"Mr. WALSH: I have always held this position. I have advocated it in our paper and through circulars to our members, that 48 hours or 72 hours was the maximum time allowed, but it was not expected they should take that time to unload equipment. When they do that they are depriving themselves of a proper facility, and they are depriving somebody else. But we think it is a reasonable time to allow in case of emergency or of accident. I think it would be fair to say this, that the people I represent are not laying themselves out to delay cars or to take advantage of the free time; their purpose is to unload as quickly as they can and get the cars to load up again. As I say, and I want to repeat, our people realize that. Our manufacturers hold that cars are for the purpose of transporting freight from one point to another, that they are not for storage purposes, and we try to the best of our ability to unload as rapidly as possible. But we have got to have the conditions. they must be favourable.

11 GEORGE V, A. 1921

"Commissioner McLEAN: Following that, if the free time simply represents the maximum reasonable time for unloading, is it quite fair to say that because a man unloads within that time that the portion of the time unused should be applied to another car? That looks at it as a matter of right. He has a right to so much time within the two days. If he is able to unload a car, and have, say, one-half or three-quarters of the day unused, what has that got to do with another car?"

"Mr. WALSH: Simply because another car cannot be got at.

"Commissioner McLEAN: But if you say two days is a reasonable time for unloading does it not mean that each car should stand by itself?"

"Mr. WALSH: If it could be worked out theoretically perfectly.

"Commissioner McLEAN: Leaving aside theory, is not that your position? I just want to understand your position.

"Mr. WALSH: Possibly that is correct.

"Commissioner McLEAN: I just want to see what your position leads to.

"Mr. WALSH: Yes, but that is not possible.

"Commissioner McLEAN: But either the two days is a right or it is not. If he does not use the two days on one car, he has a right to the unused portion to apply on another car. Either it is that or it is a reasonable maximum time for unloading, and whatever he unloads within that time it stops at that. It is either one position or the other.

"Mr. WALSH: Certainly, if the conditions are ideal. We had a good illustration of it yesterday in connection with the movement of cars.

"Commissioner McLEAN: We have to take one horn of the dilemma. It is either a right or a reasonable maximum. If it is a reasonable maximum it applies on the one car. I may be wrong, but it seems to me that that is a fair conclusion from the discussion.

"Mr. WALSH: That is all."

In supplementary summary and comment in his letter dated October 18, 1913, Mr. Walsh took, in substance, the position that the two days free time referred to had become a *right by usage*. The following extract from his letter is material:—

"At page 4577 Commissioner McLean asked whether the two days' free time allowed was a right or not. It is a right in the sense that common usage has made it so. It has been well established that a receiver of freight is entitled to notice of its arrival and to a reasonable time within which to remove it. It is the same right as he has in respect to less than carload shipments on which he is given 72 to 96 hours, and if the freight moves through the freight sheds the carrier has to provide storage and is liable under the bill of lading conditions as carrier for that length of time.

"As regards carload freight, the carrier does not have to provide such facilities. All that is required to do is to place the car for unloading. The bill of lading conditions determine the liability of the carrier and the length of free time within which the receiver has to remove the goods.

"This point was seized upon by the representatives of the railways and dealt with at some length both by Mr. Beatty and Mr. Biggar at pages 4583 and following and 4605, 4606, and 4607. Both of these gentlemen took the position that the 48 hours, as suggested, was not a right and, therefore, the public was not entitled to it. The Board is familiar with the origin of the rule and it is, therefore, unnecessary for us to enlarge further on the subject except to point out that the records of the Canadian Car Service Bureau show that the public does not as a rule take 48 hours to unload, neither has it ever been contended that cars should be held for that length of time. It is, however, our

## SESSIONAL PAPER No. 20c

contention, that we have the right in case of necessity to that length of time. We respectfully suggest to the Board that in dealing with this question actual conditions must be taken into consideration. Mr. Biggar dealt entirely with conditions in Great Britain. These are not applicable here. The nature and volume of traffic are entirely different."

The same position is adopted in the correspondence on the Board's files, including the correspondence received in reply to the circular letter of June 16, 1919, already referred to.

The Dominion Sugar Company, in a letter dated January 17, 1916, says that in checking up all cars into their yards the average time for unloading is less than 24 hours, or less than one-half of the free time; and it was submitted that the Company felt that "as though it would be an injustice to ourselves to have each individual car charged for demurrage in view of the fact that hundreds of cars are unloaded within even 12 hours time."

The Canada Crushed Stone Corporation, Limited, made the following query: "If the shipper can save the railway money by the quick loading of cars, why should he not be credited to offset the loss when the railway cannot supply cars promptly?"

The T. H. Taylor Company, Limited, stated they thought it was only fair that the shipper should be allowed something for cars which were unloaded within the free time allowed.

The Algoma Steel Corporation, Limited, stated that it had been paying several thousands of dollars annually for demurrage, and it seemed to said corporation that it should be credited for cars which it returned promptly, that is, before the free time was up.

The Steel Company of Canada, Limited, pointed out that it unloaded a large portion of its cars within the free time. It took the position that it was unfair it should be penalized at a heavy rate for cars taken in excess of the free time when it had "earned money for the railways on so much of their traffic." It expressed the opinion that if the penalty was a fair one for the use of the car, the railway should be willing to grant a credit to the consignee who gives up cars to them in less than the free time.

Without multiplying the citations, the position is, in substance, that the free time for loading or unloading exists as a matter of *right*, and that whatever is done by the consignor or consignee in regard to loading or unloading within the free time is in derogation from his strict rights and is something for which he should receive a credit.

The great majority of cars are, under the existing Demurrage Rules, loaded or unloaded within the free time, there being no incentive such as is argued for to induce extra expedition in loading or unloading, so as to obtain credits thereby. It follows that the loading or unloading within the free time is carried out not with any idea of benefitting the railway, but because the business conditions of the consignor and consignee concerned make it a good business policy to do so.

In analyzing the question of the *right* which it is contended exists, reference may be made to some decisions of the Board. In dealing with the application of the Wallaceburg Sugar Company for average demurrage, which was heard in 1909, the Board used the following language:—

"The 'average system' suggested, in my opinion, is not justifiable under the contractual relations which exists between the consignor or consignee (as the case may be) and the railway company. The contract of carriage is, that the railway company will carry the goods to the point where they are to be unloaded to the consignee, who in turn is to unload and release the car with all reasonable despatch. For more certainty and uniformity of practice, rules

11 GEORGE V, A. 1921

have been adopted which say in effect that 'reasonable despatch' for unloading shall not, in the case under consideration, exceed 48 hours. If a man exceeds this reasonable time in unloading, he is penalized by a charge of \$1 per day for the extra time he may hold the car. Such a provision is in the public interest, because it makes a consignee prompt in releasing cars consigned to him, and thus increases the supply of available cars for the shipping public."

"The intention is that, under the Car Service Rules, each car shall be dealt with by itself and without reference to the movement of other cars. This insures equal treatment of the smaller shipper or consignee with the larger one."

*Wallaceburg Sugar Co. v. Canadian Car Service Bureau, 8 Can. Ry. Cas., 332.*

At a later date, in dealing with an application of the Canadian Car Service Bureau, the Board used the following language:—

"Car Service Rules constitute a code dealing with the question of average reasonable time for delivery, delays to cars, and penalties for such delays."

*Application Canadian Car Service Bureau, for ruling as to apparent conflict in conditions of Bill of Lading and Car Service Rules. File 3678. Board's Orders and Judgments, December 1, 1916, 385, at p. 387.*

In the matter of the complaint of the *Wood Coal Company of Brantford, Ont., file 1700, part 2*, and the complaint of the *Barber-Ellis Limited, Brantford, Ont., file 1700.56*, the question of the construction of rule 2 of the then existing Car Service Rules was involved. Under this rule, 24 hours additional free time was allowed for clearance of customs. This was in addition to the 48 hours free time. It was contended in substance, that the whole period of 72 hours was available for the clearance of customs and for unloading. It was held that the clearance of customs must be effected before the car was in a position to be unloaded, and that the time allowed for clearance of customs as compared with the time allowed for unloading must, therefore, be prior; that is to say, the time allowed for clearance of customs stands first on the list, and under the rule the 48 hours for unloading runs from the termination of the time allowed for clearance of customs.

The question of *right* herein involved has been dealt with from time to time in English decisions.

The Lancashire and Yorkshire Railway Company having proposed that on and from the first day of March, 1895, it would levy a charge of sixpence per wagon per day under the title of siding rent, upon all wagons containing coal or coke, and remaining undischarged upon sidings belonging to the railway company for a longer period than four clear days, the matter came before the Railway and Canal Traffic Commission in *Manchester and Northern Counties Federation of Coal Traders' Association, v. Lancashire and Yorkshire Ry. Co., 10 Ry. and Can. Traf. Cas., 127*. The following references to what is set out in the decision are pertinent:—

"The carrier's obligation is to deliver the wagons within a reasonable time."

*Ibid, per Collins, J., p. 133.*

*Carrier's obligations:* "All that he undertakes and all he receives consideration for is the carrier's duty, which ends after he has delivered the goods—that is, has put the goods in a position where the trader can take delivery, given him notice of the fact, and left them there for a reasonable time, such as would enable the trader, with ordinary appliances, to get his goods out of the wagon."

*Ibid, pp. 133, 134.*

## SESSIONAL PAPER No. 20c

*“Termination of Carrier’s liability.*—It clearly determined when a reasonable time had elapsed—a time within which, on the principles I have laid down, the trader, acting reasonably, might have taken the coals out of that wagon; and that reasonableness, I think, must be determined, not by reference to the after-use which it would have been convenient for the trader to put that wagon to after the coals had arrived, and he had the opportunity of taking delivery, but with reference to the fact that the carrier’s obligation as an insurer remained up to the expiration of that reasonable time.”

*Ibid*, p. 134.

The point was raised that the railway must be deemed to have conceded the right to the traders to use these wagons as shops during the four days—that is, during the four days they admit to be covered by the rate.

Collins, J., said:—

“I regard this as trying to fix an extreme limit up to which they are content to bear the obligation of carriers, and to deem it as covered by the rate—and they make it an extreme limit in order to meet the exigencies of the consignee.” *Ibid*. pp. 137, 138.

In *Midland Railway Company vs. Black and others. 10 Ry & Can. Traf. Cas.*, 145, the question of average was dealt with by Wright, J., at pp. 148 and 149, as follows:—

“Then Mr. Chitty, on this part of the case as to the charge, raised a point which is of great importance, and, *prima facie*, one which has a great deal in it. He said it cannot be reasonable to pay the company 6d. beyond the four days in cases in which, as in the majority of cases, the bulk of the traffic is unloaded by the traders within four days; so that the company getting the benefit of the accommodation saved by that expedition on the part of the traders as regards something like 90 to 95 per cent of the traffic, it cannot be fair that the company should have that advantage, and also be paid for what happens after the four days, but I do not think such a matter of setoff as that is is competent for us to consider. The trader has no right to the four days. It is not as if he waived anything by unloading within the four days. The trader is bound to discharge in a reasonable time. If it is reasonable for him to discharge in two or three days and he does so, it is no more than his duty and, as Sir Frederick Peel pointed out, after the four days, supposing the four days is the right time, the character of the company is a new and altogether different one. He is now a warehouseman; and how can the amount which he is entitled to charge for warehousing these trucks (warehousing is hardly the right word for it but it conveys what I mean) be affected by the circumstances that he has not been put to all the expense as a carrier or as a conveyer of the traffic to which he might have been subjected?”

The principle of average demurrage was before the Railway and Canal Traffic Association in *North British Ry. Co. v. Coltness Iron Co., Ltd., et al., Caledonian Ry. Co., Coltness Iron Co., Ltd., et al., Glasgow & Southwestern Ry. Co. v. William Reid & Co., Ltd., et al.*, 14 *Railway & Canal Traffic Cases*, 246.

The matter involved came before the Railway and Canal Traffic Commission as arbitrators appointed by the Board of Trade to determine certain differences between them and the defendant in respect of certain charges which applicants claimed to be entitled to under section 5 (4) of the schedule to their several Rates and Charges Order Acts, 1892, on the ground that the defendants had detained wagons belonging to the applicants for an unreasonable length of time.

It was contended for the defendants that the true view was that if a railway company gets wagons released it does not matter whether they are sent out in order of arrival or otherwise. The decision in this case was given by Lord MacKenzie. It was set out that under section 5, subsection 4, of the schedules of the Act of 1892, the consignor or consignee must have a reasonable time to put traffic in or take traffic out. It was stated that—

“A full margin must be allowed to cover the reasonable maximum time to enable the consignor or consignee to give or take delivery.” (P. 262.)  
In dealing with the question of average, the following language was used:—

“It is necessary to refer to an argument used by counsel for the traders in support of what has been called the average principle. This consists in crediting to the trader whatever free time is saved. If over the whole period of a week, or a month as the case may be, it is ascertained that the total free time has not been exceeded by the total number of wagons, then, according to this contention, no demurrage is due. This principle, to my mind, is founded upon a fallacy. A trader is not entitled to keep a wagon for the whole of the free time. His duty is to discharge with all reasonable despatch. If he does this, he does no more than his duty, and is not entitled to credit for the remainder of the free time. This is pointed out in the *Midland Railway v. Black*, by Wright, J.; see also the statement of Collins, J., in *Midland Railway Company v. Sills*. Nor do I think it admissible that the free time allowed both before and after conveyance should be added together, and if the total period is not exceeded that then no demurrage should be due.” (pp. 264, 265.)

The obligation of the carrier under the contract of carriage covers not only transit but also a reasonable time for loading and unloading. Just as the carrier is entitled to a reasonable time in which to deliver, so the recipient of goods is entitled to a reasonable time to demand and receive delivery.

*Chapman v. Great Western Ry. Co. Q.B.D., (1879-80) per Cockburn, J., 281.*

“At the same time, the consignee cannot for his own convenience, or by his own prolong the heavier liability of the carrier beyond a reasonable time. When once the consignee has delayed taking away his goods beyond a reasonable time, the obligation of the carrier becomes that of an ordinary bailee, being confined to taking proper care of the goods as a warehouseman; he ceases to be liable in case of accident.” *Ibid.* pp. 281, 282.

Under the Bill of Lading, section 6, it is provided:—

“Goods not removed by the party entitled to receive them within 48 hours (exclusive of legal holidays), or in the case of bonded goods within 72 hours (exclusive of legal holidays), after written notice has been sent or given, may be kept in car, station or place of delivery or warehouse of the carrier, subject to a reasonable charge for storage, and to the carrier’s responsibility as a warehouseman only. . . .”

The situation which arises in respect of liability may be referred to. If in the case of two cars, each of which has 48 hours’ free time, car number one is unloaded in 24 hours while car number two is unloaded in 72 hours, then under the average principle the imputation of 24 hours’ credit to number two enables it to be unloaded without any demurrage penalty; but while from the standpoint of the Demurrage Rules the second car is treated as unloaded in a constructive period of 48 hours, the situation is that it has taken 72 hours’ actual time. Under section 6 of the bill of lading, the carrier would be liable as a warehouseman only after the 48-hour period.

## SESSIONAL PAPER No. 20c

The proposal to apply a credit to the car detained 72 hours is based on the idea that the 48 hours' free time is a necessary incident of the contract of carriage and that during this period the contract of carriage, with the carrier's liability attaching thereto, continues. But in order to make the credit system applicable the contract of carriage on the car in question must have been completed. The transfer of the credit in effect means the transfer from a commodity which has moved under a contract of carriage with the incidents attaching thereto (and after the contract of carriage has terminated) to another commodity where the contract of carriage has terminated; that is to say, an attempt is made to counter-balance the contract of carriage as a carrier with the contract as a warehouseman.

Dealing with the question as a matter of *right*, the consignor or consignee has a right to such portion of the free time as is actually necessary, with due diligence, to effect the loading or unloading. If he loads or unloads the car within the free time, that is a closed transaction and there is no credit to impute to a car which takes longer than the free time. The free time allowed is a maximum reasonable average. The Board has in various instances, when application has been made to it for extension of the free time on account of the alleged necessity of the consignor or consignee having extra time because of length of road haul or other conditions peculiarly affecting the situation of the consignor or consignee being involved, declined to add to the free time.

## III

While it appears that there is no such basis of *right* as is contended for, and while this might properly be taken as closing the matter, it seems proper to consider further the question of whether there are any such conditions in respect of betterment of handling of cars involved as would justify a departure from the principle, which, in my opinion, is a well-established one; that is to say, would practical operating conditions justify the abrogation of the principle?

It is argued that the average demurrage method affords an incentive to a quicker handling of the cars, and that this enures to the advantage of the carrier.

From letters from Mr. Lincoln, Manager of the Traffic Bureau of the Merchants' Association of New York city, which are filed by Mr. Walsh, said letters being dated May 28 and June 9, 1913, the following excerpts are taken:—

"The average agreement, by offering certain incentives to the receivers of freight, and particularly the large receivers, results in the more prompt release of equipment, that credits may be obtained to offset debits where demurrage accrues beyond the control of the receiver. . . ."

"As to the shipper or receiver, I am confident that an opportunity to earn credits for the purpose of offsetting debits is a constant incentive to the shipper to unload his car within 24 hours."

"The Algoma Steel Corporation contends:—

"Transportation companies benefit by this plan in that they secure the return of equipment promptly, as industries find it an incentive to load and unload and send back the cars as quickly as possible."

In the evidence of Mr. Hay, already referred to, it was set out at p. 2930, volume 124, that the consignee should, by extension of the credit, be given an incentive to unloading the cars; that this would help the release of cars.

In the evidence given by Mr. Dunn, of the International Harvester Company of Canada, it was contended at p. 4553, volume 179, that it would enable a more economical utilization of labour on the part of the company. It was set out that unloading gangs working on piece-work were used, and that if the unloading of cars were not limited by the date of receipt this would permit a continuous use of the unloading gangs.

11 GEORGE V, A. 1921

This is, in effect, an argument that the average system should be used to offset the labour costs of the industry.

Similar evidence was given by Mr. Champ, of the Steel Company of Canada, at p. 4537, volume 179, to the effect that great effort was lost in locating and unloading cars in order of date.

In a submission made by the Canadian Manufacturers' Association subsequent to the circular letter already referred to, it was stated:—

“It is our view and that of a number of manufacturers vitally interested in the question, that the addition of the average agreement in Canada would assist materially in the prompt handling of cars.”

The Chairman of the Brantford Branch of the Canadian Manufacturers' Association stated that he considered that the theory of average demurrage was correct, as “it gives the manufacturer an opportunity of making a bonus for exceptional service to offset the penalties when delays occur.”

The Peterborough Board of Trade, per the Secretary of its Transportation Committee, used similar language. It said:—

“We agree with the manufacturers that this average agreement appeals to us as being a fair and reasonable way of dealing between the commercial interests and the railways, and that carriers must recognize the fact that to deliver them their rolling stock in less than the free time allowed must represent some compensation for which they should be willing to give reasonable consideration.”

The same position was taken by the Canadian General Electric Company of Peterborough, which considers that the average arrangement would bring about a more economical use of rolling stock, as it carried a compensation for releasing cars within the free time allowed.

The same position is to be found in a submission from the Canada Foundry Company, Limited. Mr. Dunn, in his evidence already referred to, expressed the opinion that the average system would permit releasing of two cars where one was now released.

The references to the evidence above set out show that the idea of an incentive to quicker handling of cars as a result of the credits asked for, predicates the existence of the *right* already referred to, and the comments already made are applicable in this connection.

#### IV

In addition to what has already been set out, various other advantages are claimed for the system, as follows:—

(a) It will remove the friction arising over the operation of the weather and bunching rules.

(b) It is justified by United States practice and experience.

(c) It is considered as being differentiated from what was dealt with in the *Wallaceburg Sugar Case* in that there is proposed a limitation of credits.

The system is one which enures to the advantage of the large shipper. As bearing on this, various comments from the hearing which took place at Toronto on December 13, 1916, may be referred to. The reference is to volume 259 of the evidence.

At p. 8445, the Chief Commissioner said: “The average demurrage does help out the big shipper.” A discussion took place between Mr. Green, representing the Steel Company of Canada, and the Chief Commissioner, and at p. 8515 the following comment was made by the Chief Commissioner:—

## SESSIONAL PAPER No. 20c

“As far as the average question is concerned, no doubt it is a good thing for the large plant, because it enables them to keep the cars without paying demurrage.”

And on p. 8516, the following discussion took place:—

“MR. GREEN: The point I was trying to make out was that the railroads admitted at that time that they got just as many cars released—in other words, it was a 50-50 proposition.

“THE CHIEF COMMISSIONER: They get no more and no less, but you wouldn't have to pay demurrage, and the small man who couldn't work an average would have to.”

A further comment of the ex-Chief Commissioner, “Average demurrage does not help the smaller dealer, and he in turn objects to average demurrage...” may be referred to.

*In re Car Demurrage, Rules. XXIV Can. Ry. Cas. 180, at p. 195*

It is not claimed by the shippers to be of general applicability.

In a letter submitted by the Canadian General Electric Company, Limited, Peterborough, the following language occurs:—

“There doubtless are several lines of business where the adoption of such a scheme would work out to the advantage of both the public and the transportation company.”

Mr. Champ, in his evidence already referred to, says that the existing arrangement is “very unfair to the large shipper.”

The following extract from the evidence, volume 274, p. 4794, is pertinent in this connection:—

“THE CHIEF COMMISSIONER: Mr. Dunn, how many cars a month would a man have to handle before this was of the slightest practical use to him?”

“MR. DUNN: I cannot conceive that it is of much service to the man who has not from 10 to 20 cars a month; he may gather up 10 to 20 days under the best conditions.”

“THE CHIEF COMMISSIONER: I only want the fact as you saw it. Your own idea it is not of much use to any one who does not have a business of 20 cars per month. Isn't it really a large-plant facility?”

“MR. DUNN: Well, Mr. Chairman—

“THE CHIEF COMMISSIONER: But it is a large-plant facility, is it not?”

“MR. DUNN: I think so.

What has been so earnestly urged is, in reality, a plea for the large shipper. It means, in substance, that the large shipper who, because of his control of capital is able to have superior facilities, is, through a rearrangement of the Demurrage Rules, to obtain therefrom a still further advantage. For example, a coal dealer who has no coal trestle may have to take the full free time allowed, and, in individual cases, may have to exceed it. The coal dealer who has a coal trestle has superior facilities for handling coal. This is some thing which attaches to the scope of his business and the amount of capital he is able to control; and with the equalizing of conditions in this respect it is not the function of the Board to interfere. But, if the large dealer, on account of his superior facilities, is able to unload quickly and to obtain credits therefrom, the result of the system asked for would, in all probability, be to relieve him entirely from demurrage payments, payments which the less favourably situated dealer might be subjected to; and it might be that

11 GEORGE V, A. 1921

these dealers were competitors in a common area. It would be improper for the Board to attempt to take away from the larger dealer the advantages in point of facilities which his larger volume of business justified and which his greater control of capital permits; but, in dealing with the question of Demurrage Rules, it would be equally improper for the Board to leave out of consideration the effect which might be exercised through this proposed system in weighting the scales against the smaller dealer.

The suggestion that since the arrangement is optional the smaller dealer does not need to use it unless he desires, does not meet the question.

The further suggestion that the matter might be equalized by extending the time so as to take care of the smaller dealer, is to ask that the Board should equalize conditions by discriminating in favour of the smaller dealer. To state such a proposition is to attract attention to the fact that such a condition would not long endure before complaints were received.

In regulative policy in regard to rates, the practice on the North American continent is that the only quantities in railway carriage which it is justifiable to consider are carload quantities and less than carload quantities, and that it is not justifiable for a regulative tribunal to direct or countenance rates predicated upon the handling of trainload quantities. The car of coal to the large dealer must be treated in the same way as the car of coal to the smaller dealer.

The adoption of the system might, and probably would, enable large businesses to carry on their activities without the payment of any demurrage penalties whatever. This, however, is incidental, not fundamental. The fundamental question is, would the system bring about such an expedited releasing of cars as would by adding to the numbers of cars free at a given moment, facilitate the handling of traffic in general, thereby ensuring to the advantage of the general shipping and receiving public?

Consider the situation that may arise during the car shortage. Box cars loaded with lumber are moved into a manufacturing plant which is operating under the average system. The cars are given, let it be assumed, the expedited unloading which it is claimed for the average system. The plant, at the same time, has been experiencing the car shortage on outbound movements. The result will be that the cars so unloaded can be held by the plant, through the instrumentality of its credits, as a store of empty cars to meet its needs. The result of this as affecting other industries on the average system which have lesser credits and especially those operating without the average system is readily apparent.

On careful consideration of the evidence adduced and the especial references made to practice in the United States, I am of opinion that the average system is discriminatory in principle, and that it has not been affirmatively established that it will so work out as to increase the car supply available at any given time.

#### GRAND TRUNK RAILWAY RATES BETWEEN OSWEGO, U.S.A., AND BELLEVILLE, ONTARIO

---

This was an application from Mr. E. Guss Porter, K.C., M.P., contained in a letter addressed to the Board dated September 18, 1918, which, in substance, asks for the re-establishment of a trans-lake trade route between the ports of Oswego, N.Y., and Belleville, Ont., a distance of approximately 80 miles, with special reference, as it is claimed by applicants, to facilitating, expediting and cheapening coal shipments from the source of supply of hard coal in the United States to the district tributary to Belleville, and avoiding, it is alleged, the congestion in bringing this important traffic via Buffalo.

## SESSIONAL PAPER No. 20c

At the hearing the applicant was unable, with clearness, to establish the merits of the application as to rate, the evidence lacking the figures to show the rate from mine to Oswego, the cost of handling at Oswego, transshipment via lake to Belleville, and the cost of handling and loading there, and subsequently to the hearing the memo., was filed with the Board, under date of October 14, 1919, as supporting and amplifying the applicant's case. The matter was subsequently referred to the Board's Chief Traffic Officer, who made an exhaustive report, under date November 8, 1919, which report was adopted and incorporated as the basis of the Board's judgment.

The facts are fully set out in the judgment of Mr. Commissioner Boyce, dated February 12, 1920, concurred in by Chief Commissioner Carvell and Assistant Chief Commissioner McLean. Held that no case had been made out which would justify the granting of relief in any of the forms sought for.

REMOVAL CANADIAN PACIFIC RAILWAY COMPANY'S LINES ON OR NEAR RUE MESSIER, CITY  
OF ST. BONIFACE, MAN.

---

This was an application of the city of St. Boniface, province of Manitoba, to the Board for an order directing and ordering the Canadian Pacific Railway Company to remove immediately any and all lines of railway improperly, illegally, and without due and lawful authority laid by the Canadian Pacific Railway Company, or any person or corporation on its behalf, on or near Rue Messier, in the city of St. Boniface, either on the property of the railway or on the property of the city or any other person or corporation.

In the application as launched, request was made that the Canadian Pacific Railway Company be directed to remove such tracks as have been laid by it without lawful authority on or near Rue Messier, in the city of St. Boniface, Man. At the hearing, counsel for the city withdrew this portion of the application, recognizing that at the point in question no right of crossing existed.

The application, it appeared, was one which was primarily concerned with the affording of access to the plant of the Western Wheel Foundry Company. It was testified on behalf of this company that the general industrial situation had been carefully canvassed by it in regard to locations, and that the location which it now possesses adjacent to the point where the crossing is asked for, was chosen only after careful balancing up of the industrial advantages of different sites.

The Canadian Pacific Railway Company at the hearing objected strongly to the crossing being granted, and in this connection pointed out the heavy travel which existed over the tracks across the point where the proposed crossing would be located. One of these is the main line to St. Paul and Minneapolis, and another is the main lead which runs down to serve many industries as well as the stock yards.

The Canadian Pacific Railway Company proposed a diversion of Rue Messier to a point approximately 330 feet north, and then running west across the tracks to connect with Archibald street. Rue Plinquet is 1,200 feet from the proposed crossing on Rue Messier. The diversion, as proposed, would bring the crossing within 850 feet of Rue Plinquet.

The facts are fully set out in the judgment of Assistant Chief Commissioner McLean, dated February 13, 1920, concurred in by Chief Commissioner Carvell, and Mr. Commissioner Rutherford. 26, Can. Ry. Cas., 45.

Held that the crossing was necessary. Held further, that in various cases, where a highway had been opened up across the tracks of the railway and the question of protection is one which it had not been necessary to deal with at the outset, no pronouncement had been made in the order for the division of cost, thus leaving it

11 GEORGE V, A. 1921

open to the Board, at a later date, to consider the matter from the standpoint of the respective volumes of traffic on the highway and on the railway, and to deal with the matter accordingly. That a different situation existed where it was recognized that features of danger would attach to the crossing from its inception. Held further, that an order in the present case should go, subject to the municipality bearing the full burden of cost of such protection, as might from time to time be found necessary, and that for the present, protection by a watchman between the hours of 7.30 a.m., and 5 p.m. should be provided for, at the expense of the municipality. Held further, that the order should also provide for the rearrangement, at the expense of the Foundry Company, of the switch and tracks referred to.

SASKATCHEWAN SUPPLY AND FUEL CO., SASKATOON, SASK., RE FREE TIME ALLOWED FOR ORDERING AND PAYING FREIGHT CHARGES

*Judgment of Assistant Chief Commissioner, dated February 16, 1920, concurred in by Chief Commissioner Carvell.*

Applicant has a private siding on the Canadian National Railway track on which its sheds are located, these sheds being divided into some sixteen different bins. It has also the use of trackage on the John Deere Company's spur—a Canadian Pacific spur. This spur, while built under agreement for the John Deere Company, has had another spur built off it, and there is another application pending for a further extension. While the applicant does not own this spur or any portion thereof, or contribute to its upkeep, it has in this facility in practice the advantage of a private spur.

In a communication received since the hearing from the solicitor of the Canadian Pacific, the following statement occurs concerning the position taken by Mr. Strickland, a member of the applicant company:—

“Mr. Strickland authorized our superintendent, Mr. McKay, to say that his company did not desire to attach any significance to the fact that they are not in one sense served by an exclusive private spur. They admitted that they are treated identically as if they had an exclusive private spur, and desire that it be so considered.”

The applicant has adjacent to the Canadian Pacific spur in question fourteen different coal bunkers or open bins. The following submission is made:—

“Our cars may either be required at one of our bins on the Canadian National track or one of our open bins on the Canadian Pacific track, or it may be required to be spotted on either track to be unloaded by teams, and the disposition of the car depends, first, upon the kind of coal contained in the car, and secondly, upon whether the railroad has one car for us on that particular day or a number of cars, in which latter case some are required at the bins and the balance spotted for unloading by teams. Under these circumstances, our position is entirely different from the position of the owner of a private siding who has a warehouse or building of some kind at which all his cars are to be spotted, and it is next to impossible for us to give placing instructions immediately we are notified as to the arrival of the car.”

Complaint is made that the Secretary of the Canadian Freight Association, Western Lines, has given a ruling that since the applicant's cars are spotted on a private siding no time allowance for either ordering the car or paying the freight charges is allowed.

## SESSIONAL PAPER No. 20c

Dealing first with the question of time allowance for the payment of freight charges, it may be pointed out that in the rules formerly effective rule 2 provided *inter alia* that twenty-four hours should be allowed the consignee to pay the tolls or charges, if any. This was, however, subject to rule 11, which provided that this extra time allowance was not to be made where the railway company held previous or standing orders from the consignee for placing on designated tracks or private sidings. Under the rules now operative, which have been in effect since August 20, 1917, it is to be noted that while rule 3 (a), and clause 2 thereof, provides for twenty-four hours free time for giving orders for special placement, it makes no mention, as did rule 2 of the former rules, of this period covering an allowance in which to pay the tolls or charges (if any). And, further, the provisions of the present rules, as above referred to, in respect of orders for special placement are not applicable to consignees served by private sidings or industrial interchange "tracks."

While, under rule 2, (b), delivery of cars upon private sidings or industrial interchange tracks constitutes notification thereof to the consignee, it appears that in practice some arrangement has for some time existed whereby the applicant gives a special placing order. There is some difference of opinion as to the extent to which this has been lived up to. The following discussion is in point (Evid. Vol. 319, p. 12453):—

"The ASSISTANT CHIEF COMMISSIONER: So long as the railways live up to your instructions as to special notification for placing, that not being the strict letter of the rule, things worked all right?

"Mr. STRICKLAND: Yes.

"The ASSISTANT CHIEF COMMISSIONER: But as soon as the strict letter of the rules apply, you have trouble about demurrage?

"Mr. CAMPBELL: No, he still wants another day. The practice to-day is this: A car comes in and instead of being immediately placed on Mr. Strickland's siding he is sent a regular No. 3 advice note; if he gives the disposition the same day, up to 5.30 in the evening, on that car, we consider that it will be placed and his free time commence provided it is placed the following morning at 7 a.m., but there is an isolated case possible where Mr. Strickland does not get his notification early enough to enable him to decide what he is going to do with it, although I am told, subject to correction, that 4 o'clock is about the latest hour that the advices are delivered. Then Mr. Strickland has to decide whether he wants the car on one siding or another, or he turns cars over to other consignees, he sells coal by the earload to other people, or he will have it placed somewhere, but he figures that the free time will not expire before he will have time to team it and save him the expense of unloading the coal into the bins, but in all those cases where he gives his notification the same day as he is advised, the rule does not come into operation, but Mr. Strickland's point is that he should have the following day as well for giving his order."

In effect, the applicant contends that because of special conditions affecting his business he should have a modification of rule 2 (b) whereby he will obtain extra time not allowed under that rule.

As to the Canadian Pacific track concerned; it appears, as has been pointed out, that the applicant has the advantages attaching to the position of a private siding owner, without being subjected to the disabilities of paying for the same.

In a hearing which the Board held on October 21, 1919, the Board was asked by the Canadian Car Demurrage Bureau for a ruling. What was involved was:—

"The question submitted to the Board was as follows:—

"A consignee who has two or more private tracks connecting with tracks of the railway at same point, and upon which the railway company performs

11 GEORGE V, A. 1921

necessary switching to place and remove cars, advances the opinion that he should be allowed 24 hours' free time after notice of arrival of a car to designate the particular track upon which he requires a car placed. Should the 24 hours' free time be granted, or should he (consignee) not be advised that he should be in a position to designate the track immediately car is offered to him for unloading?

## RULING

"On the hearing of the matter at the sittings of the Board at Ottawa, on Tuesday, the 21st October, 1919, the Board decided that the rule (No. 2), as it stands, does not cover the situation raised, that is, by way of entitling a private owner to any extra time."

In the application of F. R. Stewart & Co., Limited, Vancouver, which was heard at Ottawa on October 21, 1919, what was involved was that the applicant who was limited to 33 feet of an industrial siding contended that he should be given the advantage of the 24 hours' provision of rule 2 for giving placement directions; and it was held that under the rules the user of the private siding was not entitled to the extra free time asked for.

The Board has had before it from time to time various applications from individuals contending that because of the special disabilities of their businesses special allowance of free time over and above what is contained in the rules should be made; and the Board has uniformly held that as the rules provide for average maximum reasonable time, departure therefrom is not justifiable.

In the present instance, a case for the extension asked for has not been made out.

A complaint was made as to the effect on applicant's free time of a demand by the railway, or railways, for a marked cheque to cover freight charges. The applicant sets out:—

"In the matter of freight charges we have no credit account with the railways nor will they give us one and while we usually get along without a marked cheque they have a habit of occasionally demanding marked cheques, in which case it is absolutely impossible for us to pay the freight charges until the bank opens at 10 o'clock the following morning."

What is complained of is not a present difficulty, for Mr. Strickland said at the hearing "at the present time the practice is to place cars without the cheque, but I want to point out we are subject to that difficulty any time." Mr. Campbell, Secretary of the Canadian Freight Association, Western Lines, stated in evidence (Vol. 319, p. 12450):—

"For example, Mr. Strickland referred to Rule 2 (b). He is not suffering any hardship under that rule because it is not the practice of the railways to place the cars upon his private siding before he gives them the placing order.  
 . . . . We do not deliver any car to him until he orders it placed."

So long as the practice so accepted by the railways is continued, there appears to be no difficulty in the situation. If it should be departed from, then, on a written submission from the applicant setting out in a specific case, or cases, the encroachment upon the free time allowed under the rules, resulting from the demand for a marked cheque, the Board will consider whether or not there has been delivery, thus enabling the free time to run, when at the same time the applicant is unable to unload his cars until the marked cheque is given, and will take such action as seems proper.

SESSIONAL PAPER No. 20c

UNITED GRAIN GROWERS OF WINNIPEG, MAN., *re* FREIGHT CLASSIFICATION ON ROAD GRADERS.

*Judgment of Assistant Chief Commissioner McLean, dated February 25, 1920. Concurred in by Chief Commissioner Carvell, and Commissioner Rutherford.*

I have read the report of the Chief Traffic Officer and agree in the conclusions arrived at.

It may be pointed out in terms of the submissions made by the applicants that there are eight types of graders handled by them. By reference to the catalogue number and weight of the machine, the following detail is available:—

The machines lettered G-56, G-57 and G-55 are shipped with the wheels off, K.D., with a second-class rating; and no complaint is made as to these.

The machines lettered from G-50 to G-54, inclusive, are the types which are shipped S.U., on flat cars, and which are at present subjected to the general double first-class rating for the set-up machine.

Rule 6 (a) of the classification provides as follows:—

“Unless otherwise provided for in this classification, or subsequent amendments thereto, L.C.L. shipments too long or too bulky to be loaded in a box or stock car through the side door thereof, and which are loaded on a flat or gondola car, will be carried at actual weight and tariff (class or commodity) rate, subject to a minimum of 5,000 pounds for each car used, at first-class rate for each consignment from one shipper to one consignee; except that when the classification provides for any article a lower minimum weight than 5,000 pounds when loaded on a flat or gondola car, such lower minimum weight will apply, instead of the minimum of 5,000 pounds referred to, for each car used.”

It will appear, then, that the machines G-50 to G-54 are, under this rule, carried at a double first-class rating, subject to a minimum of 5,000 pounds at first-class.

Applying the weight of 5,000 pounds to a machine weighing less than that amount works out, for example, that where the machine G-53, weighing 3,250 pounds is charged as if it weighed 5,000 pounds, it is being charged, if the minimum weight and rate applies because in excess of the tariff rate on the actual weight, 1.54 times as much as the weight which would apply if there were not such a minimum weighting. Working this out for the machines concerned which weigh less than 5,000 pounds, the result is as follows:—

| Weight                                |            |
|---------------------------------------|------------|
| G-53, 3,250 lbs., increased.. . . . . | 1.54 times |
| G-54, 3,250 “ “ . . . . .             | 1.49 “     |
| G-52, 3,788 “ “ . . . . .             | 1.32 “     |
| G-51, 4,770 “ “ . . . . .             | 1.05 “     |
|                                       | 5.40 “     |
| Average.. . . . .                     | 1.35       |

There is no classification rating between first-class and the one and one-half times first-class.

There is given up to the carriage of the grader the complete service rendered by a flat car. It is justifiable to take into consideration in connection with the earnings on the large grader weighing 5,510 pounds, the use which might be made of the same car in a carload movement. For this purpose, the earnings in the same mileage movement of a flat car 36 feet or over in length and carrying lumber with a minimum of 50,000 pounds may be taken. This type of car is taken as characteristic. In the case of the Canadian Pacific, 86.4 per cent of its flat cars are over 35 feet 2 inches in length.

The following table compares the earnings on the first-class rating for the same grader with the earnings on the minimum for lumber for 100, 150, 200, 250 and 300 approximate miles:—

11 GEORGE V, A. 1921

|                                | Miles | First class<br>in cents | Charge on<br>grader | Flat car of lumber<br>with 50,000<br>lbs. minimum |
|--------------------------------|-------|-------------------------|---------------------|---|
| Edmonton to Red Deer . . . . . | 100   | 50                      | \$27.55             | \$62.50   |
| “ “ Carstairs . . . . .        | 153   | 64                      | 35.26               | 72.50   |
| “ “ Hayter . . . . .           | 199   | 74                      | 40.77               | 87.50   |
| “ “ Adanac . . . . .           | 254   | 82.5                    | 45.46               | 95.00   |
| “ “ Oban . . . . .             | 300   | 91.5                    | 60.42               | 107.50  |

On this basis for the total mileages concerned, the earnings per car-mile in the case of the grader would be, at the first-class rate, 19.8 cents as compared with 42.2 cents on the carload movement of lumber. That is to say, the earnings per car-mile on the grader are 47 per cent of the earnings per car-mile on the lumber. If the movement is computed on one and one-half times first-class, the respective car-mile earnings are 29.7 and 42.2, and the percentage is 70.4 per cent.

Considering the rating on the minimum and the effect of this, together with the general classification factors adduced in the Chief Traffic Officer's report, I do not feel that the Board would be justified in directing a reduction below the rating of one and one-half times first-class.

MESSRS. PLUNKETT & SAVAGE, CALGARY, ALBERTA, vs. C.P.R. CO. *re* CHARGES FOR HEATERS IN CARS OF BANANAS—NEW ORLEANS VIA MINNEAPOLIS TO CALGARY

*Judgment of Assistant Chief Commissioner McLean, dated February 26, 1920, concurred in by Chief Commissioner Carvell and Commissioners Boyce and Rutherford. 26, Can. Ry. Cas., 57.*

It is very much to be regretted that in the presentation of this matter, both at the original hearing and at the subsequent hearing, the matter of the complaint was so developed that various matters material to the complete consideration of the question were not set out.

The original judgment, on what was before the Board, referred to a through rate being in existence from New Orleans to Calgary. It appears, however, from the tariffs that instead of there being a movement on a through rate there was a movement built up on a rate which is a combination of the rate from New Orleans to Minneapolis, plus that from Minneapolis to Calgary; a refrigerator car, to take one instance, moving to Minneapolis on a given freight, then for the movement beyond there was a new and distinct freight charge to destination.

As to the heated car service, the tariff which was in effect at the time the shipment moved was Minneapolis, St. Paul and S.S. Marie Railway Tariff, Supplement No. 2, superseding No. 1 of the M. St. P. & S. S. M. Ry., I.C.C., No. 3857. This also has a filing number for the M. St. P. & S. S. M., C.R.C., No. 645, and the Canadian Pacific filing number is C.R.C. No. W-2154.

The tariff in question provides as follows:—

CHARGES FOR HEATING REFRIGERATOR CARS

“Upon receipt of reasonable notice from shippers that a heated refrigerator car is required for carload shipments between Minneapolis, St. Paul, Minnesota Transfer, Duluth, Minn., or Superior, Wis., and points taking same rates or arbitraries higher and stations in Canada named in tariff as amended, the following rates will be assessed for heating in addition to the regular freight charges of the cars.”

Under this item, there are set out rates between Minneapolis, St. Paul, Minnesota Transfer, Duluth, Minn., and Superior, Wis., and various destination points, and the rate shown between Minneapolis and Calgary is 7½ cents per 100 pounds, minimum \$22.50 per car.

## SESSIONAL PAPER No. 20c

An analysis of this item permits the subject matter to be subdivided under three headings:—

- (a) Upon receipt of reasonable notice.
- (b) That a *heated* refrigerator car is required.
- (c) Specified rates for *heating* will be assessed in addition to the regular freight charges.

The words "upon receipt of reasonable notice," as contained in the item above referred to, are alleged by the applicant to deal only with a situation where notice by the shipper that a heated refrigerator car is required is given, and not to a situation where a car equipped with one heater, as in the present case, has gone forward to Minneapolis for forwarding and application is made for an extra heater.

The shipment, from the correspondence subsequently submitted, appears to have been made by the Cuyamel Fruit Company of Minneapolis. In response to a letter of December 4, 1918, from Plunkett & Savage to the firm aforesaid asking for information as to what had taken place in connection with the shipment from Minneapolis, the following language occurs:—

"We do not know what kind of an agreement you people have with the Illinois Central so far as the heating of cars is concerned. If you have one, we would like to get it in writing from you so that we can have it for defence if the case comes up, or, better still, if you could supply same in the form of an affidavit it would have more weight with the Commission."

Thereafter the following affidavit was submitted:—

State of Minnesota }  
County of Hennepin }ss.

"Personally appeared before me 'a notary public for and in the county of Hennepin, state of Minnesota,' Wm. H. Paton, who after being duly sworn, deposes and says that he is the District Manager for the Cuyamel Fruit Co., a corporation with headquarters in New Orleans, La., whose business is the importation and selling of bananas in carload lots. That he has had upwards of fifteen years experience in the line of handling bananas and has been employed by the above named company in his present capacity for the past four years. He affirms that the method employed by his firm in the movement of cars (refrigerator cars being always furnished), is to furnish experienced messengers to accompany cars from New Orleans to the destination of the cars. That the railroads in the United States, upon request of these messengers in charge of the cars, always without exception assist them to the best of their ability in the protection of this very highly perishable fruit, and when called upon in cold weather to furnish heaters to be placed in the ice bunkers of the cars, that they be furnished such heaters to the messengers free of any charge whatsoever. This same condition applies to Winnipeg, Manitoba, and intermediate points between Minneapolis and that point.

Lillian A. Jeffrey, *witness*.

Wm. H. Patton.

"Subscribed and sworn to before me this 9th day of December, 1918.  
(My Commission expires January 27, 1923).

Lillian A. Jeffrey,

Notary Public, Hennepin county, Minn."

The Cuyamel Company in its letter of December 9, 1918, to Plunkett & Savage, said letter being on file, says *inter alia*:—

"In connection with this matter we desire to say to you that the rule governing this charge as imposed by the above named company, requires a

11 GEORGE V, A. 1921

great stretch of imagination to apply to cars of bananas. The rule reads that 'Upon receipt of reasonable notice from shippers that a heated refrigerator car is required, carload shipments between Duluth, St. Paul, Minnesota, and stations taking the same rates, etc., etc., the charge shall be imposed according to the printed schedule.' Now as a matter of fact, we have never called upon the Mpls., St. Paul & Sault Ste. Marie Railway Company to heat a car prior to its loading, and this is obviously what this rule is intended to cover. It would be a physical impossibility for us to call upon any railway, by giving notice either reasonable or unreasonable, to furnish a heated car, for the reason that these cars are heated prior to their receipt by the M. St. P. & S. S. M. Ry., by heaters furnished south of this point gratuitously by the railroads over which the bananas move to this point, and in order to comply with the terms of this rule, the car would have to be unloaded, and you know that that is entirely impossible."

The Canadian Pacific Railway Company makes the following submission as to the construction of the tariff in this respect, said submission having been filed after the original hearing:—

"It makes no difference whatever where the shipment originated; under the tariff applicable from Minneapolis the freight rate did not include the heater charge, and even if there had been a heater in the car previously, and it were then necessary to provide an additional one, the heater charge was properly assessed. As the Board is aware, the charge is for the heater service, including fuel, and is properly assessed whenever a car moves under heat supplied by the company.

"Under reciprocal arrangements made between the various railway companies operating in the United States and Canada, cars in through movements are interchanged, so as to avoid unnecessary trans-shipment of freight.

"The same reciprocal arrangement applies to refrigerator equipment, and in so far as the charge for heater service is concerned, it makes no difference whether the shipment were transferred into a C.P.R. refrigerator car, and heaters furnished by the C.P.R. at point of connection, or whether the C.P.R. took over the connecting line's car with heaters in it. If the C.P.R. uses the heater equipment of a connecting line on shipments coming to it, it reciprocates by allowing the use of its similar equipment in the case of other shipments handed to its connections."

The contention of the applicant is that what was asked for was not a *heated car* service, but a *heater service*, and that the tariff, therefore, did not apply. The item already referred to refers both to *heated refrigerator* car and to *heating*, but the fundamental matter appears to be the heated car. While it may be that the item was intended to apply to a heated car *hauled* from Minneapolis, there is ambiguity in the item as worded.

In a written submission made on behalf of the applicants, said written submission being filed by the head of the Transportation Branch of the Fruit Commissioner's Office, Department of Agriculture, the following language is used:—

"I am informed that previous to the time of complaint Messrs. Plunkett & Savage paid the regular freight charges only on bananas except when ice was used, in which case they paid for actual amount supplied. Between the time of complaint and May 6, 1918, they paid \$22.50 per car on eighteen additional cars for which they asked a refund on same basis as the five carloads mentioned. Since that time shippers have been supplying heaters and fuel, the consignee paying for the fuel and returning heaters to them, paying nothing to the railway company."

## SESSIONAL PAPER No. 20c

On this being checked up with the railway, the Board was advised that it was the understanding of the responsible official in charge of traffic that if shippers were permitted to supply heaters and the fuel and look after same the railway company would make no charge; that, in other words, the company would make a charge only when heaters and fuel were supplied. This position is also set out in a letter of the assistant general solicitor of the company, under date of February 16, 1920, wherein he refers to the communication of Mr. W. M. Kirkpatrick, Assistant Freight Traffic Manager, already referred to, and states his understanding is that the latter has replied that a charge is made only when the heater and the fuel are supplied.

In a written submission earlier made by the company, the following statement is set out:—

“ In his judgment the Assistant Chief Commissioner states:—

If he (the messenger in charge) had not asked for the additional heaters at Minneapolis, there would have been no extra charge.

“ This statement is of course correct, as, had the heaters and fuel not been supplied, the car would not have moved as a heated car shipment.”

The statement made by Mr. Kirkpatrick, already referred to, relates to the Soo Line Tariff, C.R.C. No. 747, I.C.C. 4457, C.P. No. C.R.C. W-2431, effective February 1, 1919. However, this carries under the item of charges for heated refrigerator cars a provision identical with that referred to as being in force at the time the shipment moved, and the rate quoted is the same.

It is stated in the extracts above given that when the shippers supply heaters and fuel and look after same (the attendance being given by the shippers in either case), there is no heated car charge. Whether this is to be taken as a charge for heating or as including something in addition for the *haulage* of the car is not entirely clear. It may be arguable that since there is the same haulage where the car is heated with the heaters and fuel supplied by the railway as when it is heated by the heaters and fuel supplied by the shipper that the charge is, therefore, based on heater service.

Here, again, there is lack of definiteness. The tariff does not indicate what unit or units of heater service will be supplied for the charges concerned. When the car in question, to take one as a type of the cars concerned, arrived at Minneapolis, there was a heater in it. It was not developed in evidence at the hearing by whom or at what point this heater was supplied on the movement south of Minneapolis. As to the movement up to Minneapolis, the letter from the Cuyamel Company, as above referred to, sets out, in the extract quoted, that—

“ These cars are heated prior to their receipt by the M. St. P. & S.S.M. Ry. by heaters furnished south of this point gratuitously by the railroads over which the bananas move to this point. . . .”

The tariff is not defining the *quantum* of heating for which responsibility will be assumed by the railway for a charge, by way of furnishing “heating,” and, further, in not making clear what difference, if any, there is in the charge where, as apparently was the case here, part of the heating has already been provided for, is ambiguous. A normal rule of construction is where a tariff provision is ambiguous, it should be construed strictly against the railway.

While the Canadian Pacific Railway is a participant in the movement, what is involved is the construction of a tariff filed by a railway operating in the United States, wholly within the jurisdiction of the Interstate Commerce Commission. While the tariff, on what is before the Board, appears to be ambiguous, I do not express a concluded opinion on this; for it must be recognized that the Minneapolis, St. Paul and S. S. Marie Railway, which issued the tariff, has not been before this Board and cannot be compelled to appear. And, consequently, there has not been

before the Board any representation by said railways as to the construction of the item in question. It may also be noted that the arrangement entered into in respect to heaters was one entered into in the United States by a consignor who was not before the Board.

The construction of the terms of the tariff filed by the initial carrier determines throughout the incidence of the item as to heating. The Board has recognized in *Essex Terminal Ry. Co., v. G.T., M.C., Wabash and New York Central Ry. Cos., 22 Can. Ry. Cos., 301 at p. 304*, that as a matter of practical working there have been advantages in recognizing a control by the Interstate Commerce Commission over the rate from a point in the United States to a point in Canada.

In dealing, in the present instance, with the construction of the terms of the tariff filed by the initial carrier, who is within the jurisdiction of the Interstate Commerce Commission, it seems proper that the ruling of the Interstate Commerce Commission in *I. & S. Docket No. 1155, Heated Car Service Regulations, 50 I.C.C., 620*, should be followed. In dealing with the question of international rate practice, Commissioner Harlan, who wrote the judgment which was accepted by the Commission, said at p. 622:—

“For some years joint through rates from Canadian points to interior domestic points have been regarded as being within the general control of the Canadian Commission, while joint rates from domestic points to interior Canadian points are left under the general control of this commission. The origin and scope of this understanding between the two commissions is explained in *International Paper Co., v. D. & H. Co., 33, I.C.C. 270*. It is also referred to in *Rates on High Explosives to G. T. Ry. System Stations, 33, I.C.C. 567*, and was followed in *Aetna Powder Co., v. Wabash R. R. Co., 39, I.C.C. 199*. It has proved to be an efficient working arrangement and will not be departed from by this Commission on light grounds, although we have felt it necessary to point out that our jurisdiction extends to the service of our domestic lines performed within the United States and to the charges therefor, and that where circumstances seem to make such a course necessary we would require the domestic carrier to withdraw from participation in joint through rates to and from Canadian interior points and to establish a local or proportional rate to and from the border.”

The jurisdictional question was not spoken to. Had this been spoken to, the parties would have had earlier advice and the delays caused by the hearings and consideration of written submissions would have been eliminated, so that the parties might have had more prompt recourse to the Interstate Commerce Commission. When it became apparent that there was a jurisdictional difficulty in the way of settlement, the Board gave further attention to considering whether any adequate remedy could be worked out in respect of the Canadian Pacific Railway Company alone.

On consideration of the various phases of the matter, I am regretfully constrained to conclude that the only way in which the matter can be dealt with so as to give an adequate remedy is by dealing with it as a unit. By referring the matter to the jurisdiction of the Interstate Commerce Commission, that body will, in accordance with the ruling in *Heated Car Service Regulations*, above referred to, be in a position to pass upon the construction of the tariff involved, and afford such remedy as to it may seem proper. Whether such reference is to be made by the consignor or by the consignee is a matter to be determined between themselves.

SESSIONAL PAPER No. 20c

T. H. TAYLOR CO., CHATHAM, ONT., *re* CHECKING NON-HANDLED FREIGHT

*Judgment of Commissioner Boyce. Dated February 27, 1920. Concurred in by Chief Commissioner Curvell and Assistant Chief Commissioner McLean.*

The complaint involves the rights, as between shipper and carrier, as regards checking of a shipment of flour from Chatham, Ont., to Sydney, N.S., loaded by shippers, upon their private siding, at Chatham, Ont., and sealed with their own seals. On arrival the carriers alleged that the seals were intact and declined to check the contents of the car, or to assume any responsibility for the alleged shortage in its contents.

The relative rights of shipper and carrier, where shipments are made from private sidings of the shipper, are discussed and fully set out in the judgment of the Board, in *re* Bole Grain Company and C.P.R. (see Judgments, Orders, etc., volume 8, page 365), the principle of which is applicable to the complainants' case, and would appear to be a bar to the recognition of their claim. As was laid down in the Bole Grain Company's case, the carriers in the case of shipments from private sidings are not subjected to the same liabilities as are involved where shipments are made in the ordinary course of business, from the terminus of the railway where the carrier receives, receipts for, and loads the shipment, and seals the car. *A fortiori*, where, as in this case, from their private siding, the complainants themselves load a car, presumably checking the contents into the car, and seal that car with their own seals (not with the seals of the railway company), and at destination the seals are found intact, so it cannot be alleged that the seals were tampered with while in the care of the carrier, there is no duty cast upon the railway company to check the contents of the car, from the car, nor any liability for non-delivery of any portion of its contents.

Beyond this principle, as laid down in the case cited, rule 12 of the Canadian Freight Classification applies. That rule reads as follows:—

“Freight weighing 2,000 pounds or over, per piece, or package; also all freight in 6th, 7th, 8th, 9th and 10th classes must be loaded and unloaded by owners.”

Flour is in the 8th class, and as such the shipment mentioned was subject to the rule cited.

The carriers not having loaded the car, nor superintended the loading of the car, and not having in any way concerned themselves with, or voluntarily assumed responsibility for the contents of the car, clearly assume no duty to check out, or become responsible for the contents of the car. It is a case where the railway company would have had a right, following the Bole case cited above, to have noted the bill of lading, “Shippers load and count.”

With the above observations, the claimants will see that their claim cannot be supported.

---

I agree. Reference may also be made to the agreement worked out in 1916 between representatives of the shippers and of the railways as to carload loading on private sidings. One effect of this is that where the car is not loaded by employees of the railway or under its supervision there is no duty imposed on the railway to check out such freight.

S. J. McLEAN.

11 GEORGE V, A. 1921

FREIGHT ADJUSTING BUREAU, VANCOUVER, B.C., FOR RULING *re* RATES ON SHODDY BLANKETS

*Judgment of Assistant Chief Commissioner McLean, dated February 27, 1920. Concurred in by Chief Commissioner Carvell and Commissioner Rutherford.*

What is involved is the interpretation of apparently contradictory provisions of a tariff.

It is quite clear that item 250 of the tariff (C.R.C. 14) must be read in connection with item 265. The latter, among other things, has "Blankets, other than cotton or shoddy." Reference must therefore be found elsewhere to the shoddy article, and the only other item in the commodity tariff covering blankets is No. 250, which contains, "Blankets, cotton or shoddy." While it is true that this last is headed "Articles made wholly of cotton," provision has to be made for the shoddy blanket excluded from item 265, hence the words "cotton or shoddy." But for the specific exception in item 265 these words would have been redundant, having regard to the word "wholly" in the headline, but being there they must have been inserted with intent, meaning "cotton, as above (wholly) also shoddy." Another interpretation would take shoddy blankets entirely out of the commodity list, as contended by applicants, in which case the first-class rate would apply, namely, \$4.70½, or \$1.25½ per 100 pounds more for the inferior article than for the pure wool blanket of item 265 at \$3.45, and thus create an anomaly that respondents themselves could not be expected to defend.

I consider that applicants have proved title to the \$2.65 rate of item 250, and they have been supported, as the evidence shows, by the C.P.R. Claims Department.

CANADIAN FREIGHT ASSOCIATION *re* INCREASE IN RATES FOR HEATED REFRIGERATOR CARS

*Judgment of Assistant Chief Commissioner McLean, dated February 28, 1920. Concurred in by Chief Commissioner Carvell and Commissioner Rutherford.*

## I

Application is launched by the Canadian Freight Association, acting on behalf of the Canadian railways, for an increase in the rates for the use of heated refrigerator cars for movements in car lots.

## II

The application as launched by the Secretary-Treasurer of the Canadian Freight Association, Western Lines, acting on behalf of the lines from Fort William west, is for authority to increase the rate per car-mile to 1½ cents, minimum \$2. Reference is made in this connection to Order No. 25251 of August 5, 1916, and to General Order No. 173 of October 26, 1916. The situation is that the original tariffs filed for the West, and which were suspended by Order No. 24994, had this suspension lifted by Order No. 25251. The request on behalf of the lines in Western Canada is for an increase to 1½ cents per car per mile, with the existing minimum of \$2.

The matter of rates for heated car service in carlots in Western Canada was dealt with in 1916. Tariffs providing for the rates as set out in general order, as above referred to, had been filed and, on complaint, had been suspended. Thereafter hearings were held in the west the matter being set down for hearing at Winnipeg, Saskatoon, Edmonton, Calgary, Moose Jaw and Regina. As a result of the discussions which took place the representatives of the shippers consented to the charge of 1 cent per car per mile, with a minimum of \$2. Certain readjustments in certain of the tariff rules were made dealing with less than carlot shipments. These are not material in the present discussion.

SESSIONAL PAPER No. 20c

The result of Order No. 25251, referred to in the preceding paragraph, is that the rates in question went in under ordinary tariff filing and not under direction by order fixing a basis. The matter was not covered by General Order No. 173.

The present application has been heard at Fort William, Winnipeg, Regina, Saskatoon, Edmonton, Calgary, Vancouver and Victoria. In support of the application for an increased rate, a statement setting out the following particulars was filed at Vancouver by the Canadian Pacific Railway Company:—

COST OF HEATED CAR SERVICE BASED ON FIGURES FOR 1918-1919

|   |                    |             |
|---|--------------------|-------------|
| 1. Total cars handled.. . . . .   | 4,514              |             |
| 2. Total mileage.. . . . .  | 3,947,944          |             |
| 3. Total average per car.. . . . .  | 874.6              |             |
| 4. Capital cost of 4,400 heaters at \$20.. . . . .  | \$88,000.00        |             |
| 5. Interest at 6 per cent.. . . . .   | 5,280.00           |             |
| 6. Interest per car mile.. . . . .  |                    | 0.14        |
| 7. Depreciation—  |                    |             |
| Renewals based on average life of ten years per heater.. . . . .  | 8,800.00           |             |
| 8. Cost of repairs.. . . . .  | 10,384.00          |             |
|   | <u>\$19,184.00</u> |             |
| 9. Depreciation and repairs per mile.. . . . .  |                    | 0.48        |
| 10. Terminal attendance—  |                    |             |
| 50 inspectors at 48 cents per hour.   |                    |             |
| 6 months on heaters.. . . . .   | \$28,500.00        |             |
| Per mile.. . . . .  |                    | 0.73        |
| 11. Office supervision and distribution of heaters, figures on salaries paid general office staff.. . . . . | \$ 1,762.50        | 0.05        |
| 12. Cost of heater fuel per mile—   |                    |             |
| 2 bushels for 36 hours.   |                    |             |
| 15 miles per hour.  |                    |             |
| Charcoal costs 36 cents per bushel.. . . . .  |                    | 0.17        |
| 13. Cost of handling, $\frac{3}{4}$ cents per ton per mile.   |                    |             |
| Average weight, 75 pounds per heater.. . . . .  |                    | 0.05        |
|   |                    | <u>1.62</u> |
| Total cost per mile.. . . . .   |                    | 1.62        |

This was a matter of criticism by the different parties interested and of explanation by the railway.

The Canadian Northern Railway Company filed a statement dealing with the cost of particular items entering into the heater service. As will be noted from the sub-joined statement, this gives a percentage increase average of 82 per cent for the labour and material costs concerned.

“The cost of material and labour pertaining to the above service 1916 as compared with 1919 is as follows:—

|                                    | 1916         | 1919                      | Advance % |
|------------------------------------|--------------|---------------------------|-----------|
| Oil.. . . . .                      | \$ .10 gal.  | \$ .18 $\frac{1}{2}$ gal. | 85        |
| Wick.. . . . .                     | 1.50 doz.    | 2.50 doz.                 | 67        |
| Heater.. . . . .                   | 11.00 each   | 17.70 each                | 67        |
| Labour (superintendence) . . . . . | .24 per hour | .44 per hour              | 83        |
| Labour (repairs).. . . . .         | .37 per hour | .68 per hour              | 84        |
| Labour (helper).. . . . .          | .22 per hour | .45 per hour              | 105       |

“These figures show an average advance of 82 p.c. which is as close to actual figures as we have been able to get, after consulting our Local Freight Agents, Mechanical Departments, etc.”

A general protest against the proposed increase was lodged by the Board of Trade of Weyburn, Sask. The Board of Trade of Regina, while not objecting to the increase proposed, raised some questions as bearing on the less than carlot movements. These matters were gone into, explanation being given that no increases on the service in question were involved in connection with the present application. The Lethbridge Board of Trade submitted a statement saying that its general position was to submit the matter to the decision of the Board. No objections were lodged at Vancouver, Victoria, Edmonton or Fort William.

The Board of Trade of Calgary submitted a written statement the essential points of which were:—

(1) The figures as presented in the Canadian Pacific return do not set out accurately the cost of operating heaters on the through service. The essential criticism here is that the total of some 4,400 heaters required to take care of movements totalling 4,514 cars is excessive, and that there must be, to give such a total, an inclusion of the heaters used on less than carlot movements.

(2) It is contended that the charge for the total wages of fifty inspectors for six months against the through heated car service is improper.

(3) It is alleged that the charge for interest on heaters on a per-mile basis is incorrect. It may be noted that a check of the computation gives a corrected figure of 0.135 cents as against 0.14 cents. It is stated that the costs of operating the service include interest on investment, depreciation, and all other charges, and, therefore, the existing rate is not justified; and it is contended that instead of there being an increase the existing rate should be reduced to one-half cent per car-mile.

The capital cost for a heater is set out in the Canadian Pacific statement as being \$20. Exception was not taken to this. At the same time, the Canadian Northern gives a figure of \$17.50. The Canadian Pacific for Eastern Canada gives a replacement cost of \$18.50. The computation as to fuel expenditure is based on an average speed of 15 miles per hour. In Eastern Canada, a revised figure of 10 miles per hour was given. This appears to be more characteristic.

The points raised by the Calgary and Winnipeg Boards of Trade were gone into at Winnipeg. It was there admitted that the criticism that the car mileage as given included less than carlot mileage was correct and that a deduction of 13 per cent should be made on this account. By deducting 13 per cent, the Canadian Pacific gave, subject to the consideration of certain additional factors later referred to, a revised car-mile cost of 1.41 cents.

Leaving aside the supplementary factors of cost which the Canadian Pacific claimed and which are set out below, the figure of 1.41 cents would, by itself, show an apparent profit of 0.09 cents per car-mile. This would afford on the average car journey a slight profit amounting to 78.7 cents.

The method pursued in arriving at the corrected result of 1.41 cents is, however, based on a fallacy. It assumes that a 13 per cent reduction in the divisor of car mileage means 13 per cent in the quotient. But this reduction in the car mileage following from the same reduction in the number of cars included in the service means that the capital cost and the interest and depreciation charges based thereon are reduced by the same percentage. Consequently, the divisor and dividend having been reduced by the same percentage, it follows that, except in so far as there are fractional differences from the division not being extended, the quotient will be the same as before.

Further, it leaves out of consideration that there are three sets of divisors involved: (1) total car mileage, the divisor for items 6, 9, 10 and 11; (2) mileage per individual car per day for item 12; (3) ton mileage in the case of item 13. The deduction of 13 per cent is not made in the last two cases.

SESSIONAL PAPER No. 20c

The position set out in the two preceding paragraphs is evidenced if the Canadian Pacific statement as given, subject to a correction to a basis of ten miles per hour and the appropriate percentage reductions for less than carlot mileage and cars in less than carlot service, is taken. The following results are available:—

|   |              |
|---|--------------|
| 1. Cars handled in carlot movements.....  | 3,927        |
| 2. Mileage of cars handled in C.L.....    | 3,434,711    |
| 3. Average mileage per car.....           | 874.6        |
| 4. Capital cost.....                      | \$ 78,540.00 |
| 5. Interest.....                          | 4,712.00     |
| 6. Interest per car mile.....             | 0.13         |
| 7. Depreciation.....                      | 7,854.00     |
| 8. Depreciation per car mile.....         | 0.22         |
| 9. Repairs.....                           | 9,031.00     |
| 10. Repairs per car mile.....             | 0.26         |
| 11. Terminal attendance.....              | 25,056.00    |
| 12. Terminal attendance per car mile..... | 0.72         |
| 13. Office supervision.....               | 1,533.37     |
| 14. Office supervision per car mile.....  | 0.04         |
| 15. Cost of fuel per car mile.....        | 0.20         |
| 16. Cost of handling per car mile.....    | 0.05         |
| Cost per car mile.....                    | 1.62         |

Items 1, 2, 4, 7, 9, 11 and 13, as given above, are obtained by deducting 13 per cent from corresponding figures in the Canadian Pacific statement.

The figure in the Canadian Pacific statement of 0.17 cents per car mile for fuel cost at a movement of fifteen miles per hour is in error and should be 0.13 cents.

If instead of a speed of ten miles per hour a speed of fifteen miles, as in the original statement is taken, this would mean a deduction of 0.06 cents and a reduced cost figure of 1.55 cents per car mile.

If for the sake of a still more conservative computation the Canadian Northern figure of \$17.70 for a heater is taken, the movement being computed on an average speed of ten miles per hour, the following summary statement of cost items is available:—

|   |        |
|---|--------|
| 6. Interest per car mile.....             | \$0.12 |
| 8. Depreciation per car mile.....         | 0.29   |
| 10. Repairs per car mile.....             | 0.26   |
| 12. Terminal attendance per car mile..... | 0.72   |
| 14. Office supervision per car mile.....  | 0.04   |
| 15. Cost of fuel per car mile.....        | 0.20   |
| 16. Cost of handling per car mile.....    | 0.05   |
| Cost per car mile.....                    | \$1.59 |

A speed of fifteen miles per hour would give a corrected cost figure of 1.52 cents.

If the replacement figure of \$18.50, as used in the east, is taken, the cost per car mile on a ten-mile speed is \$1.60 cents, while on a fifteen-mile speed it is \$1.53 cents per car mile.

The railway submitted that in addition to the items it had dealt with in the statement, it had not included the following which were entitled to have weight and which would very considerably add to the cost of the service:—

“We have not, in compiling the figures covering the cost of heater car service, included the following headings:—

“1. The cost in connection with maintaining heater rooms at the larger terminals, which rooms are used for the storage of heaters and charcoal and pie plates used in starting the heaters and the saltpetre for the dipping of pie plates. Nor have we included the labour employed in these rooms in looking after the items referred to. The pie plates and saltpetre alone are two very expensive items in the course of a season which are absolutely necessary in connection with the use of charcoal heaters.

11 GEORGE V, A. 1921

"2. We have not included the cost of draying and collecting heaters. For instance, heaters in cars consigned to individual companies, such as the Scott Fruit Company, have to be gathered up and drayed to the freight shed after cars are unloaded. Likewise if Matthews-Blackwell or some other shipper desire to make shipment in heated car we have to send heaters to their warehouse to be placed in cars. The average cost of draying these heaters amounts to approximately 40 cents per heater. The same expense applies to all large terminals, such as Moose Jaw, Calgary, Lethbridge, Vancouver, etc., and is a heavy expense in the course of a season.

"3. We have not included in the expense the cost of picking up heaters at various points in the West, segregating them at the larger terminals and distributing them to various points in the West. As an illustration, on several occasions this season on account of the large number of heaters that have been used in the Okanagan valley, we have been compelled to pick up heaters at various points and segregate them at the larger centres, such as Winnipeg, Moose Jaw, Calgary, and load them in baggage cars and forward them to the Okanagan by passenger train, which has on at least two occasions involved the running of an extra section of passenger train. Likewise there is a large expense attached to the gathering of heaters in this manner and distributing them at all points.

"4. We have not included in the expense the cost of heater car messengers. Messengers are sent on all trains handling five or more cars of perishable freight when weather conditions make it necessary. These messengers are paid on an hourly rate, continuous time, being paid time and a half after being on duty ten hours and double time for Sundays and holidays. As an illustration, a messenger accompanying five or more cars of perishable freight from Calgary to Moose Jaw results in an expense of \$36. Similar service from Calgary to Wetaskiwin costs \$24. These figures are based on the actual cost as paid to messengers the past few weeks.

"5. We have not made any allowance for the extra time required in terminals for the attention to heaters in cars of perishable freight. As an illustration, take for instance a train containing from five to fifteen cars of perishable freight. It is necessary to hold this train up in terminals for one to three hours longer than is necessary to hold a dead train in order to allow sufficient time for attention to be given to the heaters, fire pots cleaned and charcoal supply replenished. In the larger centres heated cars are switched out of trains and moved to platform where the heaters can be given the necessary and proper attention. No allowance at all has been made in connection with expense of switching these cars to and from trains.

"6. There are certain expenses in connection with the handling of charcoal which we have not included in the figures submitted.

"7. There are certain general overhead expenses of a supervisory nature which are not included in the figures submitted.

There was also raised by the Winnipeg Board of Trade the point that the terminal attendance of fifty inspectors, as shown, had not been affirmatively established to be an exclusive service given to the heated refrigerator cars. In the hearing in connection with the eastern portion of the application, it was stated by the Canadian Pacific that the time of the inspectors was exclusively devoted to the heater service and, therefore, that the charge in total was a proper one. Mr. Denison's position, in substance, was:—

"Mr. DENISON: We had due notice of this, Mr. Chairman, and spent some time yesterday with the railway men in conference so that we might

## SESSIONAL PAPER No. 20c

understand just what they were wanting and the necessity for it. My opinion is that there is nothing extraordinary or unreasonable being adopted. If the cost of one cent, as adopted in 1916, was fair or reasonable, there is no question but what one and a half cents at the present time would be also fair enough; but we went into the figures which the railway people had available and I am perfectly satisfied with the cost of one and a half. So far as the shippers of the Winnipeg Board of Trade are concerned, we have no protest to make."

Due weight was given by Mr. Denison to the statement of the railway filed at the hearing, and in a supplementary communication of December 9 he said that the statements of cost were more or less reasonable, and that if the Board was satisfied, after giving due consideration to his submission, he had no further objection. He made the proviso that the service should be all that weather conditions would permit. This is a general obligation of the railway independent of the particular question of rates concerned.

At the sitting in Vancouver, the British Columbia Traffic and Credit Association of Vernon, B.C., hereinafter called the Traffic Association, which was interested in fruit shipments, had its attention drawn to the matter involved through questions directed to its secretary-manager, Mr. Winslow, who was present at the hearing. Subsequent to this sitting, a telegram was received from him asking for particulars and reasonable time for examination and preparation in rebuttal; and it was at the same time suggested that the matter might stand pending judgment by the Interstate Commerce Commission in connection with the investigation into the general question of heater rates and service it was then conducting. This was argued for on the ground that the American service covered a traffic directly competitive with that of the applicant. If, however, it was not obligatory to take into consideration the competitive situation, then the Traffic Association was agreeable to leave the matter of examination of cost in the hands of the Board, subject to the suggestion that the charges should be such as to warrant an entirely efficient service.

As already pointed out, the matter had been brought to the attention of the Traffic Association. After the receipt of the telegram above set out, a further direction was given to the railway to furnish copy of the application and statements in support of it to the Traffic Association; and direction was given that the said Association should file its objections, if any, within three weeks after receipt.

From communications on file, the railway obeyed this direction under date of December 4. Under date of December 12, the said Traffic Association wrote as follows:—

"While we favour the general proposition that the carriers should receive a fair remuneration for service rendered, we respectfully submit that in the framing of any particular tariff of rates there must be considered also the efficiency and reliability of the service rendered and the competitive rates and service. In these respects our traffic is under certain disabilities both as regards the performing of heater service and in respect to competitive traffic. For some time past, it has been our intention to meet the traffic officials of the Western Lines with a view to amelioration of these disabilities. We now hope that in conjunction with the fruit jobbers of Western Canada to meet the traffic officials in January or February which would permit of a hearing before the Commission, if this is required, in the spring.

"We regret we are unable at the present time to proceed as we desire, as the data for the current season is not available and will take some time for preparation. We would accordingly respectfully request that action by the Commission on the carriers' present application be in the nature of a necessary temporary relief; such action to be without prejudice to a re-opening of the case along the lines we above suggest."

11 GEORGE V, A. 1921

In referring to the above letter which was addressed to the Chief Commissioner, the Traffic Association, in a letter of same date to the Secretary of the Board, stated its position to be that it had asked the Commission to deal with the carriers' application temporarily affording them what relief was considered necessary, but leaving the matter open, without prejudice, to be dealt with later should the said Traffic Association not be able to come to a satisfactory arrangement with the traffic officials direct; and in another communication, dated December 13, addressed to the Board, said Traffic Association desired its telegram of November 26, already referred to, to be withdrawn.

Under date of February 10, the Traffic Association wrote enclosing resolution setting out its position, as follows:—

“That the Association bring to the attention of the Canadian Board of Railway Commissioners our strong objection to any increase in heating charges unless coupled with it there is carriers' liability.—Carried.”

What is involved in this is the contention that the carrier should be a full insurer; in other words, that as a condition of the increase of rate for heater service, the carrier should accept an extended liability which it does not at present.

### III

General Order No. 173 did two things. In the first place, as to local movements east of Westfort it lifted the suspension which had been imposed by Order 24680, and by so doing permitted the charge of 1 cent per car mile, minimum \$2, to become effective. In the second place, it dealt with the question of group rates on the movement east to the west, and vice versa, and prescribed the basis therefor. The application as launched under date of November 28, 1919, on behalf of lines in Eastern Canada, asking for the amendment of General Order No. 173 by permitting the adoption of a basis of 1½ cents per car mile, minimum \$2, is in effect, first, an application for the amendment of the portion of the order dealing with the movement from the east to the west, and vice versa; and, second, an application to file new tariffs for the movement east of Westfort in substitution for the tariffs allowed to become operative in 1916.

In support of the application, the Canadian Pacific submitted the following statement:—

#### “COST OF HEATED CAR SERVICE

|  |                    |      |
|--|--------------------|------|
| 1. Total cars handled.. . . . .  | 7,048              |      |

11 GEORGE V, A. 1921

The original cost statement as submitted by Canadian Pacific showed a cost of 1.47 cents per car mile. It will be noted that the statement which is given above shows a total of 1.89 cents. The increases are due to the following factors:—

(a) *Terminal Inspectors.*—The first statement showed forty-three inspectors at 40 cents an hour; the second statement shows at present employed forty-four inspectors at the higher wage of 49 cents per hour. This factor makes an increase of 0.16 of 1 cent per car-mile.

(b) *The cost of fuel.*—In the first statement, the computation is on the basis of fifteen miles per hour. It is set out by counsel for the railway that this average speed is excessive and that the computation should be made on the basis of ten miles per hour. This, with the same consumption of fuel during a 24-hour period and at the same price, gives an increase of 0.16 per car-mile.

(c) *The cost of wicks used.*—As set out in the evidence when the statement was prepared there were no details available as to the cost of wicks. As shown in the statement above, these figure out 0.10 of 1 cent per car-mile.

It will be seen that the items above referred to give a total of 0.36 of 1 cent per car-mile. If the difference due to the calculations as to rate of transit per hour is eliminated this will still leave 0.26, or a total charge of 1.73.

It is contended that there are items of cost in connection with the service which cannot be reduced to dollars and cents. One important one is the service performed in distributing heaters. There are central holding points for heaters at inspection points. At a large terminal like Montreal or Toronto, these heaters may have to be sent out to some private siding for heating a car that has been loaded outwards. In some cases the heaters have to be distributed by team. When there is a line haul involved, if the forwarding of the heater to the point concerned is not one involving emergency, the movement is by freight. In cases of emergency they are moved by passenger trains. Reference was made to a carload of heaters moved by passenger train to St. John on January 6, part for local use and part for distribution.

In connection with the distribution of heaters it is contended it is necessary to make use of other employees in distribution at terminal points. A building is maintained at Montreal for storage for eastern lines of these heaters during the summer months. This building is said to have a rental value of \$2,400 per year.

While the hearing at Ottawa was widely circularized by notification to trade bodies, there was but little protest. A telegram was received from the Quebec Board of Trade, but as received it referred to an increase of 1½ cents and a protest against this. Obviously the Board of Trade was proceeding on erroneous information, as the increase involved was one-half cent. It may be that there was an error in transmission of telegram; but no information bearing on this was filed and nothing further developed from the Board of Trade in question.

Mr. Marshall, for the Toronto Board of Trade, drew attention to some of the provisions of the cost statements, particularly as to the question of terminal costs, and to the number of inspectors necessary. The criticism turned more particularly on the statement of facts which had been made in connection with the 1916 investigation, wherein it was set out by a witness for the Canadian Pacific that a man engaged in this service could occasionally be used in other services of the railway. Counsel for the railway affirmatively stated that on the changed conditions and the practical doubling of mileage under heat at present as compared with 1916, the full time of the men in question was taken up with the heater service; and Mr. Marshall said he accepted this statement.

The general position as submitted by Mr. Marshall was:—

“In so far as the members of the Toronto Board of Trade are concerned, there is no objection whatever to the tariffs of the carriers being increased from one cent per mile, minimum \$2, to 1½ cents per mile for heated car ser-

## SESSIONAL PAPER No. 20c

vice, providing of course we get a really good service, and that the Board find after examining the statements submitted by the carriers that their costs are approximately right."

Mr. Tilston, for the Montreal Board of Trade, interposed no objection.

The position taken by the Traffic Associations, as already referred to, is tied up to the position as taken by Mr. McIntosh, of the Fruit Commissioner's office, who appeared on behalf of the following:—

- The Ontario Fruit Growers' Association.
- The Nova Scotia Fruit Growers' Association.
- The British Columbia Credit and Traffic Association.
- The Nova Scotia Shipping Association.
- The Western Canada Fruit Jobbers' Association.
- The Ontario Vegetable Growers' Association.
- The Niagara Peninsula Fruit Growers' Association.
- The Quebec Department of Agriculture.

Included in this list is the Traffic Association, and Mr. McIntosh read into the record a telegram from Mr. Winslow, the secretary-manager of the association, dated December 30, as follows:—

"Suggest to this Board that the traffic officials of Western Lines have been invited to meet fruit growers, shippers and jobbers of Western Canada in conference at Vancouver the last week in January for discussion of heated service with a view of more practical arrangements."

The subsequent statement by the Traffic Association has already been set out.

Mr. McIntosh desired that opportunity be afforded for further written submissions on behalf of the Director of the Co-Operation and Markets Branch, Ontario Department of Agriculture, Mr. A. H. McLennan, Vegetable Specialist, and the Potato Council of Ontario. The time which has elapsed has been amply sufficient for the filing of such submissions. None have been received. He also stated a request on behalf of the Fruit and Vegetable Trade of Montreal that a hearing be held in that city, or that they be permitted to file written submissions. The same comment as above may be applied here.

There has just been received the following resolution passed at the Annual Convention of the Ontario Vegetable Growers' Association, this resolution being submitted under date of February 25:—

"Moved by J. J. Davis, seconded by Henry Broughton, that whereas the present heated refrigerator car service as now provided by the Canadian railways, has not been satisfactory in the handling of different varieties of vegetables, particularly onions and potatoes, causing heavy losses and waste of foodstuffs, due to the fact that heaters have not received proper attention in transit, the Ontario Vegetable Growers' Association, in session in Ottawa, January 15, 1920, go on record as being opposed to any further increases in the charges for a heated refrigerator car service under rules and conditions now effective; further, that this association strongly recommends that application be made to the Board of Railway Commissioners for an order requiring the railways to provide a carriers' protective service under which the railways assume liability for loss due to freezing or from artificial overheating not the direct result of negligence of the shipper, and that the railways be permitted to impose a reasonable charge for this service in addition to the regular freight charges; and further that a copy of this resolution be filed with the Board of Railway Commissioners.—Carried unanimously.

As to the question of increased remuneration, Mr. McIntosh did not take exception to the increase in cost. At p. 133 of the evidence, volume 321, he stated: "I think under the present cost of operating that they are entitled to more money for their heated car service;" and at p. 134 he stated: "I do not think there is anything to be gained by keeping the railway companies from a charge they are entitled to for the remainder of the season." He coupled with this, however, the position that the railway should accept the liability of a full insurer. Further statements were submitted by him as bearing upon the inadequacy and defects of the service rendered, it being stated by him, on behalf of some of his clients, that certain vegetables were damaged in transit from excessive heat while others were damaged by frost. The question of the service rendered and the obligation of the railway in connection therewith, as distinct from the matter of being a full insurer, is something which is not necessarily tied up to the discussion of the rate in question.

In the exchange of opinions which took place at the hearing in regard to the question of the carrier assuming the liability of a full insurer, reference was made to the classification provisions in this respect as tied up to the class rates.

The increase as at present proposed is justified by the railways on the basis of cost and independent of any element of profit. On the basis of the figures submitted the increase asked for does not cover the full cost involved. If a carrier is to be a full insurer, it is obvious that the increase in the heater rate herein proposed cannot make any contribution to an insurance fund out of which the railway would pay such losses as might accrue from this extended liability as a full insurer; and this being so, it further developed in the course of the discussion that there was nothing before the Board as to what rate would properly take care of this liability, nor was Mr. McIntosh, who advanced the proposition, able to make any submission which would be helpful to the Board in arriving at a conclusion in the matter. This is not in criticism of Mr. McIntosh, who was simply advancing a principle and who had not in his possession the detailed statistics which it would be necessary to have in striking a rate such as would be necessitated by the extended liability he contended for. At the same time, it may be referred to as indicative of some of the difficulties which must be faced.

As was clearly pointed out by the Chief Commissioner at the hearing, this phase of Mr. McIntosh's contention was injecting into the discussion a proposition which had not been discussed; and that if it was the desire of the parties interested to have such matter brought up, then it would have to be dealt with in the regular way.

As already pointed out, the rate of one cent per car per mile as applicable in the West was worked out by consent of the parties interested. Where shippers' representatives and representatives of the railways sit down together and work out what appears to them to be a reasonable basis of rate, the agreement so arrived at must be given due weight and not lightly disregarded, as would be the effect if one of the contentions of the Calgary Board of Trade in regard to a reduction of the existing rate were acceded to.

The practice of shippers and railways endeavouring, through conference, to agree upon rate rearrangements and iron out their difficulties is one which is much to be commended. There has been on the whole a very distinct improvement in this respect during the past ten years of the Board's history. The function of the Board is not to make rates in the first instance, but to deal with the apparently irreducible minimum of grievance. At times, a railway has taken the position that because a complaint has been filed with the Board it would be improper for the railway, pending hearing and adjudication, to discuss the matter with the applicant, with the view of arriving at some satisfactory conclusion. It may be emphasized that the Board does not take any exception to such adjustment being worked out.

The rate basis of heater car service in the West was a consent one. There is substantial consent that an increase, subject to the Board's analysis of the figures

## SESSIONAL PAPER No. 20c

submitted, is justifiable. An analysis of the figures both east and west justifies the increase asked for.

The increase in the west and the increase in the east and as between the east and the west may go in, subject to the increase in the maximum rates of the groups as provided for in General Order No. 173 being limited to 50 per cent. This point was not developed in the original application as filed, but on being brought to the attention of the railways at the hearing was agreed to.

In view of the extended hearings which have taken place, the Board is justified in authorizing that the increase in rates shall become effective on seven days' notice.

PEOPLE'S GAS SUPPLY CO., OTTAWA, *re* TRANSPORTATION OF DANGEROUS ARTICLES OTHER THAN EXPLOSIVES

This was an application made by the People's Gas Company, Limited, for repeal of, or an amendment to the second paragraph of rule 1861 (j) of the Regulations for the Transportation of Explosives and other Dangerous Articles by freight. This rule was put into effect by Board's General Order No. 260 of March 17, 1919, amending General Order No. 203, and was the result of the application of the Prest-o-lite Company of Canada, Limited, for an order amending the regulations approved by said general order.

The rule complained against is as follows, and, as pointed out, the objection is to the second paragraph thereof:—

(j) Cylinders containing acetylene gas must be completely filled with a porous material that has been tested with satisfactory results by the Bureau of Explosives, and this material must be charged with acetone, or its equivalent, not to exceed 40 per cent of the interior volumetric capacity of the cylinder. The pressure in cylinders containing acetylene gas must not exceed 250 pounds per square inch at a temperature of 70° F.

"Cylinders containing acetylene gas must not be shipped unless they were charged by the person or company by or for whom the cylinders were manufactured. Provided that they may be charged by a person or company having possession of complete information furnished in writing by the person by or for whom the cylinders were manufactured, showing the nature of the porous filling and solvent in the cylinders and the meaning of the test markings, solvent indicator markings, and other markings on the cylinder."

The applicants claimed that the enforcement of this rule would mean compelling them to go out of business.

Prior to the passing of this rule, the rule that was in force, and which was applied, was as follows:—

"Cylinders containing acetylene gas must be made of tough steel and must be completely filled with porous material that has been tested with satisfactory results by the Bureau of Explosives, and this material must be charged with acetone, or its equivalent, not to exceed 40 per cent of the interior volume capacity of the cylinder. The pressure in cylinders containing acetylene gas must not exceed 250 pounds per square inch at a temperature of 70° F."

The contention of the People's Gas Company is that the Prest-o-lite people, having failed in the courts, the object of this amendment is to preserve to the Prest-o-lite Company the right to control the filling of their tanks, and to exclude the People's Gas Company from carrying on a business they are otherwise empowered by the Parliament of Canada to carry on.

The facts are fully set out in the judgment of Mr. Commissioner Goodeve, dated March 4, 1920, concurred in by Assistant Chief Commissioner McLean and Deputy Chief Commissioner Nantel.

11 GEORGE V, A. 1921

Held that the conclusion arrived at by the Interstate Commerce Commission, as expressed in its decision, 53 I.C.C. 544, governs this case and that the rule should be amended in a similar manner to that of the Interstate Commerce Commission, subject to an additional rule that every manufacturer of cylinders for the shipment of acetylene gas in Canada shall file with the Inspector of the Bureau of Explosives at Toronto, complete information as to the nature of the porous filling, the kind and quantity of solvent in the cylinders, and the meaning of such markings on the cylinders as are prescribed by the Board's regulations, together with the serial numbers of the cylinders using a particular kind of filler. That upon application of any manufacturer of acetylene gas to the Bureau of Explosives for information necessary to enable him to comply, in the recharging of same, with the regulations of this Board, the same should be furnished

DISPOSITION AND PROTECTION OF EXPRESS MATTER UNLOADED AT FLAG STATIONS

*Judgment of Assistant Chief Commissioner McLorn, dated March 22, 1920, concurred in by Chief Commissioner Carrell, Deputy Chief Commissioner Nantel and Commissioners Goodere and Boyce. 26. Can. Ry. Cas., 35.*

The express receipt provides by subsection (m) of section 5 that the company shall not be liable "for any loss or damage occurring to shipments addressed to stations where there is no agent of the company after such shipments have been left at such stations."

Complaint has been made from time to time that parcels of express are left on the platforms of flag stations, with the result that loss and damage occur in connection with them.

It was pointed out by the express companies that the amount of business done at a flag station point does not warrant the expense of maintaining a separate caretaker; and it is further stated that the express messengers are not permitted to leave their cars. The contention advanced by the express companies that as a rule shipments for flag station points are expected by the consignee who meets the train, the time of arrival of which is well known, is a contention to which much exception is taken; and much of what is said by way of criticism here is justified.

In general, the express companies, the answer of the Dominion Express Company being taken as typical, submit that they are doing all they can to have the goods protected, and that messengers have instructions to see that shipments are unloaded on the platform; and that where there is a shelter the trainmen, in general, see that the goods are put in the shelter; that, generally speaking, at points on the railway, the company has some one on duty most or part of the time; the express shipments are looked after by such person or persons; and the route agents of the express companies going along the line endeavour to learn whether or not such shipments are taken care of in a reasonable way.

The material submitted before the Board does show some legitimate reason for complaint. There are undoubtedly some losses and damages. At the same time, the Board has to deal with the matter from the standpoint of what is practicable. The Board has recognized in connection with the provisions as to flag stations that the requirement of the same or similar facilities at a flag station as at a regular station would, from the standpoint of the volume of traffic involved, be unfair. Placing on a railway, in the case of a flag station, a burden of expense analogous to that properly borne by a regular agency station would not only mean an unfair inroad into the revenue, but would mean that the railways would be exceedingly chary in establishing flag stations if regular station expenses at once attached.

## SESSIONAL PAPER No. 20c

The matter was gone into very carefully in the judgment of the late Chief Commissioner Mabee in connection with the issuance of the flag station order; and reference to what is therein set out may be made. What has been said in regard to a station where the installation of an agent has not been found justifiable would appear to apply with equal force to express business. To require at a flag station which has small traffic that some person should be employed to handle the express parcels would mean, in many cases, a payment out of revenue considerably in excess of what would be received from the express business to and from the point in question.

At the time the flag station judgment and order issued, the Board, first of all, canvassed the situation in the adjoining States of the American Union with a view to learn as much as possible from their experience. In the present instance, the Board directed the following questions to a representative list of railroad commissions in the United States:—

- (a) Is the shipment handled forward to the first agency point beyond, notification being sent to consignee from said agency point?
- (b) Is the express shipment simply put off on the platform at the non-agency point, and what liability attached to Express Company when this is done?
- (c) Is there any obligation imposed on the Express Company, or on the train crew, when shipment is put off at non-agency point to put same in the freight shed or other shelter existing at said non-agency point?

A summary of the situation from different commissions may be given:—

In the state of New York, when shipments are destined to a place where the express company has no office, the shipment must be marked with the name of the express station at which consignee will accept delivery.

In the state of Georgia, provision is made that where a shipment is consigned to a non-agency station, then, unless otherwise ordered by the shipper, the shipment is carried to the nearest agency station where it is put off, and consignee is notified by the agent that shipment is at such station. If the shipper notifies the express company that he desires shipment put off at a non-agency station, it is put off entirely at his own risk. Further, where a shipment is put off at a non-agency station, there is no obligation imposed upon the express company or train crew to put the same into a freight-shed or other place of shelter.

The Minnesota Commission states the practice in regard to non-agency stations is that shipments are carried forward to the next express agency point beyond the non-agency point, unless some one is at the latter point to receive the shipment and pay the charges; or, if the shipment is prepaid, a notice is inserted in the waybill to put shipment off at non-agency point at owner's risk. There is no rule requiring express companies to put express into freight shed at non-agency points.

The Railroad Commissions of Wisconsin, Missouri, and Iowa report similar regulations, these being governed by the official express receipt.

A similar statement is made by the Public Utilities Commission of the state of Illinois.

The Public Service Commission of Indiana states that the regulations of the American Railway Express Company, which at the time of writing was operating under the supervision of the Federal Government, apply to the matters involved; and in this connection it enclosed a copy of a letter from Mr. H. B. Calkins, Superintendent, American Railway Express Company, at Indianapolis, from which the following is an extract:—

“It is the custom in the United States when a shipper wishes express (other than money, valuables, or C.O.D. shipping), put off at a station where there is no express agent, the charges must be prepaid, and the express receipt

11 GEORGE V, A. 1921

must be endorsed 'Put off at destination at my risk,' signed by the shipper. The shipment must be endorsed 'Released—Put off at owner's risk.' In this case, a duplicate of the receipt is made and kept on file at the express office at point of origin.

"The express company will not accept a package of money or a valuable package, or a C.O.D. package with the understanding it would be put off at owner's risk."

Mr. Calkins also states that in the case of a shipment destined to a so-called inland town off the railroad, unless the shipper designates an express office where he desires the shipment billed to, the express company ascertains a nearest express office to destination and forwards the package there. The agent there sends a postal notice to the consignee announcing the arrival of the shipment.

It will thus appear from the summary given that the experience of various regulative tribunals in the United States does not disclose anything which would be helpful by way of indicating the line on which there might be an extension of obligation.

While the Board has recognized that a certain minimum is necessary before the Board would be justified in directing the installation of a regular agent at a point which has hitherto been a flag stop, at the same time it has recognized the propriety of having caretakers installed at points whose revenue falls below the \$15,000—the minimum as set out in the flag station order. No rigid rule as to the amount of traffic necessarily involved or the amount of revenue therefrom necessary to justify the installation of a caretaker can be set down. The particular facts have to be given consideration in each case. I am unable to find from the records of American state commissions that the practice of having caretakers with defined functions at flag stations has been developed in the United States as a principle in the way it has been developed here.

An analysis of the orders dealing with the appointment of caretakers has been made. In some cases, orders have issued which have not provided for the handling of express traffic as one of the functions of the caretaker. An analysis of some ninety-three orders in which provision as to express matter is contained has been made. The general provision as to the obligation of the caretaker is, in summary, "to keep station clean and heated for passengers on arrival and departure of trains, and to care for L.C.L. freight and express matter."

Of the ninety-three orders in which these provisions, or words equivalent, will be found, some forty-three are to be found in the provinces west of the Great Lakes.

After careful consideration, I am forced to the conclusion that it would be not only impracticable but also unfair to direct that at every flag station at which express matter is or may be received there should be an agent or employee to receive and take care of such express matter. For the reasons already set out, the matter must be dealt with in an average way. I am of the opinion that in every case where the Board deals with the appointment of a caretaker, the question of express traffic should be given weight, and that in every order issuing in the future one of the functions of the caretaker should be to take care of express traffic.

While I recognize that there are some individual cases of hardship which, unfortunately, this will not take care of, I am at the same time of the opinion that at a point where, on account of the small volume of traffic concerned, the Board is not justified in directing the installation of a caretaker, it necessarily follows that at such point it would not be justified in directing the installation of some one to take care of the express matter.

APPENDIX B

REPORT OF THE CHIEF TRAFFIC OFFICER OF THE BOARD FOR THE YEAR ENDING DECEMBER 31, 1920

SIR,—I have the honour to submit, for the sixteenth annual report of the Board, a memorandum of the freight, passenger, express, telephone, telegraph and sleeping and parlour-car schedules filed with the Board from November 1, 1904, when by order of the Board, under the Authority of section 311 of the Railway Act, 1903, the railway companies commenced filing their tariffs, to December 31, 1919; and from January 1, 1920, to December 31, 1920, inclusive; also, of the more important orders relating to traffic issued by the Board to December 31, 1920:—

SCHEDULES RECEIVED FROM NOVEMBER 1, 1904, TO AND INCLUDING DECEMBER 31, 1919

SUMMARY OF TRAFFIC ORDERS OF GENERAL INTEREST ISSUED DURING THE YEAR ENDED  
DECEMBER 31, 1920

General Order No. 278, January 3, 1920.—Approves tariffs of express companies as filed with the Board.

**APPENDIX "C"****REPORT OF THE OPERATING DEPARTMENT FOR THE YEAR ENDING  
DECEMBER 31, 1920**

March 8, 1921.

DEAR SIR:—I have the honour to submit herewith, for the Board's Sixteenth Annual report, a synopsis of work performed by the Operating Department during the twelve months ending December 31, 1920.

**REPORTING AND INVESTIGATING OF ACCIDENTS ATTENDED BY PERSONAL INJURY OR LOSS OF LIFE**

During the twelve months accidents to the number of 2,093, covering 254 persons killed and 2,330 persons injured were reported to the Board by the various railway companies under its jurisdiction. For particulars, attention is directed to statements 1, 3 and 4.

A perusal of statements Nos. 2, 5 and 6, which are comparative statements of the killed and injured, as between passengers, employees and others; class of accident and railways, reveals an increase of 31 persons killed and 828 persons injured over the preceding nine months.

Out of a total of 2,093 accidents reported, as above referred to, 1,344 were investigated, covering 240 persons killed and 1,606 injured. Statements Nos. 7, 8, 9 and 10 set out in detail the investigations made as regards collisions, derailments, highway crossing accidents, also accidents the result of working on or under engines. These four statements show a total of 519 investigations covering 106 persons killed and 841 persons injured. The remainder of the investigations, which number 825, covering 134 persons killed and 765 persons injured, are spread over accidents covered by the various other headings referred to in statements Nos. 3, 4 and 5.

It will be observed that out of the total of 254 persons killed and 2,330 injured, there were trespassers to the number of 73 killed and 120 injured. In this connection reference is made to statement No. 15 which shows the number killed and injured by railways and provinces.

The matter of highway crossing accidents, protection provided, etc., is set out in detail in statements Nos. 3, 4, 5, 9, 11, 12, 13, 14 and 15.

It is pointed out that the number of accidents at highway crossings involving automobile traffic is on the increase. A perusal of statement No. 15 shows that there have been 332 accidents in this respect between April 1, 1916, and December 31, 1920, made up as follows: 26 in 1917, 54 in 1918, 66 in 1919, 60 in 1919 (9 months period), and 116 in 1920.

**INSPECTION OF SAFETY APPLIANCES**

The work in this connection is largely carried on under the provisions of section 298 of the Act and General Order No. 102. The year's work is set out in detail in statements Nos. 19, 20, 21A and B. It is needless to say that the inspection of 66,108 cars entails considerable time and labour, both as regards field work, and the resultant checking, recording and filing of the numerous reports, in addition to the correspondence necessary in following up with a view to having the railway companies take the necessary action to have the defects remedied. The inspection of 66,108 cars produced 3,135 defective cars (4.74 per cent) with defects totalling 3,770.

**INSPECTION OF MOTIVE POWER**

This division of the work embraces the entire locomotive and tender, and is carried out under sections 298, 299, 300 and 301 of the Railway Act and General Orders Nos. 12, 31, 66, 78, 102, 107, 131, 171, 199, 226, 289 and 293.

Under General Order No. 78, the so-called "Boiler Inspection Order," some 66,000 report forms comprising the monthly and annual inspections of locomotive boilers and appurtenances were filed during the year.

SESSIONAL PAPER No. 20c

During the year locomotives to the number of 9,146 were inspected with defective engines totalling 1,235 (13 per cent) and total defects of 1,518. For details reference is made to statement No. 22.

The checking and recording of the above mentioned forms and reports, together with the correspondence involved, naturally creates an extensive line of work.

INSPECTION OF PASSENGER EQUIPMENT, STATION BUILDINGS AND PREMISES

This work comprises features of safety, cleanliness, accommodation, etc. A large number of matters have been brought to the attention of the proper officials with beneficial results.

APPLICATIONS AND COMPLAINTS RE TRAIN AND STATION SERVICE, HIGHWAY CROSSING PROTECTION, STATION LOCATIONS, CAR SUPPLY, ETC., ETC.

The work under this heading covers a wide range of subjects, and entails, in many instances, a considerable amount of inquiry and research. During the year complaints and applications numbering in the neighbourhood of 1,000 were inquired into and reported upon.

In conclusion it might be stated that in order to accomplish the work briefly outlined above it has necessitated the travelling of the staff of this department, approximately, 400,000 miles.

Yours faithfully,

GEO. SPENCER,

*Chief Operating Officer.*

Mr. A. D. CARTWRIGHT,  
Secretary, B.R.C.

No. 1.—STATEMENT showing number of passengers, employees and others, killed and injured on the various railways in Canada, under the Board's jurisdiction, for the twelve months ending December 31, 1920.

| Name of Railway                      | Passengers |         | Employees |         | Others |         | Total  |         |

SESSIONAL PAPER No. 20c

No. 20.—STATEMENT showing defective safety appliances on freight cars as reported by the inspectors for twelve months ending December 31, 1920.

| COUPLERS AND PARTS                        |     | AIR BRAKES  |       |
|---|-----|---|-------|
| Coupler body broken.....                  | 8   | Triple valve defective.....   |       |
| Coupler body worn.....                    | 1   | Triple valve missing.....   |       |
| Guard arm short.....                      | 14  | Reservoir defective.....  |       |
| Knuckle broken.....                       | 1   | Reservoir loose.....  | 1     |
| Knuckle worn.....                         |     | Cylinder defective.....   | 15    |
| Knuckle missing.....                      | 6   | Cylinder loose.....   | 38    |
| Knuckle pin broken.....                   | 4   | Cylinder and triple valve not cleaned within twelve months.....     | 32    |
| Knuckle pin wrong.....                    |     | Cylinder and triple valve not stencilled with date of cleaning..... |       |
| Knuckle pin bent.....                     |     | Cut out cock defective.....   | 64    |
| Knuckle pin missing.....                  | 6   | Release cock defective.....   | 4     |
| Lock block broken.....                    | 95  | Release cock missing.....   | 2     |
| Lock block worn.....                      |     | Release rod broken.....   | 132   |
| Lock block wrong.....                     |     | Release rod missing.....  | 103   |
| Lock block bent.....                      |     | Angle cock defective.....   | 137   |
| Lock block inoperative.....               | 1   | Angle cock missing.....   | 5     |
| Lock block missing.....                   | 1   | Train pipe broken.....  | 15    |
| Lock block key missing.....               | 1   | Train pipe loose.....   | 52    |
| Lock block trigger missing.....           | 1   | Train pipe bracket missing.....                                     | 66    |
|   |     | Crossover pipe defective.....                                       | 20    |
| Total.....                                | 139 | Hose defective.....   | 2     |
|   |     | Hose missing.....   | 52    |
| UNCOUPLING MECHANISM                      |     | Hose gasket missing.....  | 10    |
| Uncoupling lever broken.....              | 33  | Retaining valve defective.....                                      | 29    |
| Uncoupling lever wrong.....               | 6   | Retaining valve missing.....  | 6     |
| Uncoupling lever bent.....                | 37  | Retaining pipe defective.....                                       | 92    |
| Uncoupling lever incorrectly applied..... | 6   | Retaining pipe missing.....   | 6     |
| Uncoupling lever missing.....             | 28  | Brake rigging defective.....  | 178   |
| Uncoupling chain broken.....              | 464 | Brake cut out.....  | 1,252 |
| Uncoupling chain too long.....            | 3   | Brake cut out card old.....   |       |
| Uncoupling chain too short.....           | 2   | No brakes of any kind.....  | 4     |
| Uncoupling chain kinked.....              | 1   | Pump missing.....   | 1     |
| Uncoupling chain missing.....             | 31  |   |       |
| End casting broken.....                   | 4   | Total.....  | 2,318 |
| End casting wrong.....                    |     |   |       |
| End casting bent.....                     |     | LADDERS   |       |
| End casting loose.....                    | 6   | Ladder round broken.....  | 18    |
| End casting incorrectly applied.....      |     | Ladder round bent.....  | 101   |
| End casting missing.....                  | 9   | Ladder round loose.....   | 8     |
| Keeper broken.....                        | 5   | Ladder round missing.....   | 4     |
| Keeper wrong.....                         |     | Ladder loose.....   | 7     |
| Keeper bent.....                          | 1   | Ladder incorrectly applied.....                                     | 28    |
| Keeper loose.....                         | 13  |   |       |
| Keeper incorrectly applied.....           | 1   | Total.....  | 166   |
| Keeper missing.....                       | 7   |   |       |
| Angle clip loose.....                     |     | SILL STEPS  |       |
| Total.....                                | 657 | Sill step broken.....   | 5     |
|   |     | Sill step bent.....   | 227   |
| HANDHOLDS                                 |     | Sill step loose.....  | 4     |
| Handhold broken.....                      | 10  | Sill steps incorrectly applied.....                                 | 10    |
| Handhold bent.....                        | 92  | Sill step missing.....  | 3     |
| Handhold loose.....                       | 12  |   |       |
| Handhold incorrectly applied.....         | 2   | Total.....  | 249   |
| Handhold missing.....                     | 7   |   |       |
| Total.....                                | 123 | MISCELLANEOUS—Total.....  |       |

**APPENDIX "D"****REPORT OF THE CHIEF FIRE INSPECTOR OF THE BOARD FOR THE  
TWELVE MONTHS ENDING DECEMBER 31, 1920**

Mr. A. D. CARTWRIGHT,  
Secretary, Board of Railway Commissioners,  
Ottawa, Ont.

SIR:—I have the honour to submit, for the sixteenth annual report of the Board, the annual report of the Fire Inspection Department for the year ending December 31, 1920.

**ORGANIZATION**

The organization for local inspection has continued, in co-operation with the Dominion and provincial forest fire protective organizations, along substantially the same lines as previously reported.

**RAILWAY FIRE PATROLS**

The patrol requirements were generally well carried out by the railways. On certain portions of the Canadian National and Grand Trunk Pacific lines in Alberta and British Columbia it was found necessary to intensify the patrols, and supplementary requirements were issued to the companies concerned. This action was made necessary by the increased fire hazard, due to a period of drought, coupled with the use, as locomotive fuel, of light-bodied grades of coal.

The only complaint received during the fire season with respect to the maintenance of special patrols was as to the requirements for the Brazeau subdivision of the Canadian National Railways, where there was room for considerable improvement.

Reference was made in the last annual report of this Department to trials being under way to demonstrate the feasibility of handling special patrols by section forces. These experiments have continued during the past year, particularly on Canadian Pacific lines in British Columbia, and there is every prospect of the plan being adopted on a material scale during the ensuing year, under conditions to be prescribed by the Chief Fire Inspector.

**FIRE STATISTICS**

The fire season of 1920 in the eastern and western sections of the Dominion was a hazardous one, while in the central sections or Prairie Provinces conditions were on the whole favourable to fire protection.

Extremely dry weather was experienced during the month of May and the early part of June in the provinces of Nova Scotia, New Brunswick and Quebec. Hot, dry weather, with high winds, was experienced during July, August and September in British Columbia, particularly between the Alberta boundary and Fort George, and down the valley of the North Thompson river.

## SESSIONAL PAPER No. 20c

A grand total of 1,732 fires from all causes were reported as having originated within 300 feet of railway lines in forested territory, along railways subject to the jurisdiction of the Board, as follows:—

| Province                   | Number of fires | Per cent of total |
|----------------------------|-----------------|-------------------|
| British Columbia. . . . .  | 524             | 30.3              |
| Prairie Provinces. . . . . | 480             | 27.7              |
| Ontario. . . . .           | 504             | 29.1              |
| Quebec. . . . .            | 134             | 7.7               |
| New Brunswick. . . . .     | 34              | 2.0               |
| Nova Scotia. . . . .       | 56              | 3.2               |
| Totals. . . . .            | 1,732           | 100.0             |

Of these, 745 are class A fires, covering less than one-fourth acre each, and doing no damage, while 987 are class B fires which burned over 106,853 acres and destroyed forest growth and forest products valued at \$222,931 and other property valued at \$75,913, a total of \$298,844.

Of the grand total 1,483 fires, or 85.62 per cent were definitely attributed to railway agencies; 61 fires or 3.52 per cent, to known causes other than railways, and 188 fires or 10.85 per cent to unknown causes.

Of the total area of 106,853 acres burned over, 92.31 per cent is chargeable to railway causes, 1.22 per cent to known causes other than railways, and 6.47 per cent to unknown causes.

Of the total of \$298,844 damage, the railways are definitely charged with 93.88 per cent; 2.31 per cent of the damage is due to known causes other than railways, and 3.81 per cent to unknown causes.

Of the 1,483 fires which the railways are definitely charged with having caused, 1,414, or 81.65 per cent of the grand total, are attributed to sparks from locomotives, and 69 fires, or 3.97 per cent of the grand total, to employees.

There has been a serious increase in the number of fires set by locomotive sparks during recent years. This may be attributed in part to increased railway mileage, and in part to an increase in the number of locomotives in use. In the judgment of this department, however, the principal factors are to be found elsewhere. In the sections of this report relating to coal fuel and to fire protective appliances on locomotives, this situation is elaborated further.

The Canadian Government Railways, although administered as a part of the Canadian National Railways System, are not yet under the Board's jurisdiction, and are consequently not covered in this report. This includes the following lines: Intercolonial, including Salisbury and Albert, Moncton and Buctouche, Elgin and Havelock, Caraquet, and International Railway of New Brunswick; Prince Edward Island Railway; New Brunswick and Prince Edward Island Railway; St. John and Quebec Railway; Transcontinental Railway, Moncton to Winnipeg, and the Lake Superior Branch; and Hudson Bay Railway.

(a) Includes Esquimaux and Nanaimo and Kettle Valley Railways;  
 (b) Includes Dominion Atlantic, Fredericton, and Grand Lake Coal and Railway, and Quebec Central Railway;  
 (c) Includes Canadian National Railway Lines subject to the Board's jurisdiction. Excludes Canadian Government Railways (Transcontinental, Intercolonial, and Hudson Bay Railways);  
 (d) Includes Halifax and South Western Railway;  
 (e) Includes following lines: Algonia Eastern; Atlantic, Quebec, and Western; Cumberland Railway and Coal Co.; Quebec, Montreal, and Southern; Quebec Oriental; Temiscouata; and White Pass and Yukon.  
 NOTE—No fires were reported during 1920 as originating within 300 feet of track along the following lines: Boston and Maine; New Brunswick Coal and Railway; Maine Central; Ottawa and New York; Western Power Company of Canada.  
 Class A fires are those which cover an area of less than one-fourth acre.  
 Class B fires are those which cover an area of one-fourth acre or more.

SESSIONAL PAPER No. 20c

## OIL FUEL

During the past year, the use of oil as locomotive fuel was continued on 1,241 miles of track, distributed as follows: Canadian National Railways (Grand Trunk Pacific Railway) between Prince George and Prince Rupert, 468 miles; Canadian Pacific Railway, British Columbia District, between Field and Kamloops, also between North Bend and Vancouver, and on the Arrow Lake and Okanagan Subdivisions, a total of 462 miles; Great Northern Railway lines in southern British Columbia, 115 miles; Esquimalt and Nanaimo Railway on Vancouver Island, 199 miles.

Recent reports are to the effect that the use of oil as locomotive fuel is to be abandoned, and a reversion to coal fuel is to be effected on the following portions of the lines indicated in the foregoing paragraph: Canadian Pacific, all lines except between Field and Revelstoke; Great Northern, all lines in southern British Columbia.

On the Canadian Pacific, between Revelstoke and Kamloops, it is announced that oil fuel will be continued on passenger engines, while coal fuel will be in use on freight engines.

Arrangements are to be made for special fire patrols on lines through forested territory where the use of oil fuel is to be discontinued in whole or in part.

## COAL FUEL

The considerable increase in the number of fires set by sparks from locomotives may properly be attributed in part to a general lowering in the quality of locomotive fuel now used, more particularly on western lines, where there has been a much greater use of free-burning, light-bodied, non-coking coals. The logical remedy for this situation is, however, not the enforced discontinuance of this class of fuel, but the development of a fire protective device for locomotive front ends that will enable such fuel to be used with safety. On the other hand, pending such action, the use of these coals as locomotive fuel should be restricted to the winter months, so far as available supplies of the heavier grades of coal, possessing coking qualities, will permit. So far as action along these lines is impracticable, the obvious remedy is intensified fire patrol.

One specific complaint was received to the effect that lignite coal was being burned as locomotive fuel. On investigation it was found that a mixture of light-bodied non-coking coals together with higher grade coal was being used in which the percentage of low grade coals was excessive.

## FIRE PROTECTIVE APPLIANCES ON LOCOMOTIVES

During the fire season, 2,269 inspections of fire protective appliances on locomotives, operating through forested territory, were made by officers of the Fire Inspection Department. Of this total, the fire protective appliances on 406 locomotives, or 17.89 per cent, were found to be in a defective state.

The Master Mechanics front end will not entirely prevent the setting of fires by locomotive sparks, even when in perfect condition. This situation is rendered doubly serious when free-burning, light-bodied, non-coking coals are used as locomotive fuel during periods of extreme drought, as has been the case in the West, particularly during 1920. The summer use of such fuel was made necessary by the fact that adequate supplies of other grades could not be secured. There is the most urgent need for the development of a front-end appliance that will render safe the use of the class of coals in question; these coals are excellent from the viewpoint of steaming qualities, but they spark excessively.

11 GEORGE V, A. 1921

The following summary indicates the number of locomotives inspected and the number found defective on the more important lines:—

## SUMMARY OF INSPECTION OF LOCOMOTIVES, 1920.

| Railway  | Province  | Number Inspected | Number Defective | Per Cent Defective |

## RIGHT OF WAY CLEARING

Systematic clearing of rights of way was carried on throughout the year, though to less extent than should have been the case. Very little progress was made, for example, on the Ontario lines of the Canadian National Railways.

During the year several specific complaints were received as to unsatisfactory conditions existing upon certain portions of the rights of way of following lines: Canadian Pacific Eastern Lines, Piles and St. Maurice subdivisions; Canadian National Eastern Lines, Batiscan and Jonquiere subdivisions; Canadian National Western Lines, Brazeau subdivision; Grand Trunk Pacific, Fraser subdivision; Kettle Valley and Great Northern Railways. In each case, the matter was taken up directly with the Company concerned which usually resulted in instructions being issued and action being instituted to have the necessary work proceeded with. Considerable right of way clearing work was carried out by the Canadian Pacific Railway on the Calgary subdivision through the Rocky Mountains Park, also by the Canadian National Railway and Esquimalt and Nanaimo Railway on their Vancouver Island lines.

Early in the year, the railways issued special instructions to their employees, with respect to spring burning off of rights of way, and a large amount of this class of work was accomplished. In some districts the work was greatly handicapped by extreme dry weather and high winds.

## COMPLAINTS RE RIGHTS OF WAY

Failure to remove noxious weeds from right of way in accordance with section 279, Railway Act, 1919:—

SESSIONAL PAPER No. 20c

## FIRE GUARD REQUIREMENTS

During 1917, 1918, and 1919, the several companies concerned were granted optional authority to handle the fire-guarding of wild lands and fenced grazing lands on the basis of an eight-foot ploughed strip instead of a sixteen-foot ploughed strip on certain specified territory in the Prairie Provinces.

This modification of the fire-guard requirements was purely on an experimental basis, to determine what reduction in the cost of ploughing fire-guards could be made consistent with public interest and safety. The experiments having proved satisfactory, the fire guard requirements were revised and amended accordingly, and reissued under date of April 20, 1920.

Under this revision, authority is granted to the respective companies to exercise the option of handling the construction of fire-guards in wild lands and fenced grazing lands on the basis of an eight-foot ploughed strip instead of a sixteen-foot ploughed strip, it being clearly understood that this option shall be exercised only where, after examination, the company is of the opinion that such action can be taken with reasonable regard for the public interest. This optional authority is subject to the following provisos: First, that each company concerned shall notify the Chief Fire Inspector as to the portions of lines where ploughing of fire-guards in wild lands and fenced grazing lands is to be on the basis of an eight-foot ploughed strip; second, that reports shall be submitted to the Chief Fire Inspector monthly, respecting all fires which originate within 300 feet of track in territory where the fire-guarding of wild lands and fenced grazing lands is on the basis of an eight-foot ploughed strip.

Such optional authority does not apply to the Edmonton, Dunvegan and British Columbia Railway west of mileage 228 from Edmonton, or to certain specified portions of the Canadian Pacific Railway lines in southern Alberta, where the ploughing of sixteen-foot guards is still required.

Railway companies were also required to post public notices throughout cultivated sections within the provinces of Manitoba, Saskatchewan and Alberta at public road crossings and stations, notifying land owners and occupants as to the requirements for the ploughing of fire-guards in grain stubble, cultivated hay and grass lands.

## FIRE-GUARD STATISTICS

The Statistical fire-guard report for 1920 shows 14,310.60 track miles of railway lines in the Prairie Provinces subject to the fire-guard requirements, an increase of 54.30 miles over 1919. This is equivalent to 28,621.20 fire-guard miles, since fire-guards are required to be maintained on both sides of the track. The report indicates that 9,101.91 miles of fire-guards were constructed or maintained during the past year, and 19,519.29 miles were, for various reasons, not constructed. Of this, there were exempted by this department 8,550.74 miles; owner of land refused to allow construction, 80.16 miles; land already ploughed, 3,065.15 miles; grain stubble and cultivated hay lands not fire-guarded by owner, 5,630.11 miles. Thus, as to a total of 17,326.16 miles of fire-guards not constructed, the reasons assigned by the companies were considered acceptable, leaving 2,193.13 miles unaccounted for, but which presumably should have been fire-guarded.

SUMMARY of fire guard construction and maintenance by railways in the Provinces of Manitoba, Saskatchewan and Alberta, 1920.

| owner <sup>5</sup> .....                                 |  |                   |                           |                      |                     |           |
| Miscellaneous other reasons.....                         | 16.99  | 3.76              | 184.00                    | 625.40               | 1,362.98            | 2,193.13  |
| Total miles of fire guards not constructed               | 813.20   | 33.76             | 2,567.50                  | 8,345.40             | 7,759.43            | 19,519.29 |

<sup>1</sup> Fire guard mileage is double the track mileage, since the construction of fire guards is required on both sides of the track.

<sup>2</sup> Company exempted from fire guard construction, as to portions of line where showing made that such construction is unnecessary or impracticable.

<sup>3</sup> Employees of railway company refused permission, by owner, to enter upon land for purpose of constructing fire guards.

<sup>4</sup> Fire guarding unnecessary, because fields already plowed.

<sup>5</sup> Fire guarding in grain stubble and in cultivated hay lands required only where the land owner or occupant would undertake to plow guard at the reasonable price specified by the Board.

COMPLAINTS RE FIRE GUARDS

The following specific complaints were received during the year 1920:—

- Failure to plough and maintain fire guards—
  - Canadian National Railway... 1
- Owner refuses to permit ploughing of fire guards—
  - Canadian Pacific Railway... 1

One application was received from the Canadian Pacific Railway under clause 4, section "D" of the Fire-Guard Requirements, requesting permission to enter upon land for the purpose of constructing fire-guards, where the land owner refused to allow such construction. On being investigated the matter was arranged amicably.

Respectfully submitted,

CLYDE LEAVITT.  
Chief Fire Inspector.

**APPENDIX "F"**

LIST OF GENERAL ORDERS AND CIRCULARS OF THE BOARD FOR THE  
YEAR ENDING DECEMBER 31, 1920.  
GENERAL ORDER NO. 281:

*In the matter of application No. 2, dated December 30, 1919, of the Railway Association of Canada, under Section 345 of the Railway Act, 1919, for permission to issue free or reduced rate transportation to the classes of persons specified in the application.*

File No. 496.26

Upon reading the application, and considering what was filed in support thereof,—

*It is ordered:* That railway companies within the legislative authority of the Parliament of Canada be, and they are hereby, permitted, until further order, to issue free or reduced rate transportation to the following classes of persons, namely:—

Private secretaries of ministers of the Dominion Government, including the private secretary of the Leader of the Opposition.

F. B. CARVELL,  
*Chief Commissioner.*

OTTAWA, January 12, 1920.

---

GENERAL ORDER NO. 282

*In the matter of the General Order of the Board No. 25, dated January 25, 1909, prescribing the lighting systems to be used on each and every car requiring lighting on the railway, or portion of railway, operated by every railway company subject to the legislative authority of the Parliament of Canada.*

File No. 29449

Upon reading what is filed on behalf of the Canadian Pacific, Grand Trunk, and Grand Trunk Pacific Railway Companies, the Wabash and Michigan Central Railroad Companies, and the Canadian National Railways, and the report and recommendation of the Mechanical Expert of the Board, concurred in by its Chief Operating Officer.

*It is ordered:* That the said General Order of the Board No. 25, dated January 25, 1909, be, and it is hereby, amended by adding after sub-clause (3) of clause (h), paragraph 3, the following, namely:—

"4. That in all cases of derailment or accidents to passenger cars lighted with Pintsch Gas or Commercial Acetylene, the supply of gas must be shut off, if possible, by closing the stud valves in storage tanks underneath the body of the car. Arrangements must be made to place a key securely in the gauge box underneath the car where it will readily be accessible. Instructions must be issued to train and wrecking crews to govern this matter, so that there will be no misunderstanding in case of accident."

F. B. CARVELL,  
*Chief Commissioner.*

OTTAWA, January 29, 1920.

---

SESSIONAL PAPER No. 20c

## GENERAL ORDER NO. 283:

*In the matter of Track Scale allowances; also of "Tolerance."*

File No. 8799.1

Upon hearing the matter at the sittings of the Board held in Ottawa, March 18, 1913, Vancouver, May 19, 1913, Calgary, May 26, 1913, Edmonton, May 27, 1913, Regina, May 29, 1913, Winnipeg, May 30, 1913, and Fort William, June 4, 1913, the Canadian Pacific, Grand Trunk, Grand Trunk Pacific, Canadian Northern, Canadian Northern Quebec, and Ottawa and New York Railway Companies, the Canadian Freight Association, the Canadian Manufacturers' Association, the Canadian Lumbermen's Association, the Boards of Trade of Montreal, Toronto, Edmonton, Winnipeg and Regina, the British Columbia Lumber and Shingle Manufacturers, and the Massey-Harris Company, Limited, being represented at the hearings, and what was alleged; and upon reading the further written submissions filed,—

*It is ordered:* With respect to freight traffic referred to herein, carried between points in Canada, that railway companies subject to the jurisdiction of the Board publish and file tariffs to provide for the following allowances per car from the ascertained gross weights of loaded cars; subject to the condition that the said allowances shall not operate to reduce the net weights of the loadings of the cars below the minimum carload weights provided for in the tariffs applicable thereto:—

1. For temporary or permanent racks on flat or gondola cars loaded with bark, provided the weight of the racks is not included in the stencilled tare of the car, 1,000 pounds.

2. For temporary protectives as follows, namely:

(a) Blockage, dunnage, or temporary racks, in connection with carload shipments of agricultural implements, machinery, stoves, acid in carboys, and vehicles of all descriptions—Actual weight, but not more than 650 pounds; the shipper to certify to the weight of the said protectives on the shipping order and bill of lading.

(b) Temporary racks, stakes, standards, strips, braces, or supports in connection with carload shipments of commodities, other than those specified above, requiring such provision for safe transportation when loaded on flat or gondola cars—Actual weight when ascertainable, but not more than 500 pounds; the shipper to certify to his ascertained weight of the said protectives on the shipping order and bill of lading.

3. For lumber used by shippers in lining box (not refrigerator) or stock cars for shipments of perishable freight—Actual weight, but not more than 800 feet, board measure, at 2½ pounds per foot; the shipper to certify to the measurement of the lumber so used on the shipping order and bill of lading. Also, a further allowance of the actual weight, but not exceeding 500 pounds, of the stove and fuel, if furnished by the shipper.

4. For foreign matter not part of the lading, such as snow, ice, manure, or refuse, in or on cars at the time of weighing—an estimated allowance adequate to the actual conditions in each case.

*And it is also ordered:* That, irrespective of the aforesaid allowances, the tariffs of the said railway companies include the following definition and directions, namely:—

11 GEORGE V, A. 1921

For "tolerance," that is to say, variations in weights disclosed in check-weighing or reweighing passed without alteration of the billed weight:—

(a) On ashes, brick, cinders, clay, drain tile (soft), dolomite, ganister, gravel, mill scale, ore, sand, slag, stone (all kinds except "cut"), and other similar bulk freight, loaded on flat or open-top cars—one per cent of the weight of the lading, but not less than 1,000 pounds per car.

(b) On all other freight (including coal and coke) the weight of which is not subject to change from its inherent nature—one per cent of the weight of the lading, but not less than 500 pounds per car.

F. B. CARVELL,  
Chief Commissioner.

OTTAWA, February 24, 1920.

---

GENERAL ORDER No. 284

*In the matter of the application of the Canadian Freight Association, on behalf of the railway companies subject to the jurisdiction of the Board, for an Order rescinding the General Order of the Board No. 173, dated October 26, 1916, and authorizing the said railway companies to publish and file charges for the use of heated refrigerator cars on the basis of 1½ cents per car per mile, with a minimum charge of \$2 per car, in addition to the regular freight charges.*

File No. 18855.11.

Upon hearing the matter at the sittings of the Board held in Toronto, April 13, 1917; Ottawa, April 17, 1917; Regina, June 21, 1917; Vancouver, November 21, 1919; Calgary, November 27, 1919; Edmonton, November 28, 1919; Saskatoon, November 29, 1919; Regina, December 1, 1919; Winnipeg, December 2, 1919; Fort William, December 3, 1919, and Ottawa, January 7, 1920, in the presence of representatives of the Canadian Freight Association, the Canadian Manufacturers' Association, the Boards of Trade of Toronto, Montreal, Winnipeg, Regina, and Calgary, the Ontario Fruit Growers' Association, the Nova Scotia Fruit Growers' Association, the British Columbia Credit and Traffic Association, the Nova Scotia Shipping Association, the Western Canada Fruit Jobbers' Association, the Ontario Vegetable Growers' Association, the Niagara Peninsula Fruit Growers' Association, the Quebec Department of Agriculture, the Canadian Pacific and Grand Trunk Railway Companies, the Canadian National Railways, and the Michigan Central Railroad Company, and what was alleged; and upon reading the further written submissions filed,—

*It is ordered:* That the said General Order No. 173, dated October 26, 1916, be, and it is hereby, amended to permit increases in the existing charges for heating refrigerator cars by the carriers, in addition to the freight rates pertaining to the loadings thereof, and also in addition to the charges, if any, for the use of the said cars, as follows:—

(a) Between points west of and including Port Arthur, Ont.; also between points east of and including Westfort, Ont., from one cent per car per mile, subject to a minimum total charge of \$2 per car, to not more than 1½ cents per car per mile, subject to a minimum total charge of not more than \$2 per car.

(b) From points east of Port Arthur to points west of Westfort, and from points west of Westfort to points east of Port Arthur, the maximum charges authorized by the said General Order No. 173, when increased not more than 50 per cent to apply.

SESSIONAL PAPER No. 20c

*And it is also ordered:* That the tariffs to give effect to this Order may be published and filed not less than seven days previously to the date, or dates, on which they are intended to come into force.

S. J. McLEAN,

OTTAWA, March 8, 1920.

*Assistant Chief Commissioner.*

---

GENERAL ORDER NO. 285

*In the matter of the application of Canadian Manufacturers' Association for an Order directing the extension of the Canadian Car Demurrage Rules, so as to provide for what is known as the Average Demurrage plan.*

File No. 3775-3

Upon hearing the matter at the sittings of the Board held in Toronto, April 25, 1911, Vancouver, May 19, 1913, Calgary, May 26, 1913, Edmonton, May 27, 1913, Regina, May 29, 1913, Winnipeg, May 30, 1913, Fort William, June 4, 1913, and Ottawa, June 16 and 17, 1913, in the presence of representatives of the Canadian Manufacturers' Association, the Canadian Retail Coal Dealers' Association, the Canadian Lumbermen's Association, the Canadian Car Service Bureau, the Montreal Lumber Association, the Montreal Grain Exchange, the Boards of Trade of Toronto, Vancouver, Calgary, Edmonton, Regina, Winnipeg, and Montreal, the Canadian National Railways, the Canadian Pacific, Grand Trunk and Grand Trunk Pacific Railway Companies, the Michigan Central and Père Marquette Railroad Companies, Winnipeg shippers, the Great West Saddlery Company, Limited, the Winnipeg Sandstone Brick Company, Limited, D. Ackland & Sons, the Manitoba Bridge and Iron Works, the Dominion Bridge Company, the Beaver Soap Company, the Vulcan Iron Works, the J. D. Clark Billiard Company, the Winnipeg Cabinet Factory, Parker Whyte, Limited, the Alaska Bedding Company, the Canadian H. W. Johns-Manville Company, Limited, the Manitoba Linseed Oil Mills, the Martin-Senour Company, Limited, the Canada Cement Company, the Alsip Brick Tile and Lumber Company, the Canadian Carbon Company, the Winnipeg Steel Granary and Culvert Company, Limited, the Gurney Northwest Foundry Company, the Winnipeg Paint and Glass Company, the Manitoba Gypsum Company, the Perfection Concrete Company, George Gale & Sons, and the Anthes Foundry, Limited, and what was alleged; and upon reading the further written submissions filed,—

*It is ordered:* That the application be, and it is hereby, refused.

S. J. McLEAN,

OTTAWA, March 2, 1920.

*Assistant Chief Commissioner.*

---

GENERAL ORDER NO. 286

*In the matter of Section 375, subsection 2, of the Railway Act, 1919, and the tariffs of telephone companies; and the Order of the Board No. 21167, dated January 5, 1914, as amended by Order No. 26969, dated February 4, 1918, authorizing the Bell Telephone Company of Canada to charge the telephone tolls published in its tariffs filed with the Board.*

Case No. 955

*It is ordered* as follows:

1. That the said Order No. 21167, dated January 5, 1914, as amended by Order No. 26969, dated February 4, 1918, be, and it is hereby, rescinded.

11 GEORGE V, A. 1921

2. That, subject to such order or orders as the Board may from time to time issue, all telephone companies within the legislative authority of the Parliament of Canada be, and they are hereby, authorized to charge the telephone tolls published in their respective tariffs filed with the Board.

S. J. McLEAN,

*Assistant Chief Commissioner.*

OTTAWA, March 4, 1920.

---

GENERAL ORDER No. 287

*In the matter of the General Order of the Board No. 203, dated August 11, 1917, approving the Regulations for the transportation by freight of Dangerous Articles other than Explosives, as amended by General Orders Nos. 206, 207, and 260, dated respectively September 7, October 26, 1917, and March 17, 1919.*

*And in the matter of the application of the People's Gas Supply Company, Limited, for an Order repealing or amending the second paragraph of Rule 1861 (j) of the Regulations aforesaid.*

File No. 1717.1.

Upon hearing the matter at the sittings of the Board held in Ottawa, June 10, 1919, the People's Gas Supply Company, Limited, the Canadian Railway War Board, the Bureau of Explosives, the Compressed Gas Manufacturers' Association, L'Air Liquide Society, and the Commercial Acetylene Supply Company, Inc., being represented at the hearing, and what was alleged,—

*It is Ordered:* That the said General Order No. 260, dated March 17, 1919, be and it is hereby, amended by striking out the second paragraph (j) of rule 1861, and substituting therefor the following, namely:—

“Cylinders containing acetylene gas must not be shipped unless they were charged by a person, firm, or company having possession of complete information as to the nature of the porous filling, the kind and quantity of solvent in the cylinders, and the meaning of such markings on the cylinders as are prescribed by the Board's regulations and specifications applying to containers for the transportation of acetylene gas.

“That every manufacturer of cylinders for the shipment of acetylene gas in Canada shall file with the inspector of the Bureau of Explosives at Toronto complete information as to the nature of the porous filling, the kind and quantity of solvent in the cylinders, and the meaning of such markings on the cylinders as are prescribed by the Board's regulations, together with the serial numbers of the cylinders using a particular kind of filler; and that, upon application of any manufacturer of acetylene gas to the Bureau of Explosives for information necessary to enable him to comply, in the recharging of the same, with the regulations of the Board, the same shall be furnished.”

S. J. McLEAN,

*Assistant Chief Commissioner.*

OTTAWA, March 22, 1920.

---

SESSIONAL PAPER No. 20c

## GENERAL ORDER No. 288

*In the matter of Section 372 of the Railway Act, 1919, for the carrying of wires and cables along or across the track of railway companies under the jurisdiction of the Board; and the application of the Canadian National Railways for an Order amending the Standard Conditions and Specifications for Wire Crossings, approved by the General Order of the Board No. 231, dated May 6, 1918, as amended by General Order No. 267, dated June 27, 1919.*

Case No. 4704.

Upon reading what is filed in support of the application, the Canadian Pacific and Grand Trunk Railway Companies concurring therein,—

*It is Ordered:* That the said Standard Conditions and Specifications for Wire Crossings, as approved by the General Order of the Board No. 231, dated May 6, 1918, be, and they are hereby, amended by striking out paragraph 4 of part I of the said conditions and specifications, and substituting therefor the following, namely:—

“4. The applicant, before any work is begun, shall give the railway company owning, operating, or using the said railway at least seventy-two hours prior notice thereof in writing; and the said railway company shall be entitled to appoint an inspector, under whose supervision such work shall be done, and whose wages, at a rate not to exceed eleven dollars per day, shall be paid by the applicant; such payment to cover both wages and expenses. When the applicant is a municipality and the work is on a highway under its jurisdiction, the wages of the inspector shall be paid by the railway company.”

2. That the General Order No. 267, dated June 27, 1919, be and it is hereby rescinded.

F. B. CARVELL,  
*Chief Commissioner.*

OTTAWA, March 23, 1920.

## GENERAL ORDER No. 289

*In the matter of the consideration of the adoption by railway companies subject to the jurisdiction of the Board of rules relative to the inspection of locomotives and tenders.*

File No. 21351.

In pursuance of the powers conferred upon the Board by Section 287 of the Railway Act, 1919, and of all other powers possessed by it in that behalf; and upon reading the submissions filed by The Railway Association of Canada and the Canadian Pacific and Grand Trunk Railway Companies, and the report and recommendation of the Chief Operating Officer of the Board,—

*It is Ordered:* That the railway companies subject to the jurisdiction of the Board adopt and put into force, not later than the first day of June, 1920, the rules relative to the inspection of locomotives and tenders, hereto attached marked “A.”

F. B. CARVELL,  
*Chief Commissioner.*

OTTAWA, March 24, 1920.

## RULES RELATIVE TO THE INSPECTION OF LOCOMOTIVES AND TENDERS

Every locomotive and tender shall be inspected after each trip, or day's work. The employee making the inspection shall report all defects found, in report book. Defects reported which are not repaired before the locomotive is returned to service shall be filed in the office where the inspection is made.

*Air brakes.*—It must be known before each trip that the brakes on locomotive and tender are in safe and suitable condition for service; that the air compressor or compressors are in condition to provide an ample supply of air for the service in which the locomotive is used; and that all other devices for controlling or regulating the pressure are properly maintained.

*Testing main reservoirs.*—Every main reservoir, before being put into service, and at least each twelve months thereafter, shall be subjected to hydrostatic pressure not less than 25 per cent above the maximum allowed air pressure. The entire surface of the reservoir shall be hammer-tested each time the locomotive is shopped for general repairs, but not less frequently than once each eighteen months.

### DRAW GEAR AND DRAFT GEAR

*Draw gear between locomotive and tender.*—The draw gear between the locomotive and tender, together with the pins and fastenings, shall be maintained in safe and suitable condition for service. The pins and drawbar shall be removed and carefully examined for defects not less frequently than once each three months. Suitable means for securing the drawbar pins in place shall be provided. Inverted drawbar pins shall be held in place by plate or stirrup.

(b) Two or more safety bars or safety chains of ample strength shall be provided between locomotive and tender (except when double drawbars are used), maintained in safe and suitable condition for service, and inspected at the same time draw gear is inspected.

(c) Safety chains or safety bars shall be of the minimum length consistent with the curvature of the railroad on which the locomotive is operated.

(d) Lost motion between locomotives and tenders not equipped with spring buffer shall be kept to a minimum and shall not exceed one-half inch.

(e) When spring buffers are used between locomotives and tenders, the spring shall be applied with not less than three-fourths inch compression, and shall at all times be under sufficient compression to keep the chafing faces in contact.

*Chafing irons.*—Chafing irons of such radius as will permit proper curving shall be securely attached to locomotive and tender, and shall be maintained in condition to permit free movement laterally and vertically.

*Draft gear.*—Draft gear and attachments on locomotives and tenders shall be securely fastened and maintained in safe and suitable condition for service.

*Car lights.*—Each locomotive used between sunset and sunrise shall have cab lamps, which will provide sufficient illumination for the steam, air, and water gauges, to enable the enginemen to make necessary and accurate readings from their usual and proper positions in the cab. These lights shall be so located and constructed that the light will shine only on those parts requiring illumination. Locomotives used in road service shall have an additional lamp conveniently located to enable the persons operating the locomotive to easily and accurately read train orders and time tables, and so constructed that it may be readily darkened or extinguished.

*Lateral motion.*—The total lateral motion or play between the hubs of the wheels and the boxes on any pair of wheels shall not exceed the following limits:—

|   |         |
|---|---------|
| For engine truck wheels (trucks with swing centres).... | 1 inch. |
| For engine truck wheels (trucks with rigid centres).... | 1½ "    |
| For trailing truck wheels.....                          | 1 "     |
| For driving wheels (more than 1 pair) not more than...  | ¾ "     |

These limits may be increased on locomotives operating on track where the curvature exceeds 20 degrees, when it can be shown that conditions require additional lateral motion.

*Pilots.*—Pilots shall be securely attached, properly braced, and maintained in a safe and suitable condition for service. The minimum height from the rail 3 inches and the maximum 6 inches.

SESSIONAL PAPER No. 20c

## GENERAL ORDER No. 290

*In the matter of Section 345 of the Railway Act, 1919, and the regulations to be prescribed for the issue and recording of free transportation by railway companies subject to the jurisdiction of the Board.*

File No. 496.

Upon reading the submissions filed and the report of the Chief Traffic Officer of the Board,—

*It is ordered as follows:*

1. That the "Regulations to Govern and Issue and Recording of Free Transportation," by railway companies subject to the jurisdiction of the Board, attached hereto marked "A," be, and they are hereby, approved and prescribed for the use of such companies; and that each and every company be required to issue all free transportation, and keep all free transportation records, in conformity therewith.

2. That the said regulations are, and by virtue of this order do become, the lawful rules according to which all free transportation is to be issued and all free transportation records are to be kept.

3. That each and every person directly in charge of the free transportation of any such company be, and he is hereby, required to see to, and he is hereby made responsible for, the correct application of the said regulations in the issue and recording of free transportation; and that it shall be unlawful for any such company, or for any person directly in charge of the free transportation of any such company, to issue any free transportation or to keep any free transportation records except in the manner and form in the said regulations set forth and hereby prescribed, and except as hereinafter authorized.

4. That the foregoing regulations shall, so far as the same are applicable, apply as well to all free transportation issued by express, telegraph, or telephone companies.

F. B. CARVELL,  
*Chief Commissioner.*

OTTAWA, April 12, 1920.

" A "

REGULATIONS TO GOVERN THE ISSUE AND RECORDING OF FREE  
TRANSPORTATION

1. Each and every railway company subject to the jurisdiction of the Board shall file with the Board, on or before the 1st day of January of each year (a) a list of the names and titles of officers having authority to issue passes and over whose signatures passes will be issued; and (b) a list of the names and titles of officers having the authority to request passes from other companies. Any change in these lists in the course of the year must be promptly reported.

Names and titles of persons authorized to countersign passes and requests for passes need not be filed with the Board.

2. Requests for passes for or on account of officers or employees of traffic associations, fast freight lines, demurrage and car service bureaus, weighing and inspection bureaus, and other joint agencies maintained by or on behalf of carriers subject to these regulations, for transportation over the lines which are members of such associations, may be made direct on such lines in the same manner as provided for requests for passes for or on account of a carrier's own officers or employees. (See par. 10.) Requests for passes over lines other than member lines must be made in one of the three following methods:

11 GEORGE V, A. 1921

(a) Requests may be made over the signature of an officer of a member line if such officer's name has been filed with the Board by such member line in compliance with paragraph 1 (b) with the counter signature of an officer or employee of the association.

(b) Requests may be made over the signature of an officer of the association if such officer's name has been filed with the Board by one or more of the member lines in accordance with paragraph 1 (b) as having authority to requests passes on account of the association.

(c) Requests may be made over the signature of officers of the association if such officers' names have been filed with the Board in accordance with paragraph 1 (b) by the chief officer of the association, provided such chief officer has been delegated authority to so act by the member lines.

3. Each pass must bear either the autograph or facsimile signature of one of the officers named in the list (a) referred to in paragraph 1.

4. Passes bearing facsimile signatures must be countersigned in ink by an officer or responsible subordinate, who must be designated on the face of the pass.

5. The printing of pass stock must be done only upon the requisition of a designated officer or officers, and the delivery of the entire stock shall be made to such officer by the printer or stationer. All vouchers covering the cost of pass stock shall be approved by the officer or officers designated before they are carried through the accounts for payment.

6. A record of pass stock shall be kept by the officer ordering such stock, for a period not less than three years. On the debit side of the record shall be entered the entire stock received. On the credit side shall be entered all pass stock distributed among other officers or countersigning subordinates, all stock assigned to the officer ordering the stock and issuable by him, and all stock destroyed. (See Form 1.)

Unissued pass stock must be filed in such manner as to be accessible and convenient for examination.

7. Passes shall be consecutively numbered, without duplication or omission, before or immediately on receipt from the printer or stationer. All passes may be numbered in the same series, or separate series may be used for each of the general classes, or for each subdivision with lettered prefixes or affixes.

8. If a separate stock of passes is provided for each year, the numbering must begin with 0 or 1 at the beginning of the year. If the same stock is to be used for two or more years, the numbering may continue from year to year, commencing with 0 or 1 when desired, but not oftener than once in each calendar year.

9. All passes must be filled out in a durable ink, either with pen or typewriter, or by printing, and all the information required on the pass forms appearing herein must be shown.

10. Requests for passes must be made in writing, except as provided in paragraph 12. by the persons to whom or on whose account passes may be issued, or by a superior or ranking officer or employee in case a request is made for or on account of an employee.

#### FORMS OF REQUEST

11. (a) A request for a pass for or on account of a Company's own officer or employee must state the name and address of the officer or employee, his title or occupation, the relationship (if the pass is to be issued to a member of his family), the territory for which, or the points between which, the pass is requested, and the time limit. (See Form 2.)

(b) A request from another company for a pass for or on account of one of its officers or employees must include, in addition to the information required under (a) above, a statement that the person for whom the pass is requested is not prohibited by law from receiving free transportation. (See Forms 3 and 4.)

(c) A request for a pass for or on account of any person not covered by paragraphs (a) or (b) must set forth clearly, or be accompanied by paper showing, the legality of the issuance of the pass requested.

12. In exceptional cases, written requests for passes may be dispensed with, but in such cases the records of passes issued must show the information that is required on written request, and in addition must state upon whose authority the passes were issued and the reasons for dispensing with written request.

## SESSIONAL PAPER No. 20c

13. Requests for passes must be filed in the office in which records of annual or term passes, or the stubs or carbon copies of trip passes, are filed, and in such manner as to be accessible and convenient for examination at any time within three years. The number of passes issued must be noted upon the face of the requests.

14. Telegraph passes may be issued in cases of emergency only, and shall be confined to one way passes. The issuance of telegraph passes shall be over the name of one of the officers named in the list referred to in paragraph 1, or that of one of the countersigning officers referred to in paragraph 4, and only within the territory over which such officers have authority to issue annual, term, or trip passes.

Telegraph passes must be issued either on telegraph blanks, in accordance with Form 5, or on a special printed form of telegraph pass, showing the same data as required on Form 5, but similar in form to trip passes.

Copies of telegraph passes and of the telegrams authorizing issuance of printed forms of telegraph passes must be made by the issuing officer and filed with the stubs or carbon copies of trip passes.

If, after a telegraph pass is issued, a trip pass is substituted therefor, the former should be filed with requests for trip passes as the authority for issuing the latter.

Except as provided in the preceding paragraph, used telegraph passes must be filed with used trip passes.

15. All passes must bear the signature of the users, preferably in ink. On the back of each pass must appear a statement that the holder is not prohibited by law from receiving free transportation, and that the pass will be lawfully used. This statement must be shown among other conditions, if any, and must be subscribed to by the holder. This paragraph shall not apply to telegraph passes.

16. A pass issued for a number of persons, without naming each person, such as "John Smith, Section Foreman, and six employees of X. Y. and Z. Railway," "Geo. Jones, wife and two daughters," may be signed only by the person whose name appears on the pass.

17. A pass issued for a number of persons, the names of all appearing on the pass, such as "William Brown and Edgar Moore, Brakemen," or "Chas. Blake, Mrs. Charles Blake, and Miss Mary Blake," must be signed by the users whether the pass is used by one or by more than one of the persons named on the pass.

18. A pass issued to a person without giving the name, such as "Pass one extra messenger of the Canadian Express Company when presented with letter, etc.," need not be signed by the user. The letter or identification form which accompanies the pass must be endorsed by the user and collected and filed with collected trip passes: Provided, however, that when a pass of this kind is to be used for an indeterminate number of trips, the one letter or identification form may be used for a number of trips, and should be collected by the conductor on the last trip and turned in with other collections. In cases of this kind, the conductor's report of passes honoured shall include a report of the pass each time it is used.

19. Employees and others eligible for free transportation may be furnished with regular passenger fare tickets, or may be permitted to purchase tickets and have the amounts paid therefor afterwards refunded. In such cases, the ticket agent's report of the tickets "without value," or the vouchers refunding the amounts paid for the tickets, must be supported by the authority of one of the officers named in list (a) referred to in paragraph 1. Such authority must show the same information as is required to be shown on the requests for passes referred to in paragraph 11.

20. A complete record of free passenger fare tickets issued in lieu of passes must be maintained by the office authorizing the issue of free tickets or the refund of fares paid. This record must show the date, the form, and number of ticket, station from, station to, name of person to whom issued, address, why issued, amount of fare, and name of officer authorizing the issue. (See Form 6.)

21. The following designated persons may, at the option of the companies, be carried without passes when in the actual performance of their duties, namely: train crews, sleeping car, chair car, and dining car employees, express messengers, crews of private cars, newsboys on trains, baggage agents.

22. Pass forms must not be used for the transportation of caretakers of property.

23. Caretakers in actual charge of shipments of live stock, poultry, or fruit, and travelling on trains with such shipments, shall be furnished with no other evidence of their rights to transportation than are contained in shipping contracts or in identification papers to be used in connection with notations on way-bills. If caretakers are permitted, under the provisions of tariffs to travel on passenger trains immediately preceding or following shipments, they must be furnished with a form of caretaker's ticket, which must give full way billing reference, and conform to published tariff provisions.

11 GEORGE V, A. 1921

24. If a caretaker's return passage is furnished under the terms of the shipping contract, it shall be provided for either by having the shipping contract executed at destination for return, or by having it lifted and a caretaker's return ticket issued, which must conform to published tariff provisions and show (a) the way bill reference, or (b) the initials and numbers of the cars, the shipping point, and the destination named in the contract.

25. All collected caretaker's tickets, shipping contracts, and identification papers, on which caretakers are carried, must be checked against the way bills or way bill records and filed in such manner as to be accessible and convenient for examination at any time within three years.

26. Companies are required to keep a full record of passes issued.

27. The record of annual or term passes issued shall be kept in a book record similar to Form 7, or on cards similar to Form 8.

28. If the book record is adopted, the passes may be entered either in numerical order or in alphabetical order, according to the surnames of the persons to whom the passes are issued. When passes are entered in numerical order, an alphabetical index by name shall be maintained; when entered in alphabetical order, a numerical index with name shall be maintained. If it is desired, an additional record, with the passes entered under departments, companies, etc., may be maintained on Form 7.

29. If the card system of records is adopted, the cards must be made in duplicate, with one set of cards filed in alphabetical order, according to the surnames of the persons to whom the passes are issued. If it is desired, the cards may be made in triplicate and the third card filed under departments, companies, etc.

30. The record of trip passes issued shall be kept on the stubs or carbon copies of trip passes. Full information must be shown on the stub or carbon copy of each trip pass, as provided on Form 9, and this information must conform to the data on the pass and coupon.

31. If a pass is cancelled, returned, or lost, the fact must be stated on the record, with the date of cancellation, return, or loss entered.

32. The records of passes issued must be filed in such manner as to be accessible and convenient for examination at any time within three years.

33. The authority for the issue of requests on other companies for passes shall be restricted to the officers named in list (b) referred to in paragraph 1. Requests must show the name and address of the officer or employee for whom or on whose account the pass is requested, his title or the nature of his employment, the relationship (if the pass is to be issued to a member of his family), the territory for which, or the points between which, the pass is desired, the time limit, and a statement that the person for whom the pass is requested is not prohibited by law from receiving free transportation. (See Forms 3 and 4.)

34. Requests must bear the autograph or the facsimile signature of one of the officers named in list (b) referred to in paragraph 1. In case the facsimile is used, the request must be countersigned in ink by an officer or responsible subordinate, who must be designated thereon.

35. Requests must be made in duplicate, or legible impression copies must be taken of them, and the duplicate or impression copies must be retained by the requesting carrier and filed in such manner as to be accessible and convenient for examination. When a pass is received, its number must be noted on the duplicate or impression copy of the request.

#### JOINT PASSES

36. A pass issued jointly by two or more carriers must bear the autograph or the facsimile signature of an officer (named in list (a) referred to in paragraph 1) of each of the carriers interested. If all the signatures of such officers are facsimile signatures, the pass must be countersigned in ink by an officer or responsible subordinate of one of the carriers interested, who must be designated on the face of the pass.

37. If arrangements are made to accept or honour passes issued by other carriers over certain portions of a carrier's lines, such arrangements must be embodied in the pass rules and regulations referred to in paragraph 42, or a statement of the arrangement must be filed with the Board.

SESSIONAL PAPER No. 20c

FILING PASSES

38. All passes collected and passes spoiled or returned must be filed in such manner as to be accessible and convenient for examination at any time within three years.

CONDUCTOR'S REPORTS

39. Conductors or ticket collectors must make a report of passes honoured for each run. This report must cover all passes honoured and not lifted, except passes honoured in suburban territory. It is optional with carriers whether or not this report shall cover trip passes on runs on which they are lifted and turned in, or any passes honoured in suburban territory. (See Form 10.)

40. If trip passes collected are not included in conductors' reports of passes honoured, space must be provided on the backs of passes and coupons on which must be shown the number of the train upon which the passes are honoured, the date, and the name of the conductor of ticket collector.

41. The use of identification slips, and the form of such slips if used, are left to the option of the carriers.

CARRIERS' PASS RULES

42. Carriers are required to file with the Board copies of their general rules and instructions in effect January 1, 1920, governing the issue and use of passes, and to forward promptly copies of any subsequent rules and instructions.

FORMS

43. Passes must be issued and records kept substantially in accordance with the forms hereinafter prescribed. The forms indicate the nature of the information required and the order in which it shall appear, but the dimensions of the various forms are not prescribed.

Carriers may include any additional matter in the pass forms or record forms, but such additional matter must not be permitted to impair the information required in the prescribed forms, or to affect the order in which it is given. The matter printed in italic type in the prescribed forms is not intended to be a part of the forms, but merely to indicate the nature of the information required.

44. Carriers may subdivide any of the forms or may adopt additional record forms, but must file with the Board a list of such subdivisions or additional record forms, showing their use and their purpose.

FORM No. 1

RECORD OF PASS STOCK RECEIVED AND DISTRIBUTED

*Debit*

(Form.....)

*Credit*

| Stock received |                     |         |        | Stock distributed |              |       |                     |         |        |
|----------------|---------------------|---------|--------|-------------------|--------------|-------|---------------------|---------|--------|
| Date           | Consecutive numbers |         | Number | Date              | Furnished to |       | Consecutive numbers |         | Number |

This telegram, when written in ink and countersigned by you, will pass.....  
.....from ..... to .....  
account ..... if used within ..... days.

.....  
(Signature.)

The above form must be used for telegraph passes written on telegraph blanks.  
If desired, carriers may provide a special printed form to be used for passes sent by  
telegraph.

FORM No. 6

RECORD OF FREE PASSENGER FARE TICKETS ISSUED

| Date issued | To whom issued |         |                   | From | To | Issued by | Remarks |
|-------------|----------------|---------|-------------------|------|----|-----------|---------|
|             | Name           | Address | Issued account of |      |    |           |         |
|             |                |         |                   |      |    |           |         |

In column headed "Issued account of" must be shown the same information as is required in similar column in the record of annual or term passes issued (Form 7.)

FORM No. 7

RECORD OF ANNUAL AND TERM PASSES ISSUED—BOOK RECORD

(Form.....)

| Date issued | No. | To whom issued |         |                   | Territory | Date of expiration | Request of | Remarks |
|-------------|-----|----------------|---------|-------------------|-----------|--------------------|------------|---------|
|             |     | Name           | Address | Issued account of |           |                    |            |         |
|             |     |                |         |                   |           |                    |            |         |

In the column headed "Issued account" information must be shown in accordance with the following:

If issued to an officer or employee—the title or occupation of person to whom pass is issued.

If issued to a member of the family of an officer or employee—the name of such officer or employee, his title or occupation, and the relationship of the person to whom pass is issued; for example: "Wife of John Smith, Brakeman".

If issued to an officer or employee of another carrier—the title or occupation of the person to whom the pass is issued and the name of the carrier; for example: "Machinist, C.P.R."

If issued to a member of the family of an officer or employee of another carrier—the name of such officer or employee, his title or occupation, the relationship of the person to whom the pass is issued, and the name of the carrier; for example: "Wife of George Brown, Clerk, Accounting Department, C.P.R."

If issued to persons other than common-carrier officers or employees or members of their families, there must be shown in this space the reason for the issuance of the pass.

GENERAL ORDER No. 291

*In the matter of Section 372 of the Railway Act, 1919, for the carrying of wires and cables along or across the tracks of railway companies under the jurisdiction of the Board; and the application of the Canadian National Railways for an Order amending the Standard Conditions and Specifications for Wire Crossings, approved by the General Order of the Board No. 231, dated May 6, 1918, as amended by General Order No. 267, dated June 27, 1919.*

Case No. 4704:

Upon reading what is filed in support of the application, the Canadian Pacific and Grand Trunk Railway Companies concurring therein,—

*It is Ordered:* That the said Standard Conditions and Specifications for Wire Crossings, as approved by the General Order of the Board No. 231, dated May 6, 1918, be, and they are hereby, amended—

(1) By striking out paragraph 4 of part I of the said conditions and specifications and substituting therefor the following, namely:—

“ 4. The applicant, before any work is begun, shall give the railway company owning, operating, or using the said railway at least seventy-two hours prior notice thereof in writing, and the said railway company shall be entitled to appoint an inspector, under whose supervision such work shall be done, and whose wages, at a rate not to exceed eleven dollars per day, shall be paid by the applicant; such payment to cover both wages and expenses. When the applicant is a municipality and the work is on a highway under its jurisdiction, the wages of the inspector shall be paid by the railway company.”

## SESSIONAL PAPER No. 20c

(2) By striking out paragraph 4 of part 2 of the said conditions and specifications and substituting therefor the following, namely:—

“4. Before any work of laying, removing, or repairing any pipe, conduit, wire, or cable is begun, the Applicant shall give to the railway company at least seventy-two hours prior notice thereof in writing, accompanied by a plan and profile of the part of the railway to be affected, showing the proposed location of such pipe, wire or cable, conduit, and works contemplated in connection therewith; and the said railway company shall be entitled to appoint an inspector to see that the applicant, in performing said work, complies in all respects with the terms and conditions of this Order, and whose wages, at a rate not exceeding eleven dollars per day, shall be paid by the applicant, such payment to cover both wages and expenses. When the applicant is a municipality and the crossing is on a highway under its jurisdiction, the wages of the inspector shall be paid by the railway company.”

*And it is further Ordered:* That General Order No. 267, dated June 27, 1919, and General Order No. 288, dated March 23, 1920, made herein, be, and they are hereby, rescinded.

OTTAWA, April 7, 1920.

S. J. McLEAN,  
*Assistant Chief Commissioner.*

## GENERAL ORDER No. 292

*In the matter of the application of various railway companies, hereinafter called the “Applicant Companies,” under Sections 330, 333 and 334 of the Railway Act, 1919, for approval of increased Standard Tariffs of maximum Sleeping and Parlour Car Tolls.*

Case No. 4569; File Nos. 548.16, 1026.2, and 9451.12 to 9451.20, inclusive.

Whereas, for the approval of the Board, the applicant companies have filed from April 1 to April 20, 1920, Standard Tariffs of Increased Maximum Sleeping and Parlour Car Tolls, and have given publicity thereto through the medium of the press, and no objections thereto having been received by the Board; and an increase in the existing tolls appearing to the Board to be justified by existing transportation conditions,—

*It is Ordered:* That the following tariffs of the Applicant Companies be, and they are hereby, approved, and may be put into force after publication thereof, together with a reference to this general order, in two consecutive weekly issues of the *Canada Gazette*, namely:—

Canadian National Railways—C.R.C. No. W-S1 and E-S1.

Canadian Pacific Railway—C.R.C. No. S9.

Dominion Atlantic Railway—C.R.C. No. S5.

Esquimalt & Nanaimo Railway—C.R.C. No. S6.

Grand Trunk Railway—C.R.C. No. S7.

Grand Trunk Pacific Railway—C.R.C. No. S6.

Kettle Valley Railway—C.R.C. No. S4.

Maine Central Railroad—C.R.C. No. S4.

Michigan Central Railroad—C.R.C. No. S4.

Napierville Junction Railway—C.R.C. No. S2.

New York Central Railroad—C.R.C. No. S4.

Toronto, Hamilton and Buffalo Railway—C.R.C. No. S5.

OTTAWA, April 22, 1920.

F. B. CARVELL,  
*Chief Commissioner.*

11 GEORGE V, A. 1921

## GENERAL ORDER No. 292-A

*In the matter of the application of the Quebec Central Railway Company for the approval of increase in its Standard Tariff of Maximum Sleeping and Parlour Car Tolls, and of the General Order of the Board No. 292, dated April 22, 1920, approving increased Standard Tariffs of Maximum Sleeping and Parlour Car Tolls of various railway companies.*

File No. 9451-21.

The tariff of the Quebec Central Railway Company showing increases in its maximum sleeping and parlour car tolls on the same basis as those approved under the said General Order No. 292 having been filed for the approval of the Board,—

*It is Ordered:* That the said General Order No. 292, dated April 22, 1920, be, and it is hereby amended by adding thereto, at the end of the order, the words, "Quebec Central Railway, C.R.C. No. S3."

S. J. McLEAN,  
Assistant Chief Commissioner.

OTTAWA, April 27, 1920.

## GENERAL ORDER NO. 292-B

*In the matter of the application of the Boston and Maine Railroad Company, hereinafter called the "Applicant Company," for approval of increases in its Standard Tariff of Maximum Sleeping and Parlour Car Tolls; and of the General Order of the Board No. 292, dated April 22, 1920, approving increased Standard Tariffs of Maximum Sleeping and Parlour Car Tolls of various railway companies.*

File No. 9451-22

The tariff of the applicant company showing increases in its maximum sleeping and parlour car tolls on the same basis as those approved under the said General Order No. 292 having been filed for the approval of the Board—

*It is ordered:* That the said General Order No. 292, dated April 22, 1920, as amended by General Order No. 292 A, dated April 27, 1920, be, and it is hereby further amended by adding thereto, at the end of the Order, the words, "Boston and Maine Railroad, C.R.C. No. S-4."

S. J. McLEAN,  
Assistant Chief Commissioner.

OTTAWA, May 5, 1920.

## GENERAL ORDER No. 292-C

*In the matter of the application of the Edmonton, Dunvegan and British Columbia Railway Company, hereinafter called the "Applicant Company," for approval of increases in its Standard Tariff of Maximum Sleeping and Parlour Car Tolls; and of the General Order of the Board No. 292, dated April 22, 1920, approving increased Standard Tariffs of Maximum Sleeping and Parlour Car Tolls of various railway companies.*

File No. 18903-95

The tariff of the applicant company showing increases in its maximum sleeping and parlour car tolls on the same basis as those approved under the said General Order No. 292 having been filed for the approval of the Board,—

## SESSIONAL PAPER No. 20c

*It is ordered:* That the said General Order No. 292, dated April 22, 1920, as amended by General Orders Nos. 292 A and 292 B, dated April 27, 1920, and May 5, 1920, respectively, be further amended by adding thereto, at the end of the order, the words, "Edmonton, Dunvegan and British Columbia Railway, C.R.C. No. S-3."

S. J. McLEAN,  
*Assistant Chief Commissioner.*

OTTAWA, May 10, 1920.

---

 GENERAL ORDER No. 292-D

*In the matter of the application of the Wabash Railway Company, hereinafter called the "Applicant Company," for approval of increases in its Standard Tariff of Maximum Sleeping and Parlour Car Tolls; and of the General Order of the Board No. 292 dated April 22, 1920, approving increases Standard Tariffs of Maximum Sleeping and Parlour Car Tolls of various railway companies.*

File No. 9451-23

The tariff of the applicant company showing increases in its maximum sleeping and parlour car tolls on the same basis as those approved under the said General Order No. 292 having been filed for the approval of the Board,—

*It is ordered:* That the said General Order No. 292, dated April 22, 1920, as amended by General Orders Nos. 292 A, 292-B, and 292-C, dated respectively April 27, 1920, May 5, 1920 and May 10, 1920, be further amended by adding thereto, at the end of the order, the words, "Wabash Railway, C.R.C. No. S-5."

S. J. McLEAN,  
*Assistant Chief Commissioner.*

OTTAWA, May 11, 1920.

 GENERAL ORDER No. 293

*In the matter of the application of the Brotherhood of Railroad Trainmen for an Order requiring railway companies to provide suitable seating accommodation in locomotive cabs for front end brakemen on freight trains who are required to ride the engine.*

File No. 25279

Upon reading what is filed in support of the application and on behalf of the Railway Association of Canada; and upon the report and recommendation of the Mechanical Expert of the Board, concurred in by its Chief Operating Officer,—

*It is ordered* as follows:

1. That all locomotives of railway companies subject to the jurisdiction of the Board be equipped with a seat for the brakemen.
2. That the seat provided be of a comfortable design, and where practicable equipped with back and window arm rest.
3. That such seating accommodation be provided by the 1st day of May, 1921.

S. J. McLEAN,  
*Assistant Chief Commissioner.*

OTTAWA, April 26, 1920.

---

GENERAL ORDER NO. 294

*In the matter of the complaints of D. Campbell, Winnipeg; the United Grain Growers, Limited, Calgary; J. B. Stringer and Company, Chatham; and Elliott and Company, Ridgetown, against the allowances provided by the General Order of the Board No. 50, dated December 10, 1909, as amended by General Order No. 184, dated March 22, 1917, to shippers who are compelled to furnish temporary doors to cars loaded with grain.*

File No. 4106:

Upon hearing the complaints at the sittings of the Board held in Winnipeg, November 15, 1919, and in Ottawa, December 18, 1919, in the presence of D. Campbell, counsel for and representatives of the Canadian Pacific, Grand Trunk, and Grand Trunk Pacific Railway Companies, the Canadian National Railways, the Michigan Central Railroad Company, and the Montreal Board of Trade, and what was alleged; and upon reading the submissions filed, and the report and recommendation of the Chief Traffic Officer of the Board,—

*It is ordered* as follows:

1. That the said General Order No. 50, as amended by General Order No. 184, requiring that where shippers upon all or any railways subject to the jurisdiction of the Parliament of Canada are compelled to furnish car doors to enable cars to be used for traffic, allowance therefor to such shippers be made upon the following basis:—

- (a) At and west of Port Arthur, lower doors, each... . \$1.50  
     upper doors, each... . .75
- (b) East of Port Arthur, lower doors, each... . .50  
     upper doors, each... . .50

be and it is hereby, amended to provide that the said allowance for doors so furnished to enable cars to be used for grain, be increased as follows, namely:—

- (a) At and west of Port Arthur—  
     for doorways 5 feet wide: lower doors... . \$2.25 each  
     upper doors... . .75 "  
     for doorways 6 feet wide: lower doors... . 2.60 "  
     upper doors... . .90 "
- (b) East of Port Arthur—  
     for doorways, 5 feet wide: lower doors... . 1.25 "  
     upper doors... . .75 "  
     for doorways 6 feet wide: lower doors... . 1.35 "  
     upper doors... . .90 "

F. B. CARVELL,  
*Chief Commissioner.*

OTTAWA, April 30, 1920.

GENERAL ORDER No. 295

*In the matter of the complaints of the Montreal Board of Trade, the Canadian Manufacturers' Association, and the Toronto Board of Trade et al. against the regulation of the railway companies, effective March 1, 1920, directing their agents not to accept prepayment of charges from shippers on freight traffic from Canada to the United States, except on traffic on which the Freight Classification or Tariff requires prepayment.*

File No. 29674.2.

Upon hearing the complaints at the sittings of the Board held in Toronto, March 6, 1920, and Ottawa, March 16 and 17, 1920, the complainants, the Montreal Corn Exchange, certain manufacturers in the province of Quebec, the Riordon Pulp and Paper Company, the Canadian Lumbermen's Association, the apple and potato

## SESSIONAL PAPER No. 20c

shippers of Nova Scotia, the Border Chamber of Commerce, the Ford Motor Company, certain pulpwood industries, the J. B. Belanger Mining Company, the Canadian Carbide Company, F. E. Smith, Limited, the Canadian Traffic Agency, Wm. Davies Company, Limited, the Harris Abattoir Company, Limited, the Canadian Pacific and Grand Trunk Railway Companies, the Canadian National Railways, and the Michigan Central Railroad Company being represented at the hearing, and what was alleged; and upon reading the submissions filed,—

*It is ordered:* That, for want of jurisdiction over the subject matter thereof, the said complaints be, and they are hereby, dismissed.

F. B. CARVELL,  
*Chief Commissioner.*

OTTAWA, May 5, 1920.

---

GENERAL ORDER No. 296

*In the matter of the application of the Express Traffic Association of Canada, on behalf of the express companies subject to the jurisdiction of the Board, for approval of Regulations for the Transportation by Express of Acids, Inflammables, Oxidizing Substances, etc. under Sections 349 and 350 of the Railway Act, 1919, on file with the Board under File No. 1717.12.*

Upon hearing the application at the sittings of the Board held in Ottawa, February 17, 1920, in the presence of Counsel for and representatives of the express companies, the Grand Trunk and Canadian Pacific Railway Companies, the Canadian National Railways, the Explosives Division of the Department of Mines, and the Bureau of Explosives, and what was alleged; and upon reading the submissions filed,—

*It is ordered:* That the proposed Regulations for the Transportation by Express of Acids, Inflammables, Oxidizing Substances, etc., C.R.C. No. E.T. 694, to be observed by express companies subject to the jurisdiction of the Board, on file with the Board under File No. 1717.12, marked "A," and certified by the Secretary of the Board, be, and they are hereby approved, subject to the following changes and additions, namely:—

- (1) The opening sentence of paragraph 4 to be changed to read as follows:—  
"The following articles must not be accepted for shipment by express, except properly packed and certified samples for laboratory examination as provided for in paragraph 5 (a)."
- (2) To the list of Acceptable Articles, paragraph 5, the following to be added:—  
"(a). Samples of explosives intended for laboratory examination only, and not exceeding a net weight of one-half pound for each sample, and not exceeding ten such samples in any one train, when packed, marked, labelled, described and certified in accordance with paragraph 16" (or as it may be re-numbered).
- (3). The following to be inserted as the first paragraph under "Definitions":—  
"The only samples of explosives that can lawfully be shipped by express are those intended for examination in laboratory and not intended for use or demonstration."

(4) The following is to be inserted as the first paragraph in the Rules for Packing and Marking:—

## LABORATORY SAMPLES

*Packing.*—(a) Samples of explosives for laboratory examination must be placed in well-secured metal cans or glass bottles, or in strong waterproof paper or cardboard packages; each sample must not consist of more than one-half pound of explosive, and the interior package must be placed in sawdust or similar cushioning material at least 2 inches thick, in a strong and tight wooden box, with ends not less than 1 inch thick, and top, bottom, and sides not less than one-half inch thick when a nailed box is used; or with ends, top, bottom, and sides not less than one-half inch thick of lock-cornered construction.

(b) Whenever these samples for laboratory examination are contained in a metal envelope or receptacle, this receptacle must be properly cushioned with sawdust or similar cushioning material in a strong wooden box, and this interior box must be placed in a tight outside wooden box with at least 2 inches of cushioning material separating the boxes,

*Weight.*—Not more than 10 half-pound samples of explosives for laboratory examination may be placed in one outside box or transported in any one train.

The net weight of the explosive contents must be plainly marked by the shipper on the outside of each box offered for forwarding.

*Marking.*—Each outside package containing such samples must have securely and conspicuously attached to it a square red certificate label measuring 4 inches on each side, and bearing in black letters the following:—

## EXPLOSIVE

## SAMPLE FOR LABORATORY EXAMINATION

*Handle Carefully**Keep Fire Away*

This is to certify that the articles covered by this label are properly described by name and are packed and marked and are in proper condition for transportation, according to the regulations prescribed by the Board of Railway Commissioners for Canada.

.....  
(Shipper's Name)

.....  
(Inspector, Bureau of Explosives)

or

(Inspector, Explosives Division,  
Department of Mines.)

*Certification.*—The label as above must be signed in ink by the shipper, and by either of the inspectors named. If signed by the Inspector, Bureau of Explosives, he must erase the words "Inspector, Explosives Division, Department of Mines." and "vice versa." Unless the label bears both signatures the articles tendered for transportation must be refused.

F. B. CARVELL,  
*Chief Commissioner.*

OTTAWA, May 15, 1920.

SESSIONAL PAPER No. 20c

## GENERAL ORDER No. 297

*In the matter of the application of the Great North Western Telegraph Company, the Canadian Pacific Railway Company, the Grand Trunk Pacific Telegraph Company, and the Western Union Telegraph Company, on behalf of all telegraph companies operating in Canada, hereinafter called the "Applicant Companies," for authority to increase their tariffs of tolls by about 25 per cent, notwithstanding the provisions of any legislation heretofore passed or of any rate-limiting agreement heretofore made.*

File No. 10041.88.

Upon hearing the application at the sittings of the Board held in Ottawa, November 11 and 12, 1919, Winnipeg November 15, 1919, Vancouver, November 21, 1919, Victoria, November 24, 1919, Calgary, November 27, 1919, Edmonton, November 28, 1919, Saskatoon, November 29, 1919, Regina, December 1, 1919, Winnipeg, December 2, 1919, Fort William, December 3, 1919, Halifax, December 15, 1919, St. John, December 16, 1919, and Ottawa, January 27, 1920, in the presence of representatives of the Applicant Companies, the Boards of Trade of Toronto, Winnipeg, Calgary, Edmonton, Saskatoon, Regina, Halifax, and St. John, the Cities of Toronto, Hamilton, Regina, and St. John, the Province of Prince Edward Island, the Union of Canadian Municipalities, the Winnipeg Grain Exchange, the Fort William Grain Exchange, the Canadian Manufacturers' Association, the Canadian Credit Men's Trust Association, the Northwest Grain Dealers' Association, the Retail Merchants' Association of Manitoba, and certain Saskatoon local interests, and what was alleged,—

*It is ordered:* That the applicant companies be, and they are hereby permitted to file with the Board, for its consideration, tentative schedules in accordance with the direction contained in the judgment of the Assistant Chief Commissioner, dated May 6, 1920, attached hereto marked "A." and which, for the purpose, as well as the judgment of the Chief Commissioner, dated March 23, 1920, attached hereto marked "B," are hereby made a part of this order.

S. J. McLEAN,  
Assistant Chief Commissioner.

OTTAWA, May 21, 1920.

## GENERAL ORDER No. 298

*In the matter of the consideration of a special form of Contract for the Transportation of Live Stock, to be used by the railway companies subject to the jurisdiction of the Board.*

File No. 28233.

Upon hearing the matter at the sittings of the Board held in Ottawa, February 10, 1920, the Canadian Manufacturers' Association, the Western Live Stock Shippers' Association, the Winnipeg Live Stock Exchange, the Calgary Live Stock Exchange, the Cattlemen's Protective Association of Western Canada, the Express Traffic Association, the Toronto Humane Society, the Western Canada Live Stock Union, the Canadian Council of Agriculture, the United Farmers of Ontario, the United Farmers' Co-operative Company, the Eastern Canada Live Stock Union, the Brotherhood of Locomotive Engineers, the Brotherhood of Locomotive Firemen, Swifts Canadian Company, the Grand Trunk and Canadian Pacific Railway Companies, the Canadian National Railways, and the Michigan Central Railroad Company being represented at the hearing, and what was alleged,—

11 GEORGE V, A. 1921

It is Ordered as follows:—

1. That the forms of Live Stock Contract and the Special Contract with Attendants in Charge of Stock, attached hereto marked Schedule "A" and Schedule "B" respectively, be, and they are hereby, approved.
2. That the form of the Special Contract with Attendants in Charge of Stock (Schedule "B") be printed on the back of the Live Stock Contract form (Schedule "A").
3. That on and after the 1st day of July, 1920, the forms herein approved shall be the only contracts for the carriage of live stock to be used by all the railway companies subject to the legislative authority of the Parliament of Canada.

F. B. CARVELL,  
Chief Commissioner.

SESSIONAL PAPER No. 20c

SECTION 1

The shipper agrees to pay, if required, before delivery, all lawful and proper charges as well as freight thereon to the carrier at the rate of.....per one hundred pounds, which is the lower published tariff rate, and is based on the express condition that the carrier shall in no case be liable for loss of or damage or injury to said live stock, in excess of the following agreed valuation, or a proportionate sum in any one case, upon which valuation the rate charged for the transportation of the said live stock is based, and beyond which valuation neither the carrier nor any connecting carrier shall be liable in any event, whether the loss, injury or damage occurs through the negligence of the carrier or any connecting carrier, or their or either of their employees, or otherwise, viz,—

|   |                          |
|---|--------------------------|
| Horses or mules.....  | Not exceeding \$200 each |
| Colts, under one year of age.....                                     | Not exceeding \$100 each |
| Cattle (except calves).....   | Not exceeding \$150 each |
| Hogs ..   | Not exceeding \$40 each  |
| Other domestic animals (including calves 6 months old and younger) .. | Not exceeding \$ 20 each |

If, upon inspection, it is ascertained that the live stock shipped is not as described in this Live Stock Bill of Lading, the freight charges must be paid on the live stock actually shipped, with any additional charges lawfully payable thereon.

SECTION 2

No carrier is bound to transport said live stock by any particular train, or in time for any particular market, or otherwise than with reasonable dispatch, unless by specific agreement endorsed herein. Every carrier, in case of physical necessity, shall have the right to forward said live stock by any railway or route between the point of shipment and the point of destination.

SECTION 3

By this contract the carrier agrees to transport only over its own line, and acts only as agent with respect to the portion of the route beyond its own line, except as otherwise provided by law; no carrier shall be liable for damage or injury not occurring on its portion of the through route, nor after the stock has been delivered to the next carrier, except as such liability is or may be imposed by law. Unless a different agreement is made with connecting carriers, in respect to transportation on their respective lines, the terms and conditions hereof shall apply to the transportation by each carrier on any portion of the route to destination.

SECTION 4

(1) The shipper agrees to load, unload, or re-load said live stock at his own expense and risk; feed, water and attend same at his own expense and risk while in transit, except as provided in subsection (5) of this section. In case any of the employees of the carrier load, unload, reload, feed, water or otherwise care for the said live stock, or assist in doing so, they shall be treated as agents of the shipper for that purpose and not as the agents of the carrier; except when such loading, unloading, reloading, feeding or watering is occasioned by some act or default of the carrier.

(2) The carrier agrees to provide proper loading, unloading or reloading facilities and suitable equipment with secure car door fastenings for the transportation of said live stock.

(3) The shipper agrees to properly and securely place all said stock in cars, and the carrier shall, except in cases where the shipper or some person on his behalf accompanies the live stock, keep said doors securely locked or fastened until placed for unloading.

(4) If temporary partitions or decks are put in the cars by the shipper, the carrier shall not be responsible for the sufficiency thereof, or for any loss or damage caused by defects therein.

(5) In the event of delay to said live stock caused by the negligence of the carrier, any consequent unloading, reloading, feeding or watering en route shall be at the carrier's expense and risk; and any expense incurred by the shipper in connection therewith shall be repaid to him by the carrier.

SECTION 5

If the destination of the shipment of said live stock is more than one hundred and fifty (150) miles from the point of shipment, the shipper or some person on his behalf (not an employee of the carrier), must, unless special arrangements are otherwise made in writing, accompany and care for the shipment throughout the journey.

SECTION 6.

The carrier shall not be liable for loss, damage, or delay to any of the live stock herein described caused by the act of God, the King's or public enemies, riots, strikes, defects or inherent vice in the live stock, heat, cold, the authority of law, quarantine, the act or default of the shipper, or causes beyond the carrier's control; nor when caused by changes in weather or delay resulting therefrom, except such delay is due to the carrier's negligence, and the burden of providing freedom from such negligence shall be on the carrier; nor for loss or damage caused by fire occurring after cars have been placed for unloading at point of destination.

Except in case of the negligence of the carrier, (and the burden of proving freedom from such negligence shall be on the carrier), the carrier shall not be liable for loss, damage or delay occurring while the live stock is stopped and held in transit upon the request of the party entitled to make such request.

SECTION 7

Notice of claim on account of loss, damage or delay must be made in writing to the agent of the carrier at the point of shipment, or to the agent of the carrier at the point of delivery; or to a Divisional Superintendent, a District Freight Agent, a Claims Agent, or the General Counsel of the carrier, within thirty (30) days after the delivery of the live stock, or in case of failure, to make delivery, then within thirty (30) days after a reasonable time for delivery has elapsed. Unless notice is so given the carrier shall not be liable.

SECTION 8

No person accompanying the said live stock shall have the right to ride free or at a rate less than full fare in connection with this shipment, unless and until he has signed the special form of contract for such attendants, printed on the back hereof.

The carrier shall not be liable either for loss of life or personal injury to such persons accompanying said live stock, whether such person is being carried free or at a rate less than full fare, unless such loss of life or personal injury is caused by negligence on the part of the carrier, its servants or employees while the said persons are in the caboose or other car provided for their transportation, or while in the car provided for the transportation of the live stock.

SECTION 9

The shipper hereby acknowledges that he has the option of shipping the above described live stock at a higher rate of freight than that payable hereunder, and according to the classifications and tariffs of the carrier, or connecting carriers, the effect of which the shipper understands would be to remove the limitation on the amount of damages for which the carrier or the connecting carriers might be liable as herein provided, and the shipper has voluntarily elected to accept the limitation of liability herein contained to enable him to obtain the reduced freight rate above mentioned.

SECTION 10

Any alteration, addition or erasure in this Live Stock Bill of Lading shall be signed or initialled in the margin by an agent of the carrier issuing the same, and if not so signed or initialled shall be without effect, and this Bill of Lading shall be enforceable according to its original tenor.

..... Agent.

..... Shipper.

(This Bill of Lading to be signed by the shipper and the agent of the carrier issuing same.)

SESSIONAL PAPER No. 20c

SCHEDULE B

To be Printed on Back of Live Stock Contract

.....RAILWAY

SPECIAL CONTRACT WITH ATTENDANTS IN CHARGE OF STOCK

Nos. of Cars.

The parties actually in charge of and accompanying the within named stock, are required to read the following agreement, and to sign their names in ink or indelible pencil below the same, in the space provided for that purpose.

In consideration of the fact that I have been furnished with.....

(Free transportation)

(Transportation at less than full fare)

I agree to give the live stock included in this shipment all care and attention needed en route. If anything goes wrong in connection with the shipment, or if it needs any care or attention that requires the help or co-operation of the train crew, I will promptly notify the conductor in charge.

Whereas, travel by freight trains is necessarily more dangerous than upon passenger trains, I hereby release the said carrier and each and every connecting carrier which may grant me such free transportation or transportation at less than full fare, from all liability for any injury or damage suffered by me while violating any of the terms of this agreement with the said carrier, as stated below, all of which I agree to carefully observe and obey.

1. I will remain in a safe place in the caboose or other car provided for my transportation, or in the car provided for the transportation of the stock, at all times while the train is in motion.

2. I will not get on or off said caboose or other car when the same is in motion.

3. I will not get on or off, or walk over the cars while they are moving.

4. I will not walk or stand on any track or station or other premises of the carrier at night without a lighted lantern. I will not walk or stand on any track or attempt to cross any track, while switching is being or is about to be done thereon. I will at all times use every reasonable effort and precaution to protect myself from injury.

5. I will always bear in mind that freight trains do not stop at stations or places especially prepared for passengers to alight; that freight trains frequently stop on bridges and places along the line where it is not safe to alight; I will therefore not attempt to alight from the caboose or other car, when a train may stop for any purpose, without first making a careful examination (with a lighted lantern if at night time), and thus ascertaining that it is safe to alight at that point; and I will not omit taking these precautions because of anything said or done by employees of the carrier.

In further consideration of the fact that I have been furnished by the railway company with.....

(Free transportation)

(Transportation at less than full fare)

I hereby further agree that in case of any accident, casualty or mishap of any kind, howsoever caused, in which I may receive any personal injury while travelling pursuant to such transportation, I will within thirty (30) days after the happening of such injury, and as a condition precedent to the right to maintain any suit or action on account of such injury, notify the Railway Company by mailing or delivering to the General Counsel or the General Solicitor of the Railway Company, written notice of the time, place, circumstances, character and extent of such injury.

I fully understand that no agent or employee of the Railway Company has the right to waive the giving of such notice.

My signature hereto shall be conclusive evidence of my assent to and agreement herewith.

.....  
.....  
.....

Agent.

.....  
.....

Parties in charge of and accompanying stock sign above in ink or indelible pencil.

11 GEORGE V, A. 1921

## GENERAL ORDER No. 299

*In the matter of the application of the Great North Western Telegraph Company, the Canadian Pacific Railway Company, the Grand Trunk Pacific Telegraph Company, and the Western Union Telegraph Company, on behalf of all telegraph companies operating in Canada, hereinafter called the "Applicant Companies" for authority to increase their tariffs of tolls by about 25 per cent, notwithstanding the provisions of any legislation heretofore passed or of any rate-limiting agreement heretofore made; and in the matter of the General Order of the Board No. 297, dated May 21, 1920.*

File No. 10041.88.

Whereas the said telegraph companies have filed for the consideration of the Board the tentative schedules permitted for that purpose by the General Order of the Board No. 297, dated May 21, 1920, and these having been checked and sealed by the Board's Traffic Department so provided for in section XI (6) of the judgment of the Board, dated May 6, 1920, and certain alterations having been made therein as the result of such checking and sealing,—

*It is ordered:* That the said schedules so amended be, and they are hereby, approved, to be made effective not earlier than June 14, 1920.

S. J. McLEAN,  
*Assistant Chief Commissioner.*

OTTAWA, June 5, 1920.

## GENERAL ORDER No. 300

*In the matter of the consideration of a special form of Contract for the transportation of Live Stock, to be used by the Railway Companies, subject to the jurisdiction of the Board; and General Order No. 298, dated June 2, 1920, approving forms of Live Stock Contract and Special Contract with attendants in charge of stock, marked Schedules "A" and "B" respectively;*

File No. 28233.

*It is ordered:* That the date upon which the said forms of Live Stock Contract and the Special Contract with Attendants in Charge of Stock, marked Schedules "A" and "B" respectively, on file with the Board under file No. 28233, shall become effective, be postponed from the 1st day of July, 1920, as provided for in the said General Order No. 298, dated June 2, 1920, to the 15th day of July, 1920.

F. B. CARVELL,  
*Chief Commissioner.*

OTTAWA, June 30, 1920.

## GENERAL ORDER No. 301

*In the matter of the question of the coal supply in Canada, and the powers conferred upon the Board by Chapter 66 of the Acts of the Parliament of Canada, 1920.*

File No. 30331.5.

Upon its appearing to the Board that there is a real or apprehended scarcity of coal, with a view to conserving the supply, and in pursuance of the powers conferred by the said Act, chapter 66, 1920,—

## SESSIONAL PAPER No. 20c

*The Board doth order:* That the exportation of coal from the Atlantic, St. Lawrence river and gulf ports of Canada, except to the United States or to Newfoundland, unless otherwise permitted and in accordance with regulations to be promulgated by the Board, be, and it is hereby, prohibited on and after the first day of August next.

F. B. CARVELL,  
*Chief Commissioner.*

OTTAWA, July 22, 1920.

---

 GENERAL ORDER No. 302

*In the matter of the General Order of the Board No. 923, dated April 26, 1920, providing, inter alia, that all locomotives of railway companies subject to the jurisdiction of the Board be equipped with a seat for the brakemen.*

File No. 25279

Upon reading what is filed on behalf of the Brotherhood of Locomotive Engineers, the Brotherhood of Locomotive Firemen and Enginemen, and the Railway Association of Canada,—

*It is ordered:* That paragraph 1 of the said General Order No. 293, dated April 26, 1920, be, and it is hereby, amended by adding thereto the following, namely:—

“Provided, however, that such seat shall not be located in a position that will interfere with the seating space or seats provided for engineer and firemen, or that will obstruct their view from side windows.”

S. J. McLEAN,  
*Assistant Chief Commissioner.*

OTTAWA, July 23, 1920.

---

 GENERAL ORDER No. 303

*In the matter of the international railway rates, fares and charges as affected by an Order of the Interstate Commerce Commission dated July 29, 1920, Ex Parte 74.*

File No. 30437

Whereas the Interstate Commerce Commission, by its Order dated at Washington, D.C., July 29, 1920, has granted carriers operating in the United States of America certain increases in their rates, fares and charges, as set out in the report of the said commission made part of its order, and the said increases being thereby made applicable also to the proportions of joint through rates to or from Canada accruing within the United States all of which may be made effective upon not less than five days' notice.

And whereas it is deemed by the Board to be expedient in the public interest that the continuity of joint through rates from points in the United States to points in Canada, and “vice versa,” should be preserved.

Therefore, in pursuance of the powers conferred upon the Board by Section 325 of the Railway Act, 1919, and of all other powers possessed by the Board in that behalf,—

*It is ordered:*

(1) That the proportions of through rates, fares and charges between the United States and Canada, fares in both directions, in effect at the date of this order, accruing within Canada, may, by general or blanket supplement to existing tariffs, be increased

11 GEORGE V, A. 1921

to the extent that the through rates, fares and charges shall conform to the increases authorized by the said order of the Interstate Commerce Commission: except on coal and coke, increases on which are reserved pending the judgment of the Board in the application of Canadian carriers for increased rates within Canada.

(2) That the through rates and fares from points in Canada to points in the United States, so increased, may be published and filed to become effective on or after August 26, 1920, upon not less than five days' notice.

S. J. McLEAN,

*Assistant Chief Commissioner.*

OTTAWA, August 13, 1920.

---

GENERAL ORDER No. 304

*In the matter of special tariffs on freight traffic to Montreal, Quebec, St. John, West St. John, and Halifax, for export.*

File No. 30437-1

Whereas the rates and charges on freight traffic from United States shipping points to the Atlantic ports of the United States will be increased on August 26, 1920, by authority of an order of the Interstate Commerce Commission dated July 29, 1920; and the Board, by its General Order No. 303, dated August 13, 1920, has authorized increases in the freight rates and charges from Canada to the United States in conformity with the said Order of the Interstate Commerce Commission;

And whereas it is expedient in the public interest that the relationship between the rates and charges from Canadian shipping points on freight traffic to the ports of Montreal, Quebec, St. John, West St. John, and Halifax, for export, and those to the Atlantic ports of the United States be continued;

Therefore, in pursuance of the powers conferred upon the Board by section 325 of the Railway Act, 1919, and of all other powers possessed by the Board in that behalf,—

*It is ordered:* That the said rates and charges on export freight traffic from Canadian shipping points to Montreal, Quebec, St. John, West St. John, and Halifax may be increased in conformity with the said relationship, to become effective on or after August 26, 1920, on not less than five days' notice.

F. B. CARVELL,

*Chief Commissioner.*

OTTAWA, August 19, 1920.

---

GENERAL ORDER No. 305

*In the matter of reconsigning rules and penalty charges for detention of equipment in interstate traffic passing through Canada.*

File No. 30451.

Whereas the Interstate Commerce Commission has, by its Special Permission No. 50321, dated at Washington, D.C., July 31, 1920, authorized the publication of revised reconsigning rules applicable on all freight in open top cars and coal and coke in all cars, and emergency penalty charges for detention to all open top cars, and cars loaded with lumber, coal or coke, to be made effective upon not less than five days' notice and the Canadian Freight Association, in behalf of Canadian carriers engaged in interstate traffic passing through Canada, has applied to the Board for permission to publish and file tariffs in accordance therewith;—

SESSIONAL PAPER No. 20c

*It is ordered:* That Canadian carriers of the said interstate traffic be, and they are hereby, permitted to publish and file tariffs in accordance with the said Special Permission No. 50321 of the Interstate Commerce Commission, to apply, at points in Canada, only on traffic "en route" from any point in the United States through Canada to any destination also in the United States.

F. B. CARVELL,  
*Chief Commissioner.*

OTTAWA, August 19, 1920.

---

GENERAL ORDER No. 306

*In the matter of minimum carload weights of grain and grain products moving from the United States into Canada, and rules and regulations applicable thereto.*

File Nos. 27612 and 27612.20.

Whereas the Interstate Commerce Commission has, by its Special Permission No. 50450, dated at Washington, D.C., August 21, 1920, as amended, authorized the publication and filing, on one day's notice, special supplements to the tariffs of United States carriers establishing increased minimum weights on grain and grain products, in carloads, and rules and regulations applicable thereto, renewing and extending from September 1, 1920, to December 31, 1920, the said tariffs which would otherwise expire August 31, 1920, in accordance with the Interstate Commerce Commission's Special Permission No. 49801, dated March 17, 1920, and the Board's Special Authority No. 123, dated March 29, 1920,—

*It is ordered:* That the said Special Permission No. 50450, as amended, be, and it is hereby, approved with respect to the said traffic moving from points in the United States to destinations in Canada.

S. J. McLEAN,  
*Assistant Chief Commissioner.*

OTTAWA, August 28, 1920.

---

GENERAL ORDER No. 307

*In the matter of reconsigning rules and penalty charges for detention of equipment interstate traffic passing through Canada, and the General Order of the Board No. 305, dated August 19, 1920.*

File No. 30451.

*It appearing* that the Interstate Commerce Commission has suspended clause 2 of the Emergency Penalty Charges authorized by its Special Permission No. 50321, dated July 31, 1920, the said clause 2 reading as follows:—

"On all open top cars and on all cars loaded with coal or coke not released within the free time as prescribed in the National Car Demurrage Rules, J. E. Fairbanks, I.C.C. No. 8, supplements thereto or reissues thereof, a storage charge of \$10 per car per day or fraction of a day will be made until car is released."

*It is ordered:* That the General Order of the Board No. 305, dated August 19, 1920, be, and it is hereby, amended accordingly.

F. B. CARVELL,  
*Chief Commissioner.*

OTTAWA, September 1, 1920.

11 GEORGE V, A. 1921

## GENERAL ORDER No. 308

*In the matter of the application of the Railway Association of Canada, on behalf of the railway companies members thereof and of all other railway companies within the jurisdiction of the Board, for authority to make a general advance of thirty per cent in the tolls at present charged for the carriage of freight by the said companies; and the further application for an additional increase of ten per cent in all freight rates, and an increase of twenty per cent in passenger fares, fifty per cent in sleeping and parlour car rates, forty per cent in the rates on milk, and twenty per cent in the rates for excess baggage.*

File No. 29996.

Upon hearing the applications at the sittings of the Board held in Ottawa, August 10, 11, 12, 15, 19, 20, and 21, 1920, in the presence of counsel for and representatives of the Canadian Pacific, Grand Trunk, Canadian Northern, Toronto, Hamilton & Buffalo, New York Central, Essex Terminal, Wabash, and Great Northern Railway companies, the Michigan Central Railroad Company, the Canadian Railway Association, the Canadian Freight Association, the Canadian Manufacturers' Association, the Livestock Dealers' Association, the Canadian Wholesale Grocers' Association, the Canadian Lumbermen's Association, the Retail Merchants' Association of Canada, the Clay Workers' Association, the Canadian Export Paper Company, the Dominion Cannery, Limited, the Carnation Milk Products, Limited, the Riordan Paper Company, the National Dairy Council, the United Farmers of Ontario, the Canadian Council of Agriculture, certain commercial organizations of the Maritime Provinces, the Retail Coal Dealers of Ontario, the Eastern Canada Livestock Union, the Crushed Stone Industries of Ontario, the Western Canada Livestock Union, the Canadian Construction Company, Limited, the Boards of Trade of Winnipeg, Toronto, Montreal, and St. John, the city of Toronto, the Hamilton Chamber of Commerce, the London Chamber of Commerce, the Border Cities Chamber of Commerce, the Provinces of Manitoba, Saskatchewan, and New Brunswick and the Department of Public Highways for the Province of Ontario, the evidence offered and what was alleged; and upon reading the written submissions filed, judgment, dated September 6, 1920, was delivered by the Chief Commissioner, and concurred in by the other members of the Board who heard the application, a certified copy of the said judgment being attached hereto marked "A."—

*It is ordered:* That the changes in the tariffs of the companies operating steam railways subject to the jurisdiction of the Board, as set forth in the judgment, which is hereby made part of this order, be, and they are hereby, authorized

F. B. CARVELL,  
*Chief Commissioner.*

OTTAWA, September 9, 1920.

SESSIONAL PAPER No. 20c

## GENERAL ORDER No. 309

*In the matter of the application of the Railway Association of Canada, on behalf of the railway companies members thereof and of all other railway companies within the jurisdiction of the Board, for authority to make a general advance of thirty per cent in the tolls at present charged for the carriage of freight by the said companies; and the further application for an additional increase of ten per cent in all freight rates and an increase of twenty per cent in passenger fares; fifty per cent in sleeping and parlour car rates; forty per cent in the rates on milk, and twenty per cent in the rates for excess baggage.*

File No. 29996.

Supplements to the Standard Freight and Passenger Tariffs of the undermentioned railway companies having been filed on the basis prescribed by the Board's judgment, dated September 6, 1920, and General Order No. 308, dated September 9, 1920,—

*It is ordered:* That the following Supplements to Standard Freight Tariffs of Maximum Mileage Tolls be, and they are hereby, approved; the rate scales of the said tariffs to be published in at least two consecutive weekly issues of the *Canada Gazette*, preceded by the following notice:—

“The undermentioned Supplements to Standard Freight Tariffs having been filed for the approval of the Board of Railway Commissioners for Canada, and being found by the Board to be in accordance with its judgment, dated September 6, 1920, and its General Order No. 308, dated September 9, 1920, and having been approved by its General Order No. 309, dated September 9, 1920, the rate scales thereof are hereby published.”

F. B. CARVELL,

*Chief Commissioner.*

OTTAWA, September 23, 1920.

11 GEORGE V, A. 1921

## GENERAL ORDER NO. 312

*In the matter of the question of the coal supply in Canada; and in the matter of an Order amending the General Order of the Board No. 301, dated the 22nd July, 1920, and the powers conferred upon the Board by Chapter 66 of the Acts of Parliament of Canada, 1920.*

File No. 30331.51.

Upon its appearing to the Board that a permit system is essential to render more effective the intent and purpose of General Order No. 301, dated the 22nd day of July, A.D. 1920; and in pursuance of the powers conferred by the said Act, chapter 66, 1920,—

*The Board doth order:* That the said General Order No. 301, dated the 22nd day of July, A.D. 1920, be, and it is hereby, amended by the addition thereto of the following words, namely: "And in the case of each shipment by water to the United States an export permit must first be secured from this Board".

F. B. CARVELL,  
*Chief Commissioner.*

OTTAWA, September 24, 1920.

## GENERAL ORDER NO. 313

*In the matter of the General Order of the Board No. 303, dated August 13, 1920, providing that the proportions of through rates, fares, and charges between the United States and Canada, in both directions, in effect at the date of the Order, accruing within Canada, may, by general or blanket supplement to existing tariffs, be increased to conform to the increased rates, fares, and charges authorized by the Interstate Commerce Commission by Order dated July 29, 1920.*

File No. 30437.

Whereas by Special Permission No. 50450, dated Washington, D.C., August 26, 1920, the Interstate Commerce Commission authorized United States carriers or their agents to file, upon one day's notice, special supplements correcting increased rates and charges filed under but not in conformity with its Order dated July 29, 1920, as amended August 11 and August 18, 1920,—

*It is therefore ordered:* That the said General Order of the Board No. 303 be, and it is hereby, amended to provide that the said corrections, where necessary, be made in the general or blanket supplement authorized by the general order of the Board No. 303, dated August 13, 1920, upon one day's notice.

S. J. McLEAN,  
*Assistant Chief Commissioner.*

OTTAWA, September 22, 1920.

## GENERAL ORDER No. 314

*In the matter of the question of the coal supply of Canada and the powers conferred upon the Board by Chapter 66 of the Acts of the Parliament of Canada, 1920.*

File No. 30331.1

Upon its appearing to the Board that there is a real or apprehended scarcity of coal, with a view to conserving the supply and so far as possible ensuring the equitable

SESSIONAL PAPER No. 20c

distribution and disposition thereof; in pursuance of the powers conferred upon the Board by the said Act, chapter 66, in amendment to the Railway Act, 1919, and under the said Railway Act,—

*The Board orders:* That the following "Regulations" governing the control of fuel supplies be, and they are hereby, prescribed for observance and use in Canada, as therein provided:—

## REGULATIONS

....

### PART A.

#### INTERPRETATION

(1) In these and all other regulations issued by the Board in its capacity as Fuel Controller for Canada, unless the context otherwise requires,—

(a) "Broker" means a person who buys and sells coal or arranges such transactions between buyer and seller, but in either event does not physically receive and handle the coal.

(b) "Wholesale dealer" means a person who physically handles and sells coal to a retail dealer.

(c) "Retail dealer" means a person who physically handles and sells coal to a consumer.

(d) "Dealer" means any wholesale or retail dealer.

(e) "Consumer" means a user of coal for domestic, industrial, or any other purposes.

(f) "Fuel Administrator" means any individual or board appointed under paragraph 2 of this part.

(g) "Fuel Commissioner" means any individual or board appointed under paragraph 4 of this part.

(h) "Coal" means coal or lignite.

(i) "Person" includes natural persons and bodies corporate.

#### ORGANIZATION AND LICENSING OF DEALERS

##### *Provincial*

(2) The Government of each of the provinces of Canada may appoint a Provincial Fuel Administrator or Board of Administrators for such province, and may create such central provincial organization as may be deemed necessary. Any expense so incurred shall be borne by each province.

(3) The powers and duties of Fuel Administrators so appointed shall, subject to any orders, regulations, or directions of the Board, be as follows:—

(a) To supervise the distribution of all coal and other fuel imported into or made available within such province.

(b) To develop the demand for and supply of wood and other coal substitutes to the greatest possible extent.

(c) To promote and administer any organization prescribed by these regulations within the province.

(d) To gather and compile, in collaboration with the Dominion Bureau of Statistics, statistics dealing with the production and consumption of fuel of all kinds within the province.

(e) To promote within the province the greatest development of any coal areas available.

(f) To issue orders to dealers, consumers, and others within the province regarding the distribution and use of coal.

(g) To license, as hereinafter provided, brokers, dealers, and others desirous of engaging in the business of selling coal.

(h) Generally to assist and advise the Board in regard to fuel matters and the enforcement of any orders or regulations that may from time to time be prescribed by the Board.

##### *Municipal*

(4) The council of any municipality may appoint a Local Fuel Commissioner or Board of Fuel Commissioners with such organization as may be deemed necessary. Any expenses so incurred shall be borne by the municipality.

11 GEORGE V, A. 1921

(5) On the petition of two-thirds of the dealers in any municipality, addressed to the Fuel Administrator, preferring complaint against any Fuel Commissioner, the said Fuel Administrator shall forthwith cause an investigation to be made into the said complaint, and if sufficient cause be shown may call upon the municipality to remove such officer.

(6) The duties of Fuel Commissioners shall be,—

- (a) To co-ordinate the work of fuel dealers in apportioning and delivering coal during any period of fuel scarcity within such municipality.
- (b) To institute when deemed necessary a system of controlling retail coal deliveries through orders on dealers within the municipality issued by the Fuel Commissioner.
- (c) Generally to assist the Fuel Administrator in enforcing such orders and regulations as may from time to time be made by the Board or by the Fuel Administrator.

#### *Dealers' Permits*

(7) Any person engaged in or who desires to engage in the business of selling coal as a broker, wholesale or retail dealer may be required by the Provincial Fuel Administrator to apply for a permit as hereinafter set forth in Form "A" or Form "B." Such permit, when issued, must be prominently exposed in the permittee's office, and the Provincial Fuel Administrator may order that no one shall commence the business of selling coal as a broker, wholesaler, or retailer without first obtaining a permit in said Form "A" or "B," as the case may be.

(8) Fees on a basis approved by the Government of any province may be charged for dealers' permits in such province, and such dealers' permits shall only be valid for the coal year within which they are issued.

(9) Dealers or brokers carrying on business and accepting orders for coal in more than one office, or who maintain branch offices within the same municipality or in other municipalities, may be required to secure a permit for each such separate office.

(10) Every application for a dealer's permit shall be in the Form "C," as hereinafter set forth, and shall be mailed by registered letter with all fees payable therefore to the Fuel Administrator for the province within which the applicant conducts business.

(11) On receipt of any application for a dealer's permit and the proper fee therefor, the Fuel Administrator shall, if the application be approved by him, mail to the applicant a receipt for the amount so paid, together with the said permit.

(12) On receipt by the Fuel Administrator of an application for a dealer's permit and the proper fee therefor, if the said application be not approved by him, the said fee shall be returned to the applicant, and a report stating the reason for disapproval shall forthwith be mailed by him to the said applicant.

(13) All fees collected by the Fuel Administrator in respect to dealers' permits shall be paid by him to the Government of the province, and shall be utilized by such province towards defraying any expenses incurred in connection with the Office of the Fuel Administrator for such province.

#### *Cancellation of Permits*

(14) In case any broker or dealer fails to obey any directions in writing issued by the Fuel Administrator or the Fuel Commissioner, or is found guilty of having given short weight, or in case there is other sufficient cause as to which the Fuel Administrator shall be the judge, the said Fuel Administrator may forthwith suspend or cancel any permit issued by him upon giving notice to the permittee by registered letter, and may afterwards renew such permit as he may in his discretion see fit.

### PART B

#### LOCAL CONTROL AND DISTRIBUTION

(1) The Fuel Administrator may give directions in writing to the Fuel Commissioner within any municipality respecting the equitable distribution and prompt delivery of coal therein not inconsistent with these regulations or with any orders of the Board that may be in force, and shall file a copy of such directions with the Board. The Fuel Commissioner shall forthwith mail a copy of the said directions to each dealer within the municipality by registered letter.

SESSIONAL PAPER No. 20c

*Restriction of Coal Deliveries*

(2) No dealer shall sell or deliver to a consumer, and no consumer shall receive any quantity of coal which, added to the quantity of such coal which such consumer may then have on hand, would constitute more than an estimated supply sufficient for such percentage of such consumer's normal needs to the 31st March, 1921, as may from time to time be determined by the Fuel Administrator.

(3) When so ordered by the Fuel Administrator, all dealers in any municipality selling coal direct to consumers shall require each consumer to sign a statement in Form "D" hereto.

(4) Notwithstanding the absence of any specific order under paragraph (3) by the Fuel Administrator any dealer selling coal direct to a consumer may require the said consumer to sign a statement in Form "D" hereto.

(5) The production by any dealer of a statement signed by the consumer as set forth in Form "D" hereto shall, if in conformity with Section (2), be prima facie evidence that no breach of section (2) hereof has been made by such seller.

*Restricting Use of Coal*

(6) The Fuel Commissioner, with the approval of the Fuel Administrator, may by registered letter issue orders to any or all fuel dealers within the municipality prohibiting such fuel dealers from supplying coal for any stated period, or until otherwise directed, to any individual consumer or group of consumers requiring coal for purposes not deemed vitally important.

(7) Upon the written recommendation of the Fuel Commissioner, the council of any municipality may make orders governing the curtailment in the use of coal or wood in public halls or other meeting places within the municipality.

(8) Anthracite coal of what is commonly known as prepared sizes shall not be used by any individual consumer for heating or power purposes except with the written consent of the Fuel Administrator.

(9) Whenever deemed desirable by the Fuel Administrator, he may by registered letter addressed to the Fuel Commissioner or to any consumer in any town or city within his Province, prohibit entirely or limit in any manner he may deem advisable the use of anthracite coal of what is commonly known as prepared sizes in any class of buildings whatsoever within such town or city.

Provided, however, that the owner or agent of any building so restricted may, on showing cause, obtain a permit in writing signed by the Fuel Administrator to use anthracite coal without any restriction.

(10) Whenever any formal order has been issued under paragraph (9) hereof, the Fuel Administrator shall forthwith cause a copy of such order to be inserted in at least one issue of any newspaper published in the town or city affected.

*Requisitioning of Coal*

(11) When in the judgment of the Fuel Commissioner an emergency exists, he may, subject to the approval of the Fuel Administrator, requisition any quantity of anthracite coal in the possession of any consumer in excess of the supply permitted under section (2) hereof, and may direct the disposal of such excessive supply of coal.

(12) Where a requisition is made pursuant to the provisions of section (11) hereof, the Fuel Commissioner may authorize any local dealer to enter the premises of the consumer named therein and remove therefrom the required quantity of coal, and deliver the same to such person as he may direct. Such dealer shall be liable to pay to the owner of such coal the compensation due to him under section (13) hereof, and may charge the person to whom it is delivered such price per ton as will reimburse him the amount of such compensation plus actual cost of delivery and profit not exceeding twenty-five cents per ton.

(13) The compensation to be paid the owner of any coal so requisitioned shall be the actual value of the said coal at retail at the time of such requisitioning, or at his option, the actual cost at the time of purchase plus seven per cent interest to date of requisition. In case of disagreement the decision of the Fuel Commissioner shall be final.

(14) For his information and assistance in carrying out the provisions of paragraphs (11), (12), and (13) hereof, the Fuel Administrator may require the council of any municipality:—

- (a) To cause an immediate and independent investigation to be made into the local fuel situation, and to report the result to him.

11 GEORGE V, A. 1921

- (b) To state by formal resolution whether or not in its opinion an emergency justifying requisitioning of coal under the preceding provisions actually exists.
- (c) To submit to him recommendations with regard to any matter connected therewith.

#### *Delivery Facilities*

(15) The Fuel Commissioner may, by written notice directed to any fuel dealer, carter, or any other person within the municipality, requisition the use of any horse, wagon, sleigh, and other delivery equipment owned by or being in the custody of such person for the purpose of expediting coal deliveries during any period when an emergency is deemed by such Fuel Commissioner to exist. He shall also fix the remuneration and make directions for the use of such equipment.

#### *Reports and Notices*

(16) The Fuel Commissioner may, by written notice, require any dealer within the municipality to furnish him daily with statements showing—

- (a) Tonnage of coal of various classes received the previous day and total quantity on hand.
- (b) A list of orders for coal booked by him the previous day.
- (c) A list of coal deliveries showing quantity by class and name and address of each recipient made by him the previous day.
- (4) The prices charged for coal so delivered.

(17) Every retail coal dealer may be required by the Fuel Commissioner to post in a prominent place in that portion of his office to which the public has access, a conspicuous typewritten or printed notice containing a list of prevailing retail prices of all classes and sizes of coal handled by him with cash discounts allowed, if any.

(18) Every retail coal dealer may be required to notify the Fuel Commissioner of any proposed changes in the selling prices of coal or extra charges to be imposed for long haul deliveries, or for any other reason, or for deduction made from standard prices in connection with yard deliveries.

#### PROSECUTIONS AND PENALTIES

(19) No information shall be laid by anyone excepting the Board against any dealer or broker without first submitting the facts to the Fuel Administrator and obtaining his consent in writing, and in all cases where information is laid by any municipal authority under these regulations, such municipality shall be entitled to receive all fines imposed in such cases.

(20) Any (a) dealer or other person contravening any of the provisions of these regulations, or failing to observe any directions of the Board or of the Fuel Administrator under these regulations, or making a false statement in the form set out in paragraphs (3), (4), or (16) of Part B hereof, knowing the same to be false; or (b) consumer of coal who, within ten days following the receipt of any request in writing from the Provincial Fuel Administrator or from the Local Fuel Commissioner, fails to furnish any information so called for respecting the fuel requirements or consumption for any specified period, or respecting the heating or power equipment of any premises occupied by him or in his charge as tenant, agent, or owner, or who furnishes false information in such matters to the said Fuel Administrator or Fuel Commissioner knowing the same to be false, shall be guilty of an offence, and shall be liable for each such offence to a penalty of not less than \$20 and not more than \$5,000, in the discretion of the court before which the same is recoverable.

(21) Where an information is laid against any dealer or broker for an offence under paragraph (12) hereof, the onus shall be upon the defendant to establish that the prices charged by him did not exceed those authorized by these regulations.

S. J. McLEAN.

*Assistant Chief Commissioner.*

OTTAWA, October 5, 1920.

SESSIONAL PAPER No. 20c

GENERAL ORDER No. 314

FORM "A"

PERMIT TO ACT DURING THE COAL YEAR 1920-21 AS BROKER, WHOLESALE DEALER, OR RETAIL DEALER IN COAL PRODUCED IN CANADA EXCLUSIVELY.

In accordance with the General Order No. 314 of the Board of Railway Commissioners for Canada, under paragraph 7 of Part "A" of the said Order, dated the 5th October, 1920, permission is hereby granted to..... of ..... to act as broker, wholesale or retail dealer in coal produced in the Dominion of Canada exclusively.

This permit is not transferable, and is valid until the 31st March, 1921, only.

The issuance of this permit does not relieve the above concern of the necessity for obtaining any other permit or license that may be required under Dominion, provincial, municipal or other authority.

..... Fuel Administrator for the Province of .....

Date.....192..

(This permit to be issued in triplicate, one copy to be mailed or delivered to (a) the permittee, one to (b) the Board of Railway Commissioners for Canada, and one (c) to be retained by the Provincial Fuel Administrator issuing the same.)

FORM "B"

PERMIT TO ACT AS BROKER, WHOLESALE DEALER, OR RETAIL DEALER IN COAL IN CANADA FOR THE COAL YEAR 1920-21.

In accordance with General Order No. 314 of the Board of Railway Commissioners for Canada, under paragraph 7 of Part "A" of the said Order, dated the 5th October, 1920, permission is hereby granted to..... of ..... to act as broker, wholesale dealer, or retail dealer in coal in the Dominion of Canada.

This permit is not transferable, and is valid until the 31st of March, 1921, only.

The issuance of this permit does not relieve the above concern of the necessity for obtaining any other permit or license that may be required under Dominion, provincial, municipal, or other authority.

..... Fuel Administrator for the Province of .....

Date.....192..

(Permit to be issued in triplicate, one copy to be mailed or delivered to (a) the permittee, one to (b) the Board of Railway Commissioners for Canada, and one (c) to be retained by the Provincial Fuel Administrator issuing the same.)

FORM "C"

APPLICATION FOR COAL DEALER'S PERMIT

Date.....

SIR,—Under paragraph (10) of Part "A" of General Order No. 314 of the Board of Railway Commissioners for Canada, dated the 5th October, 1920, application is hereby made for a permit to act as broker, wholesale, or retail dealer in coal in Canada, as indicated hereunder.

..... (State whether broker, wholesale dealer, or retail dealer.)

11 GEORGE V, A. 1921

During the twelve months commencing the 1st of April, 1919, and ending the 31st March, 1920, the amount of coal of all grades delivered by us was..... net tons, and I hereby certify that the above information is correct.

Strike out either paragraph (a) or paragraph (b), so as to show which kind of permit is desired. (a) I desire a permit to deal in coal produced in Canada only; or (b) I desire a permit to deal wholly or partly in imported coal.

Remittance of \$..... is enclosed herewith, based on the scale of fees set forth below.

The permit should be made out in the name of..... (State name of company or firm in full.)

All communications from the Board of Railway Commissioners for Canada or the Provincial Fuel Administrator should be addressed to..... (State name of official and position.) at this address..... (State address.)

Name of company or firm.....

Name of official or partner.....

This application must be signed by an official or a partner.

Scale of Fees Payable to Fuel Administrator for Dealer's Permits. (To be set forth hereunder.)

FORM "D"

Consumer's Statement under paragraph (3), Part "B," of the General Order of the Board of Railway Commissioners for Canada, No. 314, dated the 5th October, 1920.

..... of ..... (Name of applicant) (city, town, or village) in ..... hereby applies to ..... (Street and number) (Name of Dealer) coal dealers for ..... tons of ..... tons of ..... tons of ..... making a total of ..... tons of anthracite coal and ..... tons of other coal.

It is hereby certified

(1) That the undersigned now has on hand at the premises..... (Street and number) for which the said coal is required, the following estimated quantities of the same class and grade of coal, namely: ..... tons of ..... tons of ..... tons of ..... making a total of ..... tons of anthracite coal, and ..... tons of other coal.

(2) That the applicant's total normal requirements for the said premises of the same class and grades of coal for the year ending 31st March, 1921, are estimated at ..... tons of anthracite, prepared sizes, including pea ..... tons of anthracite, smaller varieties;..... tons of bituminous.

SESSIONAL PAPER No. 20c

(3) That during the year ending 31st March, 1920, the undersigned actually used for the said premises the following coal:

- .....tons of anthracite, prepared sizes, including pea
- .....tons of anthracite, smaller varieties.
- .....tons of bituminous.

(4) That this is the only order given by the applicant for any coal of the same class or grade as now applied for since the 1st of April, 1920, except as follows:

.....  
.....

(5) That the quantity applied for above, together with the quantity of the same class or grades which the undersigned now has on hand, will not exceed the maximum supply permitted under paragraph (2), Part "B," of the General Order of the Board of Railway Commissioners for Canada, and any amendments thereto, issued through the Fuel Administrator or otherwise.

(6) The undersigned (if a farmer) hereby affirms that he has no supply of wood available on his property.

The foregoing statement is declared to be correct in every particular.

Dated at ..... this ..... day of ..... 192..

.....  
(Signature of applicant)

Witness .....

I certify that the above order is accepted and entered on our books.

.....  
(Signature of applicant)

*Important.*—This form must be mailed to the Local Fuel Commissioner. If no such officer is available, it must be kept on file by the dealer until such time as a Local Fuel Commissioner is appointed.

GENERAL ORDER No. 315

*In the matter of the application of the Department of Health for the Dominion of Canada, hereinafter called the "applicant," under the provisions of the Railway Act, 1919, for permission to place signs dealing with the prevention and spread of venereal disease in coaches and railway station lavatories of railway companies operating in Canada under the jurisdiction of the Board.*

File No. 30525

Upon its being represented to the Board that the signs in question are issued under the authority of the Department of Health of the Dominion of Canada, and reading what is filed in support of the application,—

*The Board orders:* That permission be granted the applicant to place signs dealing with the prevention and spread of venereal disease in all coaches and station lavatories of railway companies in Canada subject to the jurisdiction of the Board: Provided that a notation be carried on the bottom of each copy of the sign set up or placed under the provisions of this order to the effect that the same is issued under the authority of the Department of Health for the Dominion of Canada.

S. J. McLEAN,  
*Assistant Chief Commissioner.*

OTTAWA, September 29, 1920.

11 GEORGE V, A. 1921

## GENERAL ORDER No. 316

*In the matter of the question of the coal supply of Canada; and in the matter of expediting the transportation performance of coal-carrying equipment in Canada, and the powers conferred upon the Board by Chapter 66 of the Acts of the Parliament of Canada, 1920.*

File No. 30331.4001

Upon its appearing to the Board that there is a shortage of coal-carrying equipment, and that the rate at which coal cars have been and are being unloaded is impeding the full utilization of available equipment; and in pursuance of the powers conferred by the said Act, chapter 66, 1920,—

*The Board doth order:* That whenever, by reference from the Board or otherwise, it comes to the knowledge of the Fuel Administrator for the time being of any province, duly appointed by the Government of such province, that any freight car containing coal or coke has remained under load at its destination or elsewhere on any railway in Canada for a longer period than six days after arrival, the Fuel Administrator may notify the consignee by registered mail or by telegram that unless the said car is unloaded, or furtherance order given as the case may be, within two days after date of such notice, the Fuel Administrator will take the action hereinafter outlined, and the Fuel Administrator may thereupon authorize the railway company to seize the contents of the said car and summarily offer the same for sale to the municipality at which the said car is seized, and to any coal or coke dealers at the said point, and to sell the same to the municipality or the dealer offering the highest price therefor; and after paying all charges that may be due and chargeable thereon, as well as the expenses connected with the seizure and sale, the railway company shall pay the balance, if any, of the proceeds of such sale to the consignee or to the consignor, as their interest may appear.

▲ *The Board doth further order:* That any Fuel Administrator taking action under the foregoing paragraph shall thereupon report to the Board what action has been taken by him, together with recommendations for any further action he may deem necessary.

S. J. McLEAN,

*Assistant Chief Commissioner*

OTTAWA, October 5, 1920.

## GENERAL ORDER No. 317

*In the matter of the application of the Railway Association of Canada, on behalf of railway companies subject to the jurisdiction of the Board, for free transportation under Section 345 of the Railway Act, 1919.*

File No. 496-29

Upon reading the application and considering what has been urged in support thereof,—

*The Board orders:* That the railway companies subject to the jurisdiction of the Board be, and they are hereby, permitted, until further Order, to issue free transportation in the following instances, namely:—

- (a) Agents of the Immigration and Colonization Departments, Provincial Governments of Ontario, Quebec, New Brunswick, Nova Scotia, and Prince Edward Island, actually accompanying parties of immigrants from the Atlantic seaboard to points within their respective provinces, or when travelling to the seaboard for this purpose.

## SESSIONAL PAPER No. 20c

- (b) Railroad Y.M.C.A. officers and employees bona fide engaged in railway work and dependent members of their families over railway upon which railroad branch of Y.M.C.A. at which employed is located; also such general officers of the Y.M.C.A. as are bona fide engaged in railway work.
- (c) Such officers and agents of the Salvation Army as are bona fide engaged in immigration work.

OTTAWA, October 27, 1920.

S. J. McLEAN,  
*Assistant Chief Commissioner.*

---

 GENERAL ORDER No. 318

*In the matter of the General Order of the Board No. 314, dated October 5, 1920, adopting regulations governing the control of fuel supplies.*

File No. 30331.1.

Whereas it is deemed desirable by the Board that the said regulations be amended to provide for the distribution of coal at fair and reasonable prices,—

*It is accordingly ordered:* That the said General Order No. 314, dated October 5, 1920, be, and it is hereby, amended by substituting for paragraph (h) in section 3, part "A" of the order the following, namely:—

"(h) To fix and determine, in case of need and subject to the approval of the Government of the province, the maximum prices at which any or all classes and grades of fuel may be sold and distributed within any municipality,"

And adding, as paragraph (i) to the said section 3, the following:

"(i) Generally to assist and advise the Board in regard to fuel matters and the enforcement of any orders or regulations that may from time to time be prescribed by the Board."

OTTAWA, November 13, 1920.

S. J. McLEAN,  
*Assistant Chief Commissioner.*

---

 GENERAL ORDER No. 319

*In the matter of the complaint of the Premier Milling Company of Portage la Prairie, Manitoba, against the increase, on August 26, 1920, of the charge for milling grain in transit in Canada in connection with the International movement from one to one and one-half cents per one hundred pounds.*

File No. 8641.16.

Upon its appearing that the Canadian Pacific and the Grand Trunk Pacific Railway Companies on October 25, 1920, and the Canadian National Railways on November 1, 1920, voluntarily reduced the said charge for milling grain in transit in Canada to one cent per one hundred pounds; upon reading what is alleged in support of the complaint and on behalf of the Winnipeg Board of Trade and the Canadian Pacific Railway Company; and upon report and recommendation of the Chief Traffic Officer of the Board,—

*It is declared:* That the proper charge for milling in transit within Canada of grain, the product of which is reshipped to the United States, was one cent per one hundred pounds on and after the 26th day of August, 1920.

OTTAWA, November 30, 1920.

F. B. CARVELL,  
*Chief Commissioner.*

11 GEORGE V, A. 1921

## GENERAL ORDER No. 320

*In the matter of the application of the National Dairy Council of Canada, herein-after called the "Applicants" for an Order requiring the carriage of pasteurized cream by express at the rates for ordinary cream.*

File No. 4397.53.

Upon hearing the application at the sittings of the Board held in Ottawa, November 3, 1920, the applicants, the Express Traffic Association of Canada, and the Dominion and Canadian Express Companies being represented at the hearing, and what was alleged,—

*The Board orders:* That pasteurized cream be carried by express companies subject to the jurisdiction of the Board at the same rates as ordinary cream; and that the Express Classification for Canada No. 4, and special tariffs published and filed to apply on "Cream," be amended accordingly.

F. B. CARVELL,  
*Chief Commissioner.*

OTTAWA, December 9, 1920.

## GENERAL ORDER No. 321

*In the matter of Sections 167 and 170 of the Railway Act, 1919, and the question of the form evidence of the Board's approval of route maps or location plans thereunder shall take.*

File No. 29383.1.

The matter having been considered at a meeting of the Board held in the Chief Commissioner's office, Tuesday, November 30, 1920, at which were present the Chief Commissioner, the Assistant Chief Commissioner, the Deputy Chief Commissioner, and Commissioners Boyce and Rutherford, it was decided that all route maps and location plans approved and sanctioned by the Board be signed by the Chief Commissioner.

*The Board accordingly so orders and declares.*

F. B. CARVELL,  
*Chief Commissioner.*

OTTAWA, December 2, 1920.

## GENERAL ORDER No. 322

*In the matter of the complaint of the Brotherhood of Locomotive Engineers and the Brotherhood of Locomotive Firemen and Enginemen with regard to Special Instruction "E" Canadian Pacific Railway Timetable, covering station limits.*

File No. 4135.26.

Upon hearing the complaint at the sittings of the Board held in Ottawa, November 4, 1919, the complainants, the Canadian Pacific Railway Company, and the Canadian National Railways being represented at the hearing, and what was alleged,—

*The Board Orders:* That all railway companies subject to the jurisdiction of the Board be required to withdraw Special Instruction "E" from their respective working timetables, and hereafter observe the Uniform Code of Rules for Canadian railways approved by the General Order of the Board No. 42, dated July 12, 1909; the necessary changes and instructions to employees to become effective on the 1st day of June, 1921.

F. B. CARVELL,  
*Chief Commissioner.*

OTTAWA, December 10, 1920.

SESSIONAL PAPER No. 20c

GENERAL ORDER No. 323

*In the matter of the application of railway companies subject to the jurisdiction of the Board for approval of reduced standard passenger fares, to become effective January 1, 1921.*

File No. 29996.25.

Whereas supplements to standard passenger tariffs have been filed by the under-mentioned railway companies, to become effective January 1, 1921, on the reduced basis prescribed by the judgment of the Board dated September 6, 1920, and General Order No. 308, dated September 9, 1920.—

*The Board Orders:* That the following supplements to standard passenger tariffs be, and they are hereby, approved; the said supplements to be published in at least two consecutive weekly issues of the *Canada Gazette*, prescribed by the following notice:—

“The undermentioned supplements to standard passenger tariffs, effective January 1, 1921, having been filed for the approval of the Board of Railway Commissioners for Canada, and having been found by the Board to be in accordance with its judgment, dated September 6, 1920, and its General Order No. 308, dated September 9, 1920, and having been approved by its General Order No. 323, dated December 14, 1920, the same are hereby published.”

GENERAL ORDER No. 325

*In the matter of the question of the adoption of a standard size for cattle-pass construction.*

File No. 27497.2.

Upon reading what has been filed in this matter on behalf of the railway companies, the reports of the Chief and the Assistant Chief Engineers of the Board; and in pursuance of the powers conferred upon it by Sections 272 and 287 of the Railway Act, 1919, and of all other powers possessed by the Board in that behalf,—

*The Board Orders:* That all cattle passes hereafter constructed by railway companies within the legislative authority of the Parliament of Canada be at least five feet wide and six feet high, which dimensions are hereby required to be adopted as a standard for cattle-pass construction, unless otherwise ordered by the Board where, upon application, it is shown that special conditions call for a departure from such standard.

F. B. CARVELL,  
*Chief Commissioner.*

OTTAWA, December 20, 1920.

---

CIRCULAR NO. 186

January 5, 1920.

RULES FOR WIRES ERECTED ALONG OR ACROSS RAILWAYS

Case 4704.

Referring to Circular No. 167, dated June 19, 1918, to the effect that under the provisions of the old Act and the amendment of 1911, section 7, c. 22, General Order No. 231, dated May 6, 1918, and the rules thereby adopted and confirmed, applied only to construction *across* a railway.

Section 372 of the Railway Act, 1919, is not so limited and applies to construction *along* as well as *across* a railway.

Where, therefore, the construction, whether along or across the railway, is by consent and in accordance with the Standard Conditions and Specifications set out in the schedule to General Order No. 231, and approved by that order, no further leave of the Board is necessary.

Yours truly,

A. D. CARTWRIGHT,  
*Secretary.*

11 GEORGE V, A. 1921

## CIRCULAR No. 187

February 10, 1920.

## SPECIAL ORDERS DISPENSING WITH STANDARD CLEARANCES

File 1750-18

It has been decided by the Board that in future wherever the standard clearances provided by General Orders of the Board are relaxed upon special conditions, the order granting the less-than-standard clearances will be subject to the condition that the applicant company undertake to keep its employees off the tops and sides of cars (as the particular case may call for) when operating on the sidings or tracks and so long as the said undertaking shall be performed.

By Order of the Board,

A. D. CARTWRIGHT,  
*Secretary, B.R.C.*

## CIRCULAR No. 188

March 9, 1920.

## PROCEDURE BY BOARD AS TO SERVICE

File 8654.

In correspondence with the Board, various railway companies contend that there would be a saving of time in handling complaints if, in cases where complaints are forwarded to the Board and the Board assumes the burden of making service thereof, the complaints were taken up with the legal department of the railway instead of being handled through the local agent in Ottawa.

The Board desires each railway company to intimate the practice which it prefers to have carried out in this respect.

After the written submissions have been considered, the modifications, if any, which may be introduced by the Board in respect of service of complaints will in no way supersede the provisions of section 55 of the Railway Act and in particular will not modify the obligation provided for in subsection 2 of section 55 as to the maintenance of an agency book in the office of the Secretary, said book to contain the information as provided for in the subsection.

By Order of the Board,

A. D. CARTWRIGHT,  
*Secretary.*

## CIRCULAR No. 189

March 29, 1920.

File 18540.25.

*Re* CHANGING THE NAMES OF STATIONS

Applications are from time to time made to the Board by the residents of different localities for orders requiring railway companies to change the names of stations along their respective lines of railway, to which replies have invariably been made that the Board has no power to make the orders applied for; that the railway companies themselves are the proper, in fact the only, parties to afford relief in such cases, unless, as has happened in some instances, a change in the name of a post office is desired, when, of course, the application would be to the Post Office authorities at Ottawa.

## SESSIONAL PAPER No. 20c

It is deemed advisable that the information be set out in the form of a circular for insertion in the printed Judgments, Orders, Regulations, and Rulings of the Board, to be available for reference and as a ruling of the Board for the benefit of the residents of any community desiring in the future a change in the name of a station or post office.

By Order of the Board,

A. D. CARTWRIGHT,  
*Secretary.*

---

CIRCULAR No. 190

May 20, 1920.

## REPORTING OF ACCIDENTS

File No. 45.

In connection with General Order No. 244, dated July 26, 1918, as amended by General Order No. 251, the Board desires to point out that section 285 of the Railway Act of 1919 defines the words "conductor or other employee," referred to in clause 2 of the said general order, as follows:—

"The conductor or other employee in charge of the train, place or structure in connection with which such accident occurred".

The Board further desires to point out that strict compliance with the said general order will be expected, and to say that, in every case where the railway, or its conductor or other employee, either wilfully or negligently fails to carry out the said requirements, the imposition of penalties, as provided for in section 412 of the Railway Act, will be enforced.

For the better information of the railways, and the conductor or other employee, section 412 is subjoined:—

"412. (1) Every railway company which wilfully or negligently omits to give immediate notice as by this Act required, with full particulars, to the Board of the occurrence, upon the railway belonging to such company, of any accident attended with serious personal injury to any person using the railway, or to any employee of the company, or whereby any bridge, culvert, viaduct or tunnel on or of the railway has been broken, or so damaged as to be impassable or unfit for immediate use, shall forfeit to His Majesty the sum of two hundred dollars for every day during which the omission to give such notice continues.

(2) Every conductor or other employee who makes a report to the company of the occurrence of any such accident and fails, wilfully or negligently, to notify the Board of the same by telegraph as soon as possible after such accident, is guilty of an offence and liable, on summary conviction, to a penalty not exceeding one hundred dollars".

Railway companies are required to see that a copy of this circular is placed in the hands of all concerned.

By Order of the Board,

A. D. CARTWRIGHT,  
*Secretary.*

# REPORT

OF THE

## DEPUTY MINISTER OF MARINE AND FISHERIES.

To the Hon. C. C. BALLANTYNE,  
Minister of Marine and Fisheries.

SIR,—I have the honour to submit herewith my report for the fiscal year ended March 31, 1920.

It has been the aim of the department in its reports published during the war period to outline, first, the yearly losses due to enemy action and marine risk suffered by the chief maritime nations of the world, belligerent and neutral alike (Germany recognizing no neutrals in her submarine campaign), second, the extent to which these losses were repaired by the building of ships, and third the maritime standing of these nations during each war year, in comparison with one another, and also with their establishments prior to the war.

The outstanding feature of the shipping situation during the war, apart from the wholesale destruction of the world's merchant marine, has been the rapid rise of the United States among shipbuilding nations; whether she will continue to hold her present position, or not, remains to be seen.

The disabilities under which Britain laboured in the war up-keep of her merchant marine were given in detail in last year's report, these have now been largely removed, and she will be in a much stronger position to challenge competition; the output of the Dominions too, especially that of Canada will in the next decade be an appreciable asset in the sum total of the Empire's merchant marine.

## SESSIONAL PAPER No. 21

Lord Pirrie, Controller-General of Merchant Shipbuilding in Britain, in the course of an article in "Modern Transport on "The Future of British Shipbuilding" from which these tables are taken, points out, that in the few years immediately preceding the war the British output of merchant shipping averaged 1,750,000 gross tons per annum, he puts the average yearly marine loss at 250,000 tons, making the progressive increase of the British Merchant Marine one and a half million tons per annum, of this a small proportion was disposed of yearly to foreign countries, therefore, although the net British loss amounts to only 3,000,000 tons, the gross loss for the nation's maritime requirements is about 8,000,000 tons.

This principle commonly termed the five per cent principle of course also applies to all the other nations suffering net losses; thus in the case of Norway as her pre-war tonnage was 2,600,000, in four years time this ought to have increased by 520,000 tons; as her net loss was 1,260,000 tons, her gross loss, or shortage to fulfil the proper requirements of her sea-carrying trade is 1,780,000 tons.

Norway's proportionate losses were appalling; through new construction and purchase during the war she obtained 260,000 tons, her losses by enemy action and marine risk were therefore 1,520,000 tons, out of a pre-war tonnage of 2,600,000, or very nearly sixty per cent.

In August, 1914, the world's total sea-going tonnage, exclusive of enemy countries, was 34,835,000, Great Britain contributing 18,356,000 tons, the United States including lake traffic 3,272,000, France 2,300,000, Italy 1,528,000, and Japan 1,012,000.

In November, 1918, the total gross tonnage was 33,041,000, a decrease of about five per cent, Britain's tonnage had decreased by 3,084,000, France's by 746,000, Italy's by 454,000, while United States' tonnage had increased by 4,196,000 and Japan's by 677,000. The strong position of the United States and of Japan is apparent.

Turning to new production for the years 1915 to 1918 inclusive, British output in 1915 in round numbers was 670,000 gross tons, United States 142,000; 1916, British 540,000, United States 240,000; 1917, British 1,200,000, United States 1,000,000; 1918, British 1,400,000, United States 2,260,000. It was not until 1917 that the United States commenced serious shipbuilding operations; in 1918 her output topped that of Britain by 860,000 tons.

Whereas before the war Germany was Great Britain's chief maritime competitor, now the United States is, a more satisfactory state of affairs, as whatever may be the rivalry it will probably be of a friendly nature and for the general benefit of mankind; it will be sometime before there is a likelihood of very keen competition in the world's sea-carrying trade, owing to the general shortage of tonnage; British shipping men accordingly view American shipbuilding activity with comparative calm.

When the era of competition does arrive, in order that Britain and America may best serve the general interests of world trade, it is essential that there should be complete understanding and co-operation between them, rather than any attempt to cut rates and obtain custom at the expense of each other.

The adoption of this attitude rests chiefly with the United States; Britain's heavy war losses of shipping and of trade alike, incurred in the allied cause, and America's immunity, and recent shipbuilding activity (entered into it is true largely on behalf of the Allies), place her in a position, should she so chose, to affect adversely the trade of the Empire to her own temporary advantage, though it is doubtful if undue competition would make for her permanent good.

America like Britain, though not in the same degree, has now need of an extensive merchant marine, and it is absurd to think that she would for a moment dream of scrapping her huge shipyards, built at great expense and under great

11 GEORGE V, A. 1921

difficulties: but the activities of both British and American yards will be needed for some years to come to restore the world's lost tonnage, and if they can eventually agree upon their building programmes so as not to increase unduly the total supply of tonnage, and upon their trade routes to insure a fair division of business and the profits accruing from it, it is likely to further the true interests of both, and certainly the interests of the world at large.

#### MERCANTILE SHIPBUILDING, 1919.

The returns here given are taken from the annual summary in Lloyd's Register, are in gross tons, and only include the outputs of the allied and neutral countries.

##### UNITED KINGDOM.

During 1919 there were launched from British yards 612 merchant ships of 1,620,442 tons (541 steamers of 1,584,920 tons, and 71 barges of 35,522 tons). These vessels included one wooden steamer and 53 vessels of reinforced concrete of which 41 were barges without propelling machinery, the remainder were steel vessels.

The output for 1919 exceeded that for 1918 by 272,322 tons, but was 311,711 tons less than the output for 1913, the first pre-war year.

Ninety-four per cent of the tonnage launched in 1919 was for home registration, the remaining six per cent for foreign owners; the latter comprising 29 steel steamers of 97,459 tons; France acquired 27,861 tons, Norway 20,054, and Greece 18,750.

The average tonnage of the ships launched excluding those of less than 500 tons was 4,006.

The outputs of the chief shipbuilding centres were: Glasgow 337,030 tons, Greenock 188,717, a total of 525,747 tons for the Clyde basin, an increase of 176,937 tons over the 1918 output; Sunderland 274,283 tons, Newcastle 239,836, total 514,119 for the Tyne district, a decrease of 26,758 tons from 1918; Belfast 213,720 tons, an increase over 1918 of 65,461 tons; Middlesborough 119,943 tons, West Hartlepool 82,233, a total of 202,176 tons for the Tees basin, a decrease of 18,180 tons as compared with the 1918 output.

At the opening of the year 1919, 1,979,952 tons of shipping were under construction in the United Kingdom, at the beginning of 1920 there were 2,994,249 tons, an increase of 1,014,000 tons of shipping in hand over the previous twelve months date.

##### UNITED STATES.

The American output for 1919 was 4,075,385 tons, an increase over that of 1918 of 1,042,000 tons; the steel tonnage exceeded that of 1918 by 1,431,000 tons, and the wood showed a decrease of 415,000 tons.

On the Atlantic coast 1,973,755 tons of steel ships were launched, an increase of 1,020,000 tons over the 1918 output. The tonnage launched on the Great Lakes totalled 495,559 tons, 64,000 tons more than in 1918; these were all sea-going steel ships.

The American steel tonnage included 137 steamers of between 5,000 and 6,000 tons, 251 between 6,000 and 10,000 tons, and five ships of over 10,000 tons each. Of the wooden ships 168 were over 2,000 tons, of these 103 were steamers, and the others sailing barges. Five steamers of reinforced concrete were built totalling 18,046 tons; two of these were of 5,000 tons burden.

The output of the United States for 1919 was 57 per cent of the world's output, and 74 per cent of the tonnage launched abroad.

At the beginning of 1920 the United States had 2,996,000 tons of shipping under construction.

## SESSIONAL PAPER No. 21

## JAPAN.

The output of Japan for 1919 was 611,883 tons, 121,959 tons in excess of the 1918 tonnage, and the highest on record for that country.

An idea of the strides made by Japan in the building of merchant ships may be gathered from the fact that her 1919 output nearly equals her output for the 22 years immediately preceding the war, 1892-1913.

Japan's 1919 tonnage included 48 ships of between 5,000 and 6,000 tons, and 22 of between 6,000 and 8,230 tons.

At the opening of 1920 Japan had 309,000 tons of shipping under construction.

## BRITISH DOMINIONS.

Canada launched during 1919, 271,264 tons of shipping, 13,000 tons more than in 1918. This included 28 steamers of 60,233 tons total, built on the Great Lakes. On the coast and on the St. Lawrence there were launched 12 steel steamers of between 5,000 and 6,000 tons each, and 80 wood steamers, 51 of which were between 1,000 and 1,200 tons, and 6 of between 2,000 and 2,700 tons.

The tonnage launched in all the other British Dominions reached 87,464 tons, a little less than one-third of the Canadian output. What is striking and almost astounding is that that remote corner of the Empire, the Hong-Kong district, was responsible for one-half of this tonnage, having built eight ships of between 5,000 and 5,806 tons burden.

The total tonnage launched in all the Dominions during the year amounted to 358,728 tons; this was 78,824 tons more than in 1918, and nearly equals the output for the 10 years 1908-17.

## SCANDINAVIAN COUNTRIES.

Denmark, Norway and Sweden launched 146,315 tons of shipping in 1919, the output being fairly evenly divided between these three countries, this was an increase of 32,859 tons over the 1918 production. One of these ships launched in Denmark was of 9,950 tons burden, and three others were over 4,000 tons each.

## HOLLAND.

The tonnage launched during 1919 reached 137,086 tons, 63,000 tons more than the 1918 total; this does not include vessels intended only for river navigation. Only three vessels of more than 5,000 tons were built, viz.,—two between 7,000 and 7,500 tons, and one of 9,700 tons built at Amsterdam.

Holland had in hand at the beginning of 1920, 328,000 tons of merchant shipping.

## ITALY.

This country built and put afloat ships totalling 82,713 tons in 1919, this includes for the first time the output of Trieste, 23,513 tons. Nine steamers were between 5,000 and 6,000 tons, and six between 6,000 and 8,500.

The Italian programme for 1920 amounts to 314,000 tons, nearly four times the 1919 production.

## SPAIN.

Spain's output for 1919 was 52,609 tons, about fifty per cent more than her 1918 total; the largest ship launched was of 5,700 tons burden.

## SUMMARY.

|   | Tons.     |
|---|-----------|
| United States .....                                   | 1,075,385 |
| United Kingdom .....                                  | 1,620,442 |
| Japan .....   | 611,883   |
| Canada, 271,264 tons; other Dominions, 87,464 .....   | 358,728   |
| Scandinavian countries (Denmark, Norway, Sweden)..... | 146,315   |
| Holland .....   | 137,086   |
| Italy.....  | 82,713    |
| Spain.....  | 52,609    |

The total output of allied and neutral shipping during 1919 amounted according to Lloyd's Register to 7,144,549 tons, an increase of 1,697,000 tons over the 1918 output, and of 3,811,000 tons over that of 1913, the pre-war record year.

Canada still retains her 1918 position, fourth on the list.

America shows an overwhelming superiority accounting as already stated for 57 per cent of the entire output of the allied and neutral nations; but if one turns to the shipping under construction at the beginning of 1920 it will be seen that America and Britain are almost exactly on a par, each having about 3,000,000 tons of merchant shipping in hand. America apparently is not prepared to maintain her terrific pace of building set in 1919, her programme for 1920 falling short by about 1,000,000 tons of her 1919 production; Great Britain, however, has increased her building programme for 1920 by about the same amount; it would seem that she may yet retain her ancient shipbuilding supremacy; time will show; but that America will always prove a most formidable competitor is beyond question.

Japan, too, evidently intends to ease her rate of building, having at the beginning of 1920, 309,000 tons of shipping under construction, as compared with an output of 611,883 tons for 1919.

Holland and Italy on the other hand are speeding up very markedly, the former having for 1920, 328,000 tons of shipping in hand, and the latter 314,000 tons, as compared with 1919 productions of 137,086 tons and 82,713 tons respectively.

There is another point to be considered in the comparison between American and British merchant tonnage output during 1919.

A shipbuilding number of the *Glasgow Herald* bearing date December 30, 1919, in giving the tonnage figures for the two countries (they are slightly higher in each case than those given by Lloyds) puts the indicated horse-power of the American tonnage at 2,591,210, of the British at 3,209,040; the American tonnage for 1919 though more than double the British in quantity is far from being double in effectiveness; the American ships are obviously much slower on an average than the British; and speed in the sea-carrying trades means much.

The *Glasgow Herald* thus sums up the situation: "The American tonnage for 1919 is more than double the British, but it is not necessarily twice as effective. In all probability it is very little more effective, because it includes many lake vessels and a large number of wooden ships of little sea-going value, while many of the fabricated steamers are less efficient on service than British-built vessels of similar sizes, and cost much more for maintenance.

The fact remains, however, that the capacity for doing an enormous amount of work has been proved, and only further training and the improvement and development of designs and methods of work are required to bring the general standard of quality up to the British level. After that there has to be considered (1) the demands of American shipping and (2) the question of comparative costs. If American shipping can be established on a world-wide basis it will support a very substantial home shipbuilding industry, while if the American costs can be made as low as those of the United Kingdom there will be competition for contracts on this side of the Atlantic.

## SESSIONAL PAPER No. 21

## ATLANTIC EMIGRANT TRAFFIC.

In the report of a British Board of Trade Committee on the position of shipping, and shipbuilding industries after the war, a part is devoted to the emigrant traffic from Europe before the war, and the methods by which German lines acquired a paramount share of it; it is very doubtful if these methods are generally known, and they are of great interest, as they show conclusively the German attitude in the conduct of their shipping trade.

In 1894 control stations were first established by Germany along the Russo-German frontier, after an outbreak of cholera in Russia, in order to prevent the spread of the disease by Russian emigrants, so far so good; Germany soon realized, however, that these control stations might be used to divert the stream of European emigration to her own lines, in the same year accordingly an order was passed placing the management of the control stations in the hands of the Hamburg-America, and North German Lloyd Companies, and not long afterwards the system was extended to cover the Southern as well as the Eastern frontier.

The German regulations provided (1), that the emigrants should be in good health, (2) that they should be furnished with a proper contract ticket for some steamship line, as well as with a railway ticket to the port of embarkation, and (3) that they should possess 400 marks; if the emigrant were travelling by a German line this last requirement was not enforced, if by a British one, failing to meet it, he was not allowed to pass beyond the control stations; this was not all, should the emigrant possessing a ticket for a British line, be in a position to comply with all the three requirements, he was subjected to all manner of delays and inconveniences, and an attempt was made to either bully or cajole him into shipping by a German line, if he still remained obdurate he was sent back to his place of departure.

Representations were made to the British Government by the Cunard, White Star, and other British lines pointing out the abuse of their control system by the Germans, and they were called upon for an explanation, but merely made evasive replies, and the system continued in full force with the results shown in the table below:—

STATEMENT showing the number of Third-class Continental Passengers carried by the United Kingdom and Continental Services of various Steamship Lines during 1913.

|   | Number. | Per cent. |
|---|---------|-----------|
| (a) From United Kingdom ports by transhipment or by subsequent call at a French port— |         |           |
| British lines.....  | 78,000  | 9         |
| American lines.....   | 23,000  | 3         |
| Total.....  | 101,000 | 12        |
| (b) From continental ports by direct services—  |         |           |
| British lines.....  | 91,000  | 11        |
| Enemy lines.....  | 417,000 | 50        |
| Other lines.....  | 220,000 | 27        |
| Total.....  | 728,000 | 88        |
| Total (all lines).....  | 829,000 | 100       |

It will be seen that 12 per cent of the Atlantic emigrant traffic was from United Kingdom ports, the remaining 88 per cent from continental ports; of the latter only 11 per cent was carried by British lines and 50 per cent by German; two lines alone the Hamburg-America and the North German Lloyd accounted for 40 per cent of it.

The principal German steamship lines operating just before the war, and all members of one group were:—

| Line.                          | Gross tons,<br>June 30,<br>1914. | Route.  |
|--------------------------------|----------------------------------|---|
| 1. Hamburg-America.....        | 1,093,000                        | All parts of the world except Australia and the East Indies.                  |
| 2. North German Lloyd.....     | 716,000                          | All parts of the world except East and West Africa and West coast of America. |
| 3. Hamburg-South America.....  | 268,000                          | South and Central America, and New York to South America.                     |
| 4. Hansa.....                  | 339,000                          | India, Red Sea ports, and South America.                                      |
| 5. German Australia.....       | 264,000                          | Australia and East Indies.  |
| 6. Kosmos.....                 | 179,000                          | West coast of America.  |
| 7. Roland.....                 | 75,000                           | West coast of America.  |
| 8. German East Africa.....     | 105,000                          | East Africa.  |
| 9. Woermann.....               | 112,000                          | West Africa.  |
| 10. Hamburg-Bremen-Africa..... | 43,000                           | West Africa.  |
| Total.....                     | 3,194,000                        |   |

These lines held 60 per cent of Germany's shipping, the most important line outside this group was the German Levant Line (155,000 gross tons).

The report thus sums up the effects of the German system of Control Stations:—

- (1) The most important part of the eastern emigration movement to America passed across Germany and Austria-Hungary.
- (2) This movement was tapped by the German lines at control stations erected at the chief frontier posts.
- (3) Most of the emigrants were forced to travel by the German lines on pain of being refused transit.
- (4) This control over the emigrant traffic was used by the German lines as a weapon for dividing their competitors and forcing unfavourable agreements on them.
- (5) The action of the German lines had the support of the German Government.

The salient features of the German mercantile marine before the war were:—

- (1) The German mercantile marine was essentially a "liner" fleet in which the passenger element was all important.
- (2) The bulk of German shipping was owned by a few powerful companies, more or less closely associated and working in close agreement.
- (3) The main strength of German shipping despite its world-wide activities was concentrated in the Atlantic trades; and the principal services of the two most powerful German companies—the Hamburg-America line and the North German Lloyd—were to the United States.

The Atlantic emigrant traffic before the war was the most profitable of all the sea trades, and the earnings of the German lines employed in it enabled them to adopt a policy of systematic rate cutting in the cargo services on other routes, aided it is true by a system of Government subsidies; the subsidies paid annually by the German Government to German steamship lines before the war were:—

To the North German Lloyd, £33,450 for services to China, the East Indies and Australia.

To the Hamburg-America Line, £10,000 for a service to Heligoland, Borkum, etc.

To the German East Africa Line, £67,500 for the service to East Africa.

The findings of this report show clearly the ruthless but effective methods by which Germany became the second of the maritime powers, under a very great handicap, as she was the last in the field; her system of control stations which served her in such good stead is now a thing of the past, as it is to be hoped is also Germany as a first-rate maritime power; but the Atlantic emigrant traffic

SESSIONAL PAPER No. 21

although quiet enough now, may in time be resumed, and like a stream dammed and then released, flow in a still stronger current to our shores; Germany's 50 per cent of it will have gone a begging, and should this trade revive, it will be very much in the interests of the Empire's merchant marine to secure as large a share of it as possible.

MERCHANT MARINE UP-KEEP COST.

The profits of a merchant marine are of course partly dependent upon the cost of its maintenance.

The following is an approximate comparison of the cost of wages and board per month between a British, an American, a Canadian, and a Japanese steam merchant ship of similar tonnage and dimensions; cost of the British ship for wages and board per month \$3,645.09, of the American \$6,711.10, of the Canadian \$2,303.50, and of the Japanese \$1,124.50.

The pay of the master of the Canadian ship was \$250 per month, that of the master of the Japanese ship \$100 per month; able seamen on the Canadian ship received \$16.20 per month, on the Japanese ship \$9 per month.

Taking the American cost of operating which is by far the highest as representing 100 per cent, the British is 54 per cent, the Canadian 34 per cent, and the Japanese 17 per cent; it is apparent that the American merchant marine is operated under a great disadvantage as compared with the Japanese, and to a lesser extent with the British and the Canadian; the Canadian operating costs are 20 per cent less than the British, 66 per cent less than the American, but nearly double those of the Japanese.

It is altogether likely when the period of competition sets in that America will lower her cost of operation, otherwise she will be heavily handicapped.

AMERICA'S MERCHANT MARINE.

On July 1, 1919 (the end of the American fiscal year), there was, excluding vessels of under 500 tons, a fleet of 2,506 sea-going ships, aggregating 8,106,956 gross tons, under the American flag, made up as follows:—

|  |                       |
|--|-----------------------|
| 359 freight and passenger steamers, totalling.....     | 1,344,505 gross tons. |
| 29 freight, passenger and refrigerator, totalling..... | 150,198 "             |
| 1,488 freight, totalling.....                          | 4,960,800 "           |
| 27 freight and refrigerator, totalling.....            | 152,513 "             |
| 188 steam tankers, totalling.....                      | 1,013,051 "           |
| 415 sailing ships, totalling.....                      | 485,889 "             |
| 2,506  | 8,106,956 "           |

This tonnage included 118 ships of 315,086 gross tons under the American flag but foreign controlled, leaving 2,388 ships of 7,791,870 gross tons under both American control and flag. There were also under American control 384 foreign vessels of 1,262,669 gross tons.

GROWTH OF AMERICAN SHIPPING.

The ensuing table prepared by the United States Commissioner of Navigation shows the growth of America's Merchant Marine from the years 1914 to 1919, inclusive:—

| July 1.   | Foreign Trade. | Coasting Trade. |                | Total.      |
|-----------|----------------|-----------------|----------------|-------------|
|           |                | Great Lakes.    | Sea and River. |             |
|           | Gross tons.    | Gross tons.     | Gross tons.    | Gross tons. |
| 1914..... | 1,076,132      | 2,882,992       | 3,969,614      | 7,928,688   |
| 1915..... | 1,871,543      | 2,818,000       | 3,699,886      | 8,839,429   |
| 1916..... | 2,191,715      | 2,760,815       | 3,517,119      | 8,469,649   |
| 1917..... | 2,446,399      | 2,769,824       | 3,654,814      | 8,871,037   |
| 1918..... | 3,603,706      | 2,708,523       | 3,612,289      | 9,924,518   |
| 1919..... | 6,669,726      | 2,635,680       | 3,601,894      | 12,907,300  |

11 GEORGE V, A. 1921

A glance at this table will show that American coastwise shipping, both Great Lakes, and Sea and River, between the years 1914 and 1919 has remained nearly stationary: comparing 1919 with 1914 there has been a decrease of 247,312 tons in the Great Lakes shipping, and of 367,720 tons in the sea and river shipping; but the overseas shipping in 1919 was slightly more than six times that in 1914.

Lloyds states that in 1914, 41.6 per cent of the world's sea-going tonnage was owned in the United Kingdom, 4.46 per cent in the United States; in 1919 the United Kingdom owned 34.1 per cent, the United States 20.4 per cent.

On October 1, 1919, the total sea-going American merchant tonnage of 500 tons and over, comprised, according to the American Bureau of Navigation, 2,991 vessels of 9,352,945 gross tons as follows:—

|  | Vessels. | Gross tons. |
|--|----------|-------------|
| Vessels 1,000 gross tons and over—   |          |             |
| Steam and gas .....  | 1,988    | 7,928,260   |
| Sailing .....  | 346      | 538,835     |
| Vessels 500 gross tons and over—   |          |             |
| Steam and gas .....  | 155      | 113,376     |
| Sailing .....  | 442      | 340,950     |
| Total .....  | 2,931    | 8,941,421   |
| Additional vessels of 500 gross tons and over adapted for merchant service transferred to the Navy or the War Department since April 6, 1917 ..... | 60       | 411,524     |
| Grand total .....  | 2,991    | 9,352,945   |

America's sea-carrying trade has naturally kept pace with the growth of her merchant marine.

In 1914, of the United States imports and exports, 9.7 per cent were carried in American bottoms; in 1919, 27.8 per cent.

There can be no doubt that America's export trade was for many years hampered by her lack of an adequate merchant marine; the returns for the years 1914 to 1919 show this clearly.

| Fiscal Years ending June 30. | United States Exports. |                |                |                   |               | Total.          |
|------------------------------|------------------------|----------------|----------------|-------------------|---------------|-----------------|
|                              | Europe.                | North America. | South America. | Asia and Oceania. | Africa.       |                 |
| 1914 .....                   | \$1,486,498,729        | \$ 528,644,962 | \$ 124,529,909 | \$ 196,994,033    | \$ 27,901,515 | \$2,364,579,148 |
| 1915 .....                   | 1,971,434,687          | 477,075,727    | 99,323,957     | 192,235,218       | 28,519,751    | 2,768,589,340   |
| 1916 .....                   | 2,999,305,097          | 733,024,674    | 180,175,374    | 377,386,709       | 43,591,031    | 4,333,482,885   |

The exports for 1919 were treble those for 1914, and nearly two-thirds of them went to Europe.

## SESSIONAL PAPER No. 21

## AUSTRALIAN MERCHANT MARINE.

The department is indebted to Mr. A. M. Bomphrey, Director of Australian Shipbuilding, and to Mr. G. H. Knibbs, Commonwealth Statistician, for the statements of Australia's merchant marine and shipbuilding programme here given:—

## VESSELS ON THE AUSTRALIAN REGISTER, JANUARY, 1919.

|   | Number. | Net Tons. |
|---|---------|-----------|
| Steam Vessels—  |         |           |
| Dredges and Tugs .....                                | 130     | 9,157     |
| Other Steam Vessels .....                             | 978     | 314,048   |
| Total Steam Vessels .....                             | 1,108   | 323,205   |
| Sailing Vessels—                                      |         |           |
| Fitted with auxiliary power .....                     | 1,066   | 42,121    |
| other .....   | 214     | 4,828     |
| Total Sailing Vessels .....                           | 1,280   | 46,949    |
| Barges, Hulks, Dredges, etc. not self-propelled ..... | 251     | 62,264    |
| Total Vessels on the Register .....                   | 2,639   |           |
| Total Net Tonnage .....                               |         | 432,418   |

## AUSTRALIAN SHIPBUILDING PROGRAMME.

The Australian programme provides for the construction of 24 steel cargo steamers as follows:—

## STEEL VESSELS.

| Locality.             | No. | Builders.                             | Type.                 |
|-----------------------|-----|---------------------------------------|-----------------------|
| Williamstown .....    | 6   | Commonwealth Ship Construction Branch | Steel Cargo Steamers. |
| Walsh Island .....    | 6   | New South Wales Govt.                 | " "                   |
| Cockatoo Island ..... | 2   | Commonwealth Navy Dept.               | " "                   |
| Maryborough (Q) ..... | 4   | Walkers Limited.                      | " "                   |
| Adelaide .....        | 4   | Poole and Steel                       | " "                   |
| Tasmania .....        | 2   | Mersey Shipbuilding Company, Ltd.     | " "                   |

The building programme for these 24 steel cargo steamers is divided into three parts: The first part comprises 6 ships of 5,500 tons deadweight each, and a sea speed of  $10\frac{1}{2}$  knots. These have all been built and launched, two at Williamstown, two at Walsh Island, and two at Cockatoo Island.

The second part includes 14 ships being built in the following yards: 2 at Commonwealth Dockyard, Williamstown; 3 at Government Dockyard, Walsh Island; 1 at Commonwealth Dockyard, Cockatoo Island; 4 at Walkers Limited, Maryborough, Queensland, and 4 at Poole and Steel's Adelaide, South Australia.

These vessels will be of 6,000 tons deadweight capacity with a sea speed of 11 knots. Six of these ships will be completed in eighteen months, six in two years, and the remaining two in two and a half years. All are being built on the Isherwood system of longitudinal framing.

The third consists of four large freighters, 520 feet in length, three-decked, of 12,800 tons burden, with a trial speed of 15 knots, and a sea speed fully loaded of 13 knots. These ships are being built at the Cockatoo Island and Walsh Island yards, and will be in commission in two and a half years time.

In addition to this Australian programme a contract has been entered into with the English Vickers for the delivery of three 12,000 ton steel freighters, length 520 feet, sea speed 13 knots, for delivery in January, June, and October, 1921, respectively; and with Beardmores for two exactly similar freighters, of the same speed, for delivery sometime during 1921.

Fourteen small wooden steamers as well have been built for the Australian Government in American yards.

In the space of two and a half years Australia will have in commission six ships of 5,500 tons each (these are already afloat); fourteen of 6,000 tons; five of 12,000 tons; and four of 12,800 tons; or a total additional sea-going tonnage of 228,200. Her sea-going tonnage will in this time have nearly doubled. But this is not all. Of this new tonnage not a ship will be under 5,500 tons burden, and a sea speed of 10½ knots; and 111,200 tons of it, or very nearly one-half, will be made up of ships of 12,000 tons burden with a sea speed of 13 knots.

It is quite within the bounds of probability that the new tonnage will be twice as effective as the old, owing to the superior size and speed of the ships.

No comment need be made on the importance attached by Australia to the possession of an efficient and up to date merchant fleet.

#### CANADIAN GOVERNMENT MERCHANT MARINE.

In the British Board of Trade Report already mentioned is the following pertinent comment: "Our findings and recommendations are accordingly based on two hypotheses, neither of which is likely to be contradicted, the first, that the maritime ascendancy of the Empire must be maintained at all costs, and the second, that the grave wastage sustained by the merchant marine during the war must, therefore, be repaired without delay"; as was shown in last year's report Britain's adverse balance of trade in pre-war times was offset practically entirely by the earnings of her merchant marine, coupling this fact with the axioms laid down by the British Board of Trade Committee, it is manifest what a benefit to the Empire as a whole the shipbuilding activities of the dominions are likely to be, and in particular the very handsome beginning made by Canada.

The tonnage built by the dominions frees an equal amount of British tonnage to resume the sea carrying trade on routes which had to be more or less abandoned during the stress of war.

In another part of this report under the heading "Canadian Government Shipbuilding Programme, 1919-20," will be found a detailed statement of the Canadian Government fleet of merchant ships built and building, comprising 63 vessels in all; the total cost of these vessels is \$73,029,435, the total deadweight tonnage 380,435, and the average cost per deadweight ton, \$191.96.

Recently the British Government sold to France 40 steel freighters, some of them built in Canada for the Imperial Munitions Board, at an average rate of \$185 per ton; in Japanese yards the present cost of steel vessels is \$187 per ton; in British yards the smaller freighters ranging from 3,000 to 4,000 tons are selling at \$190 per ton; the cost of the Canadian ships, taking everything into account, compares, therefore, not unfavourably with that of ships from British and Japanese yards, and favourably with the cost of the output of American yards, which runs from \$200 to \$220 per ton for steel freighters.

This fleet of 63 ships is made up as follows: Two ships of 10,500 tons building at the Halifax Shipyards; 25 of 8,390 tons, 10 of these are building at Canadian Vickers, Montreal. 6 by Coughlan and Sons, Vancouver, 2 at Halifax Shipyards, 2 at Prince Rupert, 2 at Victoria. 2 by Wallace Shipyards, Vancouver, and 1 by Davie S. R. Company, Lewis, P.Q.; 8 of 5,100 tons, 4 building by Tidewater Shipbuilding Co.; 2 by Wallace Shipyards, and 2 by Davie S. R.

## SESSIONAL PAPER No. 21

Company; 6 of 4,575 tons, 2 at Vickers, Ltd., 2 at Port Arthur, and 2 by British American Shipbuilding Company; 1 of 4,540 tons by Wallace Shipyards; 1 of 4,485 tons by the same firm; 9 of 3,990 tons, 7 by Collingwood Shipbuilding Co., 1 at Midland, and 1 at Port Arthur; 2 of 3,890 tons at Collingwood; 2 of 3,500 tons by the Dominion Shipbuilding Co., Toronto; 4 of 3,400 tons at Port Arthur, and 3 of 2,800 tons by the Nova Scotia S. & C. Company.

With the acquisition by the Canadian Government of the Grand Trunk, Grand Trunk Pacific, and the Canadian Northern Railways, the Canadian merchant fleet will serve as a feeder to these lines, and complete a great national transportation system by land and sea.

At the beginning of December, 1919, there were 12 Canadian freighters plying to Buenos Ayres, Montevideo, Barbados, Trinidad, Havana, Kingston (Jamaica), and Liverpool, Eng.; a rapid increase of trade having developed recently between Canada, and South America and the West Indies; the names and the deadweight tonnage of these vessels are: *Canadian Voyageur*, 4,575; *Canadian Pioneer*, 8,390; *Canadian Warrior*, 3,990; *Canadian Volunteer*, 4,485; *Canadian Trooper*, 4,540; *Canadian Recruit*, 3,990; *Canadian Signaller*, 3,990; *Canadian Trader*, 3,400; *Canadian Sailor*, 3,400; *Canadian Ranger*, 8,390; *Canadian Seigneur*, 8,390; *Canadian Miller*, 8,390.

At the end of the fiscal year 1919-20, Canada will have in commission a fleet of about 25 merchant ships plying not only to Britain, South America, and the West Indies, but also to Japan, Australia, South Africa, and India; India already contemplates a preference to Britain and the dominions on hides and skins, and Australia has a large surplus of wheat, wool, and meat and food-stuffs awaiting transhipment.

Although in February, 1919, there was a very considerable drop in ocean freight rates, they are still high as compared with pre-war standards, and for some years to come, until really keen competition occurs in the world's sea carrying trade, are likely to remain so; the earnings of the Canadian merchant marine by that time, ought to insure it a sufficient reserve to cover depreciation, and to meet competition in the world's markets.

## FOREIGN SHIPBUILDING BY CANADIAN YARDS.

The details of the building of steel and wooden ships for the British merchant marine by Canadian yards under the control of the Imperial Munitions Board, with a representative of the Ministry of Shipping, as expert advisor, are now available; in all 88 ships with a total deadweight tonnage of 349,163 were built. This total included 46 wooden vessels, tonnage 142,600, and 42 steel vessels, tonnage 206,563.

In order to cope successfully with this large building programme, all existing steel Canadian shipbuilding plants with one or two exceptions, were enlarged and improved, and new plants were organized at Bridgeburg, Ont., at Welland, Ont., under the title British American Shipbuilding Co., and at Midland, Ont. The intention at first was to build only steel vessels, but as tonnage requirements became more pressing, owing to heavy submarine losses, it was decided to build wooden ships as well.

The wooden shipbuilding in the east was undertaken by general contractors, who had first of all to establish their yards; and was carried out as follows, the vessels being standardized and built to a common plan: Grand and Horne, St. John, N.B., 2 vessels; Quinlan and Robertson, Quebec, 4; Quebec Shipbuilding and Repair Co., Ltd., 2; Three Rivers Shipyards, 2; Fraser, Brace & Co., Ltd., Montreal, 4; Toronto Shipbuilding Co., Ltd., 2; Great Lakes Dredging

11 GEORGE V, A. 1921

Co., Ltd., Fort William, 2; Southern Salvage Co., Liverpool, N.S., 1; total, 19 vessels, 58,900 tons.

Wooden shipbuilding operations on the Pacific coast comprised 5 ships of 3,100 tons built by the Foundation Co., Victoria, B.C.; 4 of 3,100 by the Cameron Genoa Co., Victoria, 4 of 3,100 by New Westminster Construction Co.; 6 of 3,100 by the Western Canada Construction Co.; 2 of 3,100 by the Pacific Construction Co., Coquitlan; 6 of 3,100 by William Lyall Shipbuilding Co., North Vancouver; total, 27 vessels, 83,700 tons.

In the steel plants Canadian Vickers, Montreal, built 4 ships of 7,000 tons each; J. Coughlan & Sons, Vancouver, 9 of 8,800; Wallace Shipyards, North Vancouver, 1 of 4,500 and 2 of 4,600; Port Arthur Shipbuilding Co., 1 of 4,300 and 6 of 3,400; Collingwood Shipbuilding Co., 2 of 2,900; Midland Shipbuilding Co., 3 of 3,400; British American Shipbuilding Co., Welland, 3 of 3,500; Canadian General Electric Co., Bridgeburg, 2 of 3,500; Pelsons Iron Works, Ltd., 6 of 3,500; Nova Scotia Steel and Coal Co., New Glasgow, 1 of 1,800 and 1 of 2,400; Car Ferry, Leonard, purchased 1 of 2,263 tons; total, 42 ships, 206,563 tons.

The British Government expended \$70,000,000 for the 349,163 tons of merchant shipping built in Canadian yards under the auspices of the Imperial Munitions Board, at an average cost of \$200.48 per deadweight ton. As will be seen in another part of this report, under the heading "Canadian Government Shipbuilding Programme 1919-20," the cost per deadweight ton of the 380,435 tons built and building for the Canadian Government merchant marine is \$191.96.

During the calendar year 1919, 80 vessels, with a total net tonnage of 99,340, were built in Canadian yards for foreign Governments; 2 of these were wooden sailing vessels, 60 steam wooden vessels, and 18 steel steamships; more than half the wooden vessels were built in Pacific Coast yards for the French Government.

The official returns follow:—

11 GEORGE V, A. 1921

DOMINION IRON AND STEEL COMPANY'S NEW ROLLING MILL PLANT, SYDNEY,  
CAPE BRETON.

On the 19th February, 1920, there transpired at Sydney an event of the utmost importance to the Canadian steel and shipbuilding trades, and another milestone in the industrial progress of Canada was passed; on that date in the above plant there was rolled the first Canadian steel ship's plate for one of the 10,500-ton Government Merchant Marine vessels being built at the Halifax Shipyards.

The steel ingot from which this plate was rolled weighed 5,700 pounds, and the dimensions of the plate were, length 331 inches, width 72 inches, thickness 0.64 of an inch; the weight of the finished plate ready for shipment was 4,400 pounds.

The new plant of the Dominion Iron and Steel Company covers about five acres of ground, is capitalized at \$5,000,000, and is unsurpassed by any other plant in America in up-to-date efficiency; it is the last word in modern roller plate mills.

The process of rolling this steel ship's plate was briefly this: The red hot ingot was grappled at the furnace door and swung on to a 10-ton Morgan crane, by which it was lowered to a moving platform and carried to the rolling mill proper, where the pressure is applied by revolving cylinders driven by the fly-wheel of a 4,000 horse-power motor, and played upon by continuous streams of water from above; as the ingot surged back after its first passage under the turning tons of metal, it was aligned on the carriage by men with iron rods, and ready for the next plunge.

Under the terrific pounding of the cylinders the ingot gradually assumed a plate shape, when the process of lengthening and flattening grew more rapid cumulatively, until the required thinness was attained; this was indicated by a micrometer at the top of the mill, the signal to stop rolling was then given, the thickness of the plate checked by a gauge applied to the side, and it was moved on, now at a dull red heat, to the straightening machine to be given a perfectly even surface.

It then passed to the horizontal rotary shearing machine which clipped both sides at once, and then to the vertical shearing machine or guillotine, which performed the same operation to the ends of the plate; it was then moved to what is termed the castor bed, a platform studded with iron rods a few feet apart, about 3 feet in height, and about one inch in diameter; on the top of each rod a castor is set at an angle, and on these castors the heaviest plates can be moved by means of iron rods with the greatest ease to the weighing machines. On being weighed, the plate is stamped and numbered, and deposited on the floor of the plant ready for shipment.

The time that elapsed from the taking of the ingot from the furnace to the depositing of this first plate rolled on the floor of the plant was almost exactly ten minutes.

The capacity of the mill is about 50,000 square feet of plate a day, varying in thickness from three-sixteenths of an inch to 2½ inches, and the maximum width of plate that can be rolled is 96 inches; the plates that can be turned out include all kinds for ships, bridges, boilers, or steel cars.

The department is indebted to Mr. K. H. Marsh, Chief Engineer of the Dominion Iron and Steel Company's Plant at Sydney, Cape Breton, for the description of the roller plate mill proper, and for the general description of the plant here given.

## DESCRIPTION OF ROLLER PLATE MILL.

The 110-inch by 36-inch three-high plate mill at the plant of the Dominion Iron and Steel Co. is of the Lauth type and consists of one stand of rolls served

## SESSIONAL PAPER No. 21

by tilting tables and driven by a 4,000 horse-power 83 R.P.M. motor through a set of cut herring-bone pinions. The middle pinion is driven by the motor while the upper and lower pinions are connected to the upper and lower mill rolls respectively through leading spindles and coupling boxes. The pinion gear reduction is about 10 to 6 so that the mill is driven at about 49 R.P.M. The top and bottom rolls are 36-inches in diameter and the middle roll is 24 inches in diameter; the length of all rolls is 110 inches between necks, and the horizontal distance between mill housings is about 113 inches, thus the widest sheared plate that it is commercially practical to produce is about 96 inches. The mill screw down drive is located on top of housings and consists of two 100 horse-power motors connected to common shaft and driving the screws through a worm wheel reduction. These motors are electrically connected for series parallel operation. The front and back tilting tables are each about 30 feet in length and each supports 21 live rolls. Two 60 horse-power motors drive the live rolls on each tilting table. The power for raising and lowering the tilting tables is supplied by two 150 horse-power motors acting through a gear reduction and a crank motion. The tables are balanced by a closed hydro pneumatic system acting on the crank motion through hydraulic cylinders and a hydraulic accumulator. The top roll is hydraulically balanced while the middle roll is mechanically balanced and electrically raised and lowered by means of two 150 horse-power motors.

The mill motor is the General Electric Co.'s Type 1—88 pole—4,000 horse-power—82 R.P.M.—Induction—3-Phase—60-Cycle—Form M—6,600 Volt. The flywheel is direct connected, mounted between its own bearings and weighs approximately 155 000 pounds. This flywheel has a diameter of 22' 7" while the rotor has a diameter of 21' 4". The  $WR^2$  of rotating parts is approximately 20,000,000. The maximum running torque in pounds at 1' radius is 700,000.

The 1,000 kilowatt motor generator set is provided for furnishing direct current at 250 volts for all other motors used for the mill and its auxiliaries. The General Electric Co. have supplied the entire electrical equipment while the United Engineering & Foundry Co. supplied the mill proper together with tables, transfers, conveyers, shears, etc.

## GENERAL DESCRIPTION OF PLANT.

A slab yard and ingot storage, 80 feet by 200 feet, is provided adjacent to the north end of the mill buildings. This yard is served by a Morgan Engineering Company's 10-ton 3-motor E.O.T. crane. Narrow gauge tracks from the open hearth department pass under this crane and extend into the furnace building, so that hot ingots may be taken direct from the open hearth to the furnaces, or ingots may be stored in the slab yard and later rehandled on cars to the heating furnaces.

The heating furnace building is 140 feet by 227 feet in plan and contains six gas-fired regenerative side door heating furnaces, 11 feet and  $7\frac{1}{2}$  inches wide by 51 feet long inside buckstays, the width of furnace inside brickwork is 9 feet and the length of furnace hearth is 34 feet. Gas and air regenerative chambers of ample proportions are provided underneath each of these furnaces and each furnace is supplied with a self-supporting steel draught stack 5 feet 0 inches inside diameter of brickwork and 130 feet high above the furnace hearth level. Manually operated revolving valves are used. Debenzolzied coke-oven gas with a thermal value of 560 B.T.U. is used for fuel. This gas is not preheated and both air and gas regenerators are used for pre-heating air. However, the arrangement of valves, flues and ports is such that both gas and air may be regenerated in case producer gas is used for fuel. Each furnace has four brick-lined cast-iron doors, 8 feet 6 inches centre to centre, the width between door jambs being

6 feet and the clear height from foreplate to skewback is 4 feet. The furnace doors are individually operated and controlled by General Electric Co.'s motors acting through a worm-gear crank motion. The water-cooled door jamb and skewbacks are welded steel—Blaw-Knox patent.

For average operation it is estimated that the coke-oven gas consumption will be 9,000 cubic feet per ton of ingots heated, while the water consumption per furnace for jambs and skewbacks will be about 120,000 imperial gallons per 24 hours. Venturi meters of the recording-indicating and integrating type are used for measuring both gas and water on these heating furnaces.

Two Morgan Engineering Company's 10-ton, 5-motor revolving slab chargers, having a span of 55 feet, are arranged to serve the six heating furnaces in conjunction with an electrically operated ingot chariot arranged on the centre-line between furnaces. This ingot chariot and all 24 furnace door hoists are remotely controlled from a pulpit at the north end of furnace building. All heating furnaces are arranged in plain view of the mill operator—a very desirable feature from the standpoint of operating efficiency.

The mill building proper is 80 feet 10 inches by 250 feet in plan and houses the mill motor, mill proper together with its tilting tables and auxiliaries, operating pulpit, roll shop, roll rack, salt bin and scale pit. The entire building is commanded by a Morgan Engineering Company's 6-motor E.O.T. crane equipped with 50-ton main hoist and 10-ton auxiliary hoist. A brick wall separates the motor room from the mill proper. This wall extends from floor level nearly to the crane girders; a fireproof canvas curtain being arranged to close the opening between the top of this wall and the roof, so that by raising this curtain the 75-ton crane may serve the motor room. The standard gauge railroad tracks are arranged under either end of the 75-ton crane runway.

The hot-bed building, about 100 feet in width by 560 feet long, is arranged with a crane runway its entire length for a Morgan Engineering Company's 10-ton, 3-motor, E.O.T. crane. A standard gauge railroad track is arranged to enter this building underneath the crane runway. Plate mill machinery housed by this building consists of the runout tables, plate leveller, hot-bed chain conveyer, inspection turn-up, layout chain conveyer, rotary shears and tables for the same.

The shear building is 300 feet by 350 feet in plan and is arranged for its entire length with three 96 feet 6 inch crane runways, each supporting a Morgan Engineering Company's 5-motor, double trolley, E.O.T. crane. This building houses the 108 inch by  $\frac{3}{4}$  inch cross-cut shears, 156 inch by  $1\frac{1}{4}$  inch trimming shears, 144 inch by  $2\frac{1}{4}$  inch trimming shears, 5 scrap shears and 2 10-ton dial scales. The castor bed is arranged for the easy handling of plates from all shears to the scales. There are excellent track facilities for shipping, and a considerable plate storage space so necessary for economical plate mill operation.

The entire plate mill machinery, including roll lathe, was furnished by the United Engineering & Foundry Co., of Pittsburg, Pa., with the exception of the 144 inch shear, which was furnished by the Morgan Engineering Co., of Alliance, Ohio. All cranes and mill machinery is motor-driven with General Electric Company's 230-volt equipment. Auxiliary apparatus, such as shear plate grinder, test piece milling machine, air compressor, hydraulic pump, etc., is motor-driven.

The brick building walls are not less than 12 inches thick. Ample windows are provided with wooden sash and wooden frames. Reinforced concrete lintels and plain concrete window sills were used throughout. The roof consists of  $2\frac{3}{4}$  inch tongued and grooved spruce supported by channel purlins and covered with a "Barrett" specification 4-ply tar and gravel roof.

The fresh water supply required for this mill is about  $1\frac{1}{2}$  million imperial gallons per twenty-four hours. The cooling-water for heating furnaces is

## SESSIONAL PAPER No. 21

returned to a cooling pond and recirculated, while the mill cooling-water, which is contaminated with mill scale, grease and salt, is run into the sewer.

Power for plate mill operation is supplied by a General Electric 5,000 K.W. turbo-generating unit in No. 3 power-house and is transmitted about one mile at 6,600 volts.

Extensions to the open hearth building were necessary, in order to provide room for bottom casting the slab ingots required for plate mill consumption. The entire project represents the latest practice in the art of plate manufacture and is a creditable addition to the steel plant of the Dominion Iron and Steel Company, Ltd.

## OPERATIONS OF CHIEF CANADIAN SHIPBUILDING PLANTS.

## MIDLAND SHIPBUILDING CO., LTD., MIDLAND, ONT.

This company turned out during the calendar year 1919 two vessels for the Imperial Munitions Board, the *War Leveret*, deadweight tonnage 3,348, length 251 feet, approximate cost \$700,000.00, and the *War Fury*, deadweight tonnage 3,345, length 251 feet, approximate cost \$700,000.00.

## HALIFAX SHIPYARDS, LIMITED, HALIFAX, N.S.

Are building for the Canadian Government Merchant Marine two ships of 8,100 deadweight tons each, and two of 10,500 deadweight tons each.

## CANADIAN CAR AND FOUNDRY CO., LTD., MONTREAL, P.Q.

During the fiscal year 1919-20 this shipbuilding plant completed the steamer *E. D. Kingsley*, 1,500 tons deadweight, length over all 209 feet, speed 10 knots loaded.

## YARROWS, LIMITED, VICTORIA, B.C.

This plant completed during the year a motor-driven steel ferry for Mission, B.C.; length 90 feet, beam 25 feet, depth 5 feet, approximate cost \$35,000; was also engaged in repair work to local and ocean-going ships.

The following additions have been made to the plant: One new compressor building 44 feet by 40 feet with 200 horse-power electrically-driven compound air compressor installed. One electrically operated shipyard crane, 90 feet radius. A powerful electric welding plant consisting of two 200-ampere portable machines for direct current welding.

The administrative offices were enlarged and a new drawing office built.

A Fay and Egan Universal shipyard saw was installed for cutting heavy timbers.

## NOVA SCOTIA STEEL &amp; COAL CO., NEW GLASGOW, N.S.

Completed three ships 2,800 tons deadweight each for the Canadian Government Merchant Marine; sea speed,  $9\frac{1}{2}$  knots; average cost, \$530,000.00 each.

During the year \$46,000.00 was expended in new equipment for the plant.

## DOMINION SHIPBUILDING CO., LTD., TORONTO, ONT.

During 1919 this plant built and delivered one steel ship of 4,300 tons deadweight for the N. S. Transportation Co., Ltd., Toronto; four steel ships of 3,550 tons deadweight each for the Dominion Shipbuilding Co., Ltd., Toronto, Ont., and two steel ships of 3,550 tons deadweight each for the Aalesund S.S. Co. of Aalesund, Norway.

11 GEORGE V, A. 1921

Vessels under construction to be delivered during 1920 comprise two ships of 3,350 tons deadweight each for the Dominion Shipbuilding Co., Ltd., Toronto; two of 2,550 tons deadweight each for the same company; two of 3,550 tons deadweight each for the Canadian Government Merchant Marine, and two of 2,550 tons deadweight each for the Gulf Navigation Co., New Orleans, La.

A new solid brick office building with draughting room was added to the plant during the year at a cost of \$30,000.

THE ST. LAWRENCE DOCK & SHIPBUILDING CO., LTD., LÉVIS, P.Q.

The firm was engaged during the year in the work of repairs and reconstruction of ships. The Government dredge *Galreston* was dismantled, rebuilt, and converted into the ocean freighter *Pomone* for the "Affréteurs Réunis" of Paris, France; length B.P. 233 feet, deadweight tonnage 3,110. The steam tug *Gwenneth* was repaired and reconstructed, and repairs made to various smaller steam tugs. The S.S. *Lehigh* was converted into a lake coal carrier for the George Hall Company of Montreal; length, B.P. 243 feet; deadweight tonnage, 2,000.

CHOLBERG SHIPYARD, LIMITED, VICTORIA, B.C.

Completed and delivered during 1919, three wooden four-masted sailing schooners for Norwegian interests; length, 197.6 feet; displacement tonnage, 2,900; approximate cost, \$220,000 each.

Have in hand a contract with Victoria, B.C., shipowners for four wooden barquentines; length over all, 250 feet; deadweight tonnage, 2,400; estimated cost, \$250,000 each.

Additions to the plant during the year were a new stiff-leg derrick, 120 feet boom, a new air compressor, a new ship band saw, a new aerial wire timber carrier, all specially designed and arranged for the construction of wooden ships.

CANADIAN VICKERS, LIMITED, MONTREAL, P.Q.

Vessels completed and delivered April 1919-20, for Canadian Government Merchant Marine:—

*Canadian Ranger*, 8,382 tons deadweight, 400' x 52' x 31'; speed, 11 knots. *Canadian Seigneur*, 8,391 tons deadweight, 400' x 52' x 31'; speed, 11 knots. *Canadian Miller*, 8,391 tons deadweight; 400' x 52' x 31'; speed, 11 knots. *Canadian Navigator*, 4,581 tons deadweight, 320' x 44' x 25'; speed, 11 knots. *Canadian Spinner*, 8,390 tons deadweight; 400' x 52' x 31'; speed, 11 knots. *Canadian Planter*, 8,390 tons deadweight; 400' x 52' x 31'; speed, 11 knots.

For French Owners:—

*Alsace*, 8,398 tons deadweight; 400' x 52' x 31'; speed, 10 knots.

Vessels under construction, 1920, for Canadian Government Merchant Marine:—

*Canadian Victor*, 8,350 tons deadweight; 400' x 52' x 31'; speed, 11 knots. *Canadian Conqueror*, 8,350 tons deadweight; 400' x 52' x 31'; speed, 11 knots. *Canadian Commander*, 8,350 tons deadweight; 400' x 52' x 31'; speed, 11 knots. *Canadian Leader*, 8,350 tons deadweight; 400' x 52' x 31'; speed, 11 knots.

For Norwegian Owners:—

*Tatjana*, 8,350 tons deadweight; 400' x 52' x 31'; speed, 10½ knots. *Loch Tay*, 8,350 tons deadweight; 400' x 52' x 31'; speed, 10½ knots. One cargo steamer, 6,350 tons deadweight; 365' x 49½' x 29'; speed, 11 knots. One cargo steamer, 6,350 tons deadweight; 365' x 49½' x 29'; speed, 11 knots.

## SESSIONAL PAPER No. 21

## NORTHERN CONSTRUCTION CO., LTD., VANCOUVER, B.C.

Five ships were built and launched during the year; length overall, 204.5 feet; speed,  $9\frac{1}{2}$  knots; deadweight tonnage, 1,500.

No extensions were made to the yard during the year.

## PORT ARTHUR SHIPBUILDING CO., LTD., PORT ARTHUR, ONT.

For the Canadian Government Merchant Marine there were built in 1919, four steel freight steamers; length over all, 260 feet; deadweight tonnage, 3,400; speed, 11 knots; and for the Department of the Naval Service of Canada, trawlers 41, 42, 43; and 44; length, 134' 7"; breadth, 23' 4"; depth, 13' 6"; 294.5 gross tons each.

Under construction for 1920 for the Canadian Government Merchant Marine, two steel freight steamers; length over all, 333' 7"; deadweight tonnage, 4,350; speed, 11 knots; and one steel freight steamer, length over all, 260' 6"; deadweight tonnage, 3,980; speed, 11 knots. Under construction for the Naval Service of Canada, two Scotch multitubular boilers for tug *W. H. Lee*, and one Scotch multitubular boiler for C.G.S. *Bayfield*.

The following additions were made to the plant during the year: boiler shop addition, 90' x 80', cost \$27,651.80; foundry addition 90' x 40', cost \$19,147.36; power-house addition, cost \$10,483.78; paint shop addition, cost \$3,386.26; plate and angle furnace, cost \$19,132.17; new heating boiler, cost \$9,277.79; plate bending rolls for capacity plates, 24 feet wide by 1 inch thick, cost \$18,000.

## J. COUGHLAN &amp; SONS, VANCOUVER, B.C.

From June, 1919, to June, 1920, this firm built and delivered 76,400 deadweight tons of steel shipping, viz., nine vessels, five of 8,800 deadweight tons each, and four of 8,100 tons deadweight each as follows:—

1919—

*July delivery*:—S.S. *War Column*, 8,800 deadweight ton steamer, built to order Imperial Munitions Board, later sold to Italian Company, and now operating as S.S. *Attavita*. Coal burner, turbine engines.

*August delivery*:—S.S. *War Company*, 8,800 deadweight tons, built to order Imperial Munitions Board, sold to French company, and now operated as S.S. *Ontario*. Coal burner; turbine engines.

*October delivery*:—S.S. *War Chariot*, 8,800 deadweight tons, built to order of Imperial Munitions Board, and now being operated as *Iocasti*, under Greek flag. Coal burner; turbine engines.

1920—

*January delivery*:—S.S. *Canadian Importer*, 8,100 deadweight tons, built to order Canadian Government; coal burner; triple expansion engines. Now on trade route, Vancouver-Australia.

*February delivery*:—S.S. *Canadian Exporter*, 8,100 deadweight tons, built to order of Canadian Government; coal burner; triple expansion engines. Now on trade route, Vancouver-Australia.

*April delivery*:—S.S. *Braheholm*, laid down to order of J. Coughlan & Sons Ltd., and sold to Swedish-American-Mexican Line. She is of the 8,800 deadweight ton type, fitted with triple expansion engines, and coal furnaces. This is believed to be the first ship of this size ever laid down by a Canadian Shipyard to the company order.

*June delivery*:—S.S. *Canadian Inventor*, 8,100 deadweight tons; triple expansion engines; coal burner. Built to order of the Canadian Government.

11 GEORGE V, A. 1921

S.S. *Margaret Coughlan*, 8,800 deadweight tons, built to the order of Western Canada Steamships Ltd., a subsidiary company of J. Coughlan & Sons, Ltd.; oil burner, with triple expansion engines. Will be operated by Coughlan interests, and has already been chartered.

The company has in hand two 8,800 deadweight cargo steamers, one for Swedish interests and one for the Vancouver Steamships Limited, a subsidiary of J. Coughlan & Sons, Limited, and two 8,400 deadweight tons steamships for the Canadian Government Merchant Marine. These vessels will be oil burners fitted with triple expansion engines.

CANADIAN ALLIS-CHALMERS, LIMITED, BRIDGEBURG, ONT.

The Canadian Allis-Chalmers, Limited, is a subsidiary company to the Canadian General Electric Company, Limited. The capital stock of the Canadian General Electric Company, Limited, is \$12,000,000 authorized, \$10,700,000 paid up. The shareholders of the Canadian General Electric Company, Limited, are chiefly Canadian and British with a smattering of foreigners.

The shipyard proper employs 500 men. The Canadian General Electric Company, Limited, and subsidiary companies, 6,000, made up of English, French Canadian, Scotch, and Americans

The site of the shipbuilding plant covers 42 acres on the west bank of the Niagara river, three and a half miles north of the port of Bridgeburg. The plant has a siding from the Canada Southern Railway.

During the season of 1919-20 two ocean freighters were built and delivered; length over all, 261 feet; 43' 6" beam, and 23' draught, 3,560 deadweight tons each.

The company has in hand for delivery in 1920 two steel freighters of similar tonnage and dimensions for the American Metal Transport Company of New York, U.S.A.

Shipping berths Nos. 1 and 2 permit of the building of one 575 feet freighter or two of 261 feet, as also do berths Nos. 3 and 4: so that two ships of 575 feet in length or four of 261 feet can be built at the same time.

In connection with the berths there is a fitting-out dock equipped with a set of 60-ton shear legs.

COMPARATIVE STATEMENT showing the number of Vessels and Number of Net Tons on the Registry Books of the Dominion of Canada, on December 31, in each Year from 1910 to 1919, both inclusive.

| Province.            | 1910.    |         | 1911.    |         | 1912.    |         | 1913.    |           | 1914.    |           |

| Registry no longer required.....     | 4   |
| Total.....                           | 487 |

It is estimated that 45,954 men and boys, etc., inclusive of masters, were employed on ships registered in Canada during the year 1919.

## REPORT OF B. H. FRASER, M.I.C.E., CHIEF ENGINEER.

## OFFICE WORK.

|  |       |
|--|-------|
| Total plans for twelve months (April 1 to March 31, 1920)..... | 1,715 |
| Charts received and recorded.....                              | 130   |
| Photographs received and recorded.....                         | 340   |
| Specifications and bills of materials written.....             | 80    |
| Notices to Mariners issued (comprising 216 subjects).....      | 82    |

## PUBLICATIONS.

During the fiscal year 82 Notices to Mariners, covering 216 subjects, were issued.

The following may be especially noted:—

Publication of amendments to Canadian Radiotelegraph regulations with respect to wireless watches to be maintained by ships carrying only one operator; and Notice to all Masters and Shipowners of British vessels regarding wireless requirements.

Notice regarding the retention of armament on ships of Canadian register.

Improvements of channels by dredging done by the Department of Public Works were described.

Hydrographic notes were published; also Regulations for Pilotage in British Columbia.

Notices relating to waters outside of Canada were issued covering items relating to Newfoundland, Atlantic and Pacific waters of the United States, Panama canal, Roumania, as well as notices relating to transatlantic and trans-pacific subjects.

The annual edition of the "List of Lights and Fog Signals" in three sections, was published; also a new edition of the "List of Buoys, Beacons, etc., on the Pacific Coast of Canada".

## REMOVAL OF OBSTRUCTIONS TO NAVIGATION.

- Halifax..... Removal of wreck in harbour.
- St. Croix river..... The wrecked schooner *Mercedese*, which was a menace to navigation, was removed by the owners.
- St. Clair river..... The tug *Annie Moyles*, wrecked in St. Clair river, was removed by the Reid Wrecking Co., for the owners.
- Port Dover, Ont.... The tug *Jim and Tom*, which formed an obstruction in the harbour, was removed by the owners.
- Rainy river..... The tug *Ethel Banning*, which sank alongside of Government wharf, was removed by the owners.

## MAINTENANCE AND REPAIRS TO WHARVES.

The following is a list of wharves where repairs were attended to by this branch:—

*Nova Scotia.*  
Babins Cove  
Bear River  
Westport

*Ontario.*  
Kenora  
Lakoport  
Midland  
Providence Bay  
Rosseau  
Treadwell.

*New Brunswick.*  
Lorneville  
St. John  
St. Martins  
Caraquet

*Quebec.*  
Roberval  
Ste-Cecile du Bic  
St. Thomas de Montmagny  
Sandy Beach  
Ville Marie

*Prince Edward Island.*  
Alberton  
Chapel Point  
Georgetown  
Orwell Cove

*Montreal District.*  
Caughnawaga  
L'Original  
Montebello

*British Columbia.*  
Sidnev.

## SESSIONAL PAPER No. 21

## ICE-BREAKING.

The five year contract with the Great Lakes Transportation Company, to keep the harbours at the head of lake Superior open for navigation until the 17th December in each year and to open them in the spring, as soon as the canal at Sault Ste. Marie is open for navigation, is still in force.

## CHANGES AND IMPROVEMENTS IN EXISTING AIDS.

## NOVA SCOTIA.

| Lightstation.       | Nature of work.   |
|---------------------|---|
| Cape Race.....      | Repairs to tower.   |
| Coffin Island.....  | Provision and installation of a Reliance clock.                       |
| Dartmouth.....      | Agency buildings covered with asbestos for fire protection.           |
| Dartmouth.....      | Repairs to wharf.   |
| Flat point.....     | Installation of a second-hand boiler taken from Cape Fourchu.         |
| Glace bay.....      | Repairs to tower and dwelling.  |

COMMISSIONER OF LIGHTS' BRANCH.

REPORT OF J. G. MACPHAIL, B.A., B.Sc., COMMISSIONER OF LIGHTS.

The principal work performed during the fiscal year ended March 31, 1920, has been an extension of the buoy and beacon services, together with the maintenance of lights and other aids to navigation throughout the Dominion, and the maintenance and inspection of public wharves. The operations of this branch are set forth in tabular form in two inclosures.

INCLOSURE No. 1.—Statement by districts, showing the number of lights of the several orders, lightships, lightboats, lightkeepers, fog signals, buoys, submarine bells, etc.

|                            | 1st order lights. | 2nd order lights. | 3rd order lights. | 4th order lights. | 5th order lights. | 6th order lights. | 7th order lights. | Gas beacons. | Pressed lens lights & other minor types. | Catoptric lights. | Electric lights. | Total. | Lightships. | Lightboats. | Lightkeepers. | Diaphanous. | Fog pens and buoys. | Fog horns and trumpets. |

RIVER ST. LAWRENCE SHIP CHANNEL.

REPORT OF V. W. FORNERET, B.A. SC., SUPERINTENDING ENGINEER.

GENERAL INFORMATION.

The ship channel of the river St. Lawrence between Montreal and Father Point, has a total length of 340 statute miles.

The contracted part of the river, which may be properly called "Ship Channel" commences at "The Traverse" (South channel) to which point from Montreal, the distance is 220 miles. This is divided into five divisions as follows:—

|  |                   |
|--|-------------------|
| Division 1—Montreal to Sorel .....                           | 45 statute miles. |
| " 2—Sorel to Batiscan (does not include lake St. Peter)..... | 36 "              |
| " 3—Lake St. Peter.....                                      | 20 "              |
| " 4—Batiscan to Quebec.....                                  | 59 "              |
| " 5—Quebec to The Traverse.....                              | 60 "              |
| Total.....   | 220 "             |

The dredging operations for the season of 1919 were again very limited, owing to existing conditions, and as in the previous season, only day crews were placed on the dredges. This naturally made a great difference with the results obtained during the season as compared with other seasons, when the operations were carried on day and night, and a larger number of vessels in commission.

DREDGING OPERATIONS DURING SEASON 1919.

*Division 1—Montreal to Sorel.*

*Longueuil Curve (Montreal Harbour).*—Some work was done on this curve during the season of 1919. One dredge worked for a short time at the commencement of the season and another at the end.

The dredging consisted of widening the curve on the north side to a width of 850 feet, and deepening the channel to 35 feet at E.L.W. of 1897. The material being hardpan, stones, boulders and some shale rock.

The total number of cubic yards removed amounted to 52,295.

*Varenes Curve.*—One dredge worked for a short time in the spring, on Varenes curve, deepening the channel to 35 feet at E.L.W. of 1897. The material dredged consisted of clay.

The number of cubic yards removed amounted to 53,200.

*Vercheres Traverse.*—Considerable work was done on Vercheres traverse, in connection with the deepening of the channel to 35 feet at E.L.W. of 1897. One dredge was kept at work nearly all season and good progress was made, there remaining very little to be done to complete the 35 dredging on this part of the channel.

The number of cubic yards removed amounted to 164,750. the material consisting of clay.

*Division II.—Sorel to Batiscan.*

*Champlain Channel.*—This channel was thoroughly swept for 30 feet at E.L.W., by the sweeping steamer early in the season, and sand bars were found to have again formed between Pointe Citrouille and the lower half of Champlain channel.

One dredge was detailed for this special work, and was occupied removing these bars most of the season.

This is the only point in the ship channel between Montreal and Quebec, where filling in of any importance occurs.

The number of cubic yards removed amounted to 55,800.

*Division III.—Lake (St. Peter).*

No work was done in this Division during the season of 1919.

*Division IV.—Batiscan to Quebec.*

*Cap à la Roche Curve.*—Considerable work was accomplished at Cap à la Roche, where the widening on the north side of the channel (upper part of the curve) was completed.

This now gives a width of 500 to 550 feet instead of 300 to 400 as formerly.

This widening was also deepened to 30 feet at extreme low water of 1897, which is  $4\frac{1}{2}$  feet more than  $27\frac{1}{2}$  feet at ordinary low water, the present depth available in the Cap à la Roche channel.

On account of the uncompleted south half of the channel to 30 feet at E.L.W., it could only be opened to  $27\frac{1}{2}$  feet at O.L.W.

In order to give the vessels the full advantage of the increased width as soon as possible, at this point, the widened part was thoroughly swept to  $27\frac{1}{2}$  feet at ordinary low water and found clear for that depth.

The buoying of this channel was then rearranged to make this part of the river safe for day and night navigation. Three new gas bouys were added and the existing can and conical steel buoys shifted to more satisfactory positions. This improvement now permits the largest vessels coming to Montreal to navigate this part of the ship channel, day and night with safety.

Some deepening was also done to 30 feet at E.L.W. on the south half of the Cap à la Roche channel, which work is well advanced.

The total number of cubic yards removed during the season of 1919 amounted to 88,655. In addition to this there is quite a large area broken up by the rock cutter in readiness for the dredges to remove next season.

*Division V—Quebec to The Traverse.*

Hydraulic Dredge No. 8 (Beaujeu) was occupied all season removing the filling that had occurred in the south channel (St. Thomas bank). The material was soft clay (silt) and the number of cubic yards dredged amounted to 131,900.

The total number of cubic yards dredged in the river St. Lawrence ship channel, above and below Quebec, amounted to 517,305 during season of 1919.

*Thirty-foot Project (end of season 1919).*

|   |              |
|---|--------------|
| Total length of dredging .....                | 66.42 Miles. |
| "          "          yet to be done .....    | 1.58 "       |
| Total number of cubic yards dredged .....     | 53,169,332   |
| "          "          yet to be dredged ..... | 2,132,000    |

*Thirty-five-foot Project (end of season 1919).*

|   |             |
|---|-------------|
| Total length of dredging done .....           | 40.00 Miles |
| "          "          yet to be done .....    | 49.39 "     |
| Total number of cubic yards dredged .....     | 37,903,601  |
| "          "          yet to be dredged ..... | 29,170,340  |

The total cost from 1851 to the end of the fiscal year, March 31, 1920, of the ship channel from Montreal to Father Point, including plant, shops, surveys, etc., is as follows:—

|                                  |                 |
|----------------------------------|-----------------|
| Dredging .....                   | \$14,940,174 10 |
| Plant, Shops, Surveys, etc. .... | 8,320,167 64    |
| Total .....                      | \$23,260,341 74 |

## SESSIONAL PAPER No. 21

The total number of cubic yards removed from 1851, to the end of season of 1919, amounted to 117,453,139, the material varying from very hard shale rock to soft blue clay.

## TIDAL SEMAPHORES.

The tidal semaphore at Cap à la Roche, which shows the available depth of water in the dredged channel, was put in operation on April 24, 1919. The tidal semaphore at Pointe Citrouille, which also shows the depth available in Cap à la Roche channel, was put in operation the same day.

The semaphore at Pointe Citrouille is of great service to the pilots of deep-draught vessels outward bound, as it enables them to know if there is sufficient water in the channel at Cap à la Roche to allow them to proceed down in safety. If not, they can anchor at the splendid anchorage ground provided for them, just below Pointe Citrouille, where they can wait for the tide to rise.

The tidal semaphore at St. Nicholas which shows the available depth of water over the undredged St. Augustin channel, was put in operation on April 26, 1919.

## DEPTH OF WATER IN SHIP CHANNEL SEASON 1919.

With the exception of a few days at the beginning of the month of September, when the lowest water was 31 feet 3 inches in the 30-foot channel, which is considered good, the height of water kept high all season as can be noted by the following monthly averages during the season of navigation.

|        |        |        |        |        |        |        |
|--------|--------|--------|--------|--------|--------|--------|
| May    | June   | July   | Aug.   | Sept.  | Oct.   | Nov.   |
| 39' 7" | 36' 7" | 33' 5" | 32' 4" | 32' 3" | 32' 8" | 33' 5" |

## ACCIDENTS.

The season of 1919 was practically free from any serious accidents or marine casualties in the ship channel, though it was a record for the number of vessels using it, and none could be attributed to any fault of the channel.

## SWEEPING OF THE SHIP CHANNEL.

The channel was thoroughly swept as usual during the season, two outfits being employed, but no obstruction of a serious nature was found. Some sand bars were found to have again formed in Champlain channel, but these were dredged before the low water season. Considerable sweeping was also done below Quebec by the sweeping steamer *Detector* in the North and South channels. Some filling in was found to have occurred in the South channel at St. Thomas flats, and a dredge was occupied all season removing this.

## ACCIDENTS SEASON 1919.

*Between Montreal and Quebec.*

May 1.—SS. *War Toronto* went ashore at the lower end of Ile Hartelle. Was floated by dredging, apparently not damaged.

August 6.—SS. *Lake Frelona* from Great Lakes eastbound, grounded on Pointe du Chene, opposite Grondines. Was refloat—slight damage.

October 22.—Tug *J. H. Hackett* in collision with White Star Dom. SS. *Rimouski* two miles below St. Augustin bar. Tug suffered considerable damage.

October 26.—SS. *Trevillard* eastbound from Montreal went ashore 3 miles above Batiscan during foggy weather. Was refloat.

November 28.—SS. *Bassa* while turning in Montreal harbour went aground outside of Channel, a short distance above Tarte pier. Was lightered and pulled off.

11 GEORGE V, A. 1921

November 29.—American Destroyer *Eagle No. 58* outward bound went ashore on Ile Ste. Therese opposite Varennes, P.Q.. Was refloated no damage.

December 9.—SS. *Canadian Volunteer*, of the Canadian Mercantile Marine, touched on shoal outside of channel at Cap à la Roche. Bottom considerably damaged.

December 9.—SS. *Lake Elsmere* belonging to the American Shipping Board in tow of tugs *Lord Strathcona* and *Andree Dupre* struck the superstructure of the Quebec bridge on the North side. The vessel suffered considerable damage to her masts. Accident caused by heavy ice pack.

*Between Quebec and Father Point.*

May 21.—C.P.O.S. *War Beryl*, outward bound collided with Dredge *No. 8* belonging to the Department of Marine, anchored in St. Thomas channel. Both vessels damaged.

June 2.—Schooner *O. Caron* of Limoilou Quebec was struck by a steamer outward bound off St. Siméon and badly damaged.

June 16.—Steam barge *Rockferry* struck bottom East of Cape Dogs when outward bound. Vessel leaking badly.

June 27.—SS. *Corcoran* belonging to the U.S. Shipping Board collided with Market Boat *Champion*, both outward bound. Both ships were damaged. The accident occurred off the upper part of Island of Orleans.

December 17.—SS. *Canadian Recruit* of the Canadian Mercantile Marine, outward bound was driven ashore by the ice on St. Anne shoals. She floated off at high tide but owing to damaged rudder drifted in the ice pack as far as Pointe Vache, at the entrance of the Saguenay river, where the vessel was shoved ashore by the ice at that point. Salvaging operations are now going on.

None of the above casualties can be attributed to any fault of the ship channel.

MARINE SIGNAL SERVICE.

Signal stations have been established for the purpose of maintaining communication between ship and shore by means of flag signals.

This system of stations extends from St. John, N.B., Halifax, N.S., Cape Race, Nfld., and Beile Isle up the gulf and river St. Lawrence and through the Great Lakes to Sault Ste. Marie, Ont.

Following is a complete list of stations:—

EAST OF QUEBEC.

| Name of Station.                 | Location.                | Nautical miles from Quebec. | Means of communication.  |
|----------------------------------|--------------------------|-----------------------------|--------------------------|
| R Quebec                         | Custom House             | 0                           | Telephone.               |
| X St. Jean d'Orleans             | Shore end of wharf       | 14                          | "                        |
| Crane Island                     | Lighthouse               | 32                          | "                        |
| L'Islet                          | 100 yards east of church | 49                          | Telegraph.               |
| Cape Salmon                      | Lighthouse               | 81                          | Telephone and telegraph. |
| Riviere du Loup                  | Shore end of wharf       | 92                          | Telegraph.               |
| Father Point                     | Shore end of wharf       | 157                         | "                        |
| Little Metis                     | Lighthouse               | 175                         | "                        |
| Matane                           | "                        | 200                         | "                        |
| Pointe des Monts                 | "                        | 219                         | "                        |
| Cap Chat                         | "                        | 234                         | "                        |
| Riviere a la Martre              | "                        | 260                         | "                        |
| Capé Magdalen                    | "                        | 294                         | "                        |
| Fame Point                       | "                        | 325                         | "                        |
| Cap des Rosiers                  | "                        | 349                         | "                        |
| Cap d'Espoir                     | "                        | 377                         | "                        |
| Point Maquereau                  | "                        | 400                         | "                        |
| West Point, Anticosti            | "                        | 332                         | "                        |
| South West Point, Anticosti      | "                        | 360                         | "                        |
| South Point, Anticosti           | "                        | 415                         | "                        |
| Heath Point, Anticosti           | "                        | 438                         | "                        |
| Point Escuminac, N.B.            | "                        | 462                         | "                        |
| Amherst Island, Magdalen Islands | "                        | 481                         | "                        |

SESSIONAL PAPER No. 21

EAST OF QUEBEC—Concluded.

Stations marked thus 'R' are reporting stations only and are not equipped for signalling purposes. Stations marked 'X' are closed temporarily.

BRIEF SUMMARY OF WORK PERFORMED.

1. Stations report movements of vessels to Montreal, Quebec, Sydney, Halifax or St. John.
2. Stations report weather conditions daily to Montreal, Quebec, Sydney, Halifax or St. John.
3. Montreal, Quebec and St. John publish daily bulletins giving weather and ice conditions and movements of vessels.
4. Montreal and Quebec publish daily bulletins showing the depth of water at various points in the river St. Lawrence ship channel.
5. The Signal Service offices at Montreal, Quebec and St. John are opened day and night for the purpose of furnishing the public with information of shipping matters.
6. The telegraph system of the Department of Public Works on the north shore of the gulf of St. Lawrence, reports the movements of vessels engaged in the coasting trade in the Signal Service at Quebec.

11 GEORGE V, A. 1921

7. The collectors of customs at all the seaports in the river and gulf of St. Lawrence, on the Atlantic coast and in the Bay of Fundy report the arrival and departure of vessels engaged in the overseas trade.

8. Lloyd's agents at Quebec are furnished daily with full information of the movements of vessels engaged in the overseas trade to and from ports in the province of Quebec.

9. Lloyd's agents at St. John, N.B., are furnished daily with full information of the movements of vessels engaged in the overseas trade to and from ports in the Maritime Provinces.

#### IMPROVEMENTS CARRIED OUT AND CONTEMPLATED.

The Signal Service at Halifax, St. John, North Sydney and Quebec, in the river and gulf of St. Lawrence and on the Great Lakes, and the telephonic and reporting service between Quebec and Montreal were combined on April 1, 1914, under the heading of "Signal Service" with the headquarters at Quebec. This consolidation has greatly facilitated the work and has led to many improvements.

An arrangement was made with the Department of Railways and Canals whereby their officials at the Lachine, Soulanges, Cornwall, Galops, Welland and Sault Ste. Marie canals, report several times daily to the Signal Service at Montreal, giving movements of vessels bound to Montreal and points east of that port. This service has proved itself to be very useful, especially to the shipping interests of the port of Montreal, and will be extended from time to time as conditions may warrant.

#### ICE-BREAKING, 1919-20.

##### *Report of N. B. McLean, Resident Engineer.*

The weather conditions during the winter of 1919-20 were severe, the month of January being exceptionally so. The ice bridge formed at Port St. Francis December 18, and by December 21, the river was covered to Montreal. The ice jammed several times at Quebec bridge, but was successfully broken up by the *Lady Grey*. On January 24, the ice blocked at Portneuf, and on February 1 had backed up to Three Rivers, the river then being covered with ice from Portneuf to Montreal.

The *Lady Grey* was alone all winter to take care of the ice situation in the river above Quebec, as the *Montcalm* had been detailed for duty in the gulf, escorting ships that had been caught in the ice, relieving light keepers, and carrying supplies to the Magdalen Islands.

The absence of the *Montcalm* was a very severe drawback, placing a very heavy strain on the *Lady Grey*, delaying the work of opening the river above Quebec, and thus increasing the chances of very serious flooding. The water reached a height of 14 feet 9 inches above extreme low water at Three Rivers, which is practically flood level. Had the *Lady Grey* met with an accident and been put out of commission, very grave floods would have been the result.

The ice-breaking operations began on November 28, when the C.G.S. *Lady Grey* took up her station at Three Rivers to keep Port St. Francis open and to aid vessels coming down. She was assisted in this work by the C.G.S. *Bellechasse*. Vessels were passing out daily until December 14, when the last ship, the *Canadian Ranger*, left for Quebec escorted by the *Lady Grey*, reaching there late that afternoon.

On December 16, the *Canadian Recruit* and the *Canadian Spinner*, of the Canadian Government Merchant Marine, left Quebec outward bound. The same day the *Canadian Recruit* was reported aground on the Ste. Anne shoals.

## SESSIONAL PAPER No. 21

She was later lifted off by the tide, and then was adrift until December 20, when she went ashore at Vaches point, below the mouth of the Saguenay river, where she remained hard and fast. The crew was taken off by a schooner from Tadoussac. On December 18, the *Canadian Spinner* was reported adrift in the ice off Bic.

As soon as the *Canadian Recruit* was reported in distress the *Lady Grey* was detailed to go to her assistance, but owing to thick weather, snowstorms, and heavy ice, she was unable to proceed past Grosse Ile until December 27, although she made almost daily attempts. On December 27, she went down, stopping to take off a number of people at Grosse Ile, and reaching Murray Bay in the afternoon. She arrived at Tadoussac on the 28th, taking aboard the crew of the *Canadian Recruit*. The next day, the 29th, she came up, picking up the light-keepers from Red island and Brandy pots, and arriving at Murray Bay at noon. She remained there the next day on account of thick weather, getting back to Quebec on the 31st.

The *Canadian Spinner*, which was reported adrift in the ice on December 18 off Bic, was met by the *Montcalm* abreast of S.W. point, Anticosti, on January 7, having drifted with the ice from Bic to this point. Both vessels were in the ice several days longer, reaching Sydney only January 13. The *Spinner* was 28 days out from Québec when she arrived at Sydney, and had the *Montcalm* not been available to go to her assistance it is very unlikely that she would ever have reached any port.

From December 31 to March 1 the *Lady Grey* remained on her station at Quebec, engaged from time to time slicing Beauport and Cap Rouge battures, so that the channel could not become too contracted, and breaking up a number of jams that formed at Quebec bridge. When the ice blocked at Portneuf on January 24, the *Lady Grey* was not sent to break it up, this being considered unsafe, as the ice might have jammed behind her, cutting her off from her base. Had the *Montcalm* been at Quebec this would have been attempted.

On March 1 the *Lady Grey* left Quebec and proceeded to St. Croix, where she began the work of opening the channel in the upper river. Between March 1 and April 5, the river was opened from St. Croix to Grondines. The ice encountered was very heavy throughout. The usual accumulation of frazil ice, solid to the bottom, was met with at Portneuf bend. The work was greatly retarded owing to bad weather conditions, frequent trips to Quebec for coal, poor quality of coal, and an injury to the ship's plates, which had to be repaired on the Gridiron at Levis.

From April 5 to 8, the ice from lake St. Peter to Grondines was shoving and passing out, and on April 9, the *Lady Grey* was able to come to Three Rivers.

On April 10 and 11 the *Lady Grey* worked at the foot of lake St. Peter keeping the ice moving there. On the 12th, the lake was clear and she proceeded up to the Sorel islands, where a jam was broken up. On the 13th she arrived at Sorel, and from that date to the 17th, was engaged between Pte. aux Trembles and lake St. Peter, breaking up jams and keeping the ice running. The ice above Sorel was remarkably heavy, so heavy in fact, that after passing down through the Sorel islands, it grounded on the flats at the head of lake St. Peter between Ile aux Raisins Traverse and Number 2 Curve, reblocking the channel. On April 18, the *Lady Grey* reached Montreal.

At the request of the Department of Railways and Canals the *Lady Grey* cleared a channel through the frazil ice to the lower end of the Soulanges canal at Cascades point. She left Montreal May 1, reached the upper end of lake St. Louis the same day, worked two days cutting her way to the canal entrance, and was back in Montreal May 3. This completed the ice-breaking operations for 1919-20.

## DREDGES.

*Elevator Dredge No. 1. (Laval).*

This is the oldest dredge in the ship channel fleet. The hull is of wood, constructed in Ottawa in 1894. The buckets are made of cast steel for work in rock and other hard material.

During the winter of 1918-19 the dredge was thoroughly overhauled and put in good condition for the next season's work.

The details of the operations of this dredge for the fiscal year beginning April 1, 1919, were as follows:—

Dredge *No. 1* left Sorel May 5 and was taken up to Vercheres Traverse, where she was laid out to deepen the channel to 35 feet at L.W. 1897, the material to be excavated being clay. From May 5 to May 7 inclusive, repairs were made to buckets. Operations were begun May 8 and carried on until September 5.

On September 5, *No. 1* was taken up to Montreal, and laid out the next day to widen and deepen the channel at Longueuil shoal, dredging to a depth of 35 feet at L.W. 1897, the material being clay, stones, hardpan, shale rock and boulders. She continued working there until October 15, when she was taken down to Sorel and went into winter quarters.

In a total of 137 days, during which this dredge was at work, her machinery was in actual operation 78 per cent of the full working time.

The total number of cubic yards dredged amounted to 187,750 at a cost of \$79,789.61 or 42  $\frac{9}{100}$  cents per cubic yard.

*Elevator Dredge No. 2. (Laurier).*

The hull of this dredge is of wood, having been constructed at the Government Shipyard at Sorel, P.Q., in 1897. She is equipped with a set of cast steel buckets, especially designed for work in rock or other hard material.

During the winter of 1918-19, this dredge was thoroughly overhauled and put in good order for the next season's operations.

The details of the operation of this dredge for the fiscal year beginning April 1, 1919, were as follows:—

Dredge *No. 2* was brought up from Sorel on May 5 to Varennes curve, and the following day, May 6, was laid out to deepen and widen this curve to 35 feet E.L.W. 1897, the material to be excavated being clay. Work was carried on there until June 21.

On the latter date *No. 2* was brought into Sorel where she underwent some repairs to her boilers, and on June 25, she was taken down to Champlain channel and set to work cleaning up some sand filling that had occurred there. She continued working in this channel until October 13, when she was brought back to Sorel for winter quarters.

In a total of 132 days during which this dredge was at work her machinery was in actual operation 71 per cent of the full working time.

The total number of cubic yards removed amounted to 109,000 at a cost of \$79,495.93 or 72  $\frac{3}{100}$  cents per cubic yard.

*Elevator Dredge No. 5. (Lafontaine).*

This dredge was constructed at the Government Shipyard at Sorel, P.Q., and was completed in 1901. The hull is of wood. She is fitted out with cast steel buckets for working in rock or other hard material.

During the winter of 1918-19 a thorough overhauling was given to this dredge and she was put in good order for the next season's work.

The details of the operations of this dredge for the fiscal year beginning April 1, 1919, were as follows:—

## SESSIONAL PAPER No. 21

Dredge *No. 5* left Sorel May 5 arriving at Longueuil shoal Montreal the same day. She was laid out May 6, and began work May 7, widening and deepening the channel to 35 feet at E.L.W. 1897, the Material to be dredged being clay, stones, hardpan, shale rock and boulders. She continued working there until June 28.

On June 28, *No. 5*, was brought down to Sorel, remaining there undergoing some repairs until July 2, when she was taken to Cap à la Roche curve, where she was laid out to deepen and widen the channel to 30 feet at E.L.W. 1897, the material to be excavated being shale rock. Operations were carried on there until October 13, when this dredge left for Sorel, arriving there October 14, and going into winter quarters.

In a total of 135 days during which this dredge was at work, her machinery was in actual operation 60 per cent of the full working time.

The total number of cubic yards removed amounted to 88,655, at a cost of \$106,332.17 or \$1.19 $\frac{3}{100}$  cents per cubic yard.

*Hopper Hydraulic Dredge No. 8. (Beaujeu)—Steel Hull, Twin Screw.*

Dredge *No. 8* was constructed at the Government Shipyard at Sorel. Que. in 1907.

During the winter of 1918-19, the dredge was given a thorough overhauling and put in good working order for the next season's operations.

*No. 8* left Sorel April 24, and arrived in Quebec the same day. She went into dry dock on April 25, where the tail end shafts were repaired, two plates renewed, two others faired in place, some caulking done, and the hull scraped and painted up to the water line. On May 13 the *Beaujeu* came out of dry dock. She took coal on the 14th and arrived at her station at St. Thomas channel on the same day. She worked there until May 21, when she was run into by the ss. *War Beryl* of the C.P.O.S., and badly damaged forward. She proceeded to Quebec the same day, remaining there until the Inquiry had been held by the wreck commissioner. She came up to Sorel, May 29, and was there until June 24 undergoing repairs.

Dredge *Beaujeu* left Sorel June 24, arrived at St. Thomas channel, June 25, and resumed dredging the same date. She was employed here, cleaning up some "silting in" that had taken place in this channel, the material to be moved being clay and stones. On October 7, work was stopped for the season. She left St. Thomas channel October 8, arrived at Sorel, October 9, and went into winter quarters.

During the season *No. 8* worked 95 days and her machinery was in actual operation 79 per cent of the full working time.

The total number of cubic yards removed amounted to 131,900 at a cost of \$156,489.34 or \$1.18 $\frac{4}{100}$  cents per cubic yard.

The total number cubic yards removed by the whole of the dredging fleet amounted to 517,305 at a total cost of \$422,107.05 or \$1 $\frac{59}{100}$  cents per cubic yard.

11 GEORGE V, A. 1921

AVERAGE DEPTH for each month in the 27½ foot channel (27½ feet at ordinary low water) from Sorel Gauge during each year May to November.

## SOREL SHIPYARD.

## REPORT OF ACTING OFFICER IN CHARGE, L. LACOUTURE.

On April 1, 1919, the winter repairs and renewals to the St. Lawrence Ship Channel fleet and the Construction of Lights Department vessels were nearly all completed.

The outfitting was in progress, also the engaging of the crews for the new season's work.

The river Richelieu was clear of ice on March 27, and the St. Lawrence at Sorel on April 14.

The first dredge of the fleet left Sorel going into commission on May 5, 1919.

All the vessels in commission were maintained in good and serviceable condition during the season.

## NEW CONSTRUCTION.

No new vessels were built at the shipyard during the fiscal year 1919-20.

## BUOYS.

Fifty buoys of different designs, were constructed and shipped to various destinations during the fiscal year, viz.:—

1 gas and whistling buoy complete.

34 conical buoys.

6 bell buoy floats.

4 whistling buoys complete

5 steel ice buoys (alterations).

The Buoy Department was supplied with fittings and material such as rods, shackles, chains, hooks, chisels, etc.; repairs were also made to buoys.

## NAVAL SERVICE DEPARTMENT.

Work done for this department included supplies for yacht *Bethalma*. Coal clams returned from Halifax and used by the Naval Service Department were also unloaded and erected.

## ST. LAWRENCE SHIP CHANNEL.

Work done for this branch included making and repairing guage boards, iron posts, and supplying timber, etc.

## PRIVATE FIRMS.

*Canada Steamship Line*.—The steamer *Three Rivers* belonging to this firm was put on the ways for the winter, and heavy repairs were carried out to hull, rudder, etc.

*Sincennes McNaughton Line*.—Had use of shear legs and some welding done to boilers of tugs.

*Canadian Vickers, Limited*.—Pumping, clearing snow, and watching on board dredge No. 16.

*Sorel Mechanical Shops, Limited*.—The following vessels were put on the ways for this firm: steamer *Caspian*, November 6 to November 8; scow *Pennsylvania*, November 13 to November 19.

SESSIONAL PAPER No. 21

*Prescott Dock and Ferry Co.*—On September 30 the steamer *Ferdinand* was put on the ways for repairs to hull, painting, and repairs to machinery and boiler.

*Barge Reliance.*—Belonging to A. Morgan, Esq., was hauled out on the ways on May 21, for examination and launched on July 21.

GENERAL.

The shipyard launches *Bronx* and *Leros* were maintained in good order and painted. All the fences had necessary repairs during the season. The shipyard ways and wharves were repaired and kept in good condition.

The force employed during the fiscal year varied from 505 to 323 men, and averaged 414 men daily.

The financial statement shows the total amount expended on the shipyard and ship channel to have been \$556,244.24.

SESSIONAL PAPER No. 21

## METEOROLOGICAL SERVICE.

REPORT OF SIR FREDERIC STUPART, DIRECTOR.

Meteorological returns have been received at the Central office from 615 stations, exclusive of 111 storm signal stations. Twenty-seven stations have ceased reporting during the year, while on the other hand 29 have been added to the list.

The following are the new stations:—

## STATION.

|                     |                      |
|---------------------|----------------------|
| Aberdeen Lake, B.C. | Causapsal, Que.      |
| Alexis, B.C.        | East Angus, Que.     |
| Campbell Lake, B.C. | Shipshaw River, Que. |
| Duncan, B.C.        | St. Donat, Que.      |
| Malahat Beach, B.C. | Boiestown, N.B.      |
| Savary Island, B.C. | Chipman, N.B.        |
| Vernon, B.C.        | Hardwood Ridge, N.B. |
| Barons, Alta.       | St. George, N.B.     |
| Makepeace, Alta.    | St. Quentin, N.B.    |
| Spray Lakes, Alta.  | Upsalquitch, N.B.    |
| Strathcona, Alta.   | Mount Uniacke, N.S.  |
| Espanola, Ont.      | Port Clyde, N.S.     |
| Niagara Falls, Ont. | Springfield, N.S.    |
| Whitby, Ont.        | Tra'algar, N.S.      |
| Berthierville, Que. |                      |

## CENTRAL OFFICE.

The regular recognized work of the Central office has been carried on systematically throughout the year. Forecasts have been issued twice daily to all parts of the Dominion, exclusive of British Columbia, and to Newfoundland. Since the early spring the weather bulletins have been supplied with the utmost despatch to the British Admiralty through Halifax, and also the Government wireless stations for transmission over the Atlantic routes. Also, when deemed necessary, warnings of expected storms have been issued to those ports which are equipped with storm signals.

The warning service was continued throughout the year to ports on the Nova Scotia coast and the season of navigation on the Great Lakes and gulf of St. Lawrence. The severest storm of the season on the Great Lakes was that of November 29, but owing to the lateness of the season and the issue of a timely warning, there were few, if any, marine disasters. A succession of noteworthy storms passed across the Maritime Provinces during February and the first part of March, several of the gales being of great violence. Shipping was warned in each instance.

The following stations were inspected from the Central office: Grimsby, Rock Chapel, Port Dalhousie, Southampton, Parry Sound, Depot Harbour, Coldwater, Orillia, Midland, Port McNicoll, Collingwood, Meaford, Owen Sound, Wiarton, Tobermory, Cabot Head, Kincardine, Bayfield, Goderich, Arkona, Sarnia, Burlington, Brantford, Port Burwell, Port Dover, Port Colborne, Welland, Oakville, Oshawa, Cobourg, Port Hope and Kingston.

The daily weather map containing the data on which forecasts are based, has as for years past been printed in Toronto, and distributed quite widely both in that city and in the country generally, and quite recently arrangements have been completed whereby a similar map will be printed in Winnipeg in order to serve Manitoba.

*Publications.*—Each day 417 weather maps have been distributed, chiefly in Toronto, but many go to outside places, particularly schools. Each month 659 monthly weather maps and 496 copies of the Canadian Weather Record have been sent out; of annual issues 127 copies of the 1918 Toronto Observatory Year

Book and 64 copies of the Toronto Observatory Magnetic Report have been distributed. Books and periodicals received have numbered 269, besides numerous pamphlets.

#### PHYSICS BRANCH.

It was about the middle of September, 1919, before Mr. J. Patterson, M.A., had sufficiently perfected the process of separating helium from natural gas, on which he had been engaged for nearly two years with the Department of Experiment and Research of the Board of Invention and Research of the Admiralty, to enable him to resume his duties at the Meteorological office. Since that time he has devoted his time to getting the work of the Physics Branch organized.

The investigation of the upper atmosphere by means of balloons carrying instruments was started immediately, but the company from whom the balloons were obtained have been unable to supply more than two or three, and the work has been temporarily held up until they can furnish them regularly.

Arrangements were nearly completed to send an observer to Fort Good Hope to take magnetic and meteorological observations and send up pilot balloons in co-operation with the Amundsen Expedition before the announcement of Amundsen's expected arrival at Nome was received. It has now been decided by the international committee in charge to postpone this work for one year.

It is expected that during the year at least seven pilot balloon stations will be established across Canada to meet the requirements of the Air Board and for investigating the upper atmosphere.

The investigations on solar radiation and atmospheric electricity will be resumed during the year and it is also hoped to commence work on earth and ocean temperatures.

#### CLIMATOLOGY AND AGRICULTURAL METEOROLOGY.

The Monthly Record of Canadian meteorological data has been printed more promptly than ever before. The preliminary monthly map giving a summary of the weather of the Dominion for each month four days after it closes, has been continued and improved; also the 79th Annual Report of the Toronto Observatory has been published.

Special attention is being given to the weather of the western provinces, where the dependability of average or better than average weather is being worked out with the idea of mapping out the risks of farming in each district, depending upon the weather alone. The scarcity of observations of rainfall has been a serious drawback and it is hoped that a greater number of rainfall stations may be opened in the future.

Statistical studies of the yield of wheat and oats have been continued and a comprehensive attempt to abstract from all publications of other departments every reference to crops and the weather has been begun with the idea of determining to what extent other departments of the Government could co-operate with us in obtaining data valuable for study in agricultural meteorology without much extra effort or expense.

A paper outlining the main features of a study of the relation of the weather to the quality and yield of the sugar beet will be published this year.

Attention is devoted to the possibility of issuing special forecasts of settled weather conditions about a week in advance during harvest time, but so far we have not felt justified in issuing bulletins to the farming community.

During the fiscal year ending March 31, 1920, the photographic records of the daily changes in the magnetic elements at Agincourt were obtained without material loss. Magnetic disturbances were of frequent occurrence and often

SESSIONAL PAPER No. 21

for short periods passed beyond the recording limits of our instruments. The most pronounced disturbances took place on the following dates: 1919—April 7, 17; May 2, 3; August 11, 12; September 19, 20; October, 1, 2, 3, 5, 6, 23; December 14, 15. 1920—March 4, 5, 22, 23.

Absolute observations were made weekly to keep control of the base line values of the differential instruments.

Tables showing the magnetic character of each day have been forwarded as usual to the International Commission on Terrestrial Magnetism. The days selected by the commission for analysis have been used in the preparation of the magnetic reports for both Agincourt and Meanook. The report for 1918 is now in progress.

At the request of the Surveyor-General, index corrections for the compasses attached to seventy-one surveyor's theodolites were determined and the results forwarded to him.

Assistance was given to several members of the staff of the Surveyor-General's Department in determining the constants of their total force instruments both before and after their field work, and also to Mr. French, of the Dominion Observatory, in standardizing his magnetometer both before and after his field work.

Special observations were made during the total solar eclipse of May 29 at the request of Dr. Bauer, Director of the Department of Terrestrial Magnetism, Carnegie Institution, Washington, and a report of the results forwarded to him.

At Meanook only the declination changes are observed photographically and the instrument for this purpose was maintained in operation throughout the year. During the very cold weather of the winter, difficulty was again experienced in keeping the clocks running and a considerable number of hours of record were lost.

Weekly observations were made of declination, inclination and twice monthly of horizontal force.

The accompanying tables give a summary of the results obtained at Agincourt and Meanook during the fiscal year 1919-20.

DAILY and Monthly Ranges.

## SESSIONAL PAPER No. 21

## TIME SERVICE.

During the year ending March 31, 1920, seventy-three determinations for time were made by transit of stars in the meridian with the 3-inch Troughton and Simms transit instrument. The positions of the stars have been taken from the American Ephemeris and the British Nautical Almanac.

The collimation error of the transit instrument has been determined by reversal on the wires in the collimating telescope, reversal upon Polaris, and in conjunction with the determination of the instrumental azimuth error by suitable star transits in reverse and direct positions of the axis using a least square computation.

The different clocks have performed very satisfactorily but there is a great need of an additional mean time clock and chronometer.

The magneta clock and secondary circuits have not failed throughout the year and are in first-class condition.

The usual time exchanges between Toronto and Quebec, Montreal and St. John, N.B., have been made, being recorded on the chronographs at Toronto, Montreal, and St. John. The errors of the clock have been computed from the latest observations.

The 11:55 a.m. signals have been given over the fire-alarm systems throughout the year.

Time has been given weekly to the Magnetic Observatory at Agincourt and daily to the C.N.R. running out of Toronto.

The following table will show the differences between the times at the several observatories and that at Toronto. The sign + indicates slow of Toronto:—

| Date.            | Montreal. | Quebec.  | St. John. |
|------------------|-----------|----------|-----------|

## SOLAR OBSERVATIONS.

The sun was observed on 160 days and on all of those days spots were visible. Maps were made with the 6-inch Cook refracting equatorial telescope using a 50-power eye-piece, the projected image being 5 inches in diameter.

The principal sunspot groups occurring February 1 to 12, three large groups, two north and one south of the equator.

On May 9 a large group of small spots with a very large penumbral spot preceding, was central on the sun.

June 16 to 23, two groups of large penumbral spots north and south of the equator, and again a very large disturbed area was visible from August 15 to 24, being central on the 19th.

The mean sunspot relative numbers for the months of the civil year ending December 31, 1919, were: January, 68.3, February, 94.7, March, 67.5, April 64.5, May 95.9, June 139.7, July 83.2, August 102.6, September 61.7, October 62.2, November, 46.7, December 57.6. Yearly mean 78.7 being slightly in excess of that of 1918 (74.6). These relative numbers are computed from Wolf's formula,  $r=10g + f$  where  $g$  is the number of groups visible on any day and  $f$  the total number of spots, whether they were in groups or isolated.

#### SEISMOLOGICAL OBSERVATIONS.

The Milne seismographs at Toronto and Victoria have been kept in efficient working order, with comparatively little loss of record, throughout the fiscal year. No change has been made in the adjustments of the instruments, both booms being kept at a period of 18 seconds.

In Toronto, 158 unfelt earthquakes were recorded. This is the largest number recorded at Toronto in any year, being 61 greater than average as deduced from 21 years' data, and 24 greater than recorded last year. The largest monthly total, 21, occurred in May, and the least, 5, in February. There has been marked increased seismic activity since 1914.

The most important quakes were recorded on April 17 and 30, May 3 and 6, August 29 and 31, September 6, January 4 and March 29.

The tidal gauges at San Francisco and other stations on the Pacific coast recorded sea waves caused by the earthquake of April 30, the principal effect lasting from 12 to 20 hours. Records from various seismographs show that there were two earthquakes on the 30th, and the times not being far apart, various phases overlapped, the principal one occurring at 7h. 16m. G.M.T., with epicentre approximately in latitude  $6^{\circ} 48'$  south, and longitude  $158^{\circ}$  west.

The origin of the earthquake of January 4 was near mount Orizaba, a volcano situated about seventy miles west of Vera Cruz. In this vicinity the most serious damage was done. The amplitudes of record for this earthquake at Toronto and Victoria were not commensurable with the destructiveness in the region of origin, possibly owing to its volcanic nature.

We forward abstracts of all our observations to various seismological centres throughout the world and receive a number of bulletins in return. We also publish the records in several journals, and there is increased demand from various societies for copies of our data. We furnish the Associated Press with information, by request, concerning the character of any large earthquake and the distance to the epicentre as ascertained from the times of arrival of the various phases. The Toronto evening papers are sometimes supplied with bromide copies of the record.

Epicentres of all large earthquakes are determined after sufficient and trustworthy seismological data are received to base the plotting on.

Investigation regarding the correlation of microseism and meteorological phenomena has been regularly carried out by examination of the daily weather map and local temperatures. These mysterious pulsations suddenly appear at times and continue for days, then as suddenly disappear. They were supposed to be caused by convection currents set up in the instrument room, but lately it has been concluded that the majority of them are seismic in nature. They often mask the various waves on a record.

We systematically group records of large earthquakes emanating from similar centres and find a strong resemblance in many of the features of the records so that knowing the areas of seismic activity, one may sometimes be able to locate a particular earthquake, by the study of a single seismogram.

It is hoped shortly to install the Milne-Shaw type of instrument, both at Victoria and at Toronto. This is the instrument adopted by the British Asso-

## SESSIONAL PAPER No. 21

ciation; also in the near future to equip the Magnetic Observatory at Meanook, Alberta, with a similar instrument.

## PHENOLOGICAL OBSERVATIONS.

The reports received from observers during the past year were excellent. These reports of the dates of flowering of plants, ploughing, sowing, reaping, etc., not only indicate fairly the climatic conditions of a district, but add to our knowledge of the effect of weather upon agriculture. Excellent schedules with average dates for Nova Scotia were received from Dr. A. H. Mackay, Superintendent of Education, for that province, and we are indebted to Mr. W. H. Magee, Inspector of Schools for part of Saskatchewan, who also kindly supplied schedules. The results of these observations which are published in the Annual Supplement of the Monthly Meteorological Record, also in the Annual Report of the Royal Society of Canada, were prepared by Mr. F. F. Payne, of the Central office.

## OUTSIDE STATIONS.

The 611 Meteorological stations reporting to the Central office, are divided into two divisions, the first of which includes 333 stations where the observing is performed voluntarily by observers who keep a daily record of the weather, using instruments furnished by the Government. In many instances the record kept is most comprehensive, and to the observers at these stations the country owes a debt of gratitude for data which is of great value. In the other division are 278 stations where remuneration is allowed. Those stations are divided into various classes, according to the work performed, as follows: 15 Chief stations, 41 Telegraph stations, 109 Rainfall stations; 72 Climatological stations, 39 Bulletin stations and 2 Magnetic stations.

There are also 101 meteorological agents whose duty it is to attend to the display of storm signals.

The daily forecasts are based on bi-daily reports from 41 Telegraph Reporting stations and 6 of the Chief stations, together with about one hundred reports from the United States. The utmost regularity and promptness is required from observers at these stations in filing their reports for transmission by wire to the Central office, every day throughout the year, including Sundays and holidays.

The reports of the more important Meteorological stations, Victoria, B.C., Montreal, Quebec, and St. John, are given in appendices, A. B. C. D.

## APPENDIX "A."

The Director of the Quebec observatory reports as follows:—

As in the past, the usual daily observations were taken regularly, and the various instruments under my care have been kept in good order.

Statistics and reports on the weather conditions were given to the public, and this office is growing in importance in that respect.

Reports were also furnished to our local civil courts with regard to precipitation and wind storms, etc., in various cases in which such data were required.

The time-ball, which has been in operation during the whole navigation season last year, is now being overhauled to be made ready for the next season, which is expected to take place in the very near future.

## APPENDIX "B."

The Director of the St. John, N.B. observatory reports as follows:—

The tri-daily meteorological observations have been carried on at 9 a.m., 3 p.m. and 9 p.m. without change from my former report. Results of the morn-

11 GEORGE V, A. 1921

ing and night observations were immediately coded and telegraphed to the Central office, Toronto, for use of the weather chart. The eye readings at the above mentioned fixed intervals made with the standard or control instruments serve to check the autographic recorders which continuously register barometric pressure, temperature and humidity, from these instruments as well as the sunshine recorder, electrical rainfall and wind direction and velocity registers, hourly values are abstracted and daily and monthly means computed. An additional reading of the various instruments and general condition of the weather is made at noon to accompany the daily report furnished the afternoon newspapers.

No material changes have been made in the meteorological equipment or the exposures.

The wind instruments at Point Lepreaux continue to give valuable records of direction and velocity in that vicinity. The daily record sheets from the register at that station have been sent here weekly for analysis and tabulation. The anemometers at this station as well as at St. John have been frequently changed and cleaned to maintain them in efficient working condition.

The weather bulletin has been printed in the observatory every week day morning immediately after receipt of the telegraphic message from Toronto. The forecasts, synopsis of prevailing data from selected stations provide most satisfactory information, which is of great value to mariners, shippers and other interests depending largely on weather conditions. Copies of this bulletin are posted in public places, distributed through the mail and published in afternoon newspapers.

The New Brunswick Telephone Company continues the courtesy of telephoning the forecasts to their various offices throughout the province.

Numerous calls by telephone are daily received for the time, weather forecasts and other information connected with the service. During the past year the clerical work in answering correspondents for statistics and for special information required by transportation companies and others has decidedly increased, much detailed information is required particularly during the winter months when shipments through this port are most extensive and at other times when engineers are making surveys and investigations.

The reports received monthly from all stations in the Maritime Provinces have been checked and many of them summed and meaned. After entering the necessary data in our abstract registers they have been forwarded to the Central office at Toronto. Statistics from these are available here to reply promptly to inquiries for data covering different places in the Maritime Provinces. During the past year several new temperature and rainfall stations have been opened at places not heretofore reporting.

#### MARITIME PROVINCE TIME SERVICE.

For the determination of the errors and rates of the sidereal clocks, observations of standard stars were made entirely by the transit micrometer method, the records from the contact points on the micrometer head recording on the chronograph along with the seconds of the observing clock. Reversals were made on each star to eliminate collimation and pivot error corrections, nine contacts being made on each position of the axis and from six to ten stars including not less than two polars for azimuth. The Rieffer sidereal clock in the basement clock room has been run under constant pressure and temperature. The sealing of the clock continues absolutely perfect, and no use of the air pump was necessary. The Kullberg sidereal clock was cleaned and is now in perfect condition. The rates of both these clocks have been small and steady.

The mean time transmitting clock was cleaned in March and its electrical attachments for automatically sending the time signals re-adjusted. The

## SESSIONAL PAPER No. 21

various electrical appliances connected with the transmission of time signals and synchronizing clocks are in good condition. The 10 a.m. Atlantic Standard time signals have been regularly continued. Special signals frequently called for are transmitted by telegraph or telephone, the beats of the clock relay being quite audible in the long distance and local receivers.

The St. John time-ball has been dropped each week-day at 1 p.m. Atlantic Standard, excepting for several days in February owing to a severe ice storm on the sixth of that month which completely interrupted all local wire service. The system of hourly synchronizing tower, street, bank, office and factory clocks in St. John, by direct wire from the observatory, continues to be most useful and satisfactory. Some chronometer and watch adjusters have clocks which are hourly corrected by the synchronizing signal, others have bells which give an audible signal every hour, and some take the beats from the clock relay through the telephone. The public generally make many calls daily for the correct time.

The Halifax time-ball has been dropped each week-day at 1 p.m. Atlantic Standard, by time signals from this observatory through the master clock in the Western Union office there, which is automatically corrected by the 10 a.m. time signal from St. John; occasionally, owing to wire or other troubles, the signal has to be repeated at following hours. Many of the watch and chronometer adjusters in Halifax, the Admiralty, Cable Docks, Nova Scotia Telephone Company and others have wire connections with the Western Union, and receive the daily signals.

Watch inspectors of the Canadian National Railways in the Maritime Provinces have wire connections with sounders on their premises to receive the signal from the observatory.

The observatory grounds have been maintained in good condition, particularly the spacious lawn, where the outside meteorological instruments are exposed.

## APPENDIX "C."

The Director of the Gonzales Heights observatory, Victoria, B.C., reports as follows:—

During the past year the regular meteorological observations have been taken and daily weather forecasts issued for Vancouver island, the lower mainland, Kamloops and Kootenay districts. Arrangements have also been made to furnish special weather forecasts for the benefit of the fruit growers in the Okanagan Lake district. These will be issued during the spring and early summer as a means of warning the growers of the probable advent of serious frosts, and in the autumn and early winter warnings will be issued in connection with the probable approach of pronounced cold spells for the benefit of fruit shippers desirous of forwarding fruit through the mountains to the Prairie Provinces.

Storm warnings have been issued for Victoria, Vancouver and Nanaimo; these have been appreciated especially by owners of small craft, and numerous 'phone inquiries have been answered respecting general weather conditions, and when safe to leave port on towing and fishing operations.

Monthly summaries of the temperature and precipitation as obtained from our telegraph stations have been regularly published in the press of the province.

The monthly weather reports now received from 145 stations in this province and the Yukon have been regularly checked, entered in our register, then forwarded to you for publication. As numerous inquiries are received here for weather data on specified dates from our stations, I am now entering the daily

11 GEORGE V, A. 1921

readings here for all stations, as well as the monthly summaries, in order that prompt replies may be furnished inquirers.

#### TIME SERVICE.

Star transits have been taken at intervals and accurate time maintained. The time-ball which is installed on one of the highest city buildings has been dropped daily (including Sundays) at 1 p.m., and has throughout given perfect satisfaction.

Time is also furnished to numerous inquirers by the phone. At 10 a.m. daily the time is also sent from this office by wireless to all the radio stations within 300 miles, and all shipping within this area, including that in the ports of Vancouver and Nanaimo can also receive this time.

In order to obviate the present hand-sending method, I am pleased to state that I, in conjunction with Mr. Haughton, superintendent of our wireless service here, and members of his staff, have designed an automatic instrument which, started by our clock to the nearest tenth of one second, will send the international time signals by wireless for the period of three minutes. The exact termination of each minute being clearly defined.

The instrument, which was constructed in the wireless workshop here, is a very fine piece of mechanism and reflects great credit upon those engaged upon it.

It is expected to have this instrument in regular daily service very shortly.

During the past year over 1,800 visitors have been shown over this institution, and addresses bearing on the work of our service have been given both to school classes and at public meetings.

The following stations have been inspected during the year: Nanaimo, Entrance Island, Summerland (installed electric anemograph), Penticton, Keremeos, Nelson, Creston, Kaslo, Grand Forks, Osoyoos, Kelowna, Armstrong, Salmon Arm, Granite Peak, Kamloops, Tranquille, Quesnel, and Barkerville.

The past year has been remarkable for the large number of earthquakes recorded here, amounting to 149, which is the greatest annual number registered here since the seismograph was installed in 1899. The greatest monthly number of quakes was 20 in May, 1919, and February, 1920, while in September and November only 8 quakes were recorded in each month. During the night of January 23 an earthquake lasting several seconds was felt both on Vancouver island and about Vancouver city. It was well recorded here, and from careful measurements its origin appears to have been under the Strait of Georgia in the vicinity of Mayne island.

Certain necessary repairs and painting asked for have been completed by the Public Works Department in a most satisfactory manner pertaining to the interior of the building, and during the fine summer season the exterior walls and dome are to be cleaned and repainted white, which will certainly add greatly to the beauty of this building, as well as preventing further weather action now becoming apparent.

#### APPENDIX "D."

The Director of the McGill University observatory, Montreal, reports as follows:—

The prescribed work of this station has been carried on without interruption; all routine work has been punctually attended to. In addition to daily weather summaries to the press and printed abstracts, inquiries by telephone or letter or personal applications for information on weather particulars or climatic data are being met. The daily forecast from the Central office is frequently called for.

## SESSIONAL PAPER No. 21

Time signals have been supplied to the city, the commissioners of the harbour, the Canadian Pacific and Grand Trunk railways, various jewellers and corporations.

The staff comprises the director, a young lady assistant and, when available, an observer for the 8 o'clock weather reports. The writer does the time service and part of the weather observing. The lady attends to the office, sends time signals, typewrites, and answers the telephone.

Certain particulars of improvements to the equipment may be given. A Howard astronomical clock from the Geodetic Laboratory was overhauled and installed in the observatory as a relief to the master clock in case of accident to the latter. The new arrival has attained surprisingly good time-keeping properties.

The Riefler and Ballou sidereal clocks were both cleaned and adjusted, and the four clocks are now running satisfactorily.

We were fortunate in arriving at this result without any expenditure. The labours of Mr. A. Stirling, than whom we can imagine no more skilled artist with timepieces, were given freely. We regret his removal of residence to Scotland. Mr. Stirling also rebuilt an astronomical clock, replacing the Howard taken from the Geodetic Department to the observatory, and kept all the observatory instruments in repair through the year.

A wireless receiving set was recently installed, but as yet is not sufficiently complete to receive the Arlington time.

The calendar record of difference of temperatures between the summit of Mount Royal and this station is still being kept up. We have long held the view that this investigation was as futile as it is ingenious. The differences are never, on our examination, following any rational system. Impending weather changes certainly are not indicated. It runs of its own inertia and costs about \$100 per year. I believe the Physics Department concurs in my views of its futility. We should very much like to have the distant thermometer a mile or so in the air with an assurance that all cable effects really were compensated. Something then would be added to knowledge.

Near the surface of the hill, and only some 500 feet above us, nothing may be expected, even if accurate differences were attained.

The Harbour Commissioners' time-ball is still unsuitably exposed to fulfil its main purpose; it cannot be seen from half the ships. The lack of current in their loop, or their defects, have caused several failures to drop the ball this year.

The Great Northwestern Telegraph Company have attended to our business satisfactorily.

## REPORT OF L. A. DEMERS, WRECK COMMISSIONER.

|  |    |
|--|----|
| Formal investigations during the year..... | 22 |
| Preliminary inquiries.....                 | 4  |

During the calendar year 1919 there were 240 casualties reported to the department, the tonnage of same being 205,720 and the stated damage \$1,808,690, while 126 lives were lost.

Of this total number of casualties 207 were to coasting and sea-going vessels, the tonnage of same being 176,043 and the stated damage \$1,211,010; 100 lives were lost; 33 of the casualties were to inland vessels, the tonnage of same being 29,677 and the stated damage \$597,680.

In 150 cases of casualties to coasting and sea-going vessels and 18 to inland vessels, the amount of damage is not stated.

Sixty-four of the casualties to coasting and sea-going vessels, consisting of 21 steam and 43 sailing vessels, resulted in total losses, the tonnage of same being 27,249 (Canadian, 17,333; British, 2,816; foreign, 7,100).

Ten of the casualties to inland vessels, consisting of 9 steam and 1 sailing vessels, resulted in total losses, the tonnage of same being 6,837 (Canadian, 3,175; foreign, 3,662).

Casualties are given under the following headings:—

| <i>Coasting and Sea-going Vessels.</i>                 |    |
|--|----|
| Collisions.....  | 36 |
| Foundering.....  | 30 |
| Miscellaneous accidents: fire, loss of sails, etc..... | 59 |
| Strandings.....  | 82 |
| <i>Inland Vessels.</i>                                 |    |
| Collisions.....  | 7  |
| Foundering.....  | 10 |
| Miscellaneous accidents.....                           | 1  |
| Strandings.....  | 15 |

## STATEMENT of investigations into wrecks and casualties which occurred to Canadian, British and Foreign vessels, held during the fiscal year 1919-1920.

| Name of Ship and Official Number.               | Registered Port.           | Remarks.  |
|---|----------------------------|---|
| Albatross.....                                  | (Portuguese).....          | On March 9 was wrecked off Long Island, Nova Scotia, and two lives were lost. Preliminary inquiry was held at Halifax on March 14 before Captain, W. F. Mitchell.<br><i>Finding.</i> —Vessel was needlessly thrown away.  |
| Admiral Hasting.....                            | (British).....             | On August 22, stranded on Bagot bluff, gulf of St. Lawrence. Formal investigation was held at Sydney, on September 5, before Captain L. A. Demers, Dominion Wreck Commissioner, assisted by Captains A. J. Morrison and O. C. Lewis, acting as nautical assessors.<br><i>Finding.</i> —Error of judgment on part of master Frank Dudley. On account of his previous good record, his certificate is not dealt with, but he is cautioned.                      |
| Bohemian.....<br>113400                         | Liverpool, G.B.....        | On 3 area 1 stranded near Sisters rock, Sambro ledges, N.S., and six lives were lost. Formal investigation was held at Halifax, on March 5 and 6, before Captain J. B. Henry, assisted by Captains Neil Hall and C. O. Allan, acting as nautical assessors.<br><i>Finding.</i> —Master Ernest C. Hiscoe at fault for not having taken soundings. His certificate is suspended for four months.  |
| Corcoran.....<br>and<br>Champion.....<br>103975 | (American).....<br>Quebec. | On June 2, collided off island of Orleans. Formal investigation was held at Quebec, on June 30 and July 4, before Captain L. A. Demers assisted by Captains Chs. Lapierre and C. J. Stuart, acting as nautical assessors.<br><i>Finding.</i> —SS. <i>Champion</i> alone to blame for collision. Both master and first mate in default. Certificate of Donat Lemay, Master, and is suspended for six months, that of Alcide Gagne, 1st Mate, for three months. |
| Chebucto (Ferry).....<br>108683                 | Halifax.....               | On June 9 injured Halifax dock, through negligence on part of SS. <i>Hippolyte</i> . Formal investigation was held at Halifax, on July 30, before Captain L. A. Demers, assisted by Captains Neil Hall and Jos. Blois, acting as nautical assessors.<br><i>Finding.</i> —Damage to dock caused by SS. <i>Hippolyte's</i> presence in close proximity to the ferry and the entrance to her landing place. Master Jas. A. Crouse is severely reprimanded.       |

SESSIONAL PAPER No. 21

STATEMENT of investigations into wrecks and casualties which occurred to Canadian, British and Foreign vessels, held during the fiscal year 1919-1920—Continued.

| Name of Ship and Official Number.                 | Registered Port.   | Remarks.  |
|---|--------------------|---|
| Caddo.....  | (American).....    | On June 15 stranded at Isle aux Basques, St. Lawrence river. Formal investigation was held at Montreal, on July 21, before Captain L. A. Demers, assisted by Captains Chs. Lapierre and C. J. Stuart, acting as nautical assessors.<br><i>Finding.</i> —Pilot Phileas Lachance responsible for accident, in not adopting precautionary measures in foggy weather. He is severely reprimanded and cautioned.   |
| Couzelette<br>128065.....                         | Quebec.....        | On August 8 stranded on Seal rock. Formal investigation was held at Quebec, on September 18, before Captain H. St. Geo. Lindsay, assisted by Captains J. F. Robinson and W. E. Mitchell, acting as nautical assessors.<br><i>Finding.</i> —Master Joseph Delisle to blame, as he failed to use either good judgment or ordinary care in navigating his vessel so close to a lee shore. His certificate is suspended for three months.   |
| Captain Dan.<br>141373.....                       | Montreal.....      | On August 22 collided with breakwater and sank in Quebec harbour. One life was lost. Formal investigation was held at Quebec, on August 25, before Captain L. A. Demers, assisted by Captains Chs. Lapierre and C. J. Stuart, acting as nautical assessors.<br><i>Finding.</i> —Master J. B. Camache in default for lack of judgment. His certificate is suspended for two months. Pilot Eudors Langlois did not exercise proper judgment in bringing ship so close to breakwater, and showed marked indifference in issuing orders for course. His license is suspended for four months. Mate Tremblay is severely reprimanded for not having rendered immediate assistance to the women and launching the boats. No one responsible for the loss of life, which was accidental. |
| Cape Breton<br>97808.....                         | Montreal.....      | On April 5 damaged by explosion on board, while at Cape Spear, Nfld. Formal investigation was held at Sydney, on September 25, before Captain L. A. Demers, assisted by Captains C. M. Crockett and Geo. Symington, acting as nautical assessors.<br><i>Finding.</i> —No one to blame; accident due to the weakening of the patch on the centre furnace and bottom of combustion chamber, through corrosion.  |
| Canadian Volunteer.....<br>141424.                | Montreal.....      | On December 8 stranded in Cap a la Roche channel. Formal investigation was held at Montreal on December 22, before Captain L. A. Demers, assisted by Captains Chs. Lapierre and C. J. Stuart, acting as nautical assessors.<br><i>Finding.</i> —No one to blame; accident due to uncontrollable circumstances, ice and snow contributing to neutralize the pilot's knowledge and efforts.   |
| Chelston<br>119444.....                           | Glasgow.....       | On September 12 stranded on St. Paul island, Cape Breton. Formal investigation was held at Montreal on October 9, before Captain L. A. Demers assisted by Captains Chs. Lapierre and C. J. Stuart acting as nautical assessors.<br><i>Finding.</i> —Accident due to grave error of judgment on part of Master A. M. Fotheringham. His certificate is suspended for three months.  |
| Glenholm.....                                     | (Canadian).....    | On August 22 stranded on Goose Tongue rock, Spence's island, N.S. Formal investigation was at St. John on September 9, before Captain L. A. Demers, assisted by Captains A. J. Mulcahy and O. C. Lewis, acting as nautical assessors.<br><i>Finding.</i> —Error of judgment on part of Master H. W. Moore. He is severely reprimanded, but, on account of his previous good record, his certificate is not dealt with.  |
| Gladys H. (barge)<br>and<br>Eric W.....<br>116815 | Montreal.....      | On July 12 the <i>Eric W.</i> caused the <i>Gladys H.</i> to collide with the C. P. R. bridge in Lachine canal. Formal investigation was held at Montreal on October 9 and 10, before Captain L. A. Demers, assisted by Captains Chs. Lapierre and C. J. Stuart, acting as nautical assessors.<br><i>Finding.</i> —Master of <i>Eric W.</i> , J. Theo. Marchand, violated Art. 29 of Rules of the Road for the Great Lakes. His certificate is suspended for one month.   |
| Germanicus.....                                   | (British).....     | On Nov. 7 stranded on Biquette island, St. Lawrence river. Formal investigation was held at Montreal on November 21, before Captain L. A. Demers, assisted by Captains C. J. Stuart and Chs. Lapierre, acting as nautical assessors.<br><i>Finding.</i> —Master John Clive incapable to administrate or exercise vigilance, having indulged in intoxicating liquors. His certificate as Master is cancelled, but Court recommends that a Mate's certificate be granted him.   |
| Huronic<br>107185.....                            | Collingwood, Ont.. | On August 15 stranded on Angus island, lake Superior. Formal investigation was held at Sarnia on September 17, before Captain L. A. Demers, assisted by Captain Peter McIntyre and Captain Ben. Garvie, acting as nautical assessors.<br><i>Finding.</i> —Error of judgment on part of Master, E. Walkinshaw, and his certificate is suspended for one month.   |
| Hendrick Lund.....<br>21—5½                       | (Norwegian).....   | On March 6 stranded at Dartmouth, N.S. Preliminary inquiry was held at Halifax on March 9, before Captain W. F. Mitchell.<br><i>Finding.</i> —Accident due to anchor dragging.  |

11 GEORGE V, A. 1921

STATEMENT of investigations into wrecks and casualties which occurred to Canadian, British and Foreign vessels, held during the fiscal year 1919-1920—*Concluded.*

| Name of Ship and Official Number.                            | Registered Port.                 | Remarks.  |
|--|----------------------------------|---|
| Lake Frolena.....  | (American).....                  | On August 6 stranded near Pointe du Chene, Northumberland strait. Formal investigation was held at Quebec on August 19, before Capt. L. A. Demers, assisted by Captains Chs. Lapierre and C. J. Stuart, acting as nautical assessors.<br><i>Finding.</i> —Pilot, Norbert Arcand, responsible for accident. His license is suspended for one month.  |
| Lakeport.....<br>and<br>Howard W.<br>133821                  | (American).....<br>Montreal..... | On October 29 collided near Hamilton's Light, Coteau lake. Formal investigation was held at Montreal on December 16 and 17, before Captain L. A. Demers, assisted by Captains J. A. Ouellette and Chs. Lapierre, acting as nautical assessors.<br><i>Finding.</i> —Howard W. alone to blame for collision. Certificate of Mate, L. J. Daigneault, suspended for seven months, for failure to comply with Rule 25 of Great Lakes Rules of the Road, and lack of judgment and prudence. Master L. Daigneault warned not to absent himself from bridge, in future, at crucial periods.   |
| Manxman.....<br>938255                                       | Montreal.....                    | On Dec. 18 foundered in Lat. 41-53' N, long. 59-31' W, North Atlantic and forty-three lives were lost. Preliminary inquiry was held at New York by the British Consul.<br><i>Finding.</i> —Accident due to heavy weather.   |
| North Star.....  | (American).....                  | On August 8 stranded near Yarmouth, N.S. Formal investigation was held at Yarmouth on August 4, before Captain L. A. Demers assisted by Captains E. E. Tedford and R. W. Goudey, acting as nautical assessors.<br><i>Finding.</i> —Captain Lewis F. Strout in default for careless navigation. Copy of finding forwarded to American Consul at Yarmouth, or action, if necessary.   |
| Rio Negro.....<br>143303                                     | London.....                      | On November 17 stranded near Pointe des Monts, St. Lawrence river. Preliminary inquiry was held at Quebec on November 20, before Captain H. St. George Lindsay. A formal investigation ensued, being held also at Quebec on December 3, before Captain L. A. Demers, assisted by Captains Chs. Lapierre and C. J. Stuart, acting as nautical assessors.<br><i>Finding.</i> —First Officer Alfred Hodder lacked in judgment by resuming his course without making himself positive of the nature of the light. His certificate is suspended for three months. 2nd Officer David Davies in default for disobeying instructions. His certificate is suspended for three months.  |
| Scotia.....<br>111875.                                       | Ottawa.....                      | On May 16 stranded at Mulgrave, N.S. Formal investigation was held at Mulgrave, on July 11th, before Captain L. A. Demers, assisted by Captains J. B. Scott and E. Smith, acting as nautical assessors.<br><i>Finding.</i> —Master, Geo. Cresine, erred in judgment in proceeding on when he failed to hear the fog-horn from Mulgrave, especially in view of the fact that there was a very strong tide and dense fog.   |
| War Toronto.....   | (British).....                   | On May 1 stranded on Hertel island, Montreal harbour. Formal investigation was held at Quebec on May 9th, before Captain L. A. Demers, assisted by Captains Chs. Lapierre and Chd. Koenig, acting as nautical assessors.<br><i>Finding.</i> —No one to blame: accident due to unforeseen happening.   |
| War Beryl.....<br>143057<br>and<br>Beaujeu (dredge).         | London.....                      | On May 21 collided near Crane Island, river St. Lawrence. Formal investigation was held at Quebec on May 27 and 28, before Captain L. A. Demers, assisted by Captains Chs. Lapierre and Alf. Hope, acting as nautical assessors.<br><i>Finding.</i> —War Beryl mainly to blame. Master, Robt. McKillop, erred in judgment by being absent from the bridge when navigating in narrow channel. He is cautioned. 1st Officer, H. A. Moore, is also cautioned. Pilot Joseph Delisle gravely erred in judgment in not reducing speed. His license is suspended for four months.<br>Master of dredge <i>Beaujeu</i> , A. Bourget, is severely reprimanded or not having had an officer and a watchman on duty.<br>Captain Hope, assessor, is dissident. |
| Waybausnene.....<br>112336, and<br>Long Sault.....<br>126853 | Collingwood, Ont.)<br>Quebec.    | On May 16 damaged in collision with SS. <i>Saguenay</i> , in Sorel harbour. Preliminary inquiry was held at Quebec on July 18 and at Sorel on July 22, before Captain L. A. Demers.<br><i>Finding.</i> —Handling of barge <i>Waybausnene</i> not done in seaman-like manner.  |
| War Witch.....<br>and<br>Gallia.....                         | (British).....<br>(French).....  | On August 7 collided in lat. 46-22' N., long. 55-35' W., North Atlantic, resulting in the sinking of the <i>Gallia</i> and loss of 19 lives. Formal investigation was held at Halifax on August 12 and 13, before Captain L. A. Demers, assisted by Captains O. E. Lewis and A. J. Morrison, acting as nautical assessors.<br><i>Finding.</i> —War Witch to blame for collision. Master and 2nd Mate in default. Certificate of Master William B. Bennett is cancelled, but Court recommends that he be granted a Mate's certificate. Certificate of 2nd Mate, Christopher Carroll, is suspended for a year.  |

SESSIONAL PAPER No. 21

STATEMENT of wrecks and casualties reported as having occurred to British, Canadian and Foreign vessels in Canadian waters and to Canadian vessels in other waters, from January 1 to December 31, 1919.

COASTING AND SEA GOING WRECKS.

| Date of Casualty. | Name of Ship.<br>Official No. | Age of Ship.<br>Years. | Registered Port.            | How rigged.<br>Iron or wood.<br>Steam or sail. | Regis. SESSIONAL PAPER No. 21

## MASTERS AND SEAMEN BRANCH.

REPORT OF B. F. BURNETT, SUPERINTENDENT.

During the fiscal year 1919-20, navigation schools were in operation at St. John, N.B., Halifax, N.S., Yarmouth, N.S., and Quebec, P.Q.; and marine lectures were delivered at North Sydney, C.B., Yarmouth, N.S., Collingwood, Ont., and Vancouver, B.C.

Examinations for masters' and mates' certificates were held at Halifax, N.S., Yarmouth, N.S., North Sydney, B.C., Charlottetown, P.E.I., St. John, N.B., Quebec, P.Q., Montreal, P.Q., Ottawa, Ont., Kingston, Ont., Toronto, Ont., Collingwood, Ont., Port Arthur, Ont., West Selkirk, Man., Edmonton, Alta., Nelson, B.C., Prince Rupert, B.C., Vancouver and Victoria, B.C.

Issued during the year: 9 masters', 16 mates' and 12 second mates' sea-going certificates of competency; 97 masters' and 92 mates' coasting certificates of competency; 38 masters' and 33 mates' inland waters certificates of competency; 36 masters' and 17 mates' minor inland waters certificates of competency and 47 masters' temporary certificates.

During the year 18,208 seamen were shipped at the various shipping offices.

## PILOTAGE REPORT.

CAPT. G. E. L. ROBERTSON, SUPERINTENDENT GENERAL.

Following the report of the Royal Commission on Pilotage, I was transferred to Ottawa on the 1st July, 1919, as Superintendent General of Pilotage.

The Minister of Marine and Fisheries is the Pilotage Authority for the Pilotage districts of Quebec and Montreal, and all matters relating to pilotage are dealt with through the local superintendent of pilots at Quebec. There are 50 pilots and 9 apprentices in the Montreal district, and 62 pilots and 8 apprentices in the Quebec district. The gross earnings of pilots in the Quebec district was \$141,917.77, and in the Montreal district \$133,364.36, giving an average of \$2,288.97 and \$2,600 to each pilot of the Quebec and Montreal districts, respectively. All expenses for these services are paid out of public funds. Expenses for fiscal year ending 31st March, 1920, were \$106,806.24.

In the Montreal district 5 per cent of the gross earnings of pilots is deducted for the Pension Fund (Montreal Decayed Pilots' Pension Fund). This fund is administered without charge for the Montreal pilots by the Department of Finance. Each pilot on retiring receives a pension of \$300 per annum, and \$150 per annum is paid to the widow of a pilot who dies either while on active service or who has retired.

During September, 1919, the pilotage rates for inland, coasting and sea-going steamers was increased 25 cents per foot of draught, this making them \$3.25, \$3.50 and \$4.00 respectively. This was done as the pilots represented that the rates in force did not allow for sufficient remuneration.

In the Quebec district 7 per cent of the gross earnings of the pilots is deducted for the pension fund. This fund is administered by the Quebec Pilots' Corporation, and amounted on December 31st, 1919, to \$87,524.10. In addition to the pension received from the corporation, certain retired pilots, 30 in number, receive an annual pension of \$300 from the Government.

The Pilotage district of Halifax, which was taken over in 1918 under the provisions of the War Measures Act, was formally taken over, with the Minister as the Pilotage Authority, on 1st January, 1920. New by-laws for the government of this district are being prepared, and will be applied at an early date.

11 GEORGE V, A. 1921

There are 13 first-class, 4 second-class, and 4 apprentice pilots in this district. The gross earnings for the year ending 31st December, 1919, were \$58,893.93. Each first-class pilot received \$3,604.79, and each second-class pilot \$1,802.39. Five per cent of gross earnings are deducted for the pension fund. Pilots on retiring receive a pension of \$50 to \$600, according to length of service. This fund is administered for the Halifax pilots by the Department of Finance without charge.

The Minister of Marine and Fisheries has, by an Order in Council, dated 21st December, 1918, been appointed the Pilotage Authority for the Pilotage District of St. John, N.B., and steps are being taken to have a local superintendent appointed and by-laws for the government of the district prepared.

The Pilotage Districts of Nanaimo, Vancouver, and Victoria-Esquamalt were, on the recommendation of the Royal Commission on Pilotage, amalgamated into one district, called the "Pilotage District of British Columbia," with the Minister of Marine and Fisheries as the Pilotage Authority, the orders in Council in this regard being dated 10th September, 1919, and 20th December, 1919. The department formally took charge on the 1st January, 1920. Lieut.-Commander B. L. Johnson, D.S.O., was appointed Superintendent of Pilots, with headquarters at Victoria, B.C. There are 17 pilots in this district. Two over-age pilots have been retired and placed in charge of the pilotage stations at Nanaimo and Vancouver.

The pilotage dues are collected by the Collectors of Customs and forwarded direct to Ottawa and deposited to the credit of the Receiver General. The pilots receive 60 per cent of the gross receipts, 40 per cent being retained for expenses. Each pilot receives up to a maximum of \$325 per month, 5 per cent being deducted for the Superannuation Fund.

Of the thirty-eight other pilotage authorities constituted under the authority of the Governor in Council in pursuance of the provisions of the Canada Shipping Act, twenty-five have forwarded returns for 1919.

### SIGNAL STATION, CITADEL, HALIFAX N.S.

Record of shipping from April 1, 1919, to March 31, 1920, by F. C. Kilburn Major, R.C.E., Superintendent of Signals:—

|                             |       |
|-----------------------------|-------|
| Total vessels reported..... | 1,457 |
| "    arrived.....           | 1,484 |
| "    passed.....            | 3     |

### SABLE ISLAND.

Mr. J. U. Blakeney, ex-superintendent, reports boats on hand: 3 life boats, 3 surf boats, 2 dories, 1 motor dory.

Live stock on hand: 34 horses and colts, 40 horned cattled, 2 pigs.

Wrecks: SS. *Platea*, stranded on north side of island on November 7; crew of 30 were all safely landed.

Surf boat was smashed along C.G.S *Stanley* in April, 1919, and should be replaced.

### REPORTS OF AGENCIES

#### HALIFAX AGENCY.

In accordance with departmental instructions, the light-stations and buoys on the west coast of Nova Scotia from cape Sable north, and on the south shore of the Bay of Fundy, including Minas basin, and the south shore of Chignecto bay, were transferred to the St. John, N.B., agency on April 1, 1919.

## SESSIONAL PAPER No. 21

A new fence was built at the north entrance to Dartmouth depot, and repairs to the wharf are being carried out.

New aids to navigation during the year consisted of three spar buoys placed in Voglers cove, Port Medway, and two spar buoys at Chimney Corner, Cape Breton, and also at Port Morien in South Ingonish.

The C.G.S. *Lady Laurier* was employed in the district from April to August, 1919; from August to the end of November was at Halifax undergoing repairs, and from then on was engaged in agency work.

The C.G.S. *Stanley* was engaged from April to December 4 continuously in agency work, and from that date to the end of March was laid up for repairs.

The C.G.S. *Aranmore* during the months of April, May, June and July underwent repairs, from then until December 10 was employed in the district, afterwards going into winter quarters.

The lightship *Halifax No. 15* took fire and sank at dock, Dartmouth depot, on November 2, 1918, was refloated, repaired, and placed on station at Sambro bank, April 24, 1919. On November 6, 1919, broke her moorings during a heavy gale, made Liverpool harbour, coaled and arrived at Halifax on November 11; after repairing proceeded to her station on November 25. On March 14 again lost her moorings in a heavy gale, arrived at Halifax March 15, after securing new moorings, proceeded to her station on March 19.

## SYDNEY, N.S., SUB AGENCY.

Government steamers *Lady Laurier*, *Aranmore*, *Stanley*, and *Montcalm* made frequent calls in connection with lifting and placing harbour and coast buoys, and also in carrying lighthouse supplies.

For the year ended March 31, 1920, the shipping trade of the port was:—

|                             |       |              |           |
|-----------------------------|-------|--------------|-----------|
| Inwards—Foreign ships.....  | 506   | tonnage..... | 777,107   |
| Coastwise ships.....        | 1,512 | “ .....      | 836,828   |
| Total.....                  | 2,018 | “ .....      | 1,613,935 |
| Outwards—Foreign ships..... | 826   | “ .....      | 849,859   |
| Coastwise ships.....        | 1,214 | “ .....      | 730,298   |
| Total.....                  | 2,040 |              | 1,580,157 |

## PICTOU, N.S., SUB AGENCY.

Buoys were lifted in December, 1918, repaired, painted, and placed in position on April 29, 1919, the work of lifting and replacing the buoys being done by the SS. *Brant*.

For the Charlottetown, P.E.I. agency 543 barrels of oil were discharged and stored, and delivery checked when removed. The steamers *Brant*, *Stanley*, *Montcalm*, and *Lady Evelyn* were employed in this work.

Coal and supplies were obtained for steamers calling during the season.

Steamers arriving, 174, tonnage 30,684; steamers departing 175, tonnage 31,627; sailing vessels arriving, 400, tonnage 26,488; sailing vessels departing, 413, tonnage 26,969.

Assistance was given in preparing the SS. *Canadian Sealer* for the Magdalen islands service.

## QUEBEC AGENCY.

In accordance with departmental instructions, the lightstations and buoys eastward of Natashkwan along the north shore, and those of Newfoundland and strait of Belle Isle and Magdalen islands, including Bird rocks, were transferred to the Charlottetown, P.E.I., agency on April 1, 1919, and on that date this agency took over from the St. John, N.B. one, all the lights and buoys on the south side of Bay des Chaleurs, from Campbellton to Miscou.

11 GEORGE V, A. 1921

The vessels under the control of the agency during the season were: Ice breakers *Montcalm* and *Champlain*; steamers *Druid*, *Eureka*, and *Rouville*; lightships *Red Islet*, *Prince Shoal*, *White Island*, and *Lower Traverse*. For winter repairs and supplies the icebreaker *Lady Grey* and the steamer *Bellechasse* were employed.

The ferry service between River Ouelle wharf and the north shore of the river St. Lawrence was conducted during winter and summer by the *Champlain*.

## CHARLOTTETOWN AGENCY.

Besides the district taken over from the Quebec agency, the lightstations and buoys on the east coast of New Brunswick, from cape Tormentine to Shippigan were, on April 1, 1919, taken over from the St. John, N.B., agency.

During the year the larger part of the marine wharf at Charlottetown was repaired and a large warehouse built on the eastern side. Warehouse No. 4 was moved to the head of the wharf, to be used as a repair shop. No. 1 warehouse was overhauled and blocked up, and roof lights put round the building, and both Nos. 1 and 2 warehouses were fitted for elevators.

Work was commenced on the wharf on February 7, 1919, with five men, and continued until the late autumn.

The C.G.S. *Brant* was employed in the work of the agency throughout the season, during June and July the C.G.S. *Stanley*, and during November the C.G.S. *Montcalm* and the C.G.S. *Aranmore*.

## VICTORIA, B.C., AGENCY.

The reinforced concrete tower at Dryad point, Lama passage, commenced last year, to replace the former wooden one, was completed.

The work of constructing a combined light and fog-alarm station at Triple island, Hecate straits, was begun in August, 1919, but had to be abandoned before completion, owing to inclement weather in the latter part of November.

The rearrangement of the lighting system at the mouth of the Fraser river was completed, and the system of range lights extended up the river as far as New Westminster.

A combined concrete light tower and fog-alarm was constructed on Barrett rock, and a combined keeper's dwelling and engine-room was built of wood on the shore opposite the rock.

The Government steamers *Esteran*, *Newington*, with the chartered SS. *Lecbro*, were employed throughout the year in the district in the work of supplying lighthouses, buoy service, etc.

Only one wreck occurred in the district during the year, a small fishing vessel was blown ashore on Triangle island in the latter part of April, 1919. One man was drowned and his body picked up, and two survivors were taken off the island by the C.G.S. *Esteran*.

## PRINCE RUPERT, B.C., AGENCY.

On January 31, 1920 the Prince Rupert district was changed from a sub-agency to an agency, taking over all aids to navigation from Cape Caution to the Alaskan boundary, including Queen Charlotte islands.

Automatic acetylene beacons were erected on Kinnahan and Genn islands.

An oil-lighted day beacon was erected on David point, close to Ocean falls. An Aga beacon was established on Kamp point to aid vessels crossing Wright sound, and making the entrance to Grenville channel.

All light stations were inspected during the year, and found to be in a satisfactory condition.

## SESSIONAL PAPER No. 21

The agency maintained during the season: 11 light stations, 10 acetylene gas buoys, 1 Aga type buoy, 29 acetylene gas beacons, 4 can buoys, 6 conical buoys, 2 platform buoys, 20 spar buoys, and 25 day beacons.

The C.G.S. *Estevan* was employed in the work of the agency from July 26 to the close of the season, the C.G.S. *Lecbro* from October 20 to November 25, and the C.G.S. *Newington* from June 29, 1919, to the end of the season.

## FORT WILLIAM, ONT., SUB-AGENCY.

Icebreaking was carried on as usual, and navigation in the district opened on April 13, and closed on December 12.

The lightstations went into operation on April 13.

On April 17, 17 spar buoys were placed in the channels at Port Arthur and Fort William harbours.

There were maintained in the district during the year 12 lightstations, 2 sets of ranges, 2 Aga mast lights, 3 gas and bell buoys, 2 gas buoys, and 17 spar buoys.

## MONTREAL AGENCY.

The tug *Margot* was purchased for use in lighthouse construction work. Protection work was carried on at Cape Madeleine upper front light, and Ile de Grace back light. A new concrete pier and bridge were constructed at Lachine back light.

The Dominion steamers *Argenteuil*, *Dollard*, *Reserve*, *Vercheres* and *Shamrock* were employed during the season in agency work.

The old schooner *Bengalore* was removed from the Richelieu river.

## DOMINION LIGHTHOUSE DEPOT, PRESCOTT, ONT.

During the fiscal year 1919-20 a large amount of lighthouse, fog-alarm, and buoy materials were made up and shipped for the various agencies and lightstations of the Department throughout the Dominion, and all necessary work was performed in connection with the maintenance of lights and of the buoy service in the Prescott division.

The work of making the C.G.S. *Concretia* suitable for a buoy tender was completed, extensive repairs were made to the C.G.S. *Scout*, and the drifter *C. D. 50* was converted into a lightship for Bar point.

Repairs were made to the docks, some of the old useless buildings were removed, and the yard considerably improved, the work being carried out in a satisfactory manner by a somewhat reduced staff.

The machine shop completed about 103 production orders during the year, as well as doing a good deal of work on orders not yet completed. The production orders included: the making of standard diamond vapour light parts, diaphone instruments, pistons, and other fog-alarm materials; remodelling of Reliance clocks, work on high and low model revolving pedestal apparatus, etc., and also necessary work for Government steamers and plant.

The carpenter shop made necessary repairs to the steamers *Scout* and *Concretia*; also to the South Lancaster wharf, and Barriefield front light, and a number of superstructures for buoys were prepared for various agencies.

In the paint shop all buoys and lighthouse lanterns belonging to the Prescott division were painted, also traction lanterns for stores and lightstations, and all lanterns sent in from various agencies for repairs. Necessary painting for Government steamers and plant was also done.

In the packing and shipping department 560 shipments were packed and sent out during the year, and cases and crates for the same were made. All second hand materials received at the depot for repairs or stock were unpacked, examined, and reported upon.

In the blacksmith shop all necessary forgings for apparatus, Government steamers, and plant were made, a quantity of anchor chain prepared, and orders for fog alarm and buoy materials completed.

11 GEORGE V, A. 1921

The brass foundry made castings for various kinds of apparatus and for Government steamers.

The shipyard shop attended to freight shipments to and from the depot, handled coal and heavy materials for the various departments, loaded and unloaded railway cars, looked after the depot yards.

All gas, can, and conical buoys stored on the depot dock were cleaned and painted, and a number of old buoys were overhauled and made serviceable, orders for concrete anchors were completed, and labour furnished for the various shops.

The gas test room overhauled and tested all buoy and beacon lanterns in the Prescott division, and all lighthouse lanterns were put in good condition. All buoy lanterns received from the various agencies for repairs were overhauled, tested, and returned.

All orders for carbide door caskets, purifier door caskets, flash burner caskets, and buoy lantern diaphragms were made up by this department.

Shipments of Pintsch gas to the depot were measured up and reported upon.

The gas lighting plant on the Bar point lightship was installed.

Fifteen patterns were made in the pattern shop, and a large number overhauled and altered.

Seventeen drawings were made in the drawing office.

The C.G.S. *Scout* and the C.G.S. *Concretia* were employed in agency work throughout the season.

#### PARRY SOUND, ONT. AGENCY.

This agency maintained during the season 15 gas buoys, 2 Trinity bell buoys, 1 conical buoy, and 181 spar buoys.

The Government steamers *Grenville* and *Lambton* were employed from the opening to the close of navigation in the district on the work of supplying light-houses and maintaining the buoy service.

In May a new illuminating apparatus was installed in Owen Sound front range, and the ship channel between Parry Sound and Waubaushene was buoyed.

During July and August, a new concrete gas-lighted beacon was erected at the entrance to Honey harbour, and a fog-alarm bell was installed on Davieaux island, lake Superior.

Several new day beacons were built for the inner channel between Parry Sound and Waubaushene.

The agency staff proper during the season comprised eleven employees.

#### ST. JOHN, N.B. AGENCY.

The usual number of light and fog-alarm stations, buoys, and beacons, were maintained throughout the year.

At Boars head protection work was done to the dwelling, and repairs made to road. At Green island a temporary fog-alarm was established. At Letite passage a new fog-alarm building was erected, and a diaphone with oil engines installed. A new blacksmith shop was built and equipped at the Marine depot. The oil shed destroyed by fire at Machias, Seal island, was rebuilt. A new wooden building was erected at Parrsboro, and a small diaphone plant installed. Repairs to equipment and sheds were carried out at St. John West wharves. At cape D'or 800 yards of rock excavation was done to prevent sliding of the cribs. Tongue shoal was abandoned as a watched light, and an unwatched gas installation with sun valve made in 1919.

Throughout the season the C.G.S. *Aberdeen* and the C.G.S. *Laurentian* were employed in lighthouse supplies and buoy service work in the agency; and the C.G.S. *Thos. Mason* was also employed in this work and in carrying officials and workmen to and from lightstations.

SESSIONAL PAPER No. 21

## REPORTS OF HARBOUR COMMISSIONERS.

## MONTREAL HARBOUR COMMISSION.

## PERSONNEL.

President, W. G. Ross; Commissioners, Farquhar Robertson, A. E. Labelle; officials: Secretary-Treasurer, M. P. Fennell, Jr.; Cashier, Thos. F. Trihey; Chief Engineer, F. W. Cowie, M. Inst., C.E., Consulting Engineer, Sir John Kennedy, assistant Chief Engineer, T. W. Harvie; General Superintendent of Grain Elevators, M. Peterson; Mechanical Superintendent, Geo. Gendron; Harbour Master, Capt. T. Bourassa, deputy Harbour Master, Capt. J. F. Symons; Comptroller, George E. Smart; Paymaster and Wharfinger, Robt. A. Eakin; Superintendent of Railway Terminals, J. Vaughan, assistant Superintendent of Railway Terminals, R. L. Mercier; Purchasing Agent, L. H. A. Archambault; Supervisor Customs Wharfages, P. E. Morant, Chief of Police, Lieut.-Col. E. A. Williams.

## MONTREAL'S PLACE AMONG THE WORLD PORTS.

The United States Department of Commerce, in its Statistical Abstract for 1919, thus gives the total export and import trade of the seven leading ports of the world for the latest year for which data are available:—

| Port.           | Year. | Imports.        | Exports.        | Total Commerce. |
|-----------------|-------|-----------------|-----------------|-----------------|
| New York.....   | 1918  | \$1,251,386,000 | \$2,613,049,000 | \$3,864,435,000 |
| Liverpool.....  | 1917  | 1,813,488,000   | 1,091,743,000   | 2,905,231,000   |
| London.....     | 1917  | 1,643,434,000   | 818,045,000     | 2,461,479,000   |
| Hamburg.....    | 1913  | 1,084,325,000   | 817,275,000     | 1,901,600,000   |
| Antwerp.....    | 1912  | 623,164,000     | 588,181,000     | 1,211,345,000   |
| Marseilles..... | 1915  | 518,756,000     | 304,290,000     | 823,046,000     |
| Montreal.....   | 1918  | 204,518,000     | 524,365,000     | 729,183,000     |

Although Montreal occupies seventh place among world ports for total commerce, it occupies sixth place in the value of its exports.

## ACCOMMODATION.

For an expenditure so far of \$29,500,000, Montreal Harbour affords the following accommodations:—

One hundred steamship berths from 350 to 750 feet in length, with a depth of water from 20 to 35 feet.

Thirty-five of these steamship berths are modern concrete wharves, built in the past few years.

Two large modern fireproof elevators with conveyor system to 15 steamship berths, at which 9 vessels can be loaded with grain at one time.

Twenty-three permanent fireproof transit sheds.

Fifty-eight miles of harbour railway terminals.

Complete and valuable construction and repairs plants.

About 200 acres of land situated in the most valuable position, industrially, in Montreal, all reclaimed.

11 GEORGE V, A. 1921

The extent of the wharves and piers at the end of the season was as follows:

|   |        |          |
|---|--------|----------|
| For 30 ft. draft and over at O.L.W.<br>or 4.9992 miles. | 26,396 | lin. ft. |
| For 25 to 27½ ft.<br>or 2.5458 miles.                   | 13,442 | lin. ft. |
| Total deep draft<br>or 7.5450 miles.                    | 39,838 | lin. ft. |

Included in this, five berths are available having a depth of 35 feet at O.L.W.

|   |        |          |
|---|--------|----------|
| For 20 ft. draft and under<br>or 0.5880 miles.  | 3,105  | lin. ft. |
| Total wharfage, end of 1919<br>or 8.1330 miles. | 42,943 | lin. ft. |

## SPECIAL FEATURES.

Montreal is on the line of route, east and west, between the great north-west of the American continent and European ports.

The harbour of Montreal is at the head of ocean navigation on the St. Lawrence, and at the foot of the inland navigation of the Great Lakes.

The great transcontinental railway lines of Canada all reach ocean navigation at Montreal.

During seven months of the year the Canadian transportation system, via the harbour of Montreal, competes with the great lake and rail transportation system of the United States.

## NAVIGATION CONDITIONS.

## TABLE OF DISTANCES.

## ENGINEERING DEPARTMENT.

On the completion of the high-level railway to the Imperial Oil Works, Montreal East, at the end of last year, extensions and improvements were effected this year as follows:—

The spur embankment from the main line to the Imperial Oil wharf was completed, and also rip-rap protection on the outer face of the embankment from Vulcan wharf to Montreal East, 28,000 cubic yards of material being used on the extension and protection work.

In conjunction with the company, direct connection with No. 1 plant of the Canada Cement was established by a short spur track to the harbour boundary, the company continuing the spur from that point to a junction with their track near Notre Dame street.

## SESSIONAL PAPER No. 21

Railway connections to the Imperial Oil Company's works, Montreal East, were improved.

The high-level railway between Papineau avenue and Jail subways was widened, and two additional tracks laid down.

The siding accommodation adjoining the Commissioners' elevators was greatly increased, and a considerable amount of paving done in conjunction with the city authorities.

## SUMMARY OF RAILWAY EXTENSIONS.

|   | lin. ft. |
|---|----------|
| Connection to Canada Cement Co. ....                          | 200      |

| Section 82 (additional on Harbour property).....              | 328      |
| <hr/>   |          |
| Total additional track on Harbour property.....               | 15,715   |
| Equal to 3 miles approximately.                               |          |

*New Wharves.*—The construction of wharves suspended during the last two years of the war, was resumed. Jacques Cartier pier was lengthened 218 feet on the east side and 273 feet on the west side, the new pier head line measuring 294 feet, making in all 785 feet of standard high level quay-wall. The building of new shore wharves from section 30 to the Dominion Coal Company's wharf was resumed.

*Dredging and Filling.*—Two dredges worked all season on the channel and cribseats for the proposed south side of Bickerdike pier; the area covered being  $3\frac{1}{2}$  acres.

On the 15th of August one dredge resumed work on the 20-foot channel E.L.W. behind St. Helen's island, covering during the season an area of about  $2\frac{1}{2}$  acres, the cut extended being 250 feet in length, to a width of 300 feet.

Government dredge No. 1 was engaged during the season in widening the ship channel opposite the drydock, and provided 6,200 cubic yards of material for reclamation above the drydock for filling in the bight between the drydock and Sutherland pier, the filling on this work during the season amounted to 111,000 cubic yards.

*New Buildings.*—Concrete foundation and steel work for three new sheds were constructed in the fall: No. 17, 310 feet by 100 feet; No. 18, 530 feet by 85 feet, and No. 19, 520 feet by 85 feet; these will have two decks, a conveyor gallery system of two belts, and modern fireproof offices and workrooms.

Plans have been made and construction work is in progress on a new locomotive repair shop in Harbour yard, on Notre-Dame street, East. This building, 130 feet by 42 feet, will be fireproof, and provided with a 30-ton traveller crane and pit.

The commissioners' floating crane lightered and handled 10,999 tons during the season, and proved, as usual, a valuable adjunct to the port.

The electrical equipment of the head office, dredging plant, transit sheds, elevators, conveyors, freight hoists, escalators, engine shops, and sub-stations, were maintained and improved, and the harbour lighting, comprising flame arcs and powerful nitrogen units was operated throughout the season.

The saw-mill delivered to the works during the season 717,012 feet B.M., and 328,722 lineal feet

## RAILWAY TRAFFIC DEPARTMENT.

The increase in mileage for the year was about 3 miles, making at present a total of 58 miles of track to be maintained. During the year 13,742 ties were renewed, and 17,970 lineal yards of rails replaced. In spite of the enormous tonnage handled per mile, no serious mishap to traffic occurred during the year. The total number of cars handled during the year was 182,328.

## GRAIN ELEVATOR SYSTEM.

The capacity of the commissioners' elevators is:—

|  |                    |
|--|--------------------|
| Elevator No. 1.....                    | 4,000,000 bushels. |
| " No. 2.....                           | 2,652,000 "        |
| Grand Trunk Elevators "A" and "B"..... | 2,150,000 "        |

The total quantity of grain handled by elevator No. 1 during the season was 19,530,635 bushels; by No. 2, 17,820,924 bushels—a total of 35,509,323 bushels for the season. Only one floating elevator was operated during the season, which transferred 20,326 bushels.

## POLICE DEPARTMENT.

During 1919 the Harbour Police Force consisted of 4 officers and 53 men, uniformed and armed, who regulated the traffic, maintained order, and protected life and property within the harbour limits. The services of 30 of this force were constantly at the disposal of the various shipping companies during the season.

## FINANCIAL STATEMENT.

Receipts on revenue account were \$1,990,594.39, a decrease of \$113,597.09 from the previous year. Cost of operations, maintenance and interest was \$2,114,555.61, an increase over the previous year of \$88,013.54, leaving a deficit to the debit of revenue account for the year of \$123,961.22. The interest charges, amounting to \$911,320.49, show an increase of \$7,735.22 on new loans, due to the continued carrying out of works of improvement.

There was received from the Dominion Government on loan \$670,000 on account of capital expenditure for works of improvement, on which the Government have raised the rate of interest from  $3\frac{1}{2}$  per cent to 5 per cent.

The disbursements on capital account in 1919 were \$1,176,286.30.

## GENERAL.

The plans for the building of a public warehouse and cold storage plant, and the electrification of the harbour railway system outlined in last year's report are being carried out.

The site decided upon for the warehouse is inside the harbour retaining wall on the west side of the foot of Beaudry street, and that for the power house to contain the mechanical refrigerating equipment, and the electrical equipment for the operation of the harbour electric railways, will be on the east side of the foot of Beaudry street.

The building when completed will be 436 feet by 103 feet, and will consist of eight floors and a basement, equipped with eight large freight elevators. Each cold storage floor will be divided into nine rooms varying in capacity from 77,750 cubic feet to 35,750 cubic feet.

The building will be of a fireproof character, and equipped with an up-to-date automatic fire sprinkler system. The power-house opposite will be a considerably smaller building similar in appearance, and will consist of a basement, two floors, and a condenser house on the roof.

## SESSIONAL PAPER No. 21

The piling on the ground to be occupied by the cold storage-warehouse plant, has been successfully completed by the McArthur Concrete Pile and Foundation Company of Montreal, the piles being known as "pedestal piles," formed by driving a steel core and shell, then removing the core and filling the shell with concrete.

The work of the electrification of the harbour railway system was commenced in September, 1919, and carried on throughout the winter months; steady progress is being made, the work being divided into four sections:—

1. Power Station Machinery Equipment.
2. Control, Protective and Signal Equipment.
3. Overhead Catenary Line Material.
4. Rail Bonding Material.

## QUEBEC HARBOUR COMMISSION.

## CHIEF ENGINEER'S REPORT.

Construction work on landing shed No. 28, Princess Louise docks, and subsidiary grain galleries, has been almost completed, so that all will be ready for use by the opening of navigation next spring. Electric lights have been installed in this shed, and a Gantry crane, and car loading and railway lines to serve the shed laid down.

The lease of the shipbuilding site at the west end of the Louise embankment to the Quebec Shipbuilding and Repair Company terminated last summer, and all the company's plant and material have been removed, making this area and the adjoining dock frontage available for use next season.

The grading of the dredged basin in the river St. Charles has been continued, and the approach to the basin widened and deepened.

Damage caused to sheds on pier No. 1 by last November storms has been repaired, and the work of raising the finished surfaces of this pier and of landing sheds Nos. 25 and 27 was begun and continued until the close of the season.

Permanent brick paved roadways and approaches have been laid down between the main embankment roadway and landing sheds Nos. 28 and 29; a brick paved roadway is also under construction at the west end of the embankment, affording exit from the docks by way of Ramsay street.

A brick building has been erected at the east end of the main carriage roadway to serve as a waiting room for passengers embarking by tender on ocean ships not berthing at the breakwater.

Railway lines have been laid down to the new landing shed No. 28 and connected with the main lines.

A new 8-inch water main has been laid down at the west end of the embankment to supply 6-inch main installed for water service to sheds Nos. 28 and 29.

The long wharf at Indian cove, damaged by last November's high tide, has been rebuilt and repaired with the exception of about 500 feet, which still has to be built up to an additional height of seven feet.

All the commissioners' properties have been maintained in good condition.

## WHARFINGER'S REPORT.

The traffic in connection with the St. Charles docks and wharves was: inwards, 331 vessels, 822,983 tons register; outwards, 274 vessels, 506,879 tons register; lower port vessels, 111, 18,231 tons register.

11 GEORGE V, A. 1921

## HARBOUR MASTER'S REPORT.

## PORT OF QUEBEC—RECORD OF SHIPPING ARRIVALS, 1919.

|   | Number<br>of<br>Vessels. | Gross<br>tonnage. |
|---|--------------------------|-------------------|
| Coasting vessels from seaward .....                 | 141                      | 88,957            |
| Coasting vessels from Montreal and Great Lakes..... | 186                      | 186,738           |
| Ocean Steamships—Inwards.....                       | 147                      | 1,152,244         |
| Ocean Steamships—Outwards <sup>1</sup> .....        | 181                      | 546,151           |
|   | 655                      | 1,974,090         |

<sup>1</sup>Including sea-going vessels built on the Great Lakes.

For the first time in the history of the port navigation last winter was hardly ever closed. The last vessel sailed on the 30th of December, and on the 21st of January the SS. *Canadian Voyageur* left for Halifax with the C.G.S. *Montcalm* as escort.

Shipbuilding was active throughout the season. Five steam trawlers for the naval service and eleven steam wooden vessels for the French Government were built by the Davie Shipbuilding and Repairing Company, Limited, and one steamer also for the French Government, by the National Shipbuilding Company, of Levis.

In the fall some newly-built ships came into port from various western shipyards to be completed for sea; fourteen of these, built of wood, were delayed by ice, and wintered in the port, as well as eight United States Eagle boats and one United States Navy tug.

## TRAFFIC MANAGER'S REPORT.

During the year 42,113 cars were handled by the commissioners' locomotives, and 10,355 cars by the car ferry

## GRAIN ELEVATOR.

Harbour Commissioners' elevator No. 2 received 4,534,067 bushels of grain during the season, and delivered 4,100,403 bushels, leaving in store 433,664 bushels.

## REVENUE AND EXPENDITURE.

The revenue for 1919 was \$389,502.62, and the expenditure \$438,673.17, leaving a deficit for the year of \$49,170.55.

## FACILITIES OF THE PORT OF QUEBEC.

*Steamship berths.*—In wet dock, six berths of from 400 to 500 feet in length. In tidal harbour, four berths of from 400 to 500 feet in length. Breakwater—four berths of 500 feet in length, or three berths of 700 feet in length, or two berths of 1,100 feet in length. Pointe-a-Carcy wharves—five berths, one ocean, one car ferry, two coasting, and one bunkering. River St. Charles basin—seven berths of from 500 to 600 feet in length.

*Depth of water at low tide.*—wet dock, 25 to 26 feet; tidal harbour, 24 to 30 feet; breakwater, 40 feet; Point-a-Carcy wharves opposite shed, 21; ocean berth and car ferry berth, 40 feet; river St. Charles, 35 feet.

*Grain Elevators.*—One grain elevator with a capacity of 250,000 bushels.

One fireproof concrete grain elevator, with a capacity of 2,000,000 bushels, with marine tower, conveyors and grain galleries; loading capacity, 60,000 bushels per hour; it has also a grain dryer, a "Richardson separator," and a baggage shed.

## SESSIONAL PAPER No. 21

*Facilities for handling Cargoes.*—Four locomotives for switching cars. Railway lines to all ships, berths and sheds. One 50-ton floating crane. Cars and scows for removing ships' ballasts. Five locomotive cranes, with capacity up to 38 tons. City water, electric light, and power installation.

*Landing sheds.*—There are thirteen landing sheds in all, with a combined space of 542,550 square feet of floor area.

*Railway facilities.*—The Quebec Harbour Commissioners have 16 miles of tracks on docks for handling of freight. Shunting on docks is done by Harbour Commissioners.

With the completion of the Quebec bridge, the docks are now accessible to all railways.

The Canadian Pacific Railway and the Canadian National Railways (Canadian Northern and National Transcontinental) have their Quebec terminus within the harbour limits.

*Graving docks.*—Quebec harbour possesses two graving docks, one 600 feet long by 62 feet wide at entrance and one (new) 1,150 feet long by 120 feet wide at entrance, capable of taking the largest vessels afloat, with attached workshops capable of executing all required repairs.

## TARIFFS.

The Quebec Harbour Commissioners' tariffs relating to wharfage, switching and grain elevators, have been carefully revised during the year 1919. These new tariffs, which will compare favourably with any other existing tariffs at other ports, were put into effect on May 1, 1919.

## THREE RIVERS HARBOUR COMMISSION

The Commission has not been able to make up the deficit of 1918, nor have they been able to avert another though smaller deficit for 1919, as shown by the statement. This is chiefly due to the loss of the bituminous coal trade, now conveyed by railway. The port has also suffered through the decrease of the lumber trade with the United States. However, a large pulp mill is being built at the mouth of the St. Maurice river, which will be in operation next spring and undoubtedly contribute to the trade of the port.

The Quebec and Levis Ferry Company are desirous of establishing a car ferry service between Three Rivers and Ste. Angele de Laval, the terminus of the Grand Trunk. This would have to be done by direct negotiation with the Government. The linking up of the shores of the river in the vicinity of Three Rivers would undoubtedly benefit the shipping and the general trade of the port.

STATEMENT of number and tonnage of steamers and other vessels reported inward and outward of the port of Three Rivers, for the year 1919.

## VANCOUVER HARBOUR COMMISSION.

On the 7th of July, 1919, an Act was passed providing an expenditure of \$5,000,000 for the development and equipment of the harbour. On October 1 the board was reconstituted; the members of the new board are—President, G. H. Kirkpatrick, Esq., Commissioners S. McLay, Esq., and A. R. McKenzie, Esq.

## BALLANTYNE PIER.

Mr. A. D. Swan, M. Inst. C.E., was instructed to prepare plans for the above new pier on Burrard inlet, to be equipped with reinforced concrete warehouses and modern freight handling appliances. Coincident with the construction of this pier a freight car ferry service will be installed opening up as industrial sites, extensive flats on the north shore of Burrard inlet. It is estimated that these works will take two years to complete.

## OTHER PROJECTS.

Are (1) the providing of public booming grounds; (2) the preparation of Kitsilano Indian Reserve for the accommodation of industries. This area underbrushed last year is now being cleared and graded. The success of the reclamation of the area known as Granville island, now leased to industrial concerns, and the continued demand for industrial sites, should insure the financial success of this last project.

## SESSIONAL PAPER No. 21

## SHIPBUILDING.

During the year there were built in local yards twelve steel vessels with a total tonnage of 90,200.

## GOVERNMENT WHARF.

The number of vessels of all classes berthed at this wharf during the year was 271, and the volume of business handled 68,000 tons of general merchant and 18,000,000 feet B.M. of lumber.

## SHIPPING RETURNS.

According to the Customs returns, the classification of vessels entering and clearing during the year ending 31st March, 1920, is as follows:—

|                        | Vessels. | Tonnage.   |
|------------------------|----------|------------|
| Foreign inwards.....   | 1,430    | 1,761,008  |
| “ outwards.....        | 1,298    | 1,416,979  |
| Coastwise inwards..... | 9,964    | 3,576,597  |
| “ outwards.....        | 10,308   | 3,936,827  |
|                        | 23,000   | 10,691,411 |

## RECEIPTS AND EXPENDITURES.

Total operating receipts, \$106,675.97; total operating expenditures, \$75,-466.06; surplus for year ended December 31, 1919, \$31,209.91.

## PORT WARDENS REPORTS FOR THE YEAR ENDING DECEMBER 31, 1919.

Returns have been received from sixteen port wardens, eight from Nova Scotia, two from New Brunswick, two from Quebec, and four from British Columbia.

The total amount of fees collected by port wardens was \$32,351.57. To this total the port of Montreal contributed \$19,572.57; the port of Halifax, \$4,454; the port of Vancouver, \$3,380; the port of Sydney, Cape Breton, \$1,644; and the port of Quebec, \$1,619.50.

At the port of Montreal navigation opened on April 17, three days earlier than in 1918, and closed on December 12, two days earlier than in 1918.

The number of sea-going ships reported at the port of Montreal during 1919 was 531; aggregate tonnage, 1,809,148; an increase of 13 vessels over 1918, and a decrease of 10,736 tons. In addition 149 vessels of the United States Shipping Board passed through without taking on any cargoes. From the lower ports 88 steamers, tonnage 160,426, and 9 sailing vessels, tonnage 841, cleared; total 97 vessels, aggregate tonnage 161,267; an increase of 75 vessels and 145,177 tons as compared with the clearings in 1918.

## SESSIONAL PAPER No. 21

The amount of grain shipped from the port of Montreal during 1918 was: wheat, 32,818,056 bushels; peas, 42,703 bushels; barley, 10,810,515 bushels; oats 2,451,149 bushels; corn, 285,112 bushels; rye, 775,003 bushels; total of all grains, 47,182,639 bushels; a decrease of 12,249,291 bushels as compared with the shipments for 1918.

New lines of steamships operating from the port of Montreal during the season were: "Canadian Government Mercantile Marine, Limited," now operating sixteen vessels to the United Kingdom, West Indies, River Platte, and St. Johns, Nfld. "Compagnie Canadienne Transatlantique, Limitee," operating eight vessels (passenger and cargo) to French ports. "France and Canada Line," operating five vessels to French ports. "Marine Navigation Company" operating two vessels to French ports. "Houston Line," operating four vessels to River Platte. The C.P.O.S. are now operating two vessels recently bought from Norwegian owners to Scandinavian ports. Vessels have also sailed for Roumania, and Antwerp, the latter port being again open.

## REPORT OF THE QUEBEC SALVAGE AND WRECKING COMPANY.

1919.

- May 23 to 26.—Towed Department of Public Works dredge *No. 116* and four scows from Quebec to Rimouski.
- July 2nd and 3rd.—Services rendered by ss. *Lord Strathcona* assisting in operation of lifting ss. *Montmagny*.
- July 17th and 18th.—Services rendered by ss. *Lord Strathcona* assisting in operation of lifting ss. *Montmagny*.
- July 22nd and 23rd.—Towed off new steamer *C-3*, Three Rivers, which had stuck on ways during launching.
- July 23rd and 24th.—Towed Department of Public Works dredge *No. 1* from Quebec to Three Rivers.
- August 12th.—Services rendered by ss. *Lord Strathcona* assisting in operation of lifting ss. *Montmagny*.
- Aug. 22nd and 23rd.—Services rendered by ss. *Lord Strathcona* assisting in operation of lifting ss. *Montmagny*.
- Aug. 23rd to 30th.—Salved British steamer *Admiral Hastings* which steamer ran ashore off South West point, Anticosti.
- September 15th and 16th.—Services rendered by ss. *Lord Strathcona* and schooner *G.T.D.* assisting in operation of lifting ss. *Montmagny*.
- October 4th to 6th.—Towed Department of Public Works dredge and scow from Rimouski to Quebec.
- October 8th.—Services rendered by ss. *Lord Strathcona* and schooner *G.T.D.* assisting in operation of lifting ss. *Montmagny*.
- October 12th to 14th.—Diving services rendered steamer *Captain Dan* sunk Quebec harbour.
- October 15th to 18th.—Towed Department of Public Works plant *No. 110* from Port Alfred to Quebec.
- November 7th to 20th.—Salvage service rendered British steamer *Germanicus* which stranded on West reef off Bic island but had to postpone salvage owing to lateness of season also to weather.
- November 21st to 25th.—Salvage services rendered American schooner *George S. Smith* stranded off Point des Monts but had to stop work owing to lateness of season.
- November 29th to December 3rd.—Towed British steamer *Melmore Head* from Quebec to Bic.
- December 5th to 7th.—Towed off British steamer *Bassa* which ran aground in St. Lawrence river off Vickers wharf.

December 9th.—Towed American steamer *Lake Elmsmere* from Three Rivers to Quebec; this steamer lost her propeller in the ice.

The ss. *Lord Strathcona*, schooner *G.T.D.*, properly manned, and all salvage gear, in good order, have been kept in commission during the season of navigation to proceed to any accidents or mishaps to ships at very short notice.

REPORT OF THE PACIFIC SALVAGE COMPANY, LIMITED.

1919.

August 6th to 9th.—Salving *Princess Ena*, struck rock at Seymour narrows.

August 20th to 30th.—Salving ss. *Shinbu Maru*, struck at Bentinck island near Race rocks.

1920.

March 30 to 31.—*Prince John* struck at Dead Tree point Queen Charlotte islands.

RETURNS OF SHIPPING MASTERS FOR THE YEAR ENDING DECEMBER 31, 1919.

NOTE.—The Collector of Customs acts as shipping master where no shipping master is appointed.

SESSIONAL PAPER No. 21

## LIVE-STOCK SHIPMENTS.

List of live-stock shipped from May, 1919, to November, 1919, to ports in Britain France and Belgium.

## MONTREAL.

| Months.        | Sheep. | Horses. | Cattle. |
|----------------|--------|---------|---------|
| 1919.          |        |         |         |
| May.....       |        | 4       | 229     |
| June.....      |        |         | 575     |
| July.....      |        | 1       | 230     |
| August.....    |        | 52      | 424     |
| September..... |        |         | 230     |
| October.....   |        | 52      | 208     |
| November.....  |        |         | 397     |
|                |        | 109     | 2,293   |

## EXPENDITURE AND REVENUE.

The parliamentary appropriation for the fiscal year 1919-20 was \$45,289,-781.27, the expenditure \$37,836,743.70, leaving an unexpended balance of \$7,453,037.57. The net revenue was \$303,001.87.

## CORRESPONDENCE.

The number of letters received during the fiscal year 1919-20 was 74,995, as against 66,601 in 1918, an increase of 8,394.

The number of letters sent out was 42,500, as against 39,116 in 1918, an increase of 3,384.

This increase is chiefly due to correspondence relating to the new Canadian shipbuilding programme, post-war reconstruction work, and the new system of making appointments to the outside service through the Civil Service Commission.

## SEASON OF NAVIGATION.

At the port of Montreal channel was reported clear on April 14, six days earlier than in 1918. The Government ice-breaker *Lady Grey* arrived from Quebec on April 16, and the first ocean-going ship, the *War Red Cap*, on April 23.

Navigation closed on December 12, two days earlier than in 1918. The last sea-going vessel to leave the port was the *Canadian Planter*.

## NEW LEGISLATION.

During the parliamentary session of 1919-20, the following new legislation affecting the department was enacted.

Canada Shipping Act (Certificates of service), Bill No. 21.

Canada Shipping Act (Steamboat Inspection), Bill No. 49.

Canada Shipping Act (Pilotage), Bill No. 94.

Canada Shipping Act (Sick and distressed mariners), Bill No. 127.

Shipbuilding, Bill No. 199.

## STEAMBOAT INSPECTION.

The report of the Chairman of the Board of Steamboat Inspection is published as a supplement to the annual report.

A. JOHNSTON,

*Deputy Minister of Marine and Fisheries.*

*IMPRIMÉE PAR ORDRE DU PARLEM*

OTTAWA

THOMAS MULVEY

IMPRIMEUR DE SA TRÈS EXCELLENTE MAJESTÉ LE ROI

1921

To Lt.-Col. the Hon. C. C. BALLANTYNE,

Minister of Marine and Fisheries.

Sir,—I have the honour to submit herewith the thirtieth List of Shipping issued by this Department.

E. HAWKEN,

*Acting Deputy Minister of Marine and Fisheries.*

Department of Marine and Fisheries,

Ottawa, 1920.

A l'honorable Lt.-Col. C. C. BALLANTYNE,

Ministre de la Marine et des Pêcheries.

MONSIEUR.—J'ai l'honneur de vous soumettre la trentième liste des navires publiée par ce département.

E. HAWKEN,

*Sous-ministre intérimaire de la Marine et des Pêcheries*

Ministère de la Marine et des Pêcheries,

Ottawa, 1920.

**RULES OF THE ROAD**  
FOR  
**PREVENTING COLLISIONS AT SEA AND ON  
THE GREAT LAKES**

Issued by the Department of Marine and Fisheries, under the provisions of  
Part XIV of the Canada Shipping Act, Chapter 113,  
Revised Statutes of Canada, 1906

---

---

**RÈGLEMENTS**  
POUR  
**PRÉVENIR LES ABORDAGES EN MER ET SUR  
LES GRANDS LACS**

Publiés par le ministère de la Marine et des Pêcheries, en vertu des dispo-  
sitions de la partie XIV de la loi de la marine marchande du Canada,  
chapitre 113, des Statuts révisés du Canada, 1906

## INTERNATIONAL RULES OF THE ROAD

IN FORCE IN ALL NAVIGABLE WATERS WITHIN CANADA OR WITHIN THE JURISDICTION OF THE PARLIAMENT THEREOF, EXCEPT THE WATERS OF LAKES SUPERIOR AND HURON, GEORGIAN BAY, LAKES ÉRIE AND ONTARIO, THEIR CONNECTING AND TRIBUTARY WATERS, AND THE ST. LAWRENCE RIVER AS FAR EAST AS THE LOWER EXIT OF THE LACHINE CANAL AND THE VICTORIA BRIDGE AT MONTREAL

### ORDERS IN COUNCIL.

AT THE GOVERNMENT HOUSE AT OTTAWA.

TUESDAY, the 9th day of February, 1897.

PRESENT:

HIS EXCELLENCY THE GOVERNOR GENERAL IN COUNCIL.

Whereas, by the fourteenth section of the Act intituled "An Act respecting navigation of Canadian Waters," being chapter 79 of the Revised Statutes of Canada, it is enacted, that if Her Majesty, by Order in Council, annuls or modifies any of the regulations for preventing collisions on navigable waters which, by order of Her Majesty in Council of the fourteenth day of August, 1879, were substituted for those theretofore in force for like purposes in the United Kingdom, or makes new regulations in addition thereto, or in substitution therefor, the Governor in Council may from time to time make corresponding changes, as respects Canadian waters, in the regulations contained in the second section of the Act hereinbefore quoted:

And whereas, by an order of Her Majesty in Council, dated the 27th day of November, 1896, the existing regulations for preventing collisions at sea were annulled, and new regulations submitted therefor:

His Excellency, under the provisions of the fourteenth section of the said Act, chapter 79 of the Revised Statutes, and by and with the advice of the Queen's Privy Council for Canada, is pleased to order that the following Rules and Regulations, which are in conformity with the regulations approved by the order of Her Majesty in Council of the 27th of November, 1896, be substituted for the existing second section of the said Act, chapter 79 of the Revised Statutes; and that the said new Rules and Regulations shall come into operation on and from the first day of July, 1897:

And His Excellency doth further order that the Minister of Marine and Fisheries do bring the provisions of the sections thus amended to the notice of the owners and masters of Canadian vessels.

# RÈGLEMENTS INTERNATIONAUX POUR PRÉVENIR LES ABORDAGES

EN VIGUEUR DANS TOUTES LES EAUX NAVIGABLES DU CANADA OU SOUS LA JURIDICTION DU PARLEMENT CANADIEN, SAUF LES EAUX DES LACS SUPÉRIEUR ET HURON, LA BAIE GEORGIENNE, LES LACS ÉRIÉ ET ONTARIO, LEURS EAUX TRIBUTAIRES ET LE FLEUVE SAINT-LAURENT, AUSSI LOIN À L'EST QUE LA SORTIE DU CANAL LACHINE ET LE PONT VICTORIA À MONTRÉAL.

## ARRÊTÉS EN CONSEIL

HÔTEL DU GOUVERNEMENT À OTTAWA.

MARDI, le 9e jour de février 1897.

PRÉSENT :

SON EXCELLENCE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

Considérant que par le quatorzième article de l'acte intitulé "Acte concernant la navigation dans les eaux canadiennes", étant le chapitre 79 des Statuts révisés du Canada, il est statué que si Sa Majesté, suspend ou annule, par un arrêté en conseil, l'opération de certaines dispositions des règles pour prévenir les abordages sur les eaux navigables, qui, par un arrêté de Sa Majesté en conseil portant la date du quatorzième jour d'août 1879, avaient été substituées à celles jusque-là en vigueur au même effet dans le Royaume-Uni, ou établit de nouvelles règles par voie d'addition ou de substitution auxdites règles, le Gouverneur en conseil pourra, au besoin, faire des changements correspondants, relativement aux eaux canadiennes, aux règles contenues dans l'article 2 du présent acte.

Et considérant que par un arrêté de Sa Majesté en conseil, en date du 27e jour de novembre 1896, les règlements actuels pour prévenir les abordages en mer ont été annulés et remplacés par de nouveaux règlements,—

Il plaît à Son Excellence, en vertu des dispositions du quatorzième article dudit acte, chapitre 79 des Statuts révisés, et par et avec l'avis du Conseil privé de la Reine pour le Canada, d'ordonner que les règles et règlements suivants, qui sont en conformité des règlements approuvés par l'arrêté de Sa Majesté en conseil du 27 novembre 1896, soient substitués au présent deuxième article dudit acte, chapitre 79 des Statuts révisés; et que lesdits nouveaux règlements et règles deviennent en vigueur à compter du premier jour de juillet 1897;

Et Son Excellence ordonne de plus que le ministre de la Marine et des Pêcheries fasse connaître aux propriétaires et capitaines de vaisseaux canadiens les dispositions de l'article qui sont ainsi modifiées.

**REGULATIONS FOR PREVENTING COLLISIONS AND FOR DISTRESS SIGNALS.**

The following rules with respect to lights for signals, distress signals, steering and sailing, and rafts shall apply to all rivers, lakes and other navigable waters within Canada, or within the jurisdiction of the Parliament thereof, that is to say:—

**Preliminary.**

In the following rules every steam vessel which is under sail and not under steam is to be considered a sailing vessel, and every vessel under steam, whether under sail or not, is to be considered a steam vessel.

The word "steam vessel" shall include any vessel propelled by machinery.

A vessel is "under way" within the meaning of these rules, when she is not at anchor, or made fast to the shore or aground.

**Rules concerning lights, etc.**

The word "visible" in these rules, when applied to lights, shall mean visible on a dark night with clear atmosphere.

ARTICLE 1. The rules concerning lights shall be complied with in all weathers from sunset to sunrise, and during such time no other lights which may be mistaken for the prescribed lights shall be exhibited.

ARTICLE 2. A steam vessel when under way shall carry.

(a) On or in front of the foremast, or if a vessel without a foremast, then in the forepart of the vessel, at a height above the hull of not less than 20 feet, and if the breadth of the vessel exceeds 20 feet, then at a height above the hull not less than such breadth, so, however, that the light need not be carried at a greater height above the hull than 40 feet, a bright white light, so constructed as to show an unbroken light over an arc of the horizon of 20 points of the compass, so fixed as to throw the light 10 points on each side of the vessel, viz., from right ahead to 2 points abaft the beam on either side, and of such a character as to be visible at a distance of at least 5 miles.

(b) On the starboard side a green light, so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to 2 points abaft the beam on the starboard side, and of such a character as to be visible at a distance of at least 2 miles.

(c) On the port side, a red light so constructed as to show an unbroken light over an arc of the horizon of 10 points of the compass, so fixed as to throw the light from right ahead to 2 points abaft the beam on the port side, and of such a character as to be visible at a distance of at least 2 miles.

(d) The said green and red side-lights shall be fitted with inboard screens projecting at least 3 feet forward from the light, so as to prevent these lights from being seen across the bow.

(e) A steam vessel when under way may carry an additional white light similar in construction to the light mentioned in subdivision (a). These two lights shall be so placed in line with the keel that one shall be at least 15 feet higher than the other, and in such a position with reference to each other that the lower light shall be forward of the upper one. The vertical distance between these lights shall be less than the horizontal distance.

ARTICLE 3. A steam vessel when towing another vessel shall, in addition to her side-lights, carry two bright white lights in a vertical line one over the other, not less

SESSIONAL PAPER No. 22

## RÈGLEMENTS POUR PRÉVENIR LES ABORDAGES ET CONCERNANT LES SIGNAUX DE DÉTRESSE.

Les règlements suivants concernant les feux, les signaux en temps de brume, les signaux de détresse, la route à tenir, et les trains de bois, s'appliqueront à tous les fleuves, rivières, lacs et autres eaux navigables du Canada, ou tombant sous la juridiction de son parlement, savoir:—

### Dispositions préliminaires.

Dans les règles qui suivent, tout navire à vapeur, qui ne marche qu'à l'aide de ses voiles, est considéré comme un navire à voiles; et tout navire à vapeur dont la machine est en action est considéré comme navire à vapeur, qu'il se serve de ses voiles ou ne s'en serve pas.

L'expression "navire à vapeur" comprend tout navire mû par des machines.

Un navire est en "marche" dans le sens des présents règlements lorsqu'il n'est pas à l'ancre ou amarré au rivage ou échoué.

### Règles concernant les feux, etc.

L'expression "visible" employée dans les présents règlements, au sujet des feux, signifie visible par une nuit sombre, mais sans brume.

ARTICLE 1. Les règlements concernant les feux seront suivis par tous les temps entre le coucher et le lever du soleil, et durant ce temps il ne sera exhibé aucun autre feu qui pourrait être pris par erreur pour un feu réglementaire.

ARTICLE 2. Un navire à vapeur, lorsqu'il est en marche, portera les feux suivants:

(a) Sur ou en avant du mât de misaine, ou si c'est un navire sans mât de misaine, alors à l'avant du navire, à une hauteur de pas moins de 20 pieds au-dessus de la coque, et, si le navire a plus de 20 pieds de largeur, alors à une hauteur au-dessus de la coque au moins égale à cette largeur, de façon toutefois qu'il ne soit pas besoin de porter le feu à plus de 40 pieds au-dessus de la coque, un feu blanc placé de manière à fournir un rayonnement uniforme et non interrompu dans tout le parcours d'un arc horizontal de 20 quarts de compas.—établi de façon à projeter la lumière de 10 quarts de chaque côté du navire, c'est-à-dire, depuis l'avant jusqu'à 2 quarts en arrière du travers de chaque bord, et d'une portée telle qu'il puisse être visible à 5 milles au moins de distance;

(b) A tribord, un feu vert, établi de façon à projeter une lumière uniforme et non interrompue sur un arc horizontal de 10 quarts de compas,—placé de manière à projeter la lumière depuis l'avant jusqu'à deux quarts sur l'arrière du travers à tribord, et d'une portée telle qu'il puisse être visible à deux milles au moins de distance;

(c) A bâbord, un feu rouge établi de façon à projeter une lumière uniforme et non interrompue sur un arc horizontal de 10 quarts de compas,—placé de manière à projeter la lumière depuis l'avant jusqu'à 2 quarts sur l'arrière du travers à bâbord, et d'une portée telle qu'il puisse être visible à 2 milles au moins de distance;

(d) Ces feux de côté vert et rouge doivent être munis, en dedans du bord, d'écrans dirigés de l'arrière à l'avant et s'étendant à 3 pieds au moins en avant de la lumière, afin que le feu vert ne puisse pas être aperçu de bâbord avant, et le feu rouge de tribord avant;

(e) Un navire à vapeur lorsqu'il est en marche peut porter un feu blanc supplémentaire semblable dans la forme au feu mentionné dans la subdivision (a). Ces deux feux seront placés en ligne avec la quille de telle façon qu'un feu sera au moins 15 pieds plus haut que l'autre, et dans une position telle relativement l'un à l'autre que le feu d'en bas soit en avant de celui d'en haut. La distance verticale entre ces deux feux sera moindre que la distance horizontale.

ARTICLE 3. Un navire à vapeur, lorsqu'il remorque un autre navire, doit, indépendamment de ses feux de côté, porter deux feux blancs placés verticalement l'un au-

than 6 feet apart, and when towing more than one vessel shall carry an additional bright white light 6 feet above or below such lights, if the length of the tow, measuring from the stern of the towing vessel to the stern of the last vessel towed, exceeds 600 feet. Each of these lights shall be of the same construction and character, and shall be carried in the same position as the white light mentioned in article 2 (a), except the additional light, which may be carried at a height of not less than 14 feet above the hull.

Such steam vessel may carry a small white light abaft the funnel or aftermast for the vessel towed to steer by, but such light shall not be visible forward of the beam.

ARTICLE 4. (a). A vessel which from any accident is not under command shall carry at the same height as the white light mentioned in article 2 (a), where they can best be seen, and, if a steam vessel, in lieu of that light, two red lights, in a vertical line one over the other, not less than 6 feet apart, and of such a character as to be visible all round the horizon at a distance of at least 2 miles; and shall by day carry in a vertical line one over the other, not less than 6 feet apart, where they can best be seen, two black balls or shapes each 2 feet in diameter.

(b) A vessel employed in laying or in picking up a telegraph cable shall carry in the same position as the white light mentioned in article 2 (a), and if a steam vessel in lieu of that light, three lights in a vertical line one over the other, not less than 6 feet apart. The highest and lowest of these lights shall be red, and the middle light shall be white, and they shall be of such a character as to be visible all round the horizon, at a distance of at least 2 miles. By day she shall carry in a vertical line one over the other, not less than 6 feet apart, where they can best be seen, three shapes not less than 2 feet in diameter, of which the highest and lowest shall be globular in shape and red in colour, and the middle one diamond in shape and white.

(c) The vessel referred to in this article when not making way through the water, shall not carry side-lights, but when making way shall carry them.

(d) The lights and shapes required to be shown by this article are to be taken by other vessels as signals that the vessel showing them is not under command, and cannot therefore get out of the way.

These signals are not signals of vessels in distress and requiring assistance. Such signals are contained in article 31.

ARTICLE 5. A sailing vessel under way, and any vessel being towed, shall carry the same lights as are prescribed by article 2 for a steam vessel under way, with the exception of the white lights mentioned therein, which they shall never carry.

ARTICLE 6. Whenever, as in the case of small vessels under way during bad weather, the green and red side-lights cannot be fixed, these lights shall be kept at hand lighted and ready for use; and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision in such manner as to make them most visible, and so that the green light shall not be seen on the port side nor the red light on the starboard side, nor, if practicable, more than 2 points abaft the beam on their respective sides.

To make the use of these portable lights more certain and easy, the lanterns containing them shall each be painted outside with the colour of the light they respectively contain, and shall be provided with proper screens.

ARTICLE 7. Steam vessels of less than 40, and vessels under oars or sails of less than 20, tons gross tonnage, respectively, and rowing boats, when under way, shall not be obliged to carry the lights mentioned in article 2 (a), (b) and (c), but if they do not carry them, they shall be provided with the following lights:—

1. Steam vessels of less than 40 tons shall carry:—

## SESSIONAL PAPER No. 22

dessus de l'autre, à pas moins de 6 pieds de distance, et lorsqu'il remorque plus d'un navire il portera un feu brillant supplémentaire placé à 6 pieds au-dessus ou au-dessous desdits feux, si la longueur de la remorque mesurée depuis l'arrière du remorqueur jusqu'à l'arrière du dernier navire remorqué excède 600 pieds. Chacun de ces feux doit être de la même construction et de la même portée et placé dans la même position que le feu blanc mentionné à l'article 2 (a), sauf le feu supplémentaire qui peut être porté à une hauteur d'au moins 14 pieds au-dessus de la coque.

Ce navire à vapeur peut porter un petit feu blanc en arrière de la cheminée ou de l'arrière-mât pour servir de guide au navire remorqué, mais ce feu ne doit pas être visible en avant du bau.

ARTICLE 4 (a). Un navire qui, à raison de quelque accident, n'obéit pas à la manœuvre, portera à la même hauteur que le feu blanc mentionné à l'article 2 (a), à l'endroit le plus visible, et, si c'est un navire à vapeur, au lieu de ce feu, deux feux rouges placés verticalement l'un au-dessus de l'autre à pas moins de 6 pieds de distance, et d'une nature à pouvoir être visibles tout autour de l'horizon à une distance d'au moins 2 milles; et durant le jour il portera placées verticalement l'une au-dessus de l'autre à 6 pieds au moins de distance, là où elles seront le plus visibles, deux boules ou formes noires de 2 pieds de diamètre chacune.

(b) Un navire employé à poser ou relever un câble télégraphique, portera, dans la même position que le feu blanc mentionné à l'article 2 (a), et si c'est un navire à vapeur, à la place de ce feu, trois feux placés verticalement l'un au-dessus de l'autre. Le plus haut et le plus bas de ces feux seront rouges, et celui du milieu sera blanc, et ils seront d'une nature telle à pouvoir être visibles tout autour de l'horizon, à une distance d'au moins deux milles. Le jour il portera sur une ligne verticale et l'une au-dessus de l'autre là où elles seront le plus visibles, trois formes d'au moins 2 pieds de diamètre, dont la plus haute et la plus basse seront rondes et de couleur rouge, et celle du milieu en forme de losange et blanche.

(c) Le navire ci-dessus, lorsqu'il est stationnaire, ne portera pas de feux de côté, mais lorsqu'il sera en marche il devra les porter.

(d) Ces feux et boules mentionnés au présent article seront regardés par les autres navires comme étant un signal que le navire qui les porte n'obéit plus à la manœuvre, et ne peut, par conséquent, s'écarter de leur route.

Ces signaux ne sont pas des signaux de navires en détresse et ayant besoin de secours. De tels signaux sont contenus à l'article 31.

ARTICLE 5. Un navire à voiles en marche, et tout navire à la remorque, doit porter les mêmes feux que ceux prescrits par l'article 2 pour les navires à vapeur en marche, à l'exception des feux blancs, dont il ne doit jamais faire usage.

ARTICLE 6. Lorsqu'un bâtiment à voiles est d'assez faibles dimensions pour que ses feux vert et rouge ne puissent pas être fixés d'une manière permanente, par un mauvais temps, ces feux doivent néanmoins être tenus allumés sur le pont à leurs bords respectifs, et prêts à servir; et ils seront montrés à tout navire dont il s'approchera ou qui s'en approchera, chacun de leur côté, assez à temps pour prévenir l'abordage, de manière qu'ils soient autant en vue que possible, et présentés de telle sorte que le feu vert ne puisse être aperçu du côté de bâbord, ni le feu rouge du côté de tribord, ni, si la chose est praticable, à plus de deux quarts en arrière du travers de leurs bords respectifs.

Pour rendre ces prescriptions d'une application plus certaine et plus facile, les fanaux seront peints extérieurement de la couleur du feu qu'ils contiennent, et doivent être pourvus d'écrans convenables.

ARTICLE 7. Les navires à vapeur de moins de 40 tonneaux, et les vaisseaux à rames ou à voiles de moins de 20 tonneaux de tonnage brut, respectivement, et les chaloupes à rames, en marche, ne seront pas obligés de porter les feux mentionnés à l'article (a), (b) et (c), mais s'ils ne les portent pas, ils seront munis des feux suivants:—

1. Les navires à vapeur jaugeant moins de 40 tonneaux porteront—

11 GEORGE V. A. 1921

(a) In the forepart of the vessel, or on or in front of the funnel, where it can best be seen, and at a height above the gunwale of not less than 9 feet, a bright white light constructed and fixed as prescribed in article 2 (a), and of such a character as to be visible at a distance of at least 2 miles.

(b) Green and red side-lights constructed and fixed as prescribed in article 2 (b) and (c), and of such a character as to be visible at a distance of at least one mile, or a combined lantern showing a green light and a red light from right head to 2 points abaft the beam on their respective sides. Such lantern shall be carried not less than 3 feet below the white light.

2. Small steamboats, such as are carried by sea-going vessels, may carry the white light at a less height than 9 feet above the gunwale, but it shall be carried above the combined lantern, mentioned in subdivision 1 (b).

3. Vessels under oars or sails, of less than 20 tons, shall have ready at hand a lantern with a green glass on one side and a red glass on the other, which, on the approach of or to the other vessels, shall be exhibited in sufficient time to prevent collision, so that the green light shall not be seen on the port side nor the red light on the starboard side.

4. Rowing boats, whether under oars or sail, shall have ready at hand a lantern showing a white light, which shall be temporarily exhibited in sufficient time to prevent collision.

The vessels referred to in this article shall not be obliged to carry the lights prescribed by article 4 (a) and article 11, last paragraph.

ARTICLE 8. Pilot vessels, when engaged on their station on pilotage duty, shall not show the lights required for other vessels, but shall carry a white light at the masthead, visible all round the horizon, and shall also exhibit a flare-up light or flare-up lights at short intervals, which shall never exceed 15 minutes. On the near approach of or to other vessels they shall have their side-lights lighted, ready for use, and shall flash or show them at short intervals, to indicate the direction in which they are heading, but the green light shall not be shown on the port side, nor the red light on the starboard side.

A pilot vessel of such a class as to be obliged to go alongside of a vessel to put a pilot on board, may show a white light instead of carrying it at the masthead, and may, instead of the coloured lights above mentioned, have at hand ready for use a lantern with a green glass on the one side and a red glass on the other, to be used as prescribed above.

Pilot vessels, when engaged on their station on pilotage duty, shall carry lights similar to those of other vessels of their tonnage.

#### ARTICLE 9.<sup>1</sup>

ARTICLE 10. A vessel which is being overtaken by another shall show from her stern to such last-mentioned vessel a white light or a flare-up light.

The white light required to be shown by this article may be fixed and carried in a lantern, but in such case the lantern shall be so constructed, fitted and screened that it shall throw an unbroken light over an arc of the horizon of 12 points of the compass, viz., for 6 points from right aft on each side of the vessel so as to be visible at a distance of at least one mile. Such light shall be carried as nearly as practicable on the same level as the side-lights.

ARTICLE 11. A vessel under 150 feet in length, when at anchor, shall carry forward where it can best be seen, but at a height not exceeding 20 feet above the hull, a white light in a lantern so constructed as to show a clear, uniform, and unbroken light visible all round the horizon at a distance of at least one mile.

<sup>1</sup> Amended by Order in Council of June 28, 1909. (See p. 24)

## SESSIONAL PAPER No. 22

(a) A l'avant du navire, ou sur ou en avant de la cheminée, à l'endroit où il sera le plus en vue et à une hauteur au-dessus du plat-bord d'au moins 9 pieds, un feu brillant blanc construit et fixé tel que prescrit à l'article 2 (a), et de nature à être visible d'une distance d'au moins 2 milles.

(b) Des feux de côté vert et rouge tels que prescrits à l'article (b) et (c), et de nature à être visibles à une distance d'au moins 1 mille, ou un fanal combiné exhibant un feu vert et un feu rouge depuis l'avant jusqu'à deux quarts en arrière du travers de leurs bords respectifs. Ce fanal sera porté à au moins 3 pieds plus bas que le feu blanc.

2. Les petites chaloupes à vapeur que portent les navires de long cours pourront porter le feu blanc à une moindre hauteur que 9 pieds au-dessus du plat-bord, mais il sera porté au-dessus du fanal combiné mentionné au paragraphe 1 (b).

3. Les bâtiments à rames ou à voiles, jaugeant moins de 20 tonneaux, tiendront toujours prêt un fanal ayant d'un côté un verre de couleur verte, et de l'autre côté un verre de couleur rouge, et à l'approche d'un autre bâtiment ce fanal sera montré en temps opportun pour prévenir l'abordage, en ayant soin que le feu vert ne puisse être aperçu de bâbord, ni le feu rouge de tribord.

4. Les chaloupes à rames, qu'elles marchent à la rame ou à la voile, tiendront toujours prêt un fanal montrant un feu blanc qui sera temporairement exhibé en temps suffisant pour prévenir l'abordage.

Les vaisseaux mentionnés dans le présent article ne seront pas obligés de porter les feux prescrits par l'article 4 (a) et l'article 11, dernier paragraphe.

ARTICLE 8. Les bateaux-pilotes, lorsqu'ils sont occupés au service du pilotage dans leurs circonscriptions, ne porteront pas les mêmes feux que ceux exigés pour les autres bâtiments, mais ils porteront en tête du mât un feu blanc visible de tous les points de l'horizon, et montreront de plus un feu ou des feux intermittents à de courts intervalles qui ne devront pas être de plus de quinze minutes. A l'approche ou en approchant de tout navire, ils allumeront leurs feux de côtés, prêts à servir, et les exhiberont à de courts intervalles, pour indiquer la direction dans laquelle ils marchent, mais le feu vert ne sera pas montré du côté de bâbord, ni le feu rouge du côté de tribord.

Un bateau-pilote d'une classe qui l'oblige de se rendre le long d'un navire pour mettre un pilote à bord, peut montrer un feu blanc au lieu de le porter en tête du mât et peut, au lieu des feux de couleur mentionnés ci-dessus, tenir toujours prêt à servir, un fanal ayant un verre vert d'un côté et un verre rouge de l'autre, pour être employé tel que prescrit ci-dessus.

Les bateaux-pilotes qui ne seront pas occupés au service de pilotage dans leurs circonscriptions, porteront des feux semblables à ceux des autres navires de leur tonnage.

ARTICLE 9. (1).

ARTICLE 10. Lorsqu'un navire est prêt d'être atteint par un autre, il doit de sa poupe montrer à ce dernier un feu blanc ou un feu intermittent.

Le feu blanc que le présent article exige de montrer peut être fixé et porté dans un fanal, mais dans ce cas, le fanal sera construit, agencé et muni d'écrans de façon à projeter une lumière non interrompue sur un arc horizontal de 12 quarts de compas, savoir: pour 6 quarts depuis l'avant de chaque côté du vaisseau, et d'une portée telle qu'il puisse être visible à une distance d'au moins un mille. Ce feu sera porté autant que possible sur le même niveau que les feux de côté.

ARTICLE 11. Un navire de moins de 150 pieds de longueur, lorsqu'il est à l'ancre, portera à l'avant, à l'endroit le plus en vue, mais à une hauteur n'excédant pas 20 pieds au-dessus de la coque, un feu blanc dans un fanal construit de façon à projeter une lumière claire, uniforme et non interrompue visible de tous les points de l'horizon à une distance d'au moins 1 mille.

(1) Amendé par Arrêté en Conseil du 28 juin 1909 (voir page 25).

A vessel of 150 feet or upwards in length, when at anchor, shall carry in the forward part of the vessel, at a height of not less than 20 and not exceeding 40 feet above the hull, one such light, and at or near the stern of the vessel, and at such a height that it shall be not less than 15 feet lower than the forward light, another such light.

The length of a vessel shall be deemed to be the length appearing in her certificate of registry.

A vessel aground in or near a fairway shall carry the above light or lights, and the two red lights prescribed by article 4 (a).

ARTICLE 12. Every vessel may, if necessary in order to attract attention, in addition to the lights which she is by these rules required to carry, show a flare-up light or use any detonating signal that cannot be mistaken for a distress signal.

ARTICLE 13. Nothing in these rules shall interfere with the operation of any special rules made by the Government of any nation with respect to additional station and signal lights for two or more ships of war or for vessels sailing under convoy, or with the exhibition of recognition signals adopted by ship-owners, which have been authorized by their respective governments and duly registered and published.

ARTICLE 14. A steam vessel proceeding under sail only, but having her funnel up, shall carry in daytime forward, where it can best be seen, one black ball or shape 2 feet in diameter.

#### Sound signals for fog, etc.

ARTICLE 15. All signals prescribed by this article for vessels under way shall be given:

1. By "steam vessels," on the whistle or siren.
2. By "sailing vessels and vessels towed," on the fog horn.

The words "prolonged blast" used in this article shall mean a blast of from 4 to 6 seconds' duration.

A steam vessel shall be provided with an efficient whistle or siren, sounded by steam or some substitute for steam, so placed that the sound may not be intercepted by any obstruction, and with an efficient fog horn, to be sounded by mechanical means, and also with an efficient bell.\* A sailing vessel of 20 tons gross tonnage or upwards shall be provided with a similar fog horn and bell. In fog, mist, falling snow, or heavy rainstorms, whether by day or night, the signals described in this article shall be used as follows, viz. :—

(a) A steam vessel having way upon her, shall sound, at intervals of not more than 2 minutes, a prolonged blast.

(b) A steam vessel under way, but stopped and having no way upon her, shall sound at intervals of not more than 2 minutes, two prolonged blasts, with an interval of about one second between them.

(c) A sailing vessel under way shall sound, at intervals of not more than one minute, when on the starboard tack one blast, when on the port tack two blasts in succession, and when with the wind abaft the beam three blasts in succession.

(d) A vessel when at anchor, shall, at intervals of not more than one minute, ring the bell rapidly for about five seconds.

(e) A vessel, when towing, a vessel employed in laying or in picking up a telegraph cable, and a vessel under way, which is unable to get out of the way of an approaching vessel through being not under command, or unable to manœuvre as required by these

\* In all cases where the Rules require a bell to be used a drum may be substituted on board Turkish vessels, or a gong where such articles are used on board small sea-going vessels.

## SESSIONAL PAPER No. 22

Un navire de 150 pieds ou plus de longueur, lorsqu'il est à l'ancre, portera à l'avant, à une hauteur d'au moins 20 et ne dépassant pas 40 pieds au-dessus de la coque, un semblable feu, et à la poupe ou près de la poupe, et à une hauteur qui ne sera pas moins que 15 pieds plus bas que le feu d'avant, un autre feu semblable.

La longueur du navire sera censée être celle indiquée sur son certificat d'enregistrement.

Un navire échoué dans ou près d'une passe, portera le feu ou les feux ci-dessus et les deux feux rouges prescrits par l'article 4 (a).

ARTICLE 12. Chaque navire peut, si c'est nécessaire, pour attirer l'attention, en sus des feux que les présents règlements l'obligent de porter, montrer un feu intermittent, ou employer tout signal résonnant qui ne peut être pris erronément pour un signal de détresse.

ARTICLE 13. Rien de contenu dans les présents règlements n'interviendra dans l'opération de toutes règles spéciales établies par le gouvernement d'une nation quelconque au sujet de feux supplémentaires de station et de signal pour deux navires de guerre ou plus, ou pour des vaisseaux à voiles naviguant de conserve, ou dans les signaux particuliers adoptés par les propriétaires de navires et qui sont autorisés par leurs gouvernements respectifs et dûment enregistrés et publiés.

ARTICLE 14. Un navire à vapeur marchant à la voile seulement, mais ayant sa cheminée debout, portera à l'avant, pendant le jour, à l'endroit le plus en vue, une boule ou forme noire de 2 pieds de diamètre.

### Signaux phoniques pour temps de brume, etc.

ARTICLE 15. Tous les signaux prescrits par le présent article pour les navires en marche, seront donnés—

1. Par les "navires à vapeur" par le sifflet ou la sirène;

2. Par les "navires à voiles et les navires remorqués" par le cornet de brume.

Les mots "coup prolongé" employés dans le présent article signifient un coup de 4 à 6 secondes.

Un navire à vapeur doit être pourvu d'un sifflet à vapeur ou de quelque autre moyen efficace de faire entendre un signal produit par la vapeur ou quelque substitut à la vapeur, lequel sera placé de manière à ce que le son ne puisse être intercepté par aucune obstruction et d'un cor de brume actionné par un appareil mécanique, et aussi d'une forte cloche;\* un navire à voiles d'un tonnage brut de 20 tonneaux ou plus doit être pourvu d'un fort cornet actionné par un soufflet ou autre appareil mécanique, et aussi d'une forte cloche; en temps de brume, de brouillard ou de neige, soit de jour soit de nuit, les navires feront usage des signaux décrits dans le présent article, comme suit, savoir:—

(a) Un navire à vapeur en marche donnera, à des intervalles de pas plus de 2 minutes, un coup prolongé;

(b) Un navire à vapeur en marche, mais arrêté et sans mouvement, sonnera à des intervalles de deux minutes au plus, 2 coups prolongés, avec un intervalle d'environ une seconde entre chacun;

(c) Un navire à voiles en marche donnera, au moyen de son cornet, à des intervalles de pas plus d'une minute, s'il est amuré sur tribord, un coup, s'il est amuré sur bâbord deux coups de suite, et s'il est vent arrière, trois coups de suite;

(d) Un navire à l'ancre, à des intervalles de pas plus d'une minute, sonnera rapidement la cloche pendant à peu près cinq secondes.

(e) Un navire qui en remorque un autre employé à poser ou relever un câble télégraphique, et un navire en marche, qui est incapable de s'écarter du chemin d'un navire qui approche parce qu'il n'obéit pas à la manœuvre, ou qu'il est incapable de manœuvrer tel que requis par les présents règlements, sonnera, au lieu des signaux

\* Chaque fois que ces règlements exigent l'emploi d'une cloche, celle-ci pourra être remplacée par un tambour sur les navires turcs, ou par un gong à bord des petits navires de mer qui se servent de ces instruments.

rules shall, instead of the signals prescribed in subdivisions (a) and (c) of this article, at intervals of not more than 2 minutes, sound three blasts in succession, viz.: one prolonged blast, followed by two short blasts. A vessel towed may give this signal and she shall not give any other.

Sailing vessels and boats of less than 20 tons gross tonnage shall not be obliged to give the above mentioned signals, but if they do not, they shall make some other efficient sound-signal at intervals of not more than one minute.

#### Speed of ships to be moderate in fog, etc.

ARTICLE 16. Every vessel shall, in a fog, mist, falling snow, or heavy rainstorms, go at moderate speed, having careful regard to the existing circumstances and conditions.

A steam vessel hearing, apparently forward of her beam, the fog-signal of a vessel the position of which is not ascertained, shall, so far as the circumstances of the case admit, stop her engines, and then navigate with caution until danger of collision is over.

### STEERING AND SAILING RULES.

#### Preliminary—Risk of collision.

Risk of collision can, when circumstances permit, be ascertained by carefully watching the compass bearing of an approaching vessel. If the bearing does not appreciably change, such risk shall be deemed to exist.

ARTICLE 17. When two sailing vessels are approaching one another so as to involve risk of collision, one of them shall keep out of the way of the other, as follows, viz.:—

(a) A vessel which is running free shall keep out of the way of a vessel which is close hauled.

(b) A vessel which is close hauled on the port tack shall keep out of the way of a vessel which is close hauled on the starboard tack.

(c) When both are running free, with the wind on different sides, the vessel which has the wind on the port side shall keep out of the way of the other.

(d) When both are running free, with the wind on the same side, the vessel which is to the windward shall keep out of the way of the vessel which is to leeward.

(e) A vessel which has the wind aft shall keep out of the way of the other vessel.

ARTICLE 18. When two steam vessels are meeting end on, or nearly end on, so as to involve risks of collision, each shall alter her course to starboard so that each may pass on the port side of the other.

This article only applies to cases where vessels are meeting end on, or nearly end on, in such a manner as to involve risk of collision, and does not apply to two vessels which must, if both keep on their respective courses, pass clear of each other.

The only cases to which it does apply are when each of the two vessels is end on, or nearly end on, to the other; in other words, to cases in which, by day, each vessel sees the masts of the other in a line, or nearly in a line, with her own; and, by night, to cases in which each vessel is in such a position as to see both the side-lights of the other.

It does not apply, by day, to cases in which a vessel sees another ahead crossing her own course; or by night, to cases where the red light of one vessel is opposed to the red light of the other, or where the green light of one vessel is opposed to the green

---

NOTE.—When, in consequence of thick weather or other causes, such vessel finds herself so close that collision cannot be avoided by the action of the giving-way vessel alone, she also shall take such action as will best aid to avert collision.

(See articles 27 and 29.)

## SESSIONAL PAPER No. 22

prescrits dans les subdivisions (a) et (c) du présent article, à des intervalles de pas plus de 2 minutes, sonnera trois coups successifs, savoir: un coup prolongé suivi de deux coups brefs. Un navire remorqué peut donner ce signal et n'en donnera pas d'autre.

Les navires à voiles et les bateaux jaugeant moins que 20 tonneaux de tonnage brut, ne seront pas obligés de donner les signaux ci-dessus mentionnés, mais s'ils ne le font pas, ils donneront quelque autre signal sonore à des intervalles de pas plus d'une minute.

**En temps de brume la vitesse des navires sera modérée, etc.**

ARTICLE 16. Tout navire doit, en temps de brume, de brouillard, de neige, ou de pluie, aller à une vitesse modérée, tenant compte des circonstances et conditions du moment.

Un navire à vapeur qui entend, apparemment en avant de son travers, le signal de brume d'un vaisseau dont la position est incertaine, doit, selon les circonstances, arrêter ses machines, et ensuite naviguer avec prudence jusqu'à ce que tout danger d'abordage soit passé.

**RÈGLES DE NAVIGATION POUR PRÉVENIR LES ABORDAGES.**

**Notions préliminaires—Risques d'abordage.**

On peut s'assurer des risques d'abordage, lorsque les circonstances le permettent, en guettant soigneusement l'orientation d'un navire qui approche. Si l'orientation ne change pas sensiblement, ce risque est censé exister.

ARTICLE 17. Lorsque deux navires à voiles s'approchent l'un de l'autre de manière qu'il y ait risque d'abordage, l'un d'eux doit s'écarter du chemin de l'autre comme il suit, savoir:—

(a) Celui qui a du large doit s'écarter de la route du navire naviguant au plus près.

(b) Celui qui est au plus près et a les amures à bâbord, doit s'écarter de la route du navire au plus près dont les amures sont à tribord.

(c) Si tous deux courent large et ont le vent de côtés différents celui qui a le vent à bâbord doit s'écarter de la route de l'autre;

(d) Si tous deux courent large et ont le vent du même bord, celui qui est au vent doit se tenir hors de la route de celui qui est sous le vent;

(e) Celui qui est vent arrière doit s'écarter de la route de l'autre navire.

ARTICLE 18. Si deux navires sous vapeur se rencontrent courant l'un vers l'autre, directement ou à peu près, et qu'il y ait risque d'abordage, tous deux doivent venir sur tribord pour passer à bâbord l'un de l'autre.

Cet article ne s'applique que dans les cas où les navires courent l'un vers l'autre, directement ou à peu près, et où il y a risque d'abordage, mais ne s'applique pas à deux navires qui doivent, en conservant chacun leur allure, s'éviter l'un l'autre;

Les seuls cas auxquels il s'applique sont lorsque chacun des deux navires court vers l'autre, directement ou à peu près, ou, en d'autres termes, lorsque, de jour, chaque navire voit les mâts de l'autre en ligne droite, ou à peu près, avec les siens propres; et, de nuit, lorsque chaque navire est dans une position telle qu'il peut voir les deux feux de côté de l'autre;

Il ne s'applique pas lorsque, de jour, un navire en voit un autre croiser sa route en avant, ou, de nuit, lorsque le feu rouge d'un navire est opposé au feu rouge de

NOTE.—Si, en raison de gros temps ou autres causes, ce navire se trouve tellement rapproché que l'abordage ne peut être évité par la seule action du navire qui cède la route, alors il agira de la meilleure manière possible pour éviter l'abordage.

(Voir articles 27 et 29.)

light of the other, or where a red light without a green light, or a green light without a red light is seen ahead, or where both green and red lights are seen anywhere but ahead.

ARTICLE 19. When two steam vessels are crossing so as to involve risk of collision, the vessel which has the other on her own starboard side shall keep out of the way of the other.

ARTICLE 20. When a steam vessel and a sailing vessel are proceeding in such directions as to involve risk of collision, the steam vessel shall keep out of the way of the sailing vessel.

ARTICLE 21. Where by any of these rules one or two vessels is to keep out of the way, the other shall keep her course and speed.

ARTICLE 22. Every vessel which is directed by these rules to keep out of the way of another vessel shall, if the circumstances of the case admit, avoid crossing ahead of the other.

ARTICLE 23. Every steam vessel which is directed by these rules to keep out of the way of another vessel shall, on approaching her, if necessary, slacken her speed or stop or reverse.

ARTICLE 24. Notwithstanding anything, contained in these rules, every vessel, overtaking any other, shall keep out of the way of the overtaken vessel.

Every vessel coming up with another vessel from any direction more than 2 points abaft her beam, i.e., in such a position, in reference to the vessel which she is overtaking, that at night she would be unable to see either of that vessel's side-lights, shall be deemed to be an overtaking vessel; and no subsequent alteration of the bearing between the two vessels shall make the overtaking vessel a crossing within the meaning of these rules, or relieve her of the duty of keeping clear of the overtaken vessel until she is finally past and clear.

As by day the overtaking vessel cannot always know with certainty whether she is forward of or abaft this direction from the other vessel, she should, if in doubt, assume that she is an overtaking vessel and keep out of the way.

ARTICLE 25. In narrow channels every steam vessel shall, when it is safe and practicable, keep to that side of the fairway or mid-channel which lies on the starboard side of such vessel.

ARTICLE 26. Sailing vessels under way shall keep out of the way of sailing vessels or boats fishing with nets, or lines, or trawls. This rule shall not give to any vessel or boat engaged in fishing the right of obstructing a fairway used by vessels other than fishing vessels or boats.

ARTICLE 27. In obeying and construing these rules, due regard shall be had to all dangers of navigation and collision, and to any special circumstances which may render a departure from the above rules necessary in order to avoid immediate danger.

#### Sound signals for vessels in sight of one another.

ARTICLE 28. The words "short blast" used in this article shall mean a blast of about one second's duration.

When vessels are in sight of one another, a steam vessel under way, in taking any course authorized or required by these rules, shall indicate that course by the following signals on her whistle or siren, viz.:—

One short blast to mean: "I am directing my course to starboard."

Two short blasts to mean: "I am directing my course to port."

Three short blasts to mean: "My engines are going full speed astern."

## SESSIONAL PAPER No. 22

l'autre, ou lorsque le feu vert de l'un est opposé au feu vert de l'autre, ou lorsque l'un d'eux voit en avant un feu rouge sans voir le feu vert, ou un feu vert sans voir le feu rouge, ni lorsque les deux feux verts et rouges sont visibles partout ailleurs qu'en avant.

ARTICLE 19. Si deux navires sous vapeur font des routes qui se croisent et les exposent à s'aborder, celui qui voit l'autre par tribord doit manœuvrer de manière à ne pas gêner la route de ce dernier.

ARTICLE 20. Si deux navires, l'un à voiles, l'autre sous vapeur, font des routes qui les exposent à s'aborder, le navire sous vapeur doit manœuvrer de manière à ne pas gêner la route du navire à voiles.

ARTICLE 21. Lorsque, d'après les règles qui précèdent, l'un des deux navires doit s'écarter de la route de l'autre, celui-ci poursuivra sa route sans ralentir sa vitesse.

ARTICLE 22. Tout navire qui, d'après les présents, doit céder la route à un autre navire, doit, si les circonstances le permettent, éviter de croiser la route de l'autre.

ARTICLE 23. Tout navire à vapeur qui, d'après les présents règlements, doit céder la route à un autre navire, doit en l'approchant, si c'est nécessaire, ralentir sa vitesse, ou stopper ou faire machine en arrière.

ARTICLE 24. Nonobstant tout ce qui est contenu aux présents règlements, chaque navire qui en atteint un autre, doit s'écarter du navire atteint.

Chaque navire atteignant un autre navire d'une direction quelconque plus que deux quarts en arrière de son travers, *i.e.*, dans une position telle, relativement au navire atteint, que pendant la nuit le premier navire serait incapable de voir aucun des feux de côté du dernier navire, sera censé être un navire atteignant, et nul changement subséquent dans l'orientation entre les deux navires ne rendra un navire atteignant un navire croisant dans le sens des présents règlements, ni ne l'exemptera du devoir de s'écarter de la route du navire atteint, tant que le premier ne sera pas passé et libre.

Vu que pendant le jour le navire atteignant ne peut pas toujours savoir avec certitude s'il est en avant ou en arrière de cette direction d'après l'autre navire, il doit, dans le doute, présumer qu'il est un navire atteignant, et s'écarter de la route.

ARTICLE 25. Dans les passages ou chenaux étroits, tout navire à vapeur doit, si la chose est sûre et praticable, se tenir du côté du passage ou du milieu du chenal qui se trouve à tribord de ce navire.

ARTICLE 26. Les bâtiments à voiles en marche s'écarteront de la route des vaisseaux ou bateaux à voiles pêchant avec des rets, ou des lignes, ou des lignes dormantes. Cette présente règle ne donnera pas à tout vaisseau ou bateau engagé à pêcher, le droit d'obstruer un passage fréquenté par d'autres vaisseaux que des vaisseaux ou bateaux de pêche.

ARTICLE 27. En se conformant aux règles qui précèdent et les interprétant, il faut tenir compte de tous les dangers de la navigation, et avoir égard à toutes les circonstances particulières qui peuvent rendre nécessaire une dérogation à ces règles, afin de parer à un péril immédiat.

### Signaux par sons pour les navires en vue l'un de l'autre.

ARTICLE 28. Les mots "coup bref" employés dans le présent article, signifient un coup d'environ une seconde.

Lorsque des navires sont en vue les uns des autres, un navire à vapeur en marche, en prenant toute direction autorisée ou requise par les présents règlements, indiquera cette direction au moyen des signaux suivants, sur sifflet ou sirène, savoir:—

Un coup bref signifie: "Je me dirige à tribord."

Deux coups brefs signifient: "Je me dirige à bâbord."

Trois coups brefs signifient: "Je recule à toute vitesse."

**No vessel under any circumstances to neglect proper precautions.**

ARTICLE 29. Nothing in these rules shall exonerate any vessel, or the owner, or master, or crew thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper look-out, or of the neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

**Reservation of rules for harbours and inland navigation.**

ARTICLE 30. Nothing in these rules shall interfere with the operation of a special rule, duly made by local authority, relative to the navigation of any harbour, river, or inland waters.

**Distress signals.**

ARTICLE 31. When a vessel is in distress and requires assistance from other vessels or from the shore, the following shall be the signal to be used or displayed by her, either together or separately, viz. :—

In daytime—

1. A gun or other explosive signal fired at intervals of about a minute;
2. The International Code signal of distress indicated by N.C.;
3. The distant signal, consisting of a square flag, having either above or below it a ball or anything resembling a ball;
4. A continuous sounding with any fog-signal apparatus.

At night—

1. A gun or other explosive signal fired at intervals of about a minute;
2. Flames on the vessel (as from a burning tar-barrel, oil-barrel, etc.);
3. Rockets or shells, throwing stars of any colour or description, fired one at a time, at short intervals;
4. A continuous sounding with any fog-signal apparatus.

**Rafts and Harbour of Sorel.**

ARTICLE 32. Rafts, while drifting or at anchor on any of the waters of Canada, shall have a bright fire kept burning on them from sunset to sunrise. Whenever any raft is going in the same direction as another which is ahead, the one shall be so navigated as not to come within 20 yards of the other, and every vessel meeting or overtaking a raft shall keep out of the way thereof.

Rafts shall be so navigated and anchored as not to cause any unnecessary impediment or obstruction to vessels navigating the same waters.

ARTICLE 33. Unless it is otherwise directed by the Harbour Commissioners of Montreal, ships and vessels entering or leaving the harbour of Sorel shall take the port side, anything in the preceding articles to the contrary notwithstanding.

ARTICLE 34. The rules of navigation contained in articles 32 and 33 shall be subject to the provisions contained in articles 27 and 29.

JOHN J. MCGEE,

*Clerk of the Privy Council.*

SESSIONAL PAPER No. 22

**Nul navire ne doit, sous aucun prétexte, négliger les précautions nécessaires.**

ARTICLE 29. Rien dans ces règles ne saurait affranchir un navire, quel qu'il soit, son propriétaire, son capitaine ou son équipage, des conséquences d'une omission de porter des feux ou signaux, d'un défaut de surveillance convenable, ou enfin d'une négligence quelconque des précautions commandées par la pratique ordinaire de la navigation ou par les circonstances particulières de la situation.

**Réserve à l'égard règles pour les ports et la navigation intérieure.**

ARTICLE 30. Rien dans ces règles n'entravera l'opération d'une règle spéciale, régulièrement établie par une autorité locale, au sujet de la navigation d'un port, d'un fleuve, d'une rivière, ou d'eaux intérieures.

**Signaux de détresse.**

ARTICLE 31. Lorsqu'un navire est en détresse et a besoin du secours d'autres navires, ou de la terre, les signaux suivants seront employés et déployés par ce navire, soit ensemble soit séparément, savoir:—

Pendant le jour:—

1. Un canon ou autre signal explosif, tiré à des intervalles d'environ une minute;
2. Le signal de détresse indiqué par N.C. dans le Code international de signaux;
3. Le signal éloigné, composé d'un pavillon carré ayant, soit en haut ou en bas, une boule ou quelque chose ressemblant à une boule;
4. Un son continu produit par un appareil de signal de brume.

Pendant la nuit:—

1. Un canon ou autre signal explosif tiré à des intervalles d'environ une minute;
2. Des flammes sur le navire (telles que produites par des barils de goudron, ou d'huile, etc.);
3. Des fusées ou obus, jetant des étoiles de toute couleur ou description, tirés un à la fois, à de courts intervalles;
4. Un son continu par un appareil de signal de brume.

**Trains de bois—Port de Sorel.**

ARTICLE 32. Les trains de bois en dérive ou à l'ancre dans les eaux du Canada doivent tenir allumé un feu brillant depuis le coucher jusqu'au lever du soleil; tout train de bois qui suit la même route qu'un autre qui le précède doit naviguer de manière à se tenir à vingt verges de distance de l'autre, et tout bâtiment qui rencontre ou passe un train de bois doit manœuvrer de manière à ne pas gêner la route de ce train de bois.

Les trains de bois doivent naviguer et mouiller de manière à ne pas gêner inutilement la route des navires qui fréquentent les mêmes eaux.

ARTICLE 33. A moins qu'il n'en soit autrement ordonné par les Commissaires du Havre de Montréal, les navires et bâtiments entrant dans le port de Sorel ou en sortant, doivent naviguer à bâbord, nonobstant tout article ci-dessus à ce contraire.

ARTICLE 34. Les règles de navigation exprimées dans les articles 32 et 33 sont sujettes aux dispositions contenues dans les articles 27 et 29.

JOHN J. MCGEE,

*Greffier du Conseil privé.*

## AT THE GOVERNMENT HOUSE AT OTTAWA,

MONDAY, the 28th day of June, 1909.

PRESENT:

HIS EXCELLENCY THE ADMINISTRATOR IN COUNCIL.

Whereas by an order of His Majesty in Council, dated the 4th day of April, 1906, His Majesty was pleased to amend article 9, regarding lights and signals of fishing vessels and boats, of the regulations for the prevention of collisions at sea and as to signals of distress;

And whereas, it is desirable that such provisions of the said article 9 as are applicable should be incorporated in the regulations for preventing collisions in Canadian waters;

Therefore His Excellency in Council is pleased, under the provisions of Part XIV of the Canada Shipping Act, chapter 113, Revised Statutes of Canada, 1906, to order and direct that article number 9 of the regulations for preventing collisions, as established by Order in Council of the 9th day of February, 1897, shall be and the same is hereby rescinded, and the annexed article number 9, containing those provisions of the Imperial regulations in that regard as are applicable to Canadian waters, substituted therefor;

And His Excellency in Council is further pleased to order and declare, with a view to removing any doubt as to the waters in which the regulations for preventing collisions and as to signals of distress, annexed to the Order in Council of the 9th February, 1897, and as herein amended are in operation, that the said regulations shall apply to all the navigable waters within Canada or within the jurisdiction of the Parliament thereof, except the waters of Lakes Superior and Huron, Georgian bay, Lakes Erie and Ontario, their connecting and tributary waters, and the St. Lawrence river as far east as the lower exit of the Lachine canal and the Victoria bridge at Montreal.

RODOLPHE BOUDREAU,  
*Clerk of the Privy Council.*

---

**REGULATIONS FOR PREVENTING COLLISIONS OF SHIPS.**

ARTICLE 9. Fishing vessels and fishing boats, when under way and when not required by this article to carry or show the lights hereinafter specified shall carry or show the lights prescribed for vessels of their tonnage under way.

(a) Open boats, by which it is to be understood boats not protected from the entry of sea water by means of a continuous deck, when engaged in any fishing at night with outlying tackle extending not more than 150 feet horizontally from the boat into the seaway, shall carry one all-round white light.

Open boats when fishing at night, with outlying tackle extending more than 150 feet horizontally from the boat into the seaway, shall carry one all-round white light, and in addition, on approaching or being approached by other vessels, shall show a second white light at least 3 feet below the first light and at a horizontal distance of at least 5 feet away from it in the direction in which the outlying tackle is attached.

(b) Vessels and boats, except open boats as defined in subdivision (a), when fishing with drift-nets, shall, so long as the nets are wholly or partly in the water, carry two white lights where they can best be seen. Such lights shall be placed so

SESSIONAL PAPER No. 22

## HÔTEL DU GOUVERNEMENT À OTTAWA.

LUNDI, le 28e jour de juin 1909.

PRÉSENT :

SON EXCELLENCE L'ADMINISTRATEUR EN CONSEIL.

Attendu que par un arrêté de Sa Majesté en conseil daté le 4e jour d'avril 1906. il a plu à Sa Majesté de modifier l'article 9 relatif aux feux et signaux que doivent porter les vaisseaux et bateaux de pêche, des règlements établis pour prévenir les abordages en mer et concernant les signaux de détresse;

Et attendu qu'il est opportun que les dites dispositions du dit article 9 qui sont applicables soient incorporées dans les règlements pour prévenir les abordages dans les eaux canadiennes,—

À ces causes, il plaît à Son Excellence en conseil, en vertu des dispositions de la partie XIV de la loi de la marine marchande au Canada, chapitre 113 des Statuts révisés du Canada, 1906, de décréter et ordonner que l'article 9 des règlements pour prévenir les abordages en mer, tels qu'établis par arrêté en conseil du 9 février 1897. soit et il est par le présent rescindé, et il est remplacé par l'article 9 ci-annexé, contenant les dispositions des règlements impériaux à ce sujet qui sont applicables aux eaux canadiennes;

Il plaît en outre à Son Excellence en conseil de décréter et déclarer, dans le but de lever tout doute quant aux eaux dans lesquelles sont en vigueur les règlements pour prévenir les abordages et concernant les signaux de détresse, annexés à l'arrêté en conseil du 9 février 1897, que les dits règlements s'appliquent à toutes les eaux navigables en Canada ou sous la juridiction du parlement canadien, sauf les eaux des lacs Supérieur et Huron, la baie Georgienne, les lacs Erié et Ontario, leurs eaux tributaires, et le fleuve Saint-Laurent aussi loin à l'est que la sortie du canal Lachine et le pont Victoria, à Montréal.

RODOLPHE BOUDREAU,

*Greffier du Conseil privé.***RÈGLEMENTS POUR PRÉVENIR LES ABORDAGES DES NAVIRES.**

ARTICLE 9. Les vaisseaux de pêche et bateaux de pêche, lorsqu'ils sont en marche, et qu'ils ne sont pas obligés par le présent article de porter ou montrer les feux ci-après spécifiés, porteront ou montreront les feux prescrits pour les vaisseaux de leur tonnage en marche.

(a) Les bateaux non pontés, par lesquels on entend les bateaux qui ne sont pas protégés contre l'entrée de l'eau au moyen d'un pont continu, lorsque la nuit ils sont occupés à pêcher avec des engins tendus à pas plus de 150 pieds horizontalement en mer, porteront un feu blanc visible de tous les points de l'horizon.

Les bateaux non pontés, lorsque la nuit ils pêchent avec des engins tendus à plus de 150 pieds horizontalement en mer, porteront un feu blanc visible de tous les points de l'horizon, et de plus, en approchant d'autres vaisseaux, ou que d'autres vaisseaux s'en approchent, montreront un deuxième feu blanc placé au moins 3 pieds plus bas que le premier feu, et à une distance horizontale d'au moins 5 pieds dans la direction dans laquelle est attaché l'engin de pêche tendu.

(b) Les vaisseaux et bateaux, sauf les bateaux non pontés définis à la subdivision (a), pêchant aux filets traïnants, porteront, tant que les filets sont complètement ou partiellement dans l'eau, deux feux blancs, là où ils peuvent être le mieux vus. Ces feux doivent être placés de manière que la distance verticale entre eux ne soit pas de

that the vertical distance between them shall be not less than 6 feet and not more than 15 feet, and so that the horizontal distance between them, measured in a line with the keel, shall be not less than 5 feet and not more than 10 feet. The lower of these two lights shall be in the direction of the nets, and both of them shall be of such a character as to show all round the horizon, and to be visible at a distance of not less than 3 miles.

(c) Vessels and boats, except boats as defined in subdivision (a), when line-fishing, with their lines out and attached to or hauling their lines, and when not at anchor or stationary, within the meaning of subdivision (g), shall carry the same lights as vessels fishing with drift-nets. When shooting lines or fishing with towing lines, they shall carry the lights prescribed for a steam or sailing vessel under way, respectively.

(d) Oyster dredges and other vessels fishing with dredge nets, shall—

1. If steam vessels, carry in the same position as the white light mentioned in article 2 (a), a tri-coloured lantern so constructed and fixed as to show a white light from right ahead to 2 points on each bow, and a green light and a red light over an arc of the horizon from 2 points on each bow to 2 points abaft the beam on the star-board and port sides, respectively; and not less than 6 nor more than 12 feet below the tri-coloured lantern a white light in a lantern, so constructed as to show a clear uniform and unbroken light all round the horizon.

2. If sailing vessels, shall carry a white light in a lantern, so constructed as to show a clear uniform and unbroken light all round the horizon, and shall also, on the approach of or to other vessels, show where it can best be seen a white flare-up light or torch in sufficient time to prevent collision.

All lights mentioned in subdivision (d) 1 and 2 shall be visible at a distance of at least 2 miles.

(e) Fishing vessels and fishing boats may at any time use a flare-up light in addition to the lights which they are by this article required to carry and show, and they may also use working lights.

(f) Every fishing vessel and every fishing boat under 150 feet in length, when at anchor, shall exhibit a white light visible all round the horizon at a distance of at least one mile.

Every fishing vessel of 150 feet in length or upwards, when at anchor, shall exhibit a white light visible all round the horizon at a distance of at least one mile, and shall exhibit a second light as provided for vessels of such length by article 11.

Should any such vessel, whether under 150 feet in length or of 150 feet in length or upwards, be attached to net or other fishing gear, she shall on the approach of other vessels show an additional white light at least 3 feet below the anchor light, and at a horizontal distance of at least 5 feet away from it in the direction of the net or gear.

(g) If a vessel or boat when fishing becomes stationary in consequence of her gear getting fast to a rock or other obstruction, she shall in daytime haul down the day signal required by subdivision (i); at night show the light or lights prescribed for a vessel at anchor; and during fog, mist, falling snow, or heavy rainstorms, make the signal prescribed for a vessel at anchor. (See the last paragraph of article 15.)

(h) In fog, mist, falling snow, or heavy rainstorms, drift-net vessels attached to their nets, and vessels when dredging, or when line-fishing with their lines out, shall, if of 20 tons gross tonnage or upwards, respectively, at intervals of not more than one minute, make a blast; if steam vessels with the whistle or siren, and if sailing vessels, with the fog-horn; each blast to be followed by ringing the bell. Fishing vessels and

## SESSIONAL PAPER No. 22

moins de 6 pieds ni de plus de 15 pieds, et de manière que la distance horizontale qui les sépare, mesurée en ligne avec la quille du navire, ne soit pas de moins de 5 pieds ni de plus de 10 pieds. Le plus bas de ces deux feux sera dans la direction des filets, et tous les deux doivent avoir une portée telle et placés dans des fanaux d'une construction telle qu'ils soient visibles de tous les points de l'horizon à une distance d'au moins 3 milles.

(c) Les vaisseaux et bateaux, sauf les bateaux non pontés tels que définis à la subdivision (a), pêchant à la ligne avec leurs lignes tendues et attachés à leurs lignes ou les retirant, et lorsqu'ils ne sont pas ancrés ou stationnaires dans le sens de la subdivision (g), porteront les mêmes feux que les vaisseaux pêchant aux filets traïnants. Lorsqu'ils jettent leurs lignes ou pêchent avec des lignes traïnantes, ils porteront les feux prescrits pour les vaisseaux à vapeur ou à voiles en marche respectivement.

(d) Les dragues aux huîtres et autres vaisseaux pêchant à la drague—

1. S'ils sont à vapeur, porteront dans la même position que le feu blanc mentionné à l'article 2 (a) un fanal tricolore, construit et fixé de manière à montrer un feu blanc depuis l'avant jusqu'aux quarts de chaque côté, et un feu vert et un feu rouge sur un arc horizontal de deux quarts de chaque côté jusqu'à deux quarts sur l'arrière du travers à tribord et bâbord respectivement; et pas moins de 6 ni plus de 12 pieds au-dessous du fanal tricolore un feu blanc dans un fanal construit de manière à projeter une lumière uniforme et non interrompue visible de tous les points de l'horizon.

2. S'ils sont à voiles, ils porteront un feu blanc dans un fanal, construit de manière à projeter une lumière uniforme et non interrompue tout autour de l'horizon, et à l'approche d'autres vaisseaux, ou en les approchant, ils montreront aussi, là où il sera le mieux aperçu, un feu blanc à éclats ou une torche en temps suffisant pour éviter l'abordage.

Tous les feux mentionnés à la subdivision (d) 1 et 2 seront visibles à une distance d'au moins 2 milles.

(e) Les vaisseaux et bateaux de pêche pourront en tout temps employer un feu à éclats en sus des feux que le présent article les oblige de porter et montrer, et ils pourront aussi se servir de feux portatifs.

(f) Chaque vaisseau de pêche et chaque bateau de moins de 150 pieds de longueur, à l'ancre, devra montrer un feu blanc visible de tous les points de l'horizon à une distance d'un mille au moins.

Chaque vaisseau de pêche de 150 pieds de longueur ou plus, à l'ancre, montrera un feu blanc visible de tous les points de l'horizon, à une distance d'au moins un mille, et montrera un deuxième feu tel que prescrit pour les vaisseaux de cette longueur par l'article 11.

Si un tel vaisseau, qu'il ait moins de 150 pieds de longueur, ou ait 150 pieds de longueur ou plus, est attaché à un filet ou autre engin de pêche, il montrera, à l'approche d'autres vaisseaux, un autre feu blanc placé 3 pieds au moins plus bas que le feu de mouillage, et à une distance horizontale d'au moins 5 pieds dans la direction du filet ou engin.

(g) Si un vaisseau qui fait la pêche devient stationnaire par suite de ce que son engin de pêche s'est accroché à une roche ou à quelque autre obstacle, le jour il descendra la marque prescrite par la subdivision (i), la nuit il montrera le feu ou les feux prescrits pour un vaisseau à l'ancre; et dans les temps de brume, de brouillard, de neige ou de grosses pluies il fera le signal prescrit pour un vaisseau à l'ancre. (Voir le dernier paragraphe de l'article 15.)

(h) Dans les temps de brume, de brouillard, de neige ou de grosses pluies, les vaisseaux à filets traïnants attachés à leurs filets, et les vaisseaux pêchant à la traînée, ou à la ligne avec leurs lignes tendues, devront, s'ils sont de 20 tonneaux de tonnage brut ou plus, respectivement, à des intervalles d'une minute au plus, sonner le sifflet ou la sirène, s'ils sont à vapeur, ou faire résonner le cornet s'ils sont à voiles; chaque son

boats of less than 20 tons gross tonnage shall not be obliged to give the above-mentioned signals; but if they do not, they shall make some other efficient sound signal at intervals of not more than one minute.

(i) All vessels or boats fishing with nets or lines, when under way, shall in day-time indicate their occupation to an approaching vessel by displaying a basket or other efficient signal where it can best be seen. If vessels or boats at anchor have their gear out, they shall, on the approach of other vessels, show the same signal on the side on which those vessels can pass.

The vessels required by this article to carry or show the lights hereinbefore specified shall not be obliged to carry the lights prescribed by article 4 (a), and the last paragraph of article 11.

## SESSIONAL PAPER No. 22

sera suivi d'un coup de cloche. Les vaisseaux de pêche et les bateaux de moins de 20 tonneaux de tonnage brut ne seront pas obligés de donner les signaux ci-dessus, mais sinon, ils feront d'autres signaux à des intervalles d'au moins une minute.

(i) Tous les bateaux ou bateaux pêchant aux filets ou lignes ou dragues, en marche, le jour indiqueront leur occupation à un vaisseau approchant, en déployant un panier ou autre bon signal où il sera le mieux aperçu. Si des vaisseaux ou bateaux à l'ancre ont leurs engins tendus, ils montreront à l'approche d'autres vaisseaux le même signal du côté où peuvent passer ces vaisseaux.

Les vaisseaux que le présent article oblige de porter ou de montrer les feux ci-dessus décrits, ne seront pas obligés de porter les feux prescrits par l'article 40 (a) et le dernier paragraphe de l'article 11.

## RULES OF THE ROAD FOR THE GREAT LAKES

INCLUDING GEORGIAN BAY, THEIR CONNECTING AND TRIBUTARY WATERS, AND THE ST. LAWRENCE RIVER AS FAR EAST AS THE LOWER EXIT OF THE LACHINE CANAL AND THE VICTORIA BRIDGE AT MONTREAL.

### ORDER IN COUNCIL

AT THE GOVERNMENT HOUSE AT OTTAWA.

FRIDAY, the 4th day of February, 1916.

PRESENT:

HIS ROYAL HIGHNESS THE GOVERNOR GENERAL IN COUNCIL.

Whereas it is considered necessary to revise the rules of the road for the Great Lakes including Georgian Bay, their connecting and tributary waters, etc., adopted by Order in Council of the 20th April, 1905, as owing to the increased use in recent years of motor boats and other small craft on the inland waters, the present rules have become inadequate to meet present conditions.

And whereas the present rules differ from the United States rules of the road for the same waters, and one of the principal objects of the revision is to harmonize the Canadian rules with the United States rules, which object has been accomplished in the revised rules hereto annexed.

And whereas the adoption of the said revised rules is desired by Canadian shipping interests on the Great Lakes.

Therefore His Royal Highness the Governor General in Council, in pursuance of the provisions of section 913 of the Canada Shipping Act, chapter 113 of the Revised Statutes of Canada, 1906, is pleased to order as follows:—

The annexed Revised Rules are hereby adopted as the Rules of the Road for navigating the Great Lakes including Georgian Bay, their connecting and tributary waters and the St. Lawrence river as far east as the lower exit of the Lachine canal and the Victoria bridge at Montreal, the same to take effect on and after the 1st day of March, 1916, and all other rules or regulations adopted by Order in Council governing the navigation of the said waters, and all Orders in Council previously passed adopting such rules or regulations are hereby repealed.

RODOLPHE BOUDREAU,  
*Clerk of the Privy Council.*

## RÈGLEMENTS POUR PRÉVENIR LES ABORDAGES SUR LES GRANDS LACS

SUR LES EAUX DE LA BAIE GEORGIENNE, SUR CELLES LES RELIANT OU EN ÉTANT TRIBUTAIRES, ET SUR LE FLEUVE SAINT-LAURENT, JUSQU'À LA LIMITE ORIENTALE DÉTERMINÉE PAR LA PORTE D'AVAL DE L'ÉCLUSE INFÉRIEURE DU CANAL LACHINE ET LE PONT VICTORIA, À MONTRÉAL.

### ARRÊTÉ EN CONSEIL

HÔTEL DU GOUVERNEMENT À OTTAWA.

VENDREDI. le 4e jour de février 1916.

PRÉSENT :

SON ALTESSE ROYALE LE GOUVERNEUR GÉNÉRAL EN CONSEIL.

Attendu qu'il est jugé nécessaire de reviser les règlements régissant la navigation sur les Grands lacs (y compris la baie Georgienne), ainsi que la navigation sur les eaux qui les relient et les eaux tributaires, etc., adoptés par un arrêté en conseil du 20 avril 1915, car à cause de l'augmentation en ces dernières années du nombre de bateaux à moteur et d'autre batellerie sur les eaux de l'intérieur, les présents règlements sont inadéquats dans les conditions actuelles.

Et attendu que les présents règlements diffèrent de ceux des Etats-Unis sur les mêmes eaux et qu'un des buts principaux de la révision est de rendre les règlements canadiens conformes à ceux des Etats-Unis, ce qui est fait dans les règlements révisés ci-annexés.

Et attendu que les intéressés dans la marine marchande sur les Grands lacs désirent l'adoption des dits règlements révisés.

Par conséquent, il plaît à Son Altesse Royale le Gouverneur en conseil, en vertu des dispositions de l'article 913 de la loi de la marine marchande au Canada, chapitre 113 des Statuts révisés du Canada, 1906, de décréter par ces présentes ce qui suit:—

Sont par ces présentes adoptés les règlements révisés ci-annexés concernant la navigation sur les Grands lacs (y compris la baie Georgienne), ainsi que la navigation sur les eaux qui les relient et les eaux tributaires, et le fleuve Saint-Laurent jusqu'à la limite orientale déterminée par la porte d'aval de l'écluse inférieure du canal Lachine et le pont Victoria, à Montréal. Ces règlements seront en vigueur à dater du premier jour de mars 1916, et tous les autres règlements adoptés par arrêté en conseil concernant la navigation des dites eaux, et tous les arrêtés en conseil antérieurs promulguant de tels règlements sont par ces présentes rescindés.

RODOLPHE BOUDREAU,

*Greffier du Conseil Privé.*

## RULES FOR NAVIGATING THE GREAT LAKES,

Including Georgian Bay, their connecting and tributary waters and the St. Lawrence River as far East as the lower exit of the Lachine Canal and the Victoria Bridge at Montreal.

### Preliminary.

In the following rules every steam vessel which is under sail and not under steam shall be considered a sail vessel; and every steam vessel which is under steam, whether under sail or not, shall be considered a steam vessel.

The words *steam vessel* and *steamer* shall include any vessel propelled by machinery.

A vessel is *under way* within the meaning of these rules, when she is not at anchor, or made fast to the shore or aground.

### LIGHTS.

RULE 1. The lights mentioned in the following rules and no others shall be carried in all weathers from sunset to sunrise. The word visible in these rules when applied to lights shall mean visible on a dark night with a clear atmosphere.

RULE 2. Except in the cases hereinafter expressly provided for, a steam vessel when under way shall carry:—

(a) On or in front of the foremast, or if a vessel without a foremast, then in the forepart of the vessel, at a height above the hull of not less than twenty feet, and if the beam of the vessel exceeds twenty feet, then at a height above the hull not less than such beam, so, however, that such height need not exceed forty feet, a bright white light so constructed as to show an unbroken light over an arc of the horizon of twenty points of the compass, so fixed as to throw the light ten points on each side of vessel, namely, from right ahead to two points abaft the beam on either side, and of such character as to be visible at a distance of at least five miles.

(b) On the starboard side, a green light, so constructed as to throw an unbroken light over an arc of the horizon of ten points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the starboard side, and of such a character as to be visible at a distance of at least two miles.

(c) On the port side, a red light, so constructed as to show an unbroken light over an arc of the horizon of ten points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the port side, and of such a character as to be visible at a distance of at least two miles.

(d) The said green and red lights shall be fitted with inboard screens projecting at least three feet forward from the light, so as to prevent these lights from being seen across the bow.

(e) A steamer of over one hundred and fifty feet register length shall also carry when under way an additional bright light similar in construction to that mentioned in subdivision (a), so fixed as to throw the light all around the horizon and of such character as to be visible at a distance of at least three miles. Such additional light shall be placed in line with the keel at least fifteen feet higher from the deck and more than seventy-five feet abaft the light mentioned in subdivision (a).

RULE 3. A steam vessel having a tow other than a raft shall in addition to the forward bright light mentioned in subdivision (a) of rule two carry in a vertical line not less than six feet above or below that light a second bright light of the same con-

SESSIONAL PAPER No. 22

**RÈGLEMENTS CONCERNANT LA NAVIGATION SUR LES GRANDS LACS.**

Sur les eaux de la baie Georgienne, sur celles les reliant ou en étant tributaires, et sur le fleuve Saint-Laurent, jusqu'à la limite orientale déterminée par la porte d'aval de l'écluse inférieure du canal Lachine et le pont Victoria, à Montréal.

**Dispositions préliminaires.**

Pour l'application des articles du présent règlement, tout navire à vapeur faisant route uniquement à la voile, doit être considéré comme étant un navire à voiles; et tout navire à vapeur dont la machine est sous pression, doit être considéré comme navire à vapeur, qu'il se serve ou non de ses voiles.

L'expression "navire à vapeur" comprend tout navire mû par des machines.

Un navire "fait route" dans le sens du présent règlement, lorsqu'il n'est pas au mouillage, ou amarré au rivage, ou échoué.

**FEUX**

**ARTICLE 1.** Les feux dont il est fait mention dans les articles suivants du présent règlement, sont les seuls qui doivent être montrés depuis le coucher du soleil jusqu'au moment où il se lève.

L'expression "visible" employée dans le présent règlement au sujet des feux, signifie visible par une nuit noire et ciel clair.

**ARTICLE 2.** Excepté dans les cas expressément déterminés ci-après, tout navire à vapeur faisant route doit porter:—

(a) Au mât de misaine ou en avant de ce mât, ou bien, si le navire n'a pas de mât de misaine, sur la partie avant du navire, à une hauteur au-dessus du plat-bord qui ne soit pas inférieure à vingt pieds, et si la largeur du navire dépasse vingt pieds à une hauteur au-dessus du plat-bord au moins égale à cette largeur sans qu'il soit néanmoins nécessaire que cette hauteur au-dessus du plat-bord dépasse quarante pieds, un feu blanc brillant, disposé de manière à montrer une lumière ininterrompue sur tout le parcours d'un arc de l'horizon de vingt quarts ou rumbs du compas, soit 10 quarts de chaque côté du navire, c'est-à-dire depuis l'avant jusqu'à 2 quarts sur l'arrière du travers de chaque bord. Ce feu doit être visible d'une distance d'au moins cinq milles.

(b) A tribord: un feu vert établi de manière à projeter une lumière ininterrompue sur tout le parcours d'un arc de l'horizon de 10 quarts ou rumbs du compas, c'est-à-dire depuis l'avant jusqu'à deux quarts sur l'arrière du travers à tribord. Ce feu doit être visible d'une distance d'au moins deux milles.

(c) A bâbord: un feu rouge établi de manière à projeter une lumière ininterrompue sur tout le parcours d'un arc de l'horizon de 10 quarts ou rumbs du compas, c'est-à-dire depuis l'avant jusqu'à deux quarts sur l'arrière du travers à bâbord. Ce feu doit être visible d'une distance d'au moins deux milles.

(d) Ces feux de côté, vert et rouge, doivent être mis sur des boîtes ouvertes, ou écrans, placés de chaque côté du navire, dépassant le feu d'au moins trois pieds vers la proue, et construits de manière que le feu vert ne puisse être aperçu de bâbord avant et le feu rouge de tribord avant.

(e) Tout navire à vapeur de plus de cent cinquante pieds de longueur faisant route doit porter un feu additionnel blanc, semblable à celui mentionné au paragraphe (a) disposé de manière à projeter tout autour de l'horizon une lumière claire à une distance d'au moins trois milles. Ce feu additionnel doit être placé dans le plan de la quille à quinze pieds au moins au-dessus du pont et à une distance de plus de soixante et quinze pieds en arrière du feu mentionné au paragraphe (a).

**ARTICLE 3.** Tout navire à vapeur qui remorque autre chose qu'un train de bois flotté, doit porter en outre du feu blanc brillant de l'avant, mentionné au paragraphe (a) de l'article deux, un deuxième feu blanc brillant semblable au feu susdit, men-

struction and character and fixed and carried in the same manner as the forward bright light mentioned in said subdivision (a) of rule two. Such steamer shall also carry a small bright light abaft the funnel or aftermast for the tow to steer by, but such light shall not be visible forward of the beam.

RULE 4. A steam vessel having a raft in tow shall, instead of the forward lights mentioned in rule three, carry on or in front of the foremast, or if a vessel without a foremast then in the forepart of the vessel, at a height above the hull of not less than twenty feet, and if the beam of the vessel exceeds twenty feet, then at a height above the hull not less than such beam, so however, that such height need not exceed forty feet, two bright lights in a horizontal line athwartships and not less than eight feet apart, each so fixed as to throw the light all around the horizon and of such character as to be visible at a distance of at least five miles. Such steamer shall also carry the small bright steering light aft, of the character and fixed as required in rule three.

RULE 5. A sailing vessel under way and any vessel being towed shall carry the side-lights mentioned in rule two.

A vessel in tow shall also carry a small bright light aft, but such light shall not be visible forward of the beam.

RULE 6. Whenever, as in the case of small vessels under way during bad weather, the green and red side-lights cannot be fixed, these lights shall be kept at hand lighted and ready for use, and shall, on the approach of or to other vessels, be exhibited on their respective sides in sufficient time to prevent collision, in such manner as to make them most visible, and so that the green light shall not be seen on the port side, nor the red light on the starboard side, nor, if practicable, more than two points abaft the beam on their respective sides. To make the use of these portable lights more certain and easy, they shall be painted outside with the colour of the light they respectively contain, and shall be provided with suitable screens.

RULE 7. A vessel under one hundred and fifty feet register length, when at anchor, shall carry forward, where it can best be seen, but at a height not exceeding twenty feet above the hull, a white light in a lantern constructed so as to show a clear, uniform, and unbroken light, visible all around the horizon, at a distance of at least one mile.

A vessel of one hundred and fifty feet or upward in register length, when at anchor, shall carry in the forward part of the vessel, at a height of not less than twenty and not exceeding forty feet above the hull, one such light, and at or near the stern of the vessel, and at such a height that it shall not be less than fifteen feet lower than the forward light, another such light.

RULE 8. Open boats shall not be obliged to carry the side-lights required for other vessels, but shall, if they do not carry such lights, carry a lantern having a green slide on one side and a red slide on the other side; and on the approach of or to other vessels, such lantern shall be exhibited in sufficient time to prevent collision, and in such a manner that the green light shall not be on the port side, nor the red light on the starboard side. Open boats, when at anchor or stationary, shall exhibit a bright white light. They shall not, however, be prevented from using a flare-up in addition if considered expedient.

## SESSIONAL PAPER No. 22

tionné au paragraphe (a) de l'article deux, et disposé verticalement à une distance de six pieds au moins au-dessus ou au dessous de ce premier feu. Tel navire à vapeur doit aussi porter un petit feu blanc brillant en arrière de la cheminée ou du mât d'artimon, pour permettre au navire remorqué de gouverner, mais ce feu ne doit pas être visible en avant du maître-bau.

ARTICLE 4. Tout navire à vapeur qui remorque un train de bois flotté, doit, au lieu des feux de l'avant mentionnés à l'article 3, porter au mât de misaine ou en avant de ce mât, ou bien si le navire n'a pas de mât de misaine, sur la partie avant du navire, à une hauteur au-dessus du plat-bord qui ne soit pas inférieure à vingt pieds, et si la largeur du navire dépasse vingt pieds à une hauteur au-dessus du plat-bord au moins égale à cette largeur, sans qu'il soit nécessaire que cette hauteur au-dessus du plat-bord dépasse quarante pieds, deux feux blancs brillants horizontaux, disposés en travers du navire, à une distance d'au moins huit pieds l'un de l'autre et de manière à projeter tout autour de l'horizon une lumière claire ininterrompue, à une distance d'au moins cinq milles. Tel navire à vapeur doit aussi porter le petit feu blanc brillant du mât d'artimon, mentionné à la fin de l'article 3.

ARTICLE 5. Tout voilier faisant route doit porter les feux de côté mentionnés à l'article 2; et, tout navire remorqué doit aussi porter ces mêmes feux.

Tout navire remorqué doit en outre porter à l'arrière un petit feu blanc brillant, feu qui ne doit pas être visible en avant du maître-bau.

ARTICLE 6. Lorsqu'un navire faisant route par gros temps a des dimensions trop petites pour que ses feux de côté, vert et rouge, puissent être fixés de manière permanente, ces feux doivent, néanmoins, être allumés sur le pont, chacun sur le côté réglementaire, afin que l'on puisse s'en servir instantanément. Ils doivent être montrés chacun, selon le besoin, et du bon côté, à tout bâtiment qui s'approcherait du navire qui les porte, ou dont ce dernier s'approcherait, et ce, assez à temps pour prévenir un abordage. Cette manœuvre doit être faite de telle manière que les feux de côté soient aussi visibles que possible, et présentés de telle manière que le feu vert ne puisse être aperçu du côté de bâbord, ni le feu rouge du côté du tribord, si la chose est praticable, à plus de deux quarts en arrière du travers de chacun des côtés du navire. Pour rendre l'application de cet article du règlement plus facile et plus certaine, les fanaux doivent être peints extérieurement de la couleur du feu qu'ils contiennent, et ils doivent, de plus, être pourvus d'écrans convenables.

ARTICLE 7. Un navire de moins de cent cinquante pieds de longueur, lorsqu'il est au mouillage, doit porter à l'avant, dans l'endroit où il peut être le plus apparent, mais à une hauteur n'excédant pas vingt pieds au-dessus du plat-bord, un feu blanc dans un fanal disposé de manière à projeter tout autour de l'horizon une lumière claire, uniforme et non interrompue à une distance d'au moins un mille.

Un navire de cent cinquante pieds ou plus de longueur, lorsqu'il est au mouillage, doit porter à la partie avant à une hauteur au-dessus du plat-bord de vingt pieds au moins, et de quarante pieds au plus, un feu semblable à celui mentionné plus haut, et à l'arrière ou près de l'arrière un second feu pareil qui doit être à une hauteur telle qu'il ne se trouve pas à moins de 15 pieds plus bas que celui de l'avant.

ARTICLE 8. Les embarcations ouvertes ne sont pas obligées de porter les feux de côté que l'on exige des navires, mais elles doivent, si elles ne les portent pas, porter un fanal émettant une lumière verte d'un côté et rouge de l'autre; fanal qui doit être présenté assez à temps pour éviter tout abordage et de telle sorte que le feu vert ne puisse être aperçu du côté de bâbord ni le feu rouge du côté du tribord. Les embarcations ouvertes, doivent, lorsqu'elles sont au mouillage ou stationnaires, montrer un feu blanc brillant. On ne les empêche pas cependant de montrer par surcroît un feu intermittent, si cela est opportun.

11 GEORGE V, A. 1921

RULE 9. Sailing vessels shall at all times, on the approach of any steamer during the night-time, show a lighted torch upon that quarter to which such steamer shall be approaching.

**Lights for tugs under 30 tons register (net) whose principal business is harbour towing.**

RULE 10. Tugs under 30 tons register (net) whose principal business is harbour towing, shall carry the red and green side-lights carried by other steamers; and, at the foremast head, or, if the steamer has no foremast, then on top of the pilot house, a white light so constructed as to show a uniform and unbroken light over an arc of the horizon of 20 points of the compass, and so fixed as to throw the light 10 points on each side of the vessel, namely, from right ahead to 2 points abaft the beam on either side, and of such a character as to be visible at a distance of at least 3 miles; and *when towing, except when towing a raft*, shall carry an additional white light of same character and construction as the headlight, and hung not less than 3 feet vertically above or below the headlight.

*When towing a raft*, the two headlights shall be carried in a horizontal line athwartships not less than 4 feet apart, each so fixed as to throw the light all around the horizon, and of such a character as to be visible at a distance of at least 3 miles.

**Lights to be carried by ferryboats.**

RULE 11. Ferryboats propelled by steam or machinery shall carry the white light or lights and the coloured side-lights required by these rules to be carried on steam vessels, except that *double-end ferryboats* shall carry a central range of clear, bright, white lights, showing all around the horizon, placed at equal altitudes forward and aft, also on the starboard side a green light, and on the port side a red light, of such a character as to be visible on a dark night with a clear atmosphere at a distance of at least 2 miles, and so constructed as to show a uniform and unbroken light over an arc of the horizon of 10 points of the compass, and so fixed as to throw the light from right ahead to 2 points abaft the beam on their respective sides.

The green and red lights shall be fitted with inboard screens projecting at least 3 feet forward from the lights, so as to prevent them from being seen across the bow.

**Lights for canal boats in tow of steam vessels.**

RULE 12. Canal boats when in tow of steam vessels shall carry lights as follows:—

Canal boats when *towed astern of steam vessels and towed singly or tandem* shall each carry a green light on the starboard side, a red light on the port side, and a small bright white light aft.

When canal boats are *towed at a hawser in one or more tiers*, two or more abreast, the boat on the starboard side of each tier shall carry a green light on her starboard side, and the boat on the port side of each tier shall carry a red light on her port side, and each of the outside boats in the last tier shall also carry a small bright light aft.

When a canal boat is *towed alongside* and on the starboard side of a steamer, the boat towed shall carry a green light on the starboard side; and when towed on the port side of a steamer, the boat towed shall carry a red light on the port side.

## SESSIONAL PAPER No. 22

ARTICLE 9. Les voiliers doivent en tout temps, durant la nuit, lorsqu'un navire à vapeur s'approche d'eux, montrer une torche allumée du côté où se trouve le vapeur qui approche.

**Feux des remorqueurs ayant un tonnage net de moins de 30 tonneaux et principalement employés à faire du remorquage dans les ports.**

ARTICLE 10. Les remorqueurs ayant un tonnage net de moins de 30 tonneaux et principalement employés à faire du remorquage dans les ports, doivent porter les feux de côté vert et rouge que portent les autres vapeurs, et, en tête du mât de misaine ou bien si ce remorqueur à vapeur n'a pas de mât de misaine, sur le haut du kiosque du pilote, un feu blanc brillant, disposé de manière à montrer une lumière ininterrompue sur tout le parcours d'un arc de l'horizon de 20 quarts ou rumbes du compas, soit 10 quarts de chaque côté du navire, c'est-à-dire, depuis l'avant jusqu'à 2 quarts sur l'arrière du travers de chaque bord. Ce feu doit être visible à une distance d'au moins 3 milles. Lorsqu'un remorqueur fait du *remorquage autre que celui d'un train de bois flotté*, il doit porter un feu blanc additionnel semblable au feu de tête de mât et suspendu verticalement à une distance d'au moins trois pieds au-dessus ou au-dessous du feu de tête de mât.

Lorsqu'un remorqueur *remorque un train de bois flotté*, les deux feux de tête de mât doivent être disposés horizontalement en travers du navire, à une distance d'au moins quatre pieds l'un de l'autre, de manière à projeter tout autour de l'horizon, une lumière claire, uniforme et ininterrompue à une distance d'au moins trois milles.

**Feux que doivent porter les bacs.**

ARTICLE 11. Les bacs dont la progression est obtenue par l'emploi de la vapeur ou de machines, doivent porter le ou les feux blancs et les feux de couleur des côtés que ce règlement exige des navires à vapeur; et *les bacs à proue double*, c'est-à-dire, dont la poupe est remplacée par une seconde proue, doivent porter dans le plan de leur ligne médiane longitudinale ou axe, un alignement de feux blancs brillants disposés de manière à projeter tout autour de l'horizon une lumière claire. Ces feux doivent être portés à une même hauteur à l'avant et à l'arrière du bac qui, de plus, doit porter sur ses côtés un feu vert à tribord et un feu rouge à bâbord. Ces derniers feux devront être visibles par nuit noire et ciel clair à une distance d'au moins deux milles. Ils doivent être disposés de manière à montrer une lumière ininterrompue sur tout le parcours d'un arc de l'horizon de 10 quarts ou rumbes du compas, c'est-à-dire depuis l'avant jusqu'à 2 quarts sur l'arrière du travers de chaque bord.

Ces feux de côtés, vert et rouge, doivent être mis sur des boîtes ouvertes, ou écrans, dépassant le feu d'au moins trois pieds vers la proue, et construits de manière que le feu vert ne puisse pas être aperçu de bâbord avant que le feu rouge de tribord avant.

**Feux que doivent porter les bateaux naviguant sur les canaux, lorsqu'ils sont remorqués par des navires à vapeur.**

ARTICLE 12. Les bateaux naviguant sur les canaux doivent, lorsqu'ils sont *remorqués un à la fois ou en tandem à l'arrière de navires à vapeur*, porter un feu vert du côté de tribord, un feu rouge du côté de bâbord et un petit feu blanc brillant à l'arrière.

Lorsque des bateaux naviguant sur les canaux sont *remorqués à l'aide d'une haussière sur plusieurs rangées*, de deux bateaux ou plus de front, le bateau se trouvant à tribord de chaque rangée doit porter un feu de côté vert à tribord, et le bateau se trouvant à bâbord de chaque rangée doit porter un feu de côté rouge à bâbord; cependant que chacun des bateaux se trouvant aux extrémités de la dernière rangée doit, en outre, porter à l'arrière un petit feu blanc brillant.

When *two canal boats are towed alongside of a steamer*, one on the starboard and one on the port side, the starboard boat shall carry a green light on the starboard side and the port boat shall carry a red light on the port side.

The *coloured side-lights* referred to in these rules for canal boat in tow of steam vessels shall be fitted with inboard screens, so as to prevent them from being seen across the bow, and of such a character as to be visible on a dark night, with a clear atmosphere, at a distance of at least 2 miles, and so constructed as to show a uniform and unbroken light over an arc of the horizon of 10 points of the compass, and so fixed as to throw the light from right ahead to 2 points abaft the beam on either side. The minimum size of glass globes shall not be less than 6 inches in diameter and 5 inches high in the clear.

The *small bright white light aft* required to be carried on canal boats in tow shall not be visible forward of the beam.

### Lights for water craft propelled by hand power, horse-power, or by the current of the river.

RULE 13. *Any vessel propelled by hand power, horse-power, or by the current of the river*, navigating any bay, harbour, or river, or which shall be anchored or moored in or near the channel or fairway of any bay, harbour, or river, except rafts and rowing boats under oars, shall carry one white light forward not less than 8 feet above the surface of the water, which light shall be carried, from sunset to sunrise, in a lantern so fixed and constructed as to show a clear, uniform, and unbroken light, visible all around the horizon, and of such intensity as to be visible on a dark night with a clear atmosphere at a distance of at least 1 mile.

*Rowing boats* under oars shall have ready at hand a lantern showing a white light which shall be temporarily exhibited in sufficient time to prevent collision.

### Lights for rafts.

RULE 14. Rafts propelled by hand power, horse-power, or by the current of the river, or in tow, or which shall be anchored or moored in or near a channel or fairway of other vessels, shall carry lights as follows:—

Rafts of one crib and not more than two in length shall carry one white light. Rafts of three or more cribs in length and one crib in width shall carry one white light at end of the raft. Rafts of more than one crib abreast shall carry one white light on each outside corner of the raft, making four lights in all.

Bag or boom rafts navigating or anchored in the fairway of any bay, harbour, or river shall carry a bright white light at each end of the raft, and one of such lights on each side midway between the forward and after ends.

The *white light* required by these rules for rafts shall be carried, from sunset to sunrise, in a lantern so fixed and constructed as to show a clear, uniform, and unbroken

## SESSIONAL PAPER No. 22

Lorsqu'un bateau naviguant sur les canaux est *remorqué le long du bord* d'un vapeur du côté de tribord, ce bateau remorqué doit porter un feu de côté vert à tribord. Quand le bateau remorqué le long du bord d'un vapeur se trouve du côté de bâbord de ce vapeur, ce bateau remorqué doit porter un feu de côté rouge à bâbord.

Lorsque deux bateaux naviguant sur les canaux sont *remorqués le long des bords* d'un vapeur, l'un du côté de tribord et l'autre du côté de bâbord, le bateau à tribord doit porter un feu de côté vert à tribord et le bateau à bâbord un feu de côté rouge à bâbord.

*Les feux de côté de couleur*, dont il est question dans ce règlement, lorsqu'il s'agit de bateaux naviguant sur des canaux, mais qui sont remorqués par des vapeurs, doivent être pourvus de boîtes ouvertes ou écrans construits de telle sorte que le feu vert ne puisse être aperçu de bâbord avant, et le feu rouge de tribord avant. Ces feux de côté doivent être établis de manière à projeter une lumière ininterrompue sur tout le parcours d'un arc de l'horizon de 10 quarts ou rumb du compas, c'est-à-dire, depuis l'avant jusqu'à deux quarts sur l'arrière du travers de chaque bord. Ils doivent, en outre, être visibles à une distance d'au moins deux milles, par nuit noire et ciel clair. Les globes des fanaux contenant ces feux ne doivent pas avoir moins de 6 pouces de diamètre et être découverts sur une hauteur d'au moins 5 pouces.

Quant au *petit feu blanc brillant* de l'arrière que doivent porter les bateaux naviguant sur les canaux, lorsqu'ils sont remorqués, il ne doit pas être aperçu en avant du maître-bau.

### **Feux que doivent porter les bâtiments dont la progression est due à la force humaine, à celle de chevaux ou au courant d'un cours d'eau.**

ARTICLE 13. *Tout navire dont la progression est due à la force humaine, à celle de chevaux ou au courant d'un cours d'eau*, qui navigue dans une baie, dans un port ou sur un cours d'eau, ou qui est mouillé ou amarré dans ou près d'un chenal ou passe d'une baie, d'un port ou d'un cours d'eau, exception étant faite quant aux trains de bois flotté et aux embarcations marchant à l'aviron, doit montrer à l'avant, depuis le coucher du soleil jusqu'au moment où il se lève, un feu blanc brillant, porté dans un fanal établi à une distance d'au moins 8 pieds au-dessus de la surface de l'eau, de manière à projeter tout autour de l'horizon une lumière claire à une distance d'au moins 1 mille, par nuit noire et ciel clair.

*Les embarcations marchant à l'aviron* doivent toujours avoir prêt un fanal garni, pour feu blanc, qui, au besoin, doit être montré assez à temps pour prévenir tout abordage.

### **Feux que doivent porter les trains de bois flotté.**

ARTICLE 14. Les trains de bois flotté dont la progression est due à la force humaine, à celle de chevaux ou au courant d'un cours d'eau, ou qui sont remorqués, ou mouillés, ou amarrés dans ou près d'une passe ou chenal fréquenté par des navires, doivent porter les feux suivants:—

Les trains de bois flotté longs d'une part (crib) ou de deux parts au plus, doivent porter un feu blanc. Les trains de bois flotté longs de trois parts ou plus et de la largeur d'une part doivent porter un feu blanc à chacune des extrémités du train. Quant aux trains de bois flotté ayant une largeur supérieure à celle d'une part, dans le sens de leur progression, ils doivent porter un feu blanc à chacun de leurs angles extérieurs, c'est-à-dire, quatre feux en tout.

Les trains de bois flotté contenus dans une panne (boom) et qui se déplacent ou sont mouillés dans la passe d'une baie, dans un port, ou sur une rivière, doivent porter un feu blanc brillant à chacune de leurs extrémités, et un feu semblable sur chacun de leurs côtés, à mi-distance entre la tête et la queue de chaque train.

Tout *feu blanc*, dont cet article du règlement exige la présence sur les trains de bois flotté, depuis le coucher du soleil jusqu'au moment où il se lève, doit être émis par

light, visible all around the horizon, and of such intensity as to be visible on a dark night with a clear atmosphere at a distance of at least 1 mile; which lights shall be suspended from poles of such height that the light shall be not less than 8 feet above the surface of the water.

#### Lights and day marks for vessels not under command.

RULE 15. A vessel which from any accident is not under command shall carry at the same height as the white light mentioned in rule 2' (a), where they can best be seen, and, if a steam vessel, in lieu of that light, 2 red lights, in a vertical line, one over the other, not less than 6 feet apart, and of such a character as to be visible all around the horizon at a distance of at least 2 miles; and shall by day carry in a vertical line one over the other not less than 6 feet apart, where they can best be seen, 2 black balls or shapes each 2 feet in diameter.

#### Rules prohibiting the carrying of unauthorized lights on steam vessels.

RULE 16. No master or pilot of any steam vessel shall authorize or permit to be carried, any light, electric, or otherwise, not required by these rules, on the outside structure of the cabin or hull of the vessel that in any way will interfere with distinguishing the signal lights.

#### Rule relating to the use of Searchlights.

RULE 17. No master or pilot of any steam vessel shall flash or cause to be flashed the rays of the searchlight into the pilot house of any passing vessel.

#### FOG SIGNALS.

RULE 18. A steam vessel shall be provided with an efficient whistle, sounded by steam or by some substitute for steam, placed before the funnel not less than 8 feet from the deck, or in such other place where the sound will not be intercepted by an obstruction and of such character as to be heard in ordinary weather at a distance of at least 2 miles, and with an efficient bell, and, it is hereby made the duty of inspectors of steam vessels when inspecting the same to see that each steamer is furnished with such whistle and bell. A sailing vessel shall be provided with an efficient fog-horn and with an efficient bell.

Whenever there is thick weather by reason of fog, mist, falling snow, heavy rain-storms, or other causes, whether by day or by night, fog signals shall be used as follows:—

(a) A steam vessel under way, excepting only a steam vessel with raft in tow, shall sound at intervals of not more than one minute three distinct blasts of her whistle.

(b) Every vessel in tow of another vessel shall, at intervals of one minute, sound four bells on a good and efficient and properly placed bell as follows: By striking the bell twice in quick succession, followed by a little longer interval, and then again striking twice in quick succession (in the manner in which four bells is struck in indicating time).

(c) A steamer with a raft in tow shall sound at intervals of not more than one minute a screeching or Modoc whistle for from three to five seconds.

## SESSIONAL PAPER No. 22

un fanal suspendu à une perche, de telle manière que le feu se trouve à une distance d'au moins 8 pieds au-dessus de l'eau, le fanal devant être établi de manière à projeter tout autour de l'horizon une lumière claire et ininterrompue, à une distance d'au moins 1 mille, par nuit noire et ciel clair.

**Feux et voyants pour navires ne gouvernant pas.**

ARTICLE 15. Tout navire qui par suite d'un accident ne gouverne pas, doit porter à la même hauteur que le feu blanc mentionné à l'article 2 (a) à l'endroit le plus apparent et si c'est un navire à vapeur au lieu dudit feu, deux feux rouges verticaux disposés l'un au-dessus de l'autre à une distance d'au moins 6 pieds, de manière à projeter une lumière visible tout autour de l'horizon à une distance d'au moins deux milles; et durant le jour il doit porter deux formes ou ballons noirs verticaux, de 2 pieds de diamètre chacun, à l'endroit le plus apparent et à une distance d'au moins 6 pieds l'un au-dessus de l'autre.

**Il est défendu de porter sur les navires à vapeur des feux non autorisés.**

ARTICLE 16. Nul capitaine ou pilote d'un navire à vapeur ne doit autoriser ou permettre de porter à l'extérieur des cabines ou de la coque de son bâtiment, un feu électrique ou autre non autorisé par ce règlement, et qui pourrait de quelque façon empêcher de bien reconnaître les feux de signaux du bord.

**Article concernant l'emploi des projecteurs.**

ARTICLE 17. Nul capitaine ou pilote d'un navire à vapeur ne doit projeter ou faire projeter les rayons d'un projecteur lumineux sur le kiosque du pilote d'un navire qu'il rencontre.

**SIGNAUX DE BRUME.**

ARTICLE 18. Tout navire à vapeur doit être pourvu d'un bon sifflet à vapeur, ou d'un bon dispositif analogue, établi en avant de la cheminée à une distance d'au moins huit pieds au dessus du pont, ou à tel autre endroit du bâtiment où les ondes sonores émises ne soient pas interceptées par des obstacles; la construction de ce sifflet doit être telle que par temps ordinaire le son qu'il émet puisse être entendu à une distance d'au moins deux milles. Tout vapeur doit, en outre, être pourvu d'une bonne cloche. Par les présentes il est enjoint aux inspecteurs des bateaux à vapeur de se rendre compte, au cours de leurs inspections, de la présence à bord de tout navire: du sifflet et de la cloche susmentionnés. Tout voilier doit être pourvu d'un bon cornet à bouquin et d'une bonne cloche.

Lorsque de jour ou de nuit le temps est gros, par suite de brume, de brouillard, de neige, de forte pluie, ou de toute autre cause, on doit faire les signaux suivants:—

(a) Tout navire à vapeur faisant route, doit, sauf s'il remorque un train de bois flotté, donner à intervalles ne dépassant pas une minute, trois sons distincts de son sifflet.

(b) Tout navire remorqué par un bâtiment doit, à intervalles d'une minute, piquer quatre coups de cloche sur une bonne cloche convenablement placée, et ce de la manière suivante: frapper deux coups brefs successifs, suivis d'un intervalle de temps un peu plus long, puis deux autres coups brefs successifs (ainsi qu'on le fait pour piquer les quatre coups de cloche de l'heure à bord).

(c) Tout vapeur qui remorque un train de bois flotté doit, à intervalles ne dépassant pas une minute, donner un coup de sifflet perçant—sifflet Modoc,—long de trois à cinq secondes.

(d) A sailing vessel under way and not in tow shall sound at intervals of not more than one minute—

If on the starboard tack with wind forward of a beam, one blast of her fog-horn;  
 If on the port tack with wind forward of the beam, two blasts of her fog-horn;  
 If she has the wind abaft the beam on either side, three blasts of her fog-horn.

(e) Any vessel at anchor and any vessel aground in or near a channel or fairway shall at intervals of not more than two minutes ring the bell rapidly for three to five seconds.

(f) Vessels of less than ten tons registered tonnage, not being steam vessels, shall not be obliged to give the above-mentioned signals, but if they do not they shall sound a fog-horn, or equivalent signal, at intervals of not more than one minute.

(g) Produce boats, fishing boats, rafts, or other water craft navigating by hand power or by the current of the river, or anchored or moored in or near the channel or fairway and not in any port, and not otherwise provided for in these rules, shall sound a fog-horn, or equivalent signal, at intervals of not more than one minute.

Speed to be moderate in fog, and so forth.

RULE 19. Every vessel shall, in thick weather, by reason of fog, falling snow, heavy rainstorms, or other causes, go at *moderate speed*. A steam vessel hearing, apparently not more than four points from right ahead, the fog-signal of another vessel shall at once reduce her speed to bare steerageway, and navigate with caution until the vessels shall have passed each other.

## STEERING AND SAILING RULES.

### Preliminary.

*Risk of collision* can, when circumstances permit, be ascertained by carefully watching the compass bearing of an approaching vessel, if the bearing does not appreciably change, such risk should be deemed to exist.

### Sailing vessels.

RULE 20. When two sailing vessels are approaching one another so as to involve risk of collision one of them shall keep out of the way of the other, as follows, namely:—

(a) A vessel which is running free shall keep out of the way of a vessel which is closehauled.

(b) A vessel which is closehauled on the port tack shall keep out of the way of a vessel which is closehauled on the starboard tack.

(c) When both are running free, with the wind on different sides, the vessel which has the wind on the port side shall keep out of the way of the other.

(d) When they are running free, with the wind on the same side, the vessel which is to windward shall keep out of the way of the vessel which is to leeward.

## SESSIONAL PAPER No. 22

(d) Tout voilier faisant route, sans être remorqué, doit, à intervalle ne dépassant pas une minute: (s'il a ses amures à tribord et le vent sur l'avant du travers, donner un son de son cornet à bouquin). (S'il a ses amures à bâbord et le vent sur l'avant du travers, donner deux sons de son cornet à bouquin.) (S'il a le vent sur l'arrière du travers de l'un ou de l'autre bord, donner trois sons de son cornet à bouquin.)

(e) Tout navire au mouillage ou échoué dans ou près d'un chenal ou d'une passe doit à intervalles ne dépassant pas deux minutes, frapper des coups de cloche rapides pendant un laps de temps variant de trois à cinq secondes.

(f) Les navires, non à vapeur, qui jaugent moins de dix tonneaux nets, ne sont pas tenus de faire les signaux susmentionnés, toutefois s'ils ne font pas ces signaux ils doivent faire un signal phonique quelconque à même d'être entendu, et qui soit répété à des intervalles de silence ne dépassant pas une minute.

(g) Les bateaux transportant des denrées, les bateaux de pêche, les trains de bois flotté et autres bâtiments, dont la progression est due à la force humaine ou au courant d'un cours d'eau, ou ceux qui sont mouillés ou amarrés dans ou près d'un chenal ou passe ne se trouvant pas dans un port, et pour lesquels aucun signal n'aurait été spécialement déterminé dans ce règlement, doivent donner des sons à l'aide d'un cornet à bouquin ou autre instrument analogue, à des intervalles de silence ne dépassant pas une minute.

### Diminution de vitesse par temps brumeux, etc.

ARTICLE 19. Tout navire doit marcher à une *vitesse modérée*, lorsque le temps est gras (*thick weather*), c'est-à-dire lorsque l'horizon n'est pas entièrement visible, par suite de brume, de brouillard, de neige, d'une forte pluie ou de toute autre cause. Tout vapeur qui entend le signal phonique de brume d'un autre navire, provenant apparemment des quatre quarts d'un bord ou de l'autre de son avant (avant du navire entendant le son), doit immédiatement modérer sa vitesse, n'en conservant que juste assez pour obéir à l'action du gouvernail, et naviguer avec précaution jusqu'à ce que les deux bâtiments se soient dépassés.

## RÈGLES DE NAVIGATION.

### Notions préliminaires.

*Risques d'abordage.*—On peut s'assurer des risques d'abordage, lorsque les circonstances le permettent, en guettant soigneusement l'orientation d'un navire qui approche. Si cette orientation ne change pas sensiblement, ces risques sont censés exister.

### Navires à voiles.

ARTICLE 20. Lorsque deux navires à voiles s'approchent l'un de l'autre de manière qu'il y ait risque d'abordage, l'un d'eux doit s'écarter de la route de l'autre, comme suit, savoir:—

(a) Tout navire qui a du largue doit s'écarter de la route d'un navire qui est au plus près.

(b) Tout navire qui est au plus près et a les amures à bâbord, doit s'écarter de la route d'un navire qui est aussi au plus près mais qui a les amures à tribord.

(c) Lorsque deux navires à voiles ont du largue et reçoivent le vent sur des côtés différents, celui qui reçoit le vent à bâbord doit s'écarter de la route de celui qui le reçoit à tribord.

(d) Lorsque deux navires à voiles ont du largue et reçoivent le vent du même côté, celui qui est au vent doit s'écarter de la route de celui qui est sous le vent.

## Steam vessels.

### SIGNALS.

RULE 21. In all weathers every steam vessel under way in taking any course authorized or required by these rules, shall indicate that course by the following SIGNALS on her whistle, to be accompanied, whenever required, by corresponding alteration of her helm, and every steam vessel receiving a signal from another shall promptly respond with the same signal or sound the danger signal as provided in Rule 22:—

*One blast* means: "I am directing my course to starboard," except when two steamers are approaching each other at right angles or obliquely, other than when one steamer is overtaking another, one short blast signifies intention of steamer which is to starboard of the other to hold course and speed.

*Two blasts* mean: "I am directing my course to port."

RULE 22. If, when steamers are approaching each other, the pilot of either vessel fails to understand the course or intention of the other, whether from signals being given or answered erroneously, or from other causes, the pilot so in doubt shall immediately signify the same by giving the DANGER SIGNAL of five or more short and rapid blasts of the whistle; and if both vessels shall have approached within half a mile of each other, both shall be immediately slowed to a speed barely sufficient for steerage-way, and, if necessary, stopped and reversed, until the proper signals are given, answered, and understood, or until the vessels shall have passed each other.

RULE 23. Steam vessels are forbidden to use what has become technically known among pilots as "CROSS SIGNALS"—that is, answering one whistle with two, and answering two whistles with one. In all cases, and under all circumstances, a pilot receiving either of the whistle signals provided in the rules, which for any reason he deems injudicious to comply with, instead of answering it with a cross signal, shall at once sound the danger signal and observe the rule applying thereto (Rule 22).

RULE 24. The SIGNAL FOR PASSING, by the blowing of the whistle, shall be given and answered by pilots in compliance with these rules, not only when meeting "head and head," or nearly so, but at all times when passing or meeting at a distance within a half mile of each other, and whether passing to the starboard or port.

### Situation.

RULE 25. When steamers are APPROACHING EACH OTHER "HEAD AND HEAD," OR NEARLY so, it shall be the duty of each steamer to pass on the port side of the other; and the pilot of either steamer may be first in determining to pursue this course, and thereupon shall give, as a signal of his intention, one short and distinct blast of his whistle, which the pilot of the other steamer shall answer promptly by a similar blast of his whistle, and thereupon such steamers shall pass on the port side of each other. But if the courses of such steamers are so far on the starboard of each other as not to be considered by pilots as meeting "head and head," or nearly so, the pilot so first deciding shall immediately give two short and distinct blasts of his whistle, which the pilot of

SESSIONAL PAPER No. 22

## Navires à vapeur.

## SIGNAUX.

ARTICLE 21. Par tous les temps tout vapeur faisant route doit, en prenant une route autorisée ou exigée par ce règlement, indiquer cette route à l'aide des *signaux* suivants, faits à l'aide de sons de son sifflet, signaux qui selon les besoins du moment doivent être immédiatement suivis de la manœuvre correspondante de la barre. Tout vapeur qui perçoit le signal phonique d'un autre navire doit y répondre par le même signal, ou donner les sons du signal du danger, tels que mentionnés à l'article 22 de ce règlement.

Un coup de sifflet signifie: "Je me dirige sur tribord", excepté s'il s'agit de deux vapeurs qui s'approchent l'un de l'autre à angle droit ou obliquement, mais non de deux vapeurs dont l'un atteindrait l'autre. Un coup de sifflet bref signifie que le vapeur qui se trouve à tribord de l'autre entend poursuivre sa route sans ralentir sa marche.

Deux coups de sifflet signifient: "Je me dirige sur bâbord."

ARTICLE 22. Si lorsque deux vapeurs s'approchent l'un de l'autre, l'homme de barre de l'un d'eux manque de comprendre la route que l'autre navire suit, ou a l'intention de suivre, soit que les signaux aient été mal faits ou mal compris, ou pour tout autre raison, l'homme de barre qui est dans le doute doit immédiatement faire part de son doute en faisant le signal *du danger*, c'est-à-dire, en donnant cinq coups de sifflet brefs, ou plus: que, si les deux navires se sont approchés l'un de l'autre à une distance d'un demi-mille, tous deux doivent alors ralentir leur marche de manière à pouvoir tout juste gouverner, et, si nécessaire, ils doivent stopper et renverser leur marche jusqu'à ce que les signaux convenables aient été faits, qu'il y ait été répondu, et qu'on les ait compris, ou jusqu'à ce que les navires se soient dépassés réciproquement.

ARTICLE 23. Il est défendu aux navires à vapeur de faire ce qu'on est convenu de nommer en termes techniques, parmi les navigateurs, des *signaux contraires* "*cross-signals*," c'est-à-dire, répondre à un coup de sifflet par deux coups de sifflet, et à deux coups de sifflet par un coup de sifflet. Dans tous les cas et en toutes circonstances où un homme de barre entend un des coups de sifflet mentionnés dans ce règlement, et dont pour une raison quelconque il juge à propos de ne pas tenir compte, il doit au lieu de répondre par un signal contraire faire immédiatement le signal du danger et observer les dispositions prescrites ci-dessus (article 22).

ARTICLE 24. Les signaux phoniques au sifflet que doit faire un navire voulant en dépasser un autre, doivent être faits par les hommes de barre en conformité de ce règlement, et on doit y répondre aussi en conformité de ce règlement, non seulement lorsque deux navires se rencontrent faisant route "l'un sur l'autre" ou presque, mais en tout temps lorsque deux bâtiments se dépassent ou se rencontrent à un demi-mille l'un de l'autre, et ceci soit qu'un navire passe à tribord ou à bâbord de l'autre.

## Position des bâtiments.

ARTICLE 25. Lorsque deux vapeurs *marchent "l'un sur l'autre"*, ou presque, chacun d'eux doit passer à bâbord de l'autre, et l'homme de barre de l'un ou de l'autre de ces bâtiments peut être le premier à se décider à manœuvrer de la sorte, en conséquence de quoi il doit faire le signal notifiant son intention, c'est-à-dire, donner un son bref et distinct de son sifflet à vapeur, auquel l'homme de barre de l'autre vapeur doit répondre promptement par un pareil coup de sifflet, et les deux vapeurs doivent alors passer à bâbord l'un de l'autre; que si les routes suivies par les deux vapeurs se trouvent tellement à tribord l'une de l'autre que les hommes de barre soient d'avis que les deux navires ne marchent pas "*l'un sur l'autre*", ou presque, l'homme de barre qui **le premier en arrive à cette conclusion** doit donner immédiatement deux sons nets de son sifflet, auxquels l'homme de barre de l'autre navire doit répondre promptement par

11 GEORGE V, A. 1921

the other steamer shall answer promptly by two similar blasts of his whistle, and they shall pass on the starboard side of each other: *Provided, however,* That in all NARROW CHANNELS where there is a current, and in the rivers Saint Mary, Saint Clair, Detroit, Niagara, and Saint Lawrence, when two steamers are meeting, the descending steamer shall have the right of way, and shall, before the vessels shall have arrived within the distance of one-half mile of each other, give the signal necessary to indicate which side she elects to take.

In the night, steamers will be considered as meeting "head and head" so long as both the coloured lights of each are in view of the other.

RULE 26. Whenever a steamer is NEARING A SHORT BEND OR CURVE in the channel, where, from the height of the banks or other cause, a steamer approaching from the opposite direction can not be seen for a distance of half a mile, the pilot of such steamer, when he shall have arrived within half a mile of such curve or bend, shall give a signal by one long blast of the whistle, which signal shall be answered by a similar blast given by the pilot of any steamer within hearing that may be approaching on the other side, and within half a mile of such bend or curve. Should such a signal be so answered by a steamer upon the farther side of such bend, then the usual signals for meeting and passing shall immediately be given and answered; but, if the first signal of such pilot be not answered, he is to consider the channel clear and govern himself accordingly.

RULE 27. When a STEAMER IS MOVED FROM ITS DOCK OR BERTH, and other steamers are liable to approach such steamer from any direction, such steamer and any approaching steamer shall give the same signals as in case of steamers meeting at a bend; but immediately after clearing the dock or berth so as to be fully in sight they shall be governed by the rules for passing.

RULE 28. When one STEAMER IS OVERTAKING ANOTHER, and the pilot of a steamer which is astern shall desire to pass on the right or starboard hand of the steamer ahead, he shall give one short blast of the whistle, as a signal of such desire and intention, and shall put his helm to port; or if he shall desire to pass on the left or port side of the steamer ahead, he shall give two short blasts of the whistle as a signal of such desire and intention, and shall put his helm to starboard, and the pilot of the steamer ahead shall answer by the same signals; or if he does not think it safe for the steamer astern to attempt to pass at that point, he shall immediately signify the same by giving five or more short and rapid blasts of the whistle, and under no circumstances shall the steamer astern attempt to pass the steamer ahead until such time as they have reached a point where it can be safely done, when said steamer ahead shall signify her willingness by blowing the proper signals. The boat ahead shall in no case attempt to cross the bow or crowd upon the course of the passing steamer.

Every vessel coming up with another vessel from any direction more than two points abaft her beam—that is, in such a position, with reference to the vessel which she is overtaking, that at night she would be unable to see either of that vessel's side lights—shall be deemed to be *an overtaking vessel*; and no subsequent alteration of the bearing between the two vessels shall make the overtaking vessel a crossing vessel

## SESSIONAL PAPER No. 22

deux coups de sifflet pareils, et les deux navires doivent alors passer à tribord l'un de l'autre. Il est *toutefois stipulé* que dans tous les *chenaux étroits* où il existe un courant, et sur les rivières Sainte-Marie, Saint-Clair, Détroit, Niagara, et le fleuve Saint-Laurent, lorsque deux vapeurs se rencontrent le vapeur qui descend le cours d'eau a le droit de passage et doit, avant que les deux navires ne se trouvent à une distance d'un demi-mille l'un de l'autre, faire le signal de rigueur pour indiquer de quel côté de l'autre navire il a l'intention de passer. La nuit on doit admettre que deux vapeurs "*marchent l'un sur l'autre*", tant que les deux feux de couleur de l'un sont aperçus de l'autre.

ARTICLE 26. Quand un vapeur suit un chenal et s'approche d'un coude accentué ou courbe de la voie d'eau, dont la nature élevée de la rive, ou tout autre cause, empêche ledit navire puisse apercevoir un vapeur venant vers lui en sens opposé à une distance d'un demi-mille, l'homme de barre ainsi tenu dans l'ignorance de ce qui se passe au delà de la courbe, doit lorsque son navire arrive à un demi mille d'une telle courbe, donner un son long de son sifflet, signal auquel doit répondre par un signal pareil l'homme de barre de tout vapeur qui l'aurait entendu et marcherait à un demi-mille dudit coude ou courbe dans le sens opposé du bâtiment ayant fait le premier signal. Quand la réponse du long coup de sifflet est convenablement donnée par le navire dont on supposait la présence derrière l'obstacle, les deux navires s'approchant l'un de l'autre doivent faire immédiatement les signaux d'appel et de réponse que se font habituellement les vapeurs qui se rencontrent. Si l'homme de barre qui a fait le premier signal à l'approche d'une courbe ne reçoit pas de réponse, il est en droit de supposer que le chenal est libre et de gouverner en conséquence.

ARTICLE 27. Quand un vapeur se déplace en quittant son bassin ou son poste d'amarrage et que d'autres vapeurs peuvent avoir à s'en approcher en venant d'une direction quelconque, le vapeur qui se déplace et tout vapeur s'en approchant doivent faire les signaux que font les vapeurs qui se rencontrent sur le coude d'une voie d'eau; mais dès que le vapeur quittant son bassin ou son poste d'amarrage se trouve en pleine vue, on doit faire les signaux que le règlement exige des bâtiments qui se rencontrent normalement.

ARTICLE 28. Quand deux vapeurs étant en marche l'un d'eux atteint l'autre et que l'homme de barre du vapeur se trouvant en arrière désire passer à droite, c'est-à-dire, à tribord du vapeur se trouvant en avant, il doit donner un son bref de son sifflet, afin de signaler son désir et son intention; il doit mettre sa barre à bâbord; et s'il désire passer à gauche, c'est-à-dire à bâbord du vapeur en avant de lui, il doit donner deux sons brefs de son sifflet, afin de signaler son désir et son intention et il doit mettre la barre à tribord, cependant que l'homme de barre du vapeur se trouvant en avant doit répondre en faisant le même signal, que, si ce dernier homme de barre est d'avis qu'il n'est pas prudent que le vapeur le suivant essaye de le dépasser sur ce point de leur route, il doit immédiatement en faire part au bâtiment en arrière en donnant cinq sons brefs et rapides ou plus de son sifflet, le vapeur en arrière ne devant alors dans aucun cas essayer de dépasser le vapeur qui se trouve en avant de lui, et ce jusqu'au moment où les deux vapeurs ont atteint un point de leur route ou l'un peut dépasser l'autre sans danger, alors que le vapeur se trouvant en avant signifiera à l'autre qu'il consent à être dépassé en faisant les signaux convenables. Dans aucune cas le navire en avant ne doit essayer de couper la route de celui qui le suit ou le gêner en trop se portant de son côté.

Tout navire qui en atteint un autre sous une direction de plus de deux quarts sur l'arrière de son travers, c'est-à-dire, qui se trouve dans une position telle, relativement au navire atteint, que pendant la nuit il ne pourrait apercevoir ses feux de côté, est censé être une navire qui *en atteint un autre*; quelque soit le changement subséquent de la route des deux navires celui qui atteint l'autre ne peut, d'après ce règlement, prétendre avoir le droit de couper la route du navire se trouvant en avant, ou être exempté du devoir de parer le navire atteint, jusqu'à ce que celui-ci soit passé et hors de danger.

11 GEORGE V, A. 1921

within the meaning of these rules, or relieve her of her duty of keeping clear of the overtaken vessel until she is finally passed and clear.

As by day the overtaking vessel can not always know with certainty whether she is forward of or abaft this direction from the other vessel she should, if in doubt, assume that she is an overtaking vessel and keep out of the way.

**RULE 29.** IN ALL CHANNELS LESS THAN FIVE HUNDRED FEET IN WIDTH, no steam vessel shall pass another going in the same direction unless the steam vessel ahead be disabled or signify her willingness that the steam vessel astern shall pass, when the steam vessel astern may pass, subject, however, to the other rules applicable to such a situation. And when steam vessels proceeding in opposite directions are about to meet in such channels, both such vessels shall be slowed down to a moderate speed, according to the circumstances.

**RULE 30.** When two steamers are APPROACHING EACH OTHER AT RIGHT ANGLES OR OBLIQUELY SO AS TO INVOLVE RISK OF COLLISION, other than when one steamer is overtaking another the steamer which has the other on her own port side shall hold her course and speed; and the steamer which has the other on her own starboard side shall keep out of the way of the other by directing her course to starboard so as to cross the stern of the other steamer, or, if necessary to do so, slacken her speed or stop or reverse. The steamer having the other on her own port bow shall blow one blast of her whistle as a signal of her intention to cross the bow of the other, holding her course and speed, which signal shall be promptly answered by the other steamer by one short blast of her whistle as a signal of her intention to direct her course to starboard so as to cross the stern of the other steamer or otherwise keep clear.

If from any cause whatever the conditions covered by this situation are such as to prevent immediate compliance with each other's signals, the misunderstanding or objection shall be at once made apparent by blowing the danger signal, and both steamers shall be stopped, and backed if necessary, until signals for passing with safety are made and understood.

**RULE 31.** When two steam vessels are meeting end on, or nearly end on, so as to involve risk each shall alter her course to starboard, so that each shall pass on the port side of the other.

**RULE 32.** When two steam vessels are crossing so as to involve risk of collision the vessel which has the other on her own starboard side shall keep out of the way of the other.

**RULE 33.** When a STEAM VESSEL AND A SAILING VESSEL are proceeding in such directions as to involve risk of collision the steam vessel shall keep out of the way of the sailing vessel.

**RULE 34.** Where, by any of the rules herein prescribed, one of two vessels shall keep out of the way, the other shall keep her course and speed.

**RULE 35.** Every steam vessel which is directed by these rules to keep out of the way of another vessel shall, on approaching her, if necessary, slacken her speed or stop or reverse.

**RULE 36.** Notwithstanding anything contained in these rules every vessel overtaking any other shall keep out of the way of the overtaken vessel.

**RULE 37.** In obeying and construing these rules due regard shall be had to all DANGERS OF NAVIGATION AND COLLISION and to any SPECIAL CIRCUMSTANCES which may render a departure from the above rules necessary in order to avoid immediate danger.

## SESSIONAL PAPER No. 22

Or, comme pendant le jour le navire qui en atteint un autre ne peut pas toujours savoir avec certitude s'il a dépassé ou non la direction mentionnée ci-dessus par rapport à l'autre navire, il doit dans le doute, présumer qu'il se trouve être positivement un navire qui en atteint un autre et parer la route de ce dernier.

ARTICLE 29. Dans tous les chenaux ayant moins de cinq cents pieds de largeur aucun navire à vapeur n'est autorisé à en dépasser un autre marchant dans la même direction, à moins que le vapeur se trouvant en avant ne soit désemparé ou n'ait signifié qu'il consent à ce que le navire à vapeur se trouvant derrière lui le dépasse, auquel cas ce dernier peut le dépasser pourvu, néanmoins, qu'il observe les dispositions du règlement auxquelles il est sujet dans ce cas. Lorsque deux navires à vapeur font route en sens opposé et sont sur le point de se rencontrer sur un chenal ayant moins de cinq cents pieds de largeur, ces deux navires doivent ralentir leur marche et marcher à une vitesse modérée, en tenant compte des circonstances.

ARTICLE 30. Lorsque deux navires à vapeur s'approchent l'un de l'autre à angle droit ou obliquement, au risque d'un abordage, de nature différente de celui pouvant se produire dans le cas d'un vapeur qui en atteint un autre, le vapeur qui a l'autre vapeur à bâbord ne doit ni modifier sa route ni ralentir sa marche, et le vapeur qui a l'autre vapeur à tribord doit se déranger pour ce dernier, et gouverner sur tribord de manière à couper la route de l'autre vapeur à l'arrière de celui-ci, ou, si nécessaire, ralentir sa marche, ou stopper ou renverser sa marche. Le vapeur qui a l'autre par le bossoir de bâbord doit donner un son de son sifflet, pour signaler qu'il a l'intention de couper sa route en passant devant lui, et le vapeur qui fait ce signal doit poursuivre sa route et ne pas ralentir sa marche. À ce signal l'autre vapeur doit répondre promptement par un son bref de son sifflet, pour signaler qu'il a l'intention de gouverner sur tribord de manière à couper la route de l'autre vapeur en passant en arrière de lui ou qu'il entend éviter tout danger d'abordage.

Si pour une raison quelconque l'état de choses considéré dans cet article est tel qu'il empêche d'obéir immédiatement aux manœuvres imposées par les signaux échangés entre les deux vapeurs, la méprise ou l'objection se présentant doivent être notifiées en faisant donner au sifflet le son propre au signal du danger, et les deux vapeurs doivent stopper et faire machine en arrière, si c'est nécessaire, jusqu'à ce que les signaux devant permettre de passer en toute sécurité soient compris.

ARTICLE 31. Lorsque deux navires sous vapeur courent l'un sur l'autre ou à peu près, et qu'il y a risque d'abordage, tous deux doivent venir sur tribord pour passer à bâbord l'un de l'autre.

ARTICLE 32.— Si deux navires sous vapeur font des routes qui se croisent et les exposent à s'aborder, celui qui voit l'autre par tribord doit manœuvrer de manière à ne pas gêner la route de ce dernier.

ARTICLE 33. Si deux navires, l'un à voiles, l'autre sous vapeur, font des routes qui les exposent à s'aborder, le navire sous vapeur doit manœuvrer de manière à ne pas gêner la route du navire à voiles.

ARTICLE 34. Lorsque, d'après les articles de ce règlement, un navire doit s'écarter de la route d'un autre navire, celui-ci doit poursuivre sa route sans ralentir sa marche.

ARTICLE 35. Tout navire qui d'après les articles de ce règlement doit se déranger pour un autre navire, doit en l'approchant, si nécessaire, ralentir sa marche, ou stopper ou faire machine en arrière.

ARTICLE 36. Nonobstant tout ce qui est contenu au présent règlement, tout navire qui en atteint un autre, doit se déranger pour le navire qu'il atteint.

ARTICLE 37. En se conformant aux articles de ce règlement et en les interprétant il faut tenir compte des tous les dangers de la navigation, et avoir égard à toutes les circonstances particulières qui peuvent rendre nécessaire une dérogation aux dispositions de ce règlement afin de parer à un péril immédiat.

11 GEORGE V. A. 1921

RULE 38. Nothing in these rules shall exonerate any vessel, or the owner or master or crew thereof, from the consequences of any neglect to carry lights or signals, or of any neglect to keep a proper lookout, or of a neglect of any precaution which may be required by the ordinary practice of seamen, or by the special circumstances of the case.

### Diagrams.

The following diagrams are intended to illustrate the working of the system of coloured lights and pilot rules:—

#### *First Situation.*

Here the two coloured lights visible to each other will indicate their direct approach "head and head" toward each other. In this situation it is a standing rule that both shall put their helms to port and pass on the port side of each other, each having previously given one blast of the whistle.

#### *Second Situation.*

In this situation the red light only will be visible to each, the screens preventing the green lights from being seen. Both vessels are evidently passing to port of each other, which is rulable in this situation, each pilot having previously signified his intention by one blast of the whistle.

#### *Third Situation.*

In this situation the green light only will be visible to each, the screens preventing the red light from being seen. They are therefore passing to starboard of each other, which is rulable in this situation, each pilot having previously signified his intention by two blasts of the whistle.

SESSIONAL PAPER No. 22

ARTICLE 38. Rien dans les articles de ce règlement ne saurait affranchir un navire quel qu'il soit, son propriétaire, son capitaine ou son équipage, des conséquences d'une omission de porter des feux ou signaux, d'un défaut de surveillance convenable, ou, enfin, d'une négligence quelconque des précautions commandées par la pratique ordinaire de la navigation ou par les circonstances particulières de la situation.

**Diagrammes.**

Les diagrammes suivants ont pour but de permettre d'interpréter la signification des feux de couleur et les règles qui doivent guider les hommes de barre.

*Première position.*

Dans ce cas les deux feux de couleur visibles de chacun des navires, indiquent qu'ils "courent l'un sur l'autre" en droite ligne. Dans cette position il est de règle établie que chaque navire doit mettre sa barre à bâbord et passer à bâbord de l'autre bâtiment, chacun d'eux ayant au préalable donné un son de son sifflet.

*Deuxième position.*

Dans ce cas chacun des navires ne peut voir que le feu rouge de l'autre, les écrans empêchant de voir les feux verts. Chacun des navires passe évidemment à bâbord de l'autre, ce qui est de règle. Dans cette position, chaque homme de barre doit au préalable signifier son intention de ce faire en donnant un son de son sifflet.

*Troisième position.*

Dans ce cas chacun des navires ne peut voir que le feu vert de l'autre, les écrans empêchant de voir les feux rouges. Chacun des navires passe évidemment à tribord de l'autre, ce qui est de règle dans cette position, et chaque homme de barre doit au préalable signifier son intention de ce faire en donnant deux sons de son sifflet.

*Fourth Situation.*

In this situation one steamer is overtaking another steamer from some point within the angle of two points abaft the beams of the overtaken steamer. The overtaking steamer may pass on the starboard or port side of the steamer ahead after the necessary signals for passing have been given, with assent of the overtaken steamer, as prescribed in rule 28.

*Fifth Situation.*

In this situation two steamers are approaching each other at right angles or obliquely *in such manner as to involve risk of collision*, other than where one steamer is overtaking another.

The steamer which has the other on her own *port* side shall hold course and speed, and the other shall keep clear by crossing astern of the steamer that is holding course and speed, or, if necessary to do so, shall slacken her speed or stop or reverse.

Both steamers shall otherwise observe the provisions of rule 30 with respect to the signals for passing and the danger signal.

**Rules prohibiting unnecessary sounding of the steam whistle.**

**RULE 39.** No licensed officer in charge of any steamer shall authorize or permit unnecessary sounding of the steam whistle.

**Distress signals.**

**RULE 40.** When a vessel is in distress and requires assistance from other vessels or from the shore, the following shall be the signals to be used or displayed by her, either together or separately, viz.:—

In the daytime:—

1. A gun or other explosive signal fired at intervals of about a minute.
2. The International Code signal of distress indicated by N.C.
3. The distant signal, consisting of a square flag, having either above or below it a ball or anything resembling a ball.
4. A continuous sounding with any fog-signal apparatus.

*Quatrième position.*

Dans ce cas un des deux vapeurs atteint l'autre vapeur d'un point situé dans l'angle des 2 quarts sur l'arrière du travers de chaque bord du navire atteint. Le navire qui atteint l'autre peut passer à tribord ou à bâbord de celui-ci qui se trouve en avant de lui, mais il doit d'abord faire les signaux nécessaires pour le dépasser, et ce avec le consentement du navire qui est atteint, les signaux étant ceux prescrits à l'article 28.

*Cinquième position.*

Dans ce cas deux vapeurs s'approchent l'un de l'autre à angle droit ou obliquement de manière à encourir des risques d'abordage, autres que s'il s'agissait d'un vapeur en atteignant un autre.

Le vapeur qui a l'autre à *bâbord* doit poursuivre sa route sans ralentir sa marche et l'autre se déranger en coupant la route du premier en arrière de celui-ci, qui poursuit sa route sans ralentir sa marche, ou, si c'est nécessaire, le navire qui se déränge doit ralentir sa marche, stopper, ou faire machine en arrière.

Que s'il en était autrement, chacun des deux vapeurs doit observer les dispositions de l'article 30 ayant trait aux signaux à faire pour passer et à ceux pour éviter tout danger.

**Défense de donner des coups de sifflet inutiles.**

ARTICLE 39. Aucun officier breveté chargé d'un vapeur ne doit autoriser ou permettre de donner des coups de sifflet à vapeur inutiles.

**Signaux de détresse.**

ARTICLE 40. Lorsqu'un navire est en détresse et a besoin du secours d'autres navires, ou de la terre, les signaux suivants doivent être faits par ce navire, soit ensemble, soit séparément, savoir:—

Pendant le jour:—

1. Un coup de canon ou autre signal par explosion, tiré à des intervalles d'environ une minute;
2. Le signal de détresse indiqué par N.C. dans le Code International des signaux;
3. Le signal éloigné, fait à l'aide d'un pavillon carré ayant soit au-dessus soit au-dessous un ballon ou quelque chose ressemblant à un ballon;
4. Un son continu produit par un appareil de signal de brume.

At night—

1. A gun or other explosive fired at intervals of about a minute.
2. Flame from the vessel (as from burning a tar barrel, oil barrel, etc.).
3. Rockets, or shells, throwing stars of any colour or description, fired one at a time, at short intervals.
4. A continuous sounding with any fog-signal apparatus.

### Rules concerning motor boats.

#### PRELIMINARY.

In the following rules the words "motor boat" shall include every vessel propelled by machinery and not more than sixty-five feet in length except tug-boats and tow-boats propelled by steam. The length shall be measured from end to end over the deck excluding sheer.

RULE 41. That motor boats subject to the provision of these rules shall be divided into classes as follows:—

Class one. Less than twenty-six feet in length.

Class two. Twenty-six feet or over and less than forty feet in length.

Class three. Forty feet or over and not more than sixty-five feet in length.

RULE 42. That every motor boat in all weathers from sunset to sunrise shall carry the following lights, and during such time no other lights which may be mistaken for those prescribed shall be exhibited.

(a) Every motor boat of class one shall carry the following lights:—

First. A white light aft to show all around the horizon.

Second. A combined lantern in the fore part of the vessel and lower than the white light aft showing green to starboard and red to port, so fixed as to throw the light from right ahead to two point abaft the beam on their respective sides.

(b) Every motor boat of classes two and three shall carry the following lights:—

First. A bright white light in the fore part of the vessel as near the stem as practicable, so constructed as to show an unbroken light over an arc of the horizon of twenty points of the compass, so fixed as to throw the light ten points on each side of the vessel, namely, from right ahead to two points abaft the beam on either side. The glass or lens shall be of not less than the following dimensions:—

Class two. Nineteen square inches.

Class three. Thirty-one square inches.

Second. A white light aft to show all around the horizon.

Third. On the starboard side a green light so constructed as to show an unbroken light over an arc of the horizon of ten points of the compass, so fixed as to throw the light from right ahead to two points abaft the beam on the starboard side. On the port side a red light so constructed as to show an unbroken light over an arc of the horizon of ten points of the compass so fixed as to throw the light from right ahead to two points abaft the beam on the port side. The glasses or lenses in the said side-lights shall be of not less than the following dimensions on motor boats of—

## SESSIONAL PAPER No. 22

Pendant la nuit:—

1. Un coup de canon ou autre signal par explosion, tiré à des intervalles d'environ une minute;
2. Des flammes sur le navire, telles que produites par la combustion d'un baril à goudron ou à huile, etc.;
3. Des fusées ou bombes tirées une à la fois à de courts intervalles, et projetant en l'air des étoiles de couleur ou d'aspect varié;
4. Un son continu produit par un appareil de signal de brume.

### Dispositions concernant les bateaux à moteur.

#### NOTIONS PRÉLIMINAIRES.

Dans les articles suivants du présent règlement l'expression "bateaux à moteur" comprend tout bateau pour la progression duquel on emploie des machines, et qui n'a pas plus de soixante-cinq pieds de longueur. Mais on fait exception pour les remorqueurs dont la vapeur assure la progression. La longueur du bateau doit être mesurée de l'une à l'autre des extrémités sur le pont, dont on ne tiendra pas compte de la tonture.

ARTICLE 41. Les bateaux à moteur que visent les dispositions de ce règlement appartiennent aux catégories suivantes:—

Première catégorie: bateaux de moins de 26 pieds de longueur.

Deuxième catégorie: bateaux de 26 pieds ou plus de longueur et de moins de 40 pieds de longueur.

Troisième catégorie: bateaux de 40 pieds ou plus de longueur mais dont la longueur ne dépasse pas 65 pieds.

ARTICLE 42. Tout bateau à moteur doit par tous les temps depuis le coucher du soleil jusqu'au moment où il se lève, montrer les feux suivants à l'exclusion de tous autres feux pouvant être confondus avec ceux que le règlement prescrit de montrer.

(a) Tout bateau à moteur de la première catégorie doit porter les feux suivants:—

Premièrement: un feu blanc à l'arrière disposé de manière à projeter tout autour de l'horizon une lumière claire.

Deuxièmement: un fanal à combinaison que l'on doit placer à l'avant du bateau, plus bas que le feu blanc de l'arrière et pouvant montrer un feu vert sur tribord et un feu rouge sur bâbord, établi de manière à projeter une lumière ininterrompue verte à tribord depuis l'avant jusqu'à deux quarts sur l'arrière du travers à tribord, et un feu rouge sur bâbord établi de manière à projeter une lumière ininterrompue rouge à bâbord depuis l'avant jusqu'à deux quarts sur l'arrière du travers à bâbord.

(b) Tout bateau à moteur de la deuxième catégorie et de la troisième catégorie, doit porter les feux suivants:—

Premièrement: Un feu blanc brillant à l'avant du bateau et aussi près de l'étrave que possible, disposé de manière à montrer une lumière ininterrompue sur tout le parcours d'un arc de l'horizon de vingt quarts ou rumbes de compas, soit dix quarts de chaque côté du bateau, c'est-à-dire depuis l'avant jusqu'à deux quarts sur l'arrière du travers de chaque bord. Le verre ou la lentille du fanal de ce feu ne doit pas avoir des dimensions inférieures aux suivantes:—

Pour la deuxième catégorie: Dix-neuf pouces carrés.

Pour la troisième catégorie: Trente et un pouces carrés.

Deuxièmement: Un feu blanc à l'arrière disposé de manière à projeter tout autour de l'horizon une lumière claire.

Troisièmement: A tribord, un feu vert établi de manière à projeter une lumière ininterrompue sur tout le parcours d'un arc de l'horizon de dix quarts ou rumbes du compas c'est-à-dire depuis l'avant jusqu'à deux quarts sur l'arrière du travers à tribord. A bâbord un feu rouge établi de manière à projeter une lumière ininterrompue sur

Class two. Sixteen square inches.

Class three. Twenty-five square inches.

On and after March first, nineteen hundred and seventeen, all glasses or lenses prescribed by paragraph (b) of Rule 42 shall be fresnel or fluted. The said lights shall be fitted with inboard screens of sufficient height and so set as to prevent these lights from being seen across the bow and shall be of not less than the following dimensions on motor boats of—

Class two. Eighteen inches long.

Class three. Twenty-four inches long: *Provided*, That motor boats as defined in these Rules, when propelled by sail and machinery or under sail alone, shall carry the coloured lights suitably screened but not the white lights prescribed by this Rule.

RULE 43. (a) Every motor boat under the provisions of these Rules shall be provided with a whistle or other sound-producing mechanical appliance capable of producing a blast of two seconds or more in duration, and in the case of such boats so provided a blast of at least two seconds shall be deemed a prolonged blast within the meaning of these Rules.

(b) Every motor boat of class two or three shall carry an efficient fog-horn.

(c) Every motor boat of class two or three shall be provided with an efficient bell, which shall be not less than eight inches across the mouth, on board of vessels of class three.

Rule 44 repealed by Order in Council of the 29th June, 1916.

RULE 45. The foregoing Rules shall be in full force and effect on and after the first day of March, nineteen hundred and sixteen, and shall supersede all Rules of the Road for the Great Lakes, etc., previously adopted.

## SESSIONAL PAPER No. 22

tout le parcours d'un arc de l'horizon de dix quarts ou rumb du compas, c'est-à-dire depuis l'avant jusqu'à deux quarts sur l'arrière du travers à bâbord. Les verres ou lentilles des fanaux de ces feux de côté ne doivent pas avoir des dimensions inférieures aux suivantes sur les bateaux à moteur:—

Deuxième catégorie: Seize pouces carrés.

Troisième catégorie: Vingt-cinq pouces carrés.

Le et après le 1er mars mil neuf cent dix-sept, tous les verres ou lentilles exigés par le paragraphe (b) de l'article 42 devront être du type fresnel ou à cannelures. Les feux susdits doivent être établis sur des boîtes ouvertes ou écrans de hauteur suffisante, et disposés de façon que les feux ne puissent être vus du bossoir opposé. Ils ne doivent pas avoir de dimensions inférieures aux suivantes, savoir, sur les bateaux à moteurs de:—

Deuxième catégorie: Dix-huit pouces de longueur.

Troisième catégorie: Vingt-quatre pouces de longueur. Il est *pourvu* que les bateaux à moteur, tels que définis dans ce règlement, doivent porter des feux de couleurs convenables, avec écrans, mais non les feux blancs prescrits dans cet article, lorsque ces bateaux emploient pour leur progression des voiles et des machines ou seulement des voiles.

ARTICLE 43. (a) D'après les dispositions de ce règlement, chaque bateau à moteur doit être pourvu d'un sifflet ou autre dispositif mécanique pouvant donner des sons de signaux, et à même de donner un son de deux secondes ou plus de durée. Dans le cas des bateaux ainsi pourvus, un son d'au moins deux secondes de durée sera considéré comme un son long, en tant que peuvent le signifier les dispositions de ce règlement.

(b) Tout bateau à moteur de la deuxième catégorie ou de la troisième catégorie, doit porter un cornet à bouquin ne laissant rien à désirer.

(c) Tout bateau à moteur de la deuxième catégorie et de la troisième catégorie, doit être pourvu d'une bonne cloche: qui ne doit pas avoir moins de huit pouces de diamètre à sa partie la plus évasée, lorsque cette cloche se trouve à bord de bateaux appartenant à la troisième catégorie.

ARTICLE 44. Rescindé par un ordre en Conseil du 29 juin 1916. \*

ARTICLE 45. Le présent règlement aura force et effet à partir du 1er mars mil neuf cent seize inclusivement, et il remplacera tout règlement existant antérieurement, pour prévenir les abordages sur les Grands lacs, etc.
